will materialize.

It was wonderful to just speak to you on the phone the day Dr. Engel called. I don't know how you feel about sending him a letter about us not having cardiac arrests. When he asked me about it I hardly knew what to tell him. If you care to do it I would appreciate it, but if not there naturally will be no hard feelings on my part. There have been so many of them around here in cases that had no business having them and all done by anesthesiologists that naturally the men are more conscious of it than probably some other places.

Grable tells me that you are taking in the races. More power to you! I was very sorry you felt so bad the last day I was in Lexington as I had looked forward to another little visit.

Our weather here continues hot and dry. There is no other news.

My very best wishes and hearty Congratulations to you.

Sincerely
Ida Heigel.
