

My Dear Thomas

I received today your letter of the 4th. I am perfectly satisfied with the Sale of our Hamps made by you and Mr. Headley, and I think it better be delivered as fast as gotten out.

I sent yesterday the imported Jack Delaware to Kentucky where he ought to arrive about the 25th inst. If Don Manuel is sold May^r Smith is to keep Delaware, who I understand is in fine condition. I have written to him; and if the Don is not sold, May^r Smith is to take him and keep him; and Delaware will in that case remain at Arkland; but if you can get \$15.00 for him he may be sold.

About the time this letter reaches you, I expect six Mallon Sacks (three Jacks and three Jeannette) will arrive at Arkland from N. Orleans, the property of R. D. Shepherd Esq., consigned to me; and I now give directions about them.

One of the three Jacks is four years old this Spring, and I am informed, he is 4 feet 11 inches high. Another is three years old, four feet nine inches high, and the youngest is two years old four feet ~~nine~~^{eight} inches high. I fear there is some inaccuracy in the measurement. And immediately on their arrival I wish you, May^r Smith and Mr. Headley accurately to measure them, and also the Jeannette, and send me their heights and your opinion of them.

I wish the best of the three Jacks reserved for me, and the other two sold, provided you can get \$2000 a piece for them, or as much more as you can. The three Jeannette I wish put to the best of the Jacks as they come in season. They may run and be fed with my Jeannette, and as they have been so long at sea will be desirable for them to run on a Rye pasture, as soon as ~~they~~ is in a condition to be grazed.

As to the Jacks, I think it would be best to keep them at Arkland, if it can be done with convenience, until they are otherwise
