U.K. BOARD OF TRUSTEES MAKES 21-23 BIENNIUM REPORT TO LEGISLATURE

Constant Increase in Enrollm Shows Need For More Equipment

\$40,000 NEEDED ANNUALLY

Three Unfinished Building Projects in Need of Money For Completion

Completion

The report of the Board of Trustees of the University of Kentucky for the biennium 1921-23, to the Governor and the Legislature of Kentucky has just come from the press.

The most outstanding facts set out by this report are as follows:

In 1910 there were 247 college students attending the University. In October, 1923, there were 1,795 such students at the University, or an increase of 330 per cent. Since 1910 the only buildings that have been addeed to the plant of the University available for laboratory and recitation purposes have the remodeled White and Neville Halls. In other words the plant of the University for teaching purposes has not been increased by new buildings in thirteen years though the student body has grown three and a half times. The time has come when additional buildings are required for instructional purposes for the University must close its doors to all but 1,611 students.

The constantly increasing student enrollment in the University means

books and laboratory supplies must be provided or the instruction de-crease in its efficiency. At least six-

U. K. SENATE APPROVES EARLY COMMENCEMENT

With class day the afternoon of May 31st, the activities prior to commencement night, will begin and continue for three days. Final examinations, which begin as per schedule, on May 30th will discontinue from Saturday noon until Tuesday morning, June 3rd. This will give the students and alumni an opportunity to attend the exercises during the week-end.

The nine week session of summer

during the week-end.

The nine week session of summer school will begin June 16th and the boys and girls Agriculture Society will hold a meeting the preceding week at the University. As this is to be quite a large convention, the dormitories will be given over to them for the week.

The members of the Hairman

Stroller tryouts will not be held

Stroller tryouts will not be held during examinations but will begin in real earnest on February 5, the final cast being selected within a week after that date.

In order that "Seventeen" may not only kepe the high Stroller standard but may even excel all past performances the best talent of the University must be available. Almost every year a new "star" has been discovered, hence anyone who has proven himself eligible to Stroller membership has a chance for one of the leading parts.

ship has a chance to one of the parts.

All Stroller eligibles are urged to watch the bulletin board on and after February 5 when the opportunity is given to try out for a part in the play. To try and fail is no disgrace—persistent effort must win sometime—while to be selected for the cast is one of the greatest honors that can be bestowed upon a University student.

STUDENT DELEGATION AT FRANKFORT MONDAY

Join With Supporters of The Seventy-five Million Bond Issue

Approximately 150 delegates from the University of Kentucky, including President Frank L. McVey, Dean Paul P. Boyd, and other members of The constantly increasing student the faculty, students, and the rembers of the faculty, students, and the cadet enrollment in the University means that additional instructors, material, aid in the fight for the \$75,000,000 books and laboratory supplies must be provided or the instruction determined to the cadet which was inaugurated at the joint session of the Legislature.

the joint session of the Legislature.
At 2 o'clock, a parade headed by the band formed at the New Capitol Hottel and proceeded to the Capitol. Participants included students, various municipal and commercial organizations, and interested citizens from every section of the state, all bearing badges, banners, and standards with slogans boosting the "Greater Kentucky" movement.

Exercises to Be Held Before
Students Return to Their
Homes

At a meeting of the University Senate the recommendation of changing the date of commencement was approved by members of that organization and June 2nd was named as the date for the graduation exercises at the University.

With class day the afternoon of May 31st, the activities prior to commencement inight, will begin and continue for three days. Final examinations, which begin as per schedule, on May 30th will discontinue from Saturday noon until Tuesday morning, June 31d, deep the source of the University, and in the conclusion of his speech he urged that the issue not be made a political once.

TRIANGLE FRATERNITY HAS BOUGHT OLD RHODES HOME

school will begin June 16th and the boys and girls Agriculture Society will hold a meeting the preceding week at the University. As this is to be quite a large convention, the dormitories will be given over to them for the week.

The University of Kentucky chapter of Triangle, social engineering frametories will be given over to them for the week.

The members of the University of Kentucky chapter of Triangle, social engineering frametority, has purchased the old Rhodes home in Rhodes Addition, at a price of approximately \$30,000. Triangle is one of the few fraternities on the University of Kentucky cannot be understood to the commencement at the first of June in order to meet some problems of great importance and for the convenience of the students.

STROLLER TRY-OUTS TO BE RESUMED ON FEBRUARY 5 SCHOOL OF JOURNALISM All Eligibles Urged to Watch The MAY PUT IN A PRINTING PLANT AS MEMORIAL

Tyler Munford Suggests Idea At Meeting of Kentucky Press Association

WATTERSON IS HONORED

Plant, Memorial to Kentucky Writer, To Be Practical Advantage

Indorsement of the establishment of a printing plant in the Henry Wattershield in a motion adopted last Friday at the mid-winter meeting of the Kentucky. The idea of establishing such a plant was suggested to the association by Tyler Munford, a student in the department of Journalism and former editor of the Hart County News, who discussed the value of a practical knowledge of the physical make-up of a newspaper, and the Urgent need of a printing plant in the Henry Watterson School of Journalism and former editor of the Hart County News, who discussed the value of a practical knowledge of the physical make-up of a newspaper, and the Urgent need of a printing plant in the Henry Watterson School of Journalism.

Mr. Munford's address was followed by a round table discussion by members of the association which resulted in the apointment of a special committee by President L. S. Fitzhugh. The members of this committee ten Johnson, editor of the Anderson News, and D. M. Hutton editor of the Hart Conny Democrat. Mr. Fitzhugh will be ex-officio member.

It was first suggested that the committee be given power to act, but ownittee be given power to act, but ownittee the given power to act, but one of the committee and officers of the committee and officers of the committee and officers of the c

It was first suggested that the com mittee be given power to act, but ow-ing to the amount of money involved it was decided to have the committee report by letter when it had reached a decision. The committee will meet in Lexington at an early date.

FROF. HOOPER HONORED

Prof. J. J. Hooper has been invited to judge the dairy cattle at Southwest-ern Live Stock Exposition, Ft. Worth, Texas, March 8 and 9.

In response to my request, the arious class presidents desigvarious class presidents designated students to repesent the University of Kentucky at the Bond Issue meeting before the General Assembly Monday. I wish to take this opportunity to express my appreciation of the response and the general wish to serve the University.

It did not seem desirable to close the sessions if the University for the day and consequentiative for the day and consequentiations.

close the sessions if the University for the day and consequently a committee of one hundred and twenty-five was asked to represent the University. I am glad to express the thanks of the University for the service rendered.

Please convey this message to the students of the University through the Kernel.

FRANK L. McVEY.

MILITARY DEPARTMENT TO GIVE ANNUAL BALL FEB. 21

Scabbard and Blade May Hold Pledg-

A meeting of the Military ball com-mittee was held last Friday to ar-range the annual Military Ball to be held February 21. It is planned to hold the dance this year in the new basketball building if the latter is ready for use at that time, otherwise one of the hotels will be selected.

The Military Ball has always been one of the most enjoyable social events of the year and it is the desire of the committee and officers of the Military Department that the ball sur-pass all former ones.

The course will be open to all sophomores and juniors in the Arts and Science College only, and is limited to

one hundred students who will be selected by nominations.

The heads of departments in the Arts and Science College are to nominate ten students each from which number the one hundred will be chosen for the course.

number the one hundred will be chosen for the course.

There will be ten sections of ten students each, who will meet the fifth hour on Tuesday once each week when topics of interest will be discussed. The course will not be in the form of recitation in that the professor in charge will only state the topic and keep the discussion on that subject.

Dr. Dantzler in speaking of the course said, "The course is designed to meet a distinct want, because students as well as older persons do so lack the ability to exchange views, paying due regard to etiquette in conversation and discussion."

The following professors have been

versation and discussion."

The following professors have been chosen to have charge of the course:
Dean P. P. Boyd, Dr. J. B. Miner, Dr. W. D. Funkhouser, Prof. E. F. Farquhar, Miss Marguerité McLaughin, Dr. Edward Weist, Dr. Edward Tuthill, Dr. Glanville Terrell, Prof. Carol Saw Prof. Great C. Knight and Dr. Saw Prof. Great C. Knight and Dr. hill, Dr. Glanville Terreii, Prof. Carol Sax, Prof. Grant C. Knight and Dr. L. L. Dantzler.

AGRICULTURAL NOTES

All faculty members and students are invited to the Agricultural Society "candy pull" in Room 101 of the Agricultural Building, Monday, January 21, at 7:45 p.m. A small fee of 20c will be charged to help defray expenses. At 7:30 p. m. the Society holds its last meeting of the semester and will elect officers for the coming

CATS DISPLAY IMPROVED FORM AGAINST SEWANEE TIGERS AND WIN 50-15

Purple Quintet is No Match For Faster Wildcat Five

"RIEF" SCORES 18 POINTS

George Buchheit Sends Entire Reserve Strength Into The Game

With their passing and goal shooting much better than in the Aggie game, the Wildcats swamped Sewanee's Tiger five under an avalanche of baskets and defeated the Purple quintet 50-15 Tuesday night in the local gym. The Cats led after the first five minutes of play and were on the heavy end of a 25-8 count when the first period ended.

Carl Riefkin, forward, and Rahh Boren, guard, put up the best games for the Blue and White. Riefkin with 18 points to his credit, 16 of which were made in the first half, led the Cat scoring. Boren, sent in to replace Foster Helm, was impregnable on the defense and with Captain "Chuck" Rice, allowed the Tigers but few easy shots at the basket.

With the Cats on top by a safe mar-

With the Cats on top by a safe mar-gin, and the contest well under way, George Buchheit sent his entire reserve strength into the game. Twelve Cats George Buchheit sent nis enure reserves strength into the game. Twelve Cats saw service in the contest and all 12 performed brilliantly. "Chuck" Al-berts, running guard, played best of the seven scrubs who got into the

CLUBS FAVOR BOND ISSUE

Flock of Telegrams Received in Answer to Report of Secretary

Last Wednesday evening, January, the alumni secretary sent the fol-owing telegram to 32 secretaries of lumni clubs and individual alumni alumni clubs and individual alumni nall parts of Kentucky and in several other states: "Seventy-five million dollar bond issue for University, Normal schools, charitable and penal institutions and roads comes before the legislature January 14. Civic clubs backing same. Have alumni club pass resolution approving same. Give to press. Send wires to senators and reresentatives in Frankfort. Mail copies to me."

Starting two days later a long list

Starting two days later a long list of telegrams and letters have been pouring into the alumni office in anpouring into the alumni office in an-swer to this request of the secretary. The number is so large that it would be impossible to quote what each said but some of the typical sentences they contained follow.

W. T. Woodson, secretary of the Chicago Club sent telegrams to Sen-ator White L. Moss, of Pineville and Chicago Club sent telegrams to Sen-ator Whike L. Moss, of Pineville and G. L. Druy, representative of Union county, in which he said, "University of Kentucky Alumni in Chicago repre-senting every section of the state strongly urge passage of bill provid-ing \$75,000,000 for roads and schools. Don't fail us this time and the Uni-versity will lead the South." A copy of the telegram was mailed to the of-fice.

G. C. Routt, writing for the May-field Club said, "Goodness knows we need this sort of assistance or aid to put across for the betterment of the whole state and even more so in the Purchase region. We will never make the strides along these lines until ade-quate means are provided to make such possible

quate means are provided to make such possible."

"The Detroit Club is deeply interested in the \$75,000,000 bond issue, which comes before the legislature on January 14, because it will provide relief for a long existing need in the state of Kentucky," wrote the Detroit Club through H. J. Beam, secretary.

A number of last year's graduates and others wired from Buffalo, N. Y., to express their hope that the bond issue would meet the approval of the legislature, "The undersigned citizens and taxpayers of Kentucky now residing in Buffalo and representing unanimous opinion of alumni club here urge your active support of all house and senate bills tending to increase revenues and appropriations of University," signed Phil Bhumenthal, Flavius Jones, Charlie Graham, Bertrand Stater, Ridgley McDaniel and Clifford "Red" Davidson. Other alumni in Buffalo sent personal telegrams to their representatives and senators.

The McCracken County Club wired, McCracken Club urges support of the

The McCracken County Club wired, "McCracken Club urges support of the bond issue," signed by E. T. Proctor,

were enthusiastic about and heartily endorse your educational program for the state," wired Reuben T. Taylor, president of the club.

R. M. Holland, of the Owensboro Club wrote the alumni office a letter in which he said: "This alumni club will do all it can to push the movement and

our two representatives favor the bond issue, if they think it is properly safeguarded. We should make public the idea that because this is a large sum, the money will be all the more conscientiously expended."

WANT PEOPLE TO DECIDE

Lexington Club Elects Officers At First Meeting of Year

The Lexington Club at its meeting. Saturday, January 12, went on record as being in favor of the legislature submitting the \$75,000,000 bond issue to the people. Atthough no formal resolutions were passed, the club declared its intention of communicating to State Senator Ach L. Hamilton and Representatives Harry B. Miller and Sam H. Cole its attitude on the bond issue.

The election of officers for 1924 was held. Duncan Hamilton, president of the club was re-elected. The other officers follow: Marguerite McLaughlin, vice-president; Nancy Innes, secre-The Lexington Club at its meet-

officers follow: Marguerite McLaugh-lin, vice-president: Nancy Innes, secre-tary; Dr. John Chambers, treasurer. A number of the members or the club went to Frankfort Monday to appear before the legislature in behalf of the bond issue.

ALUMNUS NO 1 CONTRIBUTES

A few days ago a check for \$250 was received from W. B. Munson, class of '69; who has the distinction of being Alumnus Number One of the University of Kentucky. The check was mailed to James H. Gardner at Turlsa, Olda, who has been very active for the Greater Kentucky campaign in that state. Professor Webb received the check during the holidays, as it was mailed to the chairman of the campaign committee.

The University feels grateful indeed that its oldest child still has a warm spot in his heart for the institution he left 55 years ago. What a splendid thing it would be if, beginning with the first, all the alumni down to the last who received a diploma last June would contribute what he is able to the Greater Kentucky fund.

Mr. Munson, in addition to being the first graduate, is one of the most successful alumni of the University. He has been connected with a large number of big business enterprises

He has been connected with a large number of big business enterprises in the west. At the present time he is president and manager of the Munson Realty Company, at Denison, Texas.

ANOTHER LIFE MEMBER

The alumni office was much surprised and pleased last week to receive a check for \$25 from Elizabeth Bedinger, class of '13, for a life membership in the Alumni Association.

The check came unsolicited, but not unwelcomed. There are now about 43 life members of the association and

43 lite members of the association and addition to the little group of permanent members, coming from a clear sky, is encouraging.

Miss Bedinger is now diving jat Bekersfield, California, where she is teaching in the high school.

Betwixt Us

"Find enclosed check for alumni dues. I wish with all my heart that I could do something big and worth while for the University, but you have doubtless observed that those who spend their lives in the cause of religion have but little money."—Wm. J. Vaughan, ex., field worker, Kentucky Sunday School Association, Louisa, Ky.

ington, Ky. Mrs. Elliott was Miss Katherine H. Crockett, and they have one daughter, Miss Katherine C. El-liott. The family resides on the Ver-sailles pike; mailing address, Route 2.

'03

Recently welcomed on the list of active members is Lloyd Logan Hamilton. Mr. Hamilton has been a mem ilton. Mr. Hamilton has been a mem-ber of the firm of Roberts-Hamilton Heating Company, heating and venti-lating engineers, for many years and now holds the office of vice-president and general manager. The firm is located at 715 South Third Street, Minneapolis, Minn.

Presley T. Atkins, ex., leading news-paper man in southeastern Kentucky, has extended his field of endeavor into Virginia. He has recently bought and is editor and publisher of the Daily Progress, Norton, Va. He has not severed his connection with the Sun Publishing Company, of Pine-ville, of which he is still business man-ager. Herndon Evans, '21, has suc-ceeded him as editor of the Pineville e ceeded him as editor of the Pineville
Sun, however. Pres is known as one
of the "livest" newspaper men in the
f Skate. He is interested in progress
and active in many lines of endeavor;
is a World War veteran and at present holds the rank of Major in the
Kentucky Reserve Officers' Corps;
was a leader in organizing Bell county alumni to back the University and
Alumni Association in all undertakings and invariably has succeeded. He
is a member of the Executive Committee of the Alumni Association and
only the fact that he hasn't a degree
prevented his being one of the names prevented his being one of the names certified to the Governor for the next alumni trustee. Virginia is to be con-gratulated on having added him to the ranks of her newspaper men and cit-izens and his many friends are wish-ing him well in the new undertaking.

Graham H. McCorkle has recently been transferred to the New York of-fice of the Western Electric Company fice of the Western Electric Company with the position of assistant general engineer offices at 195 Broadway. Mr. McCorkle has been in Chicago ever since graduating ,located with the Western Electric Company and Illinois Bell Telephone Company, of which he was general traffic supervisor. Mrs. McCorkle, who was Miss Fanny McFarland, of Lexington, and their daughter, Jean, have been visiting relatives in Lxington and left last week to join Mr. McCorkle in New York.

'09
A notice received in the alumni office last wee kannounced the partner-ship of Smith, Johnson and Moore Transportation Building, Washington, D. C., for the general practice of law. D. C., for the general practice of law, specializing in cases arising under the revenue acts and other federal statutes. Virgil Y. Moore is known as one of the most successful members of the Kentucky Bar and has been conducting an extensive law practice at Madisonville, Ky. As a loyal son of "Kentucky" he has always been active in her behalf, and while Kentucky friends regret giving him up they are wishing him well in his new location.

10

Wm. H. "Billy" McAdams is associate professor of chemistry, Mass. Institute of Technology. Billy received his B. S. in 1913 and M. S. in 1914. In September, 1914, he became a Fellow in chemistry at Tech. When this country entered the world war he was chemical engineer with the Goodyear Tire and Rubber Company, Akron, Ohio, and had charge of the testing of balloon cloth and gas masks. Finding that about one-third of the masks leaked he devised a new type exhaling valve which was adopted and used on all gas masks from that time. Previous to the perfecting of this valve a gas mask could hardly be worn more than two hours; with the new valve it could be worn in safety for forty-eight hours. Shortly after this he offered his services to the government and was appointed a first lieutenant and ordered to Washington. He first served under Colonel Walker in the early preparation for manufacturing poison gases. He was

then given a captain's commission and sent to Cleveland, Ohio, where he was chief executive under Col. F. M. Dorsey and had the active management of three poison gas plants. A chart of his work shows there were twelve-sections of this work and each ment of three poison gas plants. A chart of his work shows there were twelve-sections of this work and each section comprised several departments. His Alma Mater and friends have reason to be proud of the very signal service he rendered during the World War and many veterans of the war must also be intensely grateful. Mr. McAdams' mailing address is 7 1-2 Center street, Cambridge, Mass.

14

Basil Duke Sartin, who keeps his mame consistently on the honor roll of the Alumni office was elected judge in his county last fall. Except for the was in the service of his country, he has been practicing law in Texas, since 1916. After his return to civilian life he resumed the practice of law in Wichitz Falls. Texas and now main.

Webb Lail, Jr., has returned to Lexington and with his brother, has purchased the paint shop of A. Traliot, 340 East Main Street, and they will continue the business under the firm name of Lail Brothers. Mrs. Lail was Miss Margaret Nicol, of Lexington, and friends and relatives are glad to have them return to Lexington. The most important member of the family, however, is James Donald Lail, nineteen months old, a future wearer of the Blue and White.

Jane Dickey is secretary of Girls Work Division, Y. W. C. A., at 206 West Broadway, Louisville, Ky. She deserves mention as one of those who keep their names on the honor roll.

A request from James E. McClellan to change the mailing address of his Kernel brings the information that he nernet brings the information that he is no longer with the Tiltz Engineering Company, of Los Angeles, Calif, but is now an employee of the American Blower Co., 140 South Dearborn Street, Chicago, Ill.

Cecil N. Batsel, who for quite a while eluded the alumni office "detectives" has been located in Paducah, Ky., where he is distributor for Lee Tire Sales Company, Jefferson street, near Sixth.

"Herein hand you check for dues and subscription to the Kentucky Kernel, and thank you for your kindness in 'keeping the home fires burning' by sending me each week the grand old sheet that has so efficiently kept me posted as to the activities of the Wildcats through this season as well as to the activities of the institution in general."—C. P. Mabry, attorney, Hickman, Ky.

A note from Jesse W. Tapp asks that his and Mrs. Tapp's mailing address be changed to Washington, D. C. He is connected with the U. S. Department of Agriculture and should be addressed care of Office of Farm Management. Bureau of Agricultural Economics.

Miss Helen Taylor is teaching Home

high school.

Mary E. Lyons is studying dramatic art at the American Academy of Artt, New York City. Her address is 106 Central Park West, Apart. 5-A. "Enclosed find check for dues and Kernel. This is not the result of a New Year's resolution—just the realization of what I have been missing."

HYGIENE DEPARTMENT ISSUES INVITATION

dents Are Urged to Take Advantage of Health Ser-

The Department of Hygiene wishes to express gratification regarding the number of students undergoing operations or treatments for physical defects and constitutional disabilities of many types. This has of course added, perhaps materially, to excuses for heartening wet it means much to many types. This has of course added, perhaps materially, to excuses for absententeesim, yet it means much to the individual students and the University acting in the capacity as mother to your education and chances of success. It costs several hundred dollars annually to do this, yet justification lies in assisting to point the way to longevity, happiness and efficiency. Be it remembered that if a student says, "Nobody can take my tonsils out even if they are rotten," It is only he who has to live with them; only he who has to live with them; only he who takes chances on results. Another item where refraction of eyes is recommended, please attend to it. This means so much that the suggestion should never be ignored.

Several students have asked if their physical examination reports will be shown to them. The resident physician wishes to state that it will be a pleasure to advise any student of findings in his or her report and consult with him or her on the basis of what appears either on the student's statement (blue card) or examining physician's opinion (white card.)

Reports have now been mailed to parents. An invitation is extended to them to write the resident physician in case the report causes worry. Students and parents are also urged to consult their respective family physicians regarding report findings.

ENGINEERING NOTES

The William Reed Engineering Company, of New York, has recently shipped to the University of Kentucky on loan an air filter equipment to be used for the estudy of dust removal from air. The equipment which was used at the power show in New York City is to be used by two of the senior engineers as a thesis problem.

The dates for the annual inspection trips for junior and senior engineers have just been announced.

From April 3 to 11 the entire class of sensor engineers will go to Pittsburgh, Pa., and Buffalo, N. Y.

From April 28 to May 3 the junior mechanical, electrical and civil engineers will visit Cincinati Davie.

mechanical, electrical and evil engineers will visit Cincinnati, Dayton, and Hamilton, Ohio, while on the same dates the junior mining engineers will go to Knoxville and Birmingham, Ala.

UNIVERSITY OF KENTUCKY RIFLE TEAM SCHEDULE

U. of K. vs. Corps Area, January 14 to February 17; also includes Hearst

uatch.
U. of K. vs. Northwestern, week ending January 26.
U. of K. vs. University of Maine,

week ending February 16.

U. of K. vs. University of Minnesota, week ending February 23.

U. of K. vs. University of Syracuse,

U. of K. vs. University of Syracuse, week ending March 8.
U. of K. vs. University of Dennison, week ending March 8.
U. of K. vs. Marion Institute, week ending March 15.
U. of K. vs. University of Delaware, week ending March 29.
U. of K. vs. V. P. I., week ending April 5.

C. of K. vs. V. P. I., week ending April 5.

The rifle team this year is far superior to any that has represented the University for the last two years. V. D. Johnson, M. A. Trusty, captain, and J. A. Weingartner fom last year's team are here this year. A number of the new men are turning out daily and are rapidly showing their expert marksmanship.

Two matches have already been fired this year. The first, against the University Faculty Team resulted in a victory for the Cadets. The second was against the crack 64th cavalry team.

Much interest is being taken in the Corps Area match that is now in pro-

Centre opened her basketball season Saturday night with a 32-17 victory over the Wesleyan varsity on the Danville floor. Summers, Green and Covington scored most of the Colo-nel markes.

Will all Freshmen report the progress of their basketball building drive during the holidays to the office of the Alumni Secretary in the basement of the main building as soon as possible.

Seniors must have photographs and information cards in this week.

REPORTERS:

NEW COACHING SYSTEM

There are rumors and speculation There are rumors and speculations on the campus and in sport circles as to who the next University football coach will be and what policy the athletic council will adopt in its next coaching staff. The student body as a whole is waiting anxiously for the announcement concerning this, and as its natural there are references as announcement concerning ins, and as is natural there are preferences and any number of solutions that can be gotten from the students as a whole. There is, however, a common idea that will be the center of almost every solution that will be offered. There is a common hope and wish that the next system will not be in the form of

an experiment.

What the University of Kentucky needs is a coaching staff and a head coach of national reputation. The first will seem quite an undertaking at this time, but in the humble opinion of the every research coaching the coaching he every present coaching prob-that has confronted the University for a great many years. How-ever, the financial difficulty that will have to be overcome will automatically take care of itself after the first of the year. Good coaches will draw good players; good players will make a winning football team and a winning football team will bring in gate re-ceipts that will easily pay the added expense of a higher paid coaching

staff.

We do not need to stress the value of a resident coaching system. We have on the campus the best argument for this that could possibly be found anywhere. Our basketball and track coach has been on the campus for a number of years. He has turned out a champing the man winning teams. number of years. He has turned out a championship and winning teams. He has been directly responsible for the popularity of basketball in the University of Kentucky. He has built up a machine that will this year prove one of the formidable contenders for the southern championship. All this was not done in one or two years. It took time. If ever there is a winning football team wearing the blue and wate it must be built up in this same way.

Our most cherished hope is that the

After two thousand years have passed, we doubting Thomases are still quarreling and wrangling among our-vauleville wise-crâcker would attribute this to walking home.

The walking home.

When we Breathes there a guy with so much incomparable power by virtue of divine or human agencies. When we determine what is divine and what is human perhaps we can comprehend with our finite minds that Jesus of Nazareth, whether he was born of the Virgin Mary or begotten of Joseph, was truly the Son of God.

The Fundamentalists follow faith without truth, and they claim that the Modernists follow truth without faith. There have been men, scattered and few, who were so materialistic as to see only the creation without the spirit of the creator. There have been seient-

of the creator. There have been scient-ists who have gone so far as to seek the truth for truth's sake whether the seeking led to the greatest heights or to the lowest depths. Yet there are no finer, truer men in all the realm of religion than those who follow truth allied with faith where science will not allied with faith where science will not preach. Truth knows the physical explanation of sunsets, but with faith it feels the glory and miracle of the divine behind the glowing colors. Truth knows the paths of all the stars and planets, but with faith it senses the unity of God throughout the whole Truth knows that the body is made of dust but with faith it is assured that the soul lives on.

Argument is useless. People grow

The line-up and summary:

Argument is useless. People grow more stubborn in defending their be-liefs. We are as children playing in the sands of the sea when we attempt to say how man was created or when we attempt to explain the mystery of the Son of God.

the Son of God.

This contest between the Fundamentalists and the Modernists will not settle the issue. These are minor questions after all. The MYTH holds the greatest reverence for the beliefs of every sincere person, but it laments the fact that the two camps do not come together upon their similar views instead of separating over their dismilar points. There will be conflicting beliefs as long as there are two people upon the face of the earth. The only practical religion that will serve the whole world is that one built upon the principles of Christ which teach the Fatherhood of God and the Brotherhood of man. When men leave behind their various creeds and dogmas erhood of man. When men dogmas hind their various creeds and dogmas and follow the Man Jesus, they will come to know that He was, and forev er is, divine.

OUR OWN PLANT

It has been the hope of the Kernel for the past two years that eventually a printing plant would be established in the department of journalism where this paper could be published each week by the students in the department. The endorsement of the establishment of such a plant by the Kentucky Press Association has created new interest among members of the department. It will give the Henry Waterson School of Journalism a chance to expand and to offer a geater curriculum of study to those students who expect to enter the profession of journalism. The school at present is efficient, but the lack of a printing plant has caused the department to be unable to give the student instruction in the practical make-up of a newspaper. It has been the hope of the Kernel

LAGNAPPE

Our most cherished hope is that the Athletic Council will realize this and let it guide them in their selection of the next coaching staff and system for our football team.

MODERNISM VS. FUNDAMENTALISM**

University students.

There are three building projects under way at the University which are in a more or less pocess of completion. The first of these is the Memorial Building to be erected in honor of the Kentucky men who died in the great war. The original purpose was to to raise \$300,000. Of this sum \$74,000 has been collected and invested in United States bonds. An additional amount in the form of subscriptions will be paid upon demand. The uncertainty regarding the sum available

for building purposes has delayed the planning of this building.

The second project is the erection of a main building and wing to Kustle Hall, one of the buildings used for chemistry instruction. At le \$175,000 should be appropriated

supplement the amount already on-hand.

The third project is the construction of a symnasium and stadium by the alumni and friends of the University. The amount now subscribed is \$200,000. The symnasium for men is now well under way and will be completed in January. The building will cost \$92,000 when finished. The remainder of the subscription fund is to be used for a stadium.

In the spring of 1923, Mr. E. O. Robinson, of Newport, Ky., proposed to give to the University a large tract of land in Breathitt, Knox and Perry counties for the purposes of carrying on experimentsing reforesteration, agriculture, horticulture and other forms of farming. The University is given complete control of the project.

The problem of the University is given complete control of the project.

The problem of the University is almost entirely financial. Given montre the University on each way and

The problem of the University is almost entirely financial. Given money the University on really grow and function as a great State University. Certain it is that this session marks Kentucky's forward movement or retirement of the State as a dominant factor in the national life.

Designer of Electrical Apparatus

By J. M. HIPPLE, M. E., '98, Ohio State University.

There are today in our American est and enthusiasm for successful work.

There are today in our American colleges many embryo engineers who have, though inherited instincts, early training, or otherwise, a bent toward design work. This is by no means true of all engineering students, therefore it is important that each man analyze himself to determine if he has these characteristics, for the man who is go endowed will achieve his greatest success by making design work his life's vocation.

There does not seem to be so clear an understanding of the real possibilities lying before the designer of electrical apparatus as exists in some other fields. For example, a young man understanding the study of architecture clearly understands that his future clearly understands that his future clearly understands that his future tleis in his ability to design, to creating, transforming, and switchers in the study of architecture clearly understands that his future tless in his ability to design, to creat, to supervise the construction of the reality from his designs. In just the same measure the electrical apparatus designer is a creator crystallizing his ideas into designs and supervising the construction of apparatus that is to be a part of the reality of this electrical apparatus that those who have the inherent ability will not allow themselves to be deflected into other fields where they cannot command the necessary inter-

grasp of the importance of the prob-lems that face the designer—of the varied activities required of him in solving these problems.

Problem of Electrical Apparatus Design

Design
To get a viewpoint on this problem, let us consider a motor which is a typical piece of electrical apparatus. It requires only casual consideration to indicate that there are at least three important design factors:

(1) Adequate electrical performance.

(2) Adequate mechanical perform-

(2) Adequate mechanical performance.
(3) Adequate insulation.
All these requirements must be met if the motor is to be a success. This indicates at once that this design field is not limited purely to electrical designers. The mechanical engineering student with inherent design ability to capitalize his training and will grow rapidly with the solution of the multi-tude of problems that are presented.

Designer Must Visualize
Another field for specialization is in connection with insulation and processes. The quality and workmanship of the winding and insulation of a piece of electrical apparatus is of vital importance throughout the life of the apparatus. Were unrestricted space available, the problem might not be paid for in reduced performance or increased cost, or both. Furthermore, the workman, the human element in manufacture, is a larger factor in the results obtained with windings, promanufacture, is a larger factor in the results obtained with windings cesses and insulation. Exact such as may be expected from windings, prochine tool, may not be expected here, and the engineer must reckon the pos-sibilities of the slip of the workman's hand and mind. There is needed, then, designers who visualize the possibili-ties of better work in this particular field. The man with a taste for re-search in physics, and chemistry, and who is trained in the regular electriwho is trained in the regular electri-cal engineering course, is usually well fitted for success in this work. Also, the electric-chemical courses given in some colleges afford excellent training.

some colleges afford excellent training.

Designer—His Qualifications

How may a young man recognize
his talent in design? One of the most
easily recognized indications of inherent aptitude for design work is a
liking for construction. Two other
characteristics commonly noted in
successful designers are curiosity or
inquisitiveness, the design to know the inquisitiveness, the desire to know the reason why; and persistence, the desire to carry through to a finish, to overcome all obstacles. Another indicative trait is the possession of a mathematical sense, not meaning great facility in the use of involved mathematics, but a working knowledge of the practical application of mathematics. Other desirable characteristics in company with their phases of empireering inquisitiveness, the desire to know the

Other desirable characteristics in common with other phases of engineering work are common sene, imagination, and ability to observe and to analyze.

Electrical Designer—His Work
Such a man is essentially a creator. In the order named, he conceives, plans, constructs, exploits. The newly graduated engineer, potentially en-dowed though he may be is not yet a designer. He has yet to study fundamental reasons governing present de-signs, he must acquire skill in calcula-tion to be able to evaluate results and to develop his judgment, he must study manufacturing methods and limits.

Designer of the Future

Designer of the Future

Some of the men in school today will be the designers of tomorrow. After viewing the progress of recent years in design, some one may be tempted to ask if we are going to need designers tomorrow; if the larger problems have not all been solved. The answer, based on a knowledge coming from an intimate contact with design work for many years past is that there are new and greater design problems presented each year. Some of the reasons back of the design problems now facing us are the following:

(a) The growth of center of the

(a) The growth of center of the population, with the consequent need for concentration of power in the cities. This required the construction of gigantic generating units and distributing stations, with new problems in switching, control and protection of circuits.

AGGIES OF MISSISSIPPI **DEFEAT BLUE AND WHITE OUINTET BY ONE POINT**

Rally by Cats Falls Short And Maroons Win Game 17-16

"JIMMIE MAC" LEADS CATS

Visitors, With Two All-Southern Players, Work Well To-gether

Staving off a spirited last minute rally by the Kentucky Wildcats, Mississippi A. & M., champions of the South last year, squeezed out a 17-16 victory at the University gym Monday night. The Aggies led after the first ten minutes of play and were never in real danger until the closing moments of the game when long shots by Riefkin and McFarland put new life into the Cats and Kentucky threatened to capture the battle. The Aggies led at the half 12-8.

Both teams handled the ball with a

gies led at the halt 12-8.

Both teams handled the ball with a fair degree of accuracy, but neither outfit could locate the basket successfully. Both teams repeatedly missed "crip" shots, the Aggies especially failing to make numerous easy chance at the basket.

chance at the basket.

The entire Mississippi team played the brand of ball that produced a title for the Aggies at the Atlanta tourney. With four of the championship five on the floor Monday night, the Maroon played together with a snappy precision and accuracy and never seemed to lose control of the game. The Cats, although laying a great game, failed to display the passing attack and ability to hit the basket at short range that has characterized their previous games, and missed many chances to even up the count.

Makes 12 Points

Jimmie McFarland, diminutive for-

Makes 12 Points

Jimmie McFarland, diminutive forward, was the chief factor in keeping the Wildcats in the running,, and besides making 12 of the Blue and White 16 points played a steady floor game. His handling of the ball was much avove that of the other Cars and it was this department of the name of the same of th

the back board.

Perkins, second member of the Aggies to win all-southern recognition last season was best on the attack for the Maroon. Covering a great deal of territory and slipping back into his defense quickly, the Aggie forward led his team on the offense. Meyers, for-ward, led in scoring with seven points, while Sikes, at center, played good ball. last season was best on the attack for

KITTENETTES WIN FIRST START OF SEASON 18-9

Kentucky Five Hands George-town Tigerettes Decisive Defeat

The University of Kentucky girls basketball team journeyed to George-town last Friday night and easily won its initial game of the season by de-feating the Tigerettes by the score of

18 to 9.

The game was very fast and interesting. The first half ended with the Kentucky co-eds leading by the score of 10 to 3. When the second half started the Tigerettes made a strong bid to even the count but were never able to overcome the big lead of the Kittenettes.

Miss Leola Klopp, All-Kentucky forward on the Transylvania championship team last year, led the scoring for Kentucky, making eight of the 18 points. She was closely followed by Miss Kerth, who made six points. Captain Royce made four of Georgetown's nine points, and also played an town's nine points, and also played ar excellent game at running guard.

inn Not to Return — Y Round Coach to be Selecte Soon

The University of Kentucky Wild

The University of Kentucky Wildcats will have their second gridiron coach in as many years when they step on to Stoll Field for their fist practice session next fall. This fact was made known early this week by S. A. "Daddy" Boles, athletic director of the University, who stated that Jack Winn, former Princeton star, who coached the Cats of 1923, would not return as Blue and White mentor next fall.

The 1923 football season while disappointing at times, was not wholly unsuccessful. Unavoidable conditions throughout the season kept some of the Kentucky stars out of the game at critical times and sent the eleven into games under great handicaps. Winn took the job as head coach of the Cats under a one-year contract, only after alumni of the University and friends of the former Princeton star had urged him to accept the proposition that the athletic council of the

esleyan Yearlings Lose to the Green and White Quintet

The University of Kentucky fresh-man basketball quintet opened its 1924 season Saturday night with a 39-9 vic-tory over the yearling outfit of Ken-tucky Westeyan in the local gym. The Kittens led the Panther Cubs throughout the entire contest and were never in danger from the start. Kentucky led at the end of the first half 17-5.

half 17-5.

As is usually characteristic of first appearances of the season, this contest failed to produce any great amount of brilliant playing except in the case of several individuals who displayed the fact that future varsity material is not wanting on this year's yearling five. The passing of the Green and White was only fair and the goal shoot ing of the entire squad was a long way from where it should have been. Besuden and Stephenson led the Kittens in their scoring, Besuden garnering ten points and Stephenson nine. Scrivner at backguard was largely responsible for the low Wesleyan score and played an alert steady game.

leyan score and played an alert steady game. Bedinger, Nall, and Walton played best for the Panther Cubs. The work of Nall at back guard was the only redeeming feature of the visitor's

ington that certain nationally know was the strongest contender for the gridiron mentors had been offered and had accepted the position as head directly directly cill would not take definite action for strong rumor contended that a Corat least two and possibly three weeks.

THE DESIGNER OF **ELECTRICAL APPARATUS**

(Continued from Page 5)

(b) The inevitable growth in transportation requirements for the counevery twenty years. Electrification of try which requirements double about the railroads—already started—is imminent, and will involve unprecedented

minent, and will involve unprecedented construction and equipment.

(c) The growing demand for greater protection of the worker in industry: This takes the form of shorter working hours which can be successfully put into operation only by the introduction of labor saving machin-

Also, progress must involve legisla-tion or regulation requiring safety from physical harm to the worker in the operation of all forms of electrical equipment. This requires that motors be designed to protect workers from accidental injury and that automatic control be installed to protect against accidents due to acts of carelessness or ignorance.

(d) The growing percentage of

(d) The growing percentage of power load in central stations is emphasizing the low power factor on such systems and is calling for the design of higher power factor utilization apparatus and of power factor correction apparatus rection apparatus.

(e) The aftermath of the world war has brought many nations to the verge of bankruptcy and foreshadows an era of keen competition for world markets. This emphasizes the necessity for designs that can be economically built.

"Oh, yes," said Mrs. Cadgett, proudly, "we can trace our ancestors back to—to—well, well, I don't know exactly who, but we've been descending for centuies."—Boston Transcript.

(f) In all of the foregoing cases

(f) In all of the foregoing cases and many others, including the main generating, transforming, and utilization units, there must be supplied switching control, protective and metering equipment the requirements for which are constantly changing.

To see the products of one's thought and work take shape and then go into useful service, resulting in economic gains to the work, gives a sense of satisfaction and achievement that goes far toward realizing one's ambitions.

LILIOM PRESENTED AT ROMANY THEATRE

rowded House Greets Playe Every Night During Week's Engagement

"Lilliom," Franz Molnar's greatest achievement, and Romany Theatre's first production has just finished a week's run, which was featured with success from every viewpoint, playing to standing room only its last night.

night.

The setting of the play is Budapest, that wonderful Hungarian city which vies with Naples in the rich lore of romance and natural beauty. The theme of the play centers around woman's undying devotion and man's thoughtlessness towards his benefactors and the loved one that should be the recipient of his affections.

The lead in the play was entrusted

The lead in the play was entrusted to Carl Goetz, who handled the part of "Lilliom" as if he had been imported from the Empire especially for the occasion, acting the roughness of his part with a finesse that caused his audience to wonder if he were not a circus barker instead of William Barriers; the autonia was appropriate the play of the series of

circus barker instead of William Barringer the photoplay star.

Co-starring with him was Marjorie
Warden who pontrayed the role of
'Julie,' Lilliom's sweetheart and wife,
with such appeal that she won the applause and hearts of the theatre goers
of Lexington and placed herself in
high esteem among her contemporaries
upon the campus.

Violet Young, daying the part of

Violet Young, playing the part of Marie, Julie's closest friend and sweet-heart of Wolf Bieffeld, acted her part with a sincerity that gained her the plaudits of the audience.

plaudits of the audience.

Oscar Hambleton, as Wolf Biefield was superb. His presentation of the comic side of the play was the best piece of acting that has been seen upon the campus in the last few years.

Lilliom was a success. In fact, so powerful was the play that the audience was affected more than the player to whom the roles were entrusted. Frequently throughout the play the scenes were enacted with skill which would turn the sobs of the audience into merry laughter.

SERIES OF RECITALS TO

Bentley Ball to Present For Historical Programs Begin-ning Monday Night

Miss Anna Chandler Goff, director of the Lexington College of Music, announces a series of "Four Historical Recitals," to be given by W. Bentley Ball and assisting artists, in the Auditorium of the Lexington College of Music on every other Monday night, beginning January 21st at 8:15 o'clock.
"Universal."

"Universal Message of the Folk Song," "Music of the Clasic Period" will be the subjects of the four lec-

will be the subjects of the four lecture recitals.

Mr. Ball will have a number of leading musicians assist him in presenting each of these programs, including singers, a violinist, cellist, harpist and pianists. Some chamber music will be rendered, a mixed quartette and a chorus will also assist.

The first recital, which will take place next Monday night, will comprise the most interesting folk song literature of both Europe and America and will be illustrated by songs of noted composers showing the evolution of the folk song into the higher art song form.

art song form.

The program will conclude with the singing of the Song Cycle by H. Lane Wilson, based on Old English melodies. This cycle will be interpreted by a mixed quartette of mixed

voices.
To cover incidental expense, a small fee will be charged, a season ticket will be sold for \$1.10 (war tax included) and admission single concerts will be 55c.
