Show Your Loyalty.....

If you are not an active member of the Alumni Association prove your loyalty by sending in your check for \$3.00 for one year.

\$50

will make you an active member for life. The money is placed in a perpetual trust fund and the interest alone is used.

Commerce College Gains Rapidly

Newest College at U. K. Established In 1925, Is Member of American Association of Collegiate Schools of Business; Includes Bureau of Business Research

By Dean Edward Wiest

The College of Commerce was officially established by the Board of Trustees in the spring of 1925, but prior to that date there was an extended period of development of economics and business education at the University under the administration of the Arts and Science College. As compared with eastern and northern sections of the country, Kentucky, along with some other southern states, was slow in developing economics as a college subject and still slower in developing commerce or business administration subjects. This, of course, was due to the industrial backwardness of the South and to her general unprogressive attitude that for many years characterized the social and business life of her people. It is therefore not surprising to find that as late as 1918 economics was given very scant attention at the University of Kentucky. At that time the four subjects of history, political science, economics and sociology were all offered in one department and taught by two men. Dr. Edward Tut-hill was the head of the department.

However, with the coming of President Frank L. McVey, the University in 1918 gave greater prominence to social subjects, and a beginning in commerce was also made. This expansion was carried out by the Department of Economics and Sociology which was organized that year. In other ways also, it may be said in passing, was the University modernized with respect to the range of subjects offered. For instance, the Art Department was organized the same year.

Origin of School of Business

Economics, or political economy as it was formerly called, may be said to be the parent of the College of Commerce; and going back to 1776 or to the days of Adam Smith at the time he studied and taught at the University of Glasgow, Scotland, philosophy may be said to be the father of economics or the grandfather of the Schools of Business, because Francis Hutcheson, philosopher and teacher of Adam Smith, had much to say concerning the economic order. It might be added also that from Aristotle through the medieval period to Hume and Adam Smith, econo-

mics was a subject of consuming interest to philosophers, and it was therefore logical that Adam Smith, himself a philosopher, should carve out of the general field of philosophy the subject of political economy. The new subject was of great practical value in shaping policies of statesmen in Europe and America. It began to grow and as the effects of the Industrial Revolution came to be realized, divisions of the subject, such as transportation and labor problems, were developed and offered in our leading colleges and universities.

At a later date it was felt that our institutions of learning should endeavor to train and educate men for business. This idea led to the establishment of the Wharton School of Finance at the University of Pennsylvania in 1881 and along with the subjects whose content aimed to explain more especially social relationships, practical subjects, such as accounting and corporation finance, were developed with a view to explain business technique or business administration. In other words, most of the professional courses offered in the schools of business today grew out of political economy or economics, as it is now generally called.

Expansion of Complex Business Technique

The need for professional training in business as conceived by those who had a part in the establishment of the Wharton School of Finance, has steadily grown since the 80's. Banking, corporation finance and credit in general have become infinitely more complex since that time. The field of merchandising is undergoing a revolution and a transformation. Accounting theory and technique have been developed in order to meet the new conditions of large-scale production and interlocking holdings of corporate property, as well as to enable public utility commissions and other regulatory bodies to make satisfactory valuations of corporate property with a view to determine fair rates that may be charged by quasi-public industries. Also the refinement of insurance so as to cover a greater variety of business risks, and the desirability of determining or forecasting business trends all emphasize the greater need for

business training today as compared with the early 80's.

The establishment of the College of Commerce at the University of Kentucky is therefore a fruition of a nation-wide movement. Virtually every important institution of higher learning in the United States has its school of business. Even in Europe where deep-rooted traditions are likely to militate against the development of new types of education, schools of business are being organized.

Separation of Department of Economics and Sociology

As stated above, the College of Commerce was established in the spring of 1925. Courses in Sociology remained in the College of Arts and Sciences and were placed in a separate department, while all courses in Economics were transferred to the College of Commerce. This arrangement was found not to be wholly satisfactory. From the standpoint of professional education the organization of a college of commerce, administered by a dean especially interested in the promotion of business education, has distinct advantages; but from the point of view of encouraging the study of economics as a social science among a large body of students, it has some disadvantages. For instance, it fails to call the attention of the general-arts student to the subject of economics and its importance in understanding human relationships. The difficulties were realized by both Dean Boyd, of the College of Arts and Sciences, and Dean Wiest, of the College of Commerce, and steps were taken to remedy the situation in the fall of 1928. It was decided to regard all courses in economics having a large social-science content as liberal arts courses, and to list such courses under the head of Economics in the Arts and Science section of the catalog and also in the Schedule of Recitations. The plan virtually amounts to setting up a Department of Economics in the College of Arts and Sciences administered jointly by the deans of the two colleges.

Business Curricula

The curriculum followed by students in the College of Commerce is either the General-Business outline or the Combined Commerce-Law Course both of which lead to the degree of Bachelor of Science in Commerce. The General-Business Curriculum is flexible so that a student may specialize in accounting and other fields.

At this time the College is preparing to offer also a course in Secretarial Training, a project that the schools of business generally have been averse to undertake. It is, however, receiving

more and more attention which is evidenced by the fact that the matter will be discussed at the spring meeting of the American Association of Collegiate Schools of Business. The President of the Association in his letter asking Doctor Wiest to lead this discussion states that we cannot indefinitely avoid the responsibility of providing secretarial training for women who wish to make an effective entrance into business. This responsibility is realized by the teaching personnel of the College of Commerce at the University of Kentucky, and it is hoped that work will begin next fall.

Along with a curriculum in Secretarial Training it is planned also to offer work for the training of commercial teachers. Students following this curriculum would receive the degree of Bachelor of Arts in Education. The curriculum would be jointly administered by the deans of Education and Commerce.

Bureau of Business Research

A step of very great importance was the establishment of a Bureau of Business Research as an adjunct to the College of Commerce in the spring of 1928. The director of the bureau is Prof. James W. Martin, an expert in taxation and a competent research man. The facilities of the bureau make it possible, through the study and investigation of problems, to add very valuable material to the teaching of business subjects. It also serves as a reservoir of pamphlets and documents of a highly specialized character which could not be taken care of in any other way. It furthermore serves as technical adviser and as a fact-finding agency for state officials on business and economic matters of state-wide interest. In the field of railroad rates, for instance, the bureau has done splendid work.

Teaching Personnel

The teaching personnel of the College of Commerce consists this year of nine men. These men are well trained. They have done graduate work at a variety of institutions. Altogether they represent seven different universities, which means that different points of view clash from time to time and that theories proposed are constantly challenged. This is a very wholesome situation in the fields of social science and business subjects. In fact too much in-breeding in any department of a university is undesirable. While we have not thus far deemed it advisable to establish departments in the College, we, however, assign specialists to particular fields. For instance, Professor McIntyre heads up merchandising; Professor Jennings is in charge of Economic

(Continued on Page Eleven)

WHO'S WHO AMONG THE ALUMNI

JOHN T. FAIG

John T. Faig was born in Lexington, Ky., where his early years were spent, and where he attended college. He was graduated from "Kentucky State College," now the State University, with the degree of Bachelor of Mechanical Engineering.

After graduation he spent two years as draftsman with the Lane and Bodley Company, of Cincinnati, builders of Corliss engines. The next two years were spent at the University of Michigan as instructor in mechanical engineering. About this time he received the degree of Mechanical Engineer. Shortly thereafter he returned to the University of Kentucky, and was for four years assistant professor of mechanical engineering and, for four years more, professor of machine design. In 1906 he went to the University of Cincinnati as professor of mechanical engineering. During this time he did considerable work as a consulting engineer.

In 1914-15, Mr. Faig was associate editor of The Gas Engine. He was three times elected president of the Engineers' Club of Cincinnati, and organized the Cincinnati Section of the American Society of Mechanical Engineers in 1912. In 1915 he served as a member of the International Jury of Awards, Department of Machinery Exhibits, Panama-Pacific International Exposition, San Francisco. He served as chairman of a commission on ordinances on boilers, stacks, and fur-

(Continued on Next Page)

George B. Hailey

George H. Hailey hails from Paducah, Kentucky, the city that made Irvin S. Cobb and The Saturday Evening Post famous. He worked on the same newspaper as Cobb—Cobb was editor and Hailey carried the paper.

In 1901 Mr. Hailey received his B. C. E. degree from the University of Kentucky. He was a member of Alpha Tau Omega and Tau Beta Pi fraternities.

In 1905 he was married to Miss Cora Keplinger at Carlinville, Ill. Their only child, a daughter, is a junior in the College of Liberal Arts at the University of Kentucky.

Mr. Hailey began work on the Chicago and Alton Railway in 1901 as rodman. He held the place of division engineer from 1903 to 1907.

As division engineer he had charge of the preliminary and location surveys and, later, of the construction of the famous "Air Line" of the C. and A. Railway. The engineering work on this line was done almost entirely by University of Kentucky graduates as Hailey had placed many Kentucky graduates in his engineering corps, where they got their first training after graduation. Such men as T. H. Cutler, now chief engineer of the Missouri Highway Department; G. W. Pickels, now a professor in the engineering department of the University of Illinois; H. J.

(Continued on Next Page)

JOHN T. FAIG

(Continued from Preceding Page)

naces for the City of Cincinnati, which commission drafted the present smoke abatement laws of that city. For many years he has been chairman of the Committee on Technical Nomenclature of the Society for the Promotion of Engineering Education. He has contributed various articles to technical journals.

During the great war Mr. Faig inaugurated the work of training soldiers at the University of Cincinnati, this being part of his job as Professor of Mechanical Engineering. While doing this, he organized also the war education work of the Ohio Mechanics Institute, a technical institute in Cincinnati, which is now more than a hundred years old.

This aroused his interest in institute work, and in 1918 he became President of the Ohio Mechanics Institute, which position he now holds.

Some years ago he was elected to the Executive Council of Tau Beta Pi, honorary engineering fraternity, and for six years was active on this council, becoming vice-president and president in the routine manner. He became an enthusiast on Tau Beta Pi clubs, and called together in Cincinnati the meeting which resulted in the formation of the Cincinnati Tau Beta Pi Club.

In 1923 Mr. Faig was elected vice-president of Section M, Engineering, of the American Association for the Advancement of Science, and arranged the program of Section M at the seventy-fifth meeting at Cincinnati in December of that year. In the same year he was elected a member of the American Engineering Council, a representative of the American Society of Mechanical Engineers. Of recent years his interest has been mainly in education for industry. For the period 1923-1929 he was chairman of the Committee on Education and Training for the Industries, of the American Society of Mechanical Engineers.

During his undergraduate days Mr. Faig was very much interested in music then, as he is now, and for quite a number of years conducted a college orchestra, just for fun, and gave a recital once a year in the chapel, the proceeds going to some benevolent object connected with the University. Immediately following his graduation, he spent the years 1898 to 1906 as assistant professor and professor.

C. W. Gordon, B. S., 1920, M. S., 1923, is Engineer in Industrial Department of the Superheater Company, 17 East 42nd street, New York, N. Y. His residence address is Box 339.

GEORGE H. HAILEY

(Continued from Preceding Page)

Wurtele, now superintendent of the railway lines of the Tennessee Coal, Iron and Railroad Company at Birmingham, Ala.; E. B. Stiles, now in the engineering department of the New York Central Railroad, and G. L. Barkley, now a large fruit grower in the State of Washington, all started their engineering training, after graduation, with Hailey on the C. and A. Railway.

From 1907 to 1910 Hailey was Assistant Chief Engineer of the C. I. and S. and Indiana Harbor Belt Railways, parts of the New York Central System.

Since 1910 he has been in engineering contracting work and is Secretary of the United Construction Company, railroad contractors, and also a member of the firm of Cleary, Hailey and Barry, engineers and contractors.

As a contractor, his firms have built bridges for entire new lines of railroads in Massachusetts, Illinois, Wisconsin and Alabama, besides numerous bridges and viaducts in various states and power plants in the west.

Some of the recent work done was the bridges for the new High Line of the Steel Company at Birmingham; all of the bridges on the new line of the Frisco Railway from Demopolis, Ala., to Kimbrough, Ala.; the new municipal airport for the city of Cincinnati; the new Vista Avenue viaduct in Cincinnati, and a large number of bridges for new state highways and railroads, having done work from Massachusetts to Wyoming.

Last November Mr. Hailey gave an address in Memorial Hall at the University to the engineering students on "A Quarter Century of Engineering."

Mr. Hailey is treasurer of the University of Kentucky Alumni Club of Greater Cincinnati, a member of the Sons of the American Revolution. He is very much interested in athletics, especially football.

Mr. Hailey's home address is 3342 Burnett avenue, and his business address is 408 Lyric building, both in Cincinnati, Ohio.

Ruth Duckwall, B. S. Agr., 1919, is now Mrs. Charles W. Gordon and lives in Pleasantville, New York. Her address is Box 339.

1920

Clyde Bland, B. S. Agr., 1920, is with Purina Mills, Box 696, Lexington, Kentucky. His residence address is 719 Tremont avenue.

NEWS OF SPORTS

Spring Sports Begin

Baseball and Track Teams Already Credited With Victories

Kentucky's baseball and track teams opened their seasons inauspiciously but in a successful vein during the first two weeks of this month. The diamondneers took one decision from the Miami (Ohio) Reds and split a double-header with Ohio State, while the cinder men were romping over Georgetown in a practice meet.

The nine, with Captain Rhoads on the mound, rallied in the seventh inning to clug out a 3 to 2 victory over the visiting Miamians in the opener. The Buckeyes were defeated in the first game of the series, 8 to 6, after another belated rally, but pulled a ninth-inning surprise to conquer the Wildcats, 7 to 6, on the following day. Return games with Miami and Ohio State are included on the schedule of Coach Devereaux and his men, as well as contests with Illinois, Tennessee, Cincinnati, and Vanderbilt.

Coach Shively sent his track candidates against the Tigers in what turned out to be a practice session, the score being 84 1-3 to 34 2-3. Members of the team participated in the Georgia Tech Relays, held in Atlanta April 12, and won the 2-mile relay. Vanderbilt, Sewanee and Tennessee lie in prospect for Captain Owens and his cohorts.

Spring weather has also smiled upon Coach Downing and his varsity tennis team, prepping for one of the most difficult schedules possible this year. The racquet team is moulded around Captain Rawlings Ragland and a likely crew of veterans who are sure to give a good account of themselves on the courts. Professor J. C. Jones has also issued a call for golf candidates in preparation for their initial match.

GRADUATE IS FLORIDA U. S. ATTORNEY

Byron R. Cisco became the new Assistant United States district attorney for the Miami district of Florida.

Cisco went to Miami six years ago from Ashland, Ky., and has been a practicing attorney there since that time. He is a graduate of the University of Kentucky and practiced law in Kentucky before going to Florida.

BASKETBALL CAPTAIN

Carey Spicer, of Lexington, who was chosen to captain the 1930-31 Wildcat Basketball team, is one of the outstanding athletes at the University. He won his numerals in freshman football, basketball, and tennis and has also earned his varsity "K" in these same sports, directing the grid machine last fall from his quarterback position in addition to being the high-scorer of the team and among the leading point-getters of the South. He is a graduate of Lexington high school where he also starred in these sports. Spicer is a junior in the College of Education and besides his athletic achievements is prominent in many other campus affairs.

BIRKETT PRIBBLE ELECTED PRESIDENT

At the reorganization of the Blue Grass Underwriters Life Association, effected when a group of twenty-five Lexington and Blue Grass life insurance men and women met in the palm room of the Phoenix hotel, resulted in the election of Birkett Lee Pribble, a graduate of the class of 1924. "Prib," as he will be remembered by many, was a football player of no mean ability and now is the coach for the freshman team at the University.

DEAN EDWARD WIEST

Dr. Edward Wiest

Dr. Edward Wiest, Dean of the College of Commerce at the University of Kentucky since 1925 and a member of the faculty since 1918, was born in Fairmount, Fla., but received his early education in Pennsylvania before undertaking his undergraduate work at George Washington University from which he received his A. B. degree in 1912.

During his undergraduate days Doctor Wiest gained quite a bit of business experience with private firms and in the government service, and after completing his course at George Washington he entered Columbia University from which he received his Master's degree in 1913 and subsequently his Ph. D. degree in 1916.

In 1915 Doctor Wiest was appointed to the faculty of the University of Vermont as instructor in Economics, which position he held until his appointment as professor of Economics and Dean of the department of Economics and Sociology at the University of Kentucky in 1918.

With the organization of a graduate school at the University of Kentucky in 1924, Doctor Wiest was appointed acting dean for one year, and in the spring of 1925 with the evolution of the College of Commerce from the department of Economics and Sociology, he was named Dean of the College of Commerce, which position he has held ever since.

Doctor Wiest has written numerous articles on Economic questions and among them is a book entitled "Agricultural Organization of the United States," which was published by the University of Kentucky as one of a series known as "Econo-

mics and Sociology," and which has been a pioneer in the subject treated. Several universities have organized courses embodying this subject since the publication of Doctor Wiest's book.

An article on "The Territorial Basis of Education" was written by Doctor Wiest in 1923 for "School and Society" and an article in the Encyclopaedia of Social Science entitled "Economic and Social Aspects of Agricultural Fairs" is just off the press.

He is a member of the American Economics Association, the Academy of Political Science, the American Association of University Professors, American Economic League, Beta Gamma Sigma, honorary Commerce fraternity; Delta Sigma Pi, professional Commerce fraternity, and Phi Sigma Kappa, social fraternity at the University of Kentucky.

Mrs. Wiest was Miss Sidney Crews, of Louisiana. They have one daughter, Marjorie, fifteen years old.

FORMER U. K. DEAN DIES AT ITHACA

Mrs. Virginia Francke York, 29 years old, dean of women at the University of Kentucky during the year 1925-1926, died at the Ithaca, N. Y., Memorial hospital, according to word received here. Mrs. York was the wife of Dr. Webb York, of the Cornell University medical staff.

Mrs. York came to the University of Kentucky as acting dean of women during the leave of absence of Miss Sarah Blanding, who was doing graduate work at Columbia University. Mrs. York was a graduate of Vassar College in the class of 1922. Following the completion of her work there, she went to Cornell University where she was secretary of the Young Women's Christian Association. She was also a Fellow in the National Council of Religion in Higher Education, and was active in the civic organizations of Ithaca.

DR. JAMES WEST DIES

Dr. James Nephew West, formerly of Lexington, died at his home in East Fifty-second street, New York, recently. He was 63 years of age.

Dr. West's father was Major James Nephew West, who was on the staff of General Kirby Smith in the Confederate army. Dr. West was born in Lexington and attended the State College of Kentucky (now University of Kentucky), later completing his education at Bellevue hospital medical college, in New York City.

He is survived by his widow, a son and two daughters.

Value of Alumni Support Is Cited

Organized Clubs in All Kentucky Cities Is Best Solution for Keeping Former Students in Contact With Their Alma Mater; Benefits Derived from Organization Are Many

By Marguerite McLaughlin

Looking forward to the time when the Alma Mater will attain a position of influence commensurate with the value of its training and looking backward lightly to the undergraduate days when athletics, social affairs and studies divided time, frequently in favor of the first and second, the graduate of an institution fails to realize that his or her appreciation is lacking if devotion, loyalty and a sense of duty does not impel action during the present time. This service after graduation the alumni fails to give up. Why?

With more than 5,000 students who have been graduated from the University of Kentucky working one day out of each year for the benefit of the University, the equivalent of thirteen years of service could be accounted for each twelve months. This number of students or alumni is distributed over every state in the Union and about sixteen foreign countries and therefore even the day of service if given by each member each year would fail in much of its possible effectiveness because of lack of organization. Therefore the Alumni Club.

Every mother's son in Kentucky instinctively understands politics. He may not know the how and why and wherefore of each and every political party, its tenets and lack of them, but he does know politics just in the same sense that he understood it back in the old university days, when the only way to defeat the majority registration in the Arts and Sciences College was to organize all the other colleges and put the engineers in office. Every member of the long list in the alumni directory knows these facts and the wonder of it all is that each one does not seek out the others in order to organize and place a united strength behind the University and the efforts that are being made to make it absolutely independent of every thing and every person excepting its alumni.

Alumni work is not all drudgery. During the past month I have been asked to organize a Lexington Alumni Club so that next year we could have many more social affairs for our own group. Regular business meetings are of course necessary and would be in order and a call for a meeting by telephone, the mail and the daily papers

would get the group together so that the members might consider the matter of importance to the University, while in the meantime weeks might have passed in which little was required of the alumni, as such, excepting to enjoy the companionship of those who had this great common interest "the University."

The president of the Alumni Association is, as a rule, located in Lexington and naturally is the first to be informed when there is any need for action by the organization. If the president knew that a letter or telegram could put him in touch with a graduate of the University who had at his call an organized group in every town of any size in Kentucky the president of the Alumni Association could rest in comparative peace. Moreover, when the men who do things that are not favorable to the University or who do not do what is favorable knew that 1,500 graduates of the University of Kentucky located in 350 different townships of the commonwealth were using their influence with every man and woman interested in the advancement of education and the growth of the University, the results of action effecting the institution would be vastly different.

This of course is asking much. We can not hope for the millenium. There will always be those who will not sacrifice their own benefits for those of a larger scope. There will be, as there has ever been, those who will not agree, but lop off one half or even give the University one-third of the alumni backing it is entitled to and give that support in an organized force and the results will be telling.

Many men, when talking of the University, talk strictly in terms of athletics. Well let us talk in that language. If every former graduate of the University was on his job for the benefit of this great amusing, money making, advertising interest, would marvelous athletes be reducing the record and increasing the scores and spreading the fame of other institutions of learning when they should be in the University of Kentucky? Of course every man and woman on the campus knows the argument of the outsider. He says, "we sent our man down there and you didn't get him a

(Continued on Page Eleven)

Engineers To Make Inspection Trips

Seniors Will Be Entertained During Tour By Detroit, Buffalo and New York Alumni Clubs; Junior Class Is Divided Into Two Groups, One Going North and the Other South

For thirty-five years the junior and senior classes in the College of Engineering have been making trips of inspection to industrial centers. These trips are considered very important and are required for graduation. Our school is located far from any great engineering activities and many of the students have never seen anything of this kind. It is considered very important that they be brought into contact with some of the larger work of the engineer and be given some conception of the processes employed in various types of manufacturing.

The senior engineering inspection trip this year will include Detroit, Niagara Falls, Buffalo and New York City. The party will leave Lexington on the afternoon of May 7, arriving in Detroit on the morning of the eighth, where three days will be spent. During this time the party will visit the various Ford industries, the General Motors Proving Grounds, the Yellow Coach Manufacturing plant, the Detroit-Windsor Tunnel, the Parke-Davis plant and other places of interest. On Friday evening, May 9, there will be a dinner given by the Detroit Alumni at the Book-Cadillac hotel. The headquarters of the party while in Detroit will be at the Book-Cadillac hotel.

On the night of May 10 the party will move by lake steamer to Buffalo and Niagara Falls. May 11 and 12 will be spent at Niagara Falls viewing the various things of scenic grandeur as well as the power development and some of the basic industries. The headquarters in Niagara Falls will be the Niagara hotel.

On Monday, May 12, the party will meet for dinner in Buffalo with the Western New York Chapter of the American Society of Heating and Ventilating Engineers. This will be at the Hotel Buffalo. May 13, 14 and 15 will be spent in Buffalo where the headquarters will be at the Lafayette hotel. Some of the interesting places visited in Buffalo will be the Aluminum Company of America, the National Lamp Works of the General Electric Company, the American Brass Company, the Dupont Rayon and Cellophane Plants, the American Radiator Company, the Buffalo Forge Company, the American Lithographing Company, the Albright Art Gallery and the Buffalo Historical Society Building. The Buffalo

Alumni Club banquet will be held on the evening of May 15. At the time this is written the place has not been selected.

The required trip ends in Buffalo, but a considerable number of the class will spend Friday and Saturday, May 16 and 17, in New York City where headquarters will be at the Hotel Manger. The New York Alumni Club will give a dinner-dance for the party at the Ambassador hotel on Friday evening, May 16, at 7:30.

The junior class will be divided for the purpose of the inspection trips. The mining, metallurgical and civil engineers will visit Muscle Shoals, Birmingham, Ala., Cartersville, Ga., Copperhill and Ducktown, Tenn. The party will leave Lexington on Sunday morning, April 27, arriving at Muscle Shoals the next morning. The Nitrate Plant, together with the Wilson Dam and Power House, will be the principal points of interest to be visited.

The party will arrive in Birmingham on Monday evening, April 28, and will be there until the thirtieth. While in Birmingham special attention will be given to the manufacture of cast iron pipe, cement and all forms of steel. Inspection of one of the coal mines will be made. The Birmingham Alumni Club will give a dinner for the party on Tuesday evening, April 29. Headquarters will be at the Hotel Molton.

May 1 will be spent at Cartersville, Ga., inspecting the processes of mining and manufacturing manganese, ochre, barytes, etc. The party will be entertained by the Lions Club of Cartersville with a dinner.

From Cartersville the party will proceed to Copperhill and Ducktown, Tenn., spending May 2 and 3 at these places. Copper smelting and manufacturing of sulphuric acid will be the principal things of interest. The Colonial hotel in Copperhill will be headquarters.

The trip will end when the crowd returns to Lexington on the morning of May 4.

The mechanical and electrical engineers will visit Cincinnati, Hamilton, Dayton and Middletown, Ohio.

The Allis-Chalmers Manufacturing Company at Cincinnati will be visited on Monday afternoon, April 28. The party will then proceed to Dayton

and will remain there until Thursday morning, May 1. Places visited in Dayton will be the National Cash Register Company, the Delco Products Corporation, Wright Field and Frigidaire Corporation. Headquarters will be at the Hotel Gibson.

On Thursday, May 1, the party will visit the American Rolling Mills Company at Middletown, and the General Machinery Company at Hamilton. Thursday night headquarters will be established at the Hotel Gibson in Cincinnati.

Friday and Saturday, May 2 and 3, the inspection of the following plants will be made. The Cincinnati Milling Machine and Grinding Company, the Crosley Radio Corporation and the Columbia Power Company. Friday evening there will be a dinner with the Cincinnati Alumni Club.

The party will leave for Lexington at 5:30 p. m., Saturday, May 3.

COMMERCE COLLEGE GAINS RAPIDLY

(Continued from Page Four)

History; Professor Martin is a tax expert; Professor Haun has the degree of C. P. A., and is eminently qualified to direct work in accounting; Professor Palmer centers attention upon a group of mathematical subjects, such as Statistics, Business Cycles, and Insurance; Professor Carter has charge of the field of Labor; Professor Rouse has the degree of LL. B., and is therefore qualified to teach Business Law. In the same way finance and other subjects are headed up under particular men.

Membership in College Associations

It should be stated that the College of Commerce is nationally recognized as a first-class institution. In the spring of 1926, one year after its organization, it was admitted to membership in the American Association of Collegiate Schools of Business, and in February, 1928, a local chapter of Beta Gamma Sigma, a Commerce honor fraternity, was established. Delta Sigma Pi, a professional Commerce fraternity, was established in 1920 at the time Commerce subjects were offered by the Department of Economics and Sociology.

Growth of Student Body

In 1925 the number of students enrolled in the College was 187. Since then the enrollment has steadily increased and now stands at 270. The increase in enrollment together with the expansion in courses in the economics has necessitated the use of the larger part of White Hall by the College of Commerce. It will only be a matter of a few years when this building will be inadequate.

Our graduates have entered many different types of business and they are located in widely-scattered places. A number remain in Kentucky, others are in New York, Chicago and other large cities. Some are in foreign lands. About half a dozen have done graduate work at other institutions and have entered the teaching profession. It may be said in closing that our students have always been on the whole a fine, wholesome, and a forward-looking group of young men and young women.

VALUE OF ALUMNI SUPPORT IS CITED

(Continued from Page Nine)

job; you let him fail and he left because he was ineligible," and so on. Well, Lexington is not the biggest place in the world and jobs are not easy to get, but we do the best we can for Kentucky boys and our business men are generous, and if an athlete is worth his equipment he will come to class and absorb enough to get by, that is, if the high school back home has not sent him through on his athletics or he has not been lionized beyond toleration. You send them and if they are as genuine as you were when you struggled through, we will do the rest.

The University wants athletes, musicians, mathematicians, linguist, future scientists, youngsters that are argumentive and will make lawyers and teachers, writers who will record for history, drama and journalism, studious lads who are already dreaming of rivaling the Mayos and if any are of religious trend of mind let them come and they will not be hurt but get organized Kentucky alumni and let the world know your strength.

UNIVERSITY OF KENTUCKY PRESERVES SECTION OF STATE'S PIONEER RAILWAY

The section of the old Lexington and Ohio railroad, laid at Lexington in 1831, a picture of which is on the cover of this issue of the *Alumnus*, was unearthed in July, 1915, by workmen who were reconstructing the freight yards of what is now the Louisville and Nashville Railroad. It has been restored and was dedicated with fitting ceremonies on the campus of the University of Kentucky, May 30, 1916, "to the men of forethought and courage who were pioneers in railroad development in America." The section is mounted on a cement block, in front of the Engineering College, as an inspiration to the young men of Kentucky in whose hands rests the future of the state.

Vol. II

APRIL, 1930

No. 4

HAVE YOU PAID YOUR PLEDGE?

EFFORTS will be made in the near future to raise money on the pledges signed by members of the Association for the Greater Kentucky fund. Do you still owe your pledge?

Your Executive Committee, meeting in regular session, expressed the hope that at least all members of the Association would pay their pledges so that more of the debt on the Stadium, Gymnasium and Memorial Building may be paid and the University be relieved of bills that we agreed to pay.

All pledges, we think, were signed in good faith and will be collectable sooner or later, but, before the Association can approach those who signed pledge cards, its membership must be clear on the books.

Therefore, let us urge any of you that owe a pledge, to pay it at once. Your committee and officers are making a strenuous effort, but they need your cooperation and loyal support.

These just debts, when paid, will mean much

to our glorious University and each graduate should want to do his or her part. If we all help, the burden will be much lighter.

NEW MEMBERS FOR ALUMNI ASSOCIATION

AN ENTIRE class to become members of our Association, all in one body! This is a prospective for the coming June graduation exercises. A class with foresight, with real love for its Alma Mater, is giving the idea much thought this session.

On Commencement Day each year, "old grads and new" lunch together, guests of our great University. Short talks are always in order and, usually, one is made by the president of the graduating class. Would it not be a highlight of Commencement activities for him to announce that "every graduate has this day become an active member of our Alumni Association?"

The president of the class of 1930 hopes that this may be brought about and is working on such a scheme, once a member of the active alumni group, probably always a member. Our Association will grow by great leaps.

It is expected that active alumni will encourage this plan, and that the class of 1930 shall be the one to give our Association its first big step toward the power it should be in our University.

MORE ABOUT REUNIONS

THE whole of the campus is taking on its coat of green, shrubs and flowers are throwing out their gayest colors, giving the old school a welcoming attitude. Not only is the campus making arrangements for the spring exercises, commencement and class reunions, but the faculty and local alumni are planning many interesting minutes for the returning grads.

Last year when the system of class reunions was first inaugurated, over four hundred alumni attended the commencement program. This year, the second year of our get-togethers, we hope that many more of our ever swelling ranks will return to renew old acquaintances and make new ones.

It is to be hoped that the class of 1930 will have a large delegation of alumni on June the third to welcome them into this association of ours. We can do much for the school to which we owe allegiance, and, one thing that will do much for it as well as give you no end of pleasure, is to be on hand when degrees are conferred this year.

THE PRESIDENT'S PAGE

On the fifteenth of March just past, the Alumni Association of the University of Kentucky received a letter from Mr. Raymond L. Kirk which stated that "pressure of my personal affairs and conditions which have arisen with the past few days makes it necessary for me to resign my position as secretary of the Alumni Association of the University of Kentucky." He further stated that he desired his resignation to take immediate effect, since his presence in Florida was necessary.

The Alumni Association views Mr. Kirk's resignation with deep regret and feels that it has lost a secretary who gave full measure of his energy and talents to the development of the Association.

As president of the Alumni Association I regret to say that this resignation causes me to lose a contact with Mr. Kirk which has been at all times very pleasant and I am very grateful to him for his cooperation in expanding the program of the Association as it exists today. With these feelings in mind, I wish Mr. Kirk good fortune in his new adventure and hope that success and happiness may come to him during the future years and that his interest in the Alumni Association and the University of Kentucky will continue as in the past.

At a regular meeting of the executive committee of the Association which was held the evening of March the twenty-sixth, Mr. James S. Shropshire of the Class of 1929, was elected to fill Mr. Kirk's unexpired term as secretary. I feel that the Alumni Association is very fortunate in being able to secure the services of Mr. Shropshire as secretary as he is well qualified to make a success of his new duties.

In my opinion the value and success of a University Alumni Association is dependent in a large measure on the secretary. Experience has impressed on me with great force the great difficulties which confront a secretary of an Alumni Association. It is difficult because of the many points of contact with complex conditions and institutions. The nature of these problems intrigues

one's interest and challenges one's ability. And so it is today that I wish our new secretary much success in his undertaking.

Now I wish to briefly call attention to the duties or obligations which graduation from a university places upon a person. The success of an Alumni Association depends on the number and spirit of its members. For a number of years the Association has been attempting to develop a real live and forceful organization, which has met with more or less success. In some ways progress has been made, in others there remains much to be accomplished and I feel sure that the future holds much in store for us.

The growth of our Association, the success of the *Alumnus Magazine*, the attendance at class reunions, the attendance at our athletic contests and our loyalty to the University at all times, are things which demand the services of the secretary and deserve the attention and careful consideration of each alumnus.

During the past two years the Alumni Association has laid particular stress on the development of a few of the activities and events in the life of an Alumni Association which seems to be of the greatest importance. The value of the five-year rotation of class reunions is well established. This system is practiced by many colleges and uni-

versities in this country.

The success of the efforts we have made toward uniting the interests and forces of the classes that have graduated from the University of Kentucky will be shown by the number of graduates who return to the class reunion at Commencement this year.

A letter has been sent out to those classes whose numerals end in 0 and 5 and the class of 1928. Other letters concerning the details will be sent by the Association and the class secretaries. This does not mean that only these classes are expected to return to Commencement. The time of Commencement means the time when all those who have graduated should want to return.

DR. G. DAVIS BUCKNER

Animal Friends and Enemies

ANIMALS OF THE PAST

(First of a Series by Dr. W. D. Funkhouser)

The first settlers in Kentucky found this state to be a hunter's paradise—a wilderness of dense forests undisturbed save by the trail of the Indian, the lair of the panther and the run-way of the elk; beautiful water-courses, easy of traverse and teeming with fish, otter and beaver; rugged mountains harboring the wildcat and the bear; broad plains trampled by the buffalo and ranged by the deer. Game was so plentiful as to be held in contempt; fur-bearing animals were abundant; the hunter and trapper led a happy and easy existence.

Slowly these conditions changed. With the cutting off of the forests the larger animals retreated; clearings increased to become fertile farm-lands or to grow up into neglected thickets; settlements were founded and trails through the forests became roads over which the hardy pioneers brought their families, their household goods and their stock into the new land called "Kentucke." With the change in conditions came a change in the animal life. Forest-loving species became scarcer; thicket and plain-inhabiting forms doggedly persisted; river forms scattered to more remote waters.

Change followed change, slowly at first, then more rapidly, as the thousand and one alterations incidental to the settling of a new country took place, each tending to affect the faunal life. These changes are still going on. Our native animals are making their last stand and their extermination seems to be only a question of a few years. The animals which were valuable for food have mostly disappeared; the fur-bearing forms are almost gone; those which are detrimental to crops or to stock are being hunted to death; the few which remain make a pitifully small list.

When we call the roll of these animals which were so familiar to the Indians and to the early settlers, we find very few of them here now to answer "present" to their names. The buffalo is gone. Yet in early days there were so many buffaloes in Kentucky that even such experienced hunters and woodsmen as Daniel Boone and Simon Kenton were "amazed" at their numbers. The elk, par excellence the game animal of the United States, disappeared before the buffalo but its former abundance is indicated by the geographical names which commemorate it. There is scarcely a county in the state which does not have an Elkhorn, Elk Creek, Elk Ford, Elk Fork

or Elkton. The panther, about which such blood-curdling camp-fire tales have been related, is no more. The bear is making his last stand in a few sparsely settled localities. Wolves are practically extinct in this state. The beaver has not been seen for over twenty-five years. These are animals of the past—in the days when Kentucky was indeed a happy hunting ground.

GRADUATE GOES TO ARUBA

Joseph Kastle Roberts, son of Dean George Roberts and Mrs. Roberts, of Transylvania Park, is spending six weeks at Aruba, a small island off the coast of Venezuela. Mr. Roberts, who has been with the Standard Oil Company at its offices in Whiting, Ind., since his graduation from the Massachusetts Institute of Technology in 1928, was sent to Aruba on business for the Oil Company, having in view the plan of installing a plant on the island after Mr. Roberts makes his report.

The University of Kentucky claims the honor of young Roberts' start in the world of industrial chemistry. He was graduated with his bachelor's degree, majoring in industrial chemistry from the University of Kentucky in 1925. After graduation he was awarded a fellowship to Massachusetts Institute of Technology and having acquired his master's degree he went with the Standard Oil Company. While a student in the University of Kentucky he was a member of Alpha Tau Omega, social fraternity; Phi Beta Kappa and Sigma Xi, honorary Arts and Sciences and honorary Sciences fraternities, and was the winner of military honors and trophies during his upper graduate years, three times. He was one of the most active and popular undergraduate students remembered on the campus of the University.

FIVE INITIATED BY PHI BETA KAPPA

The Kentucky chapter of Phi Beta Kappa, national honorary scholastic fraternity, initiated five members at a meeting in the office of Dr. Frank L. McVey, president of the University.

The new members initiated were Mrs. Lolo Robinson, of Lexington; Miss Elizabeth Cramer, of Louisville, and Miss Katherine Wilson, Rawlings Ragland, and Roger Smith, all of Lexington.

Miss Alice Whittinghill, of Ann Arbor, Mich., who was recently pledged by the local chapter, will be initiated at the University of Michigan, where she is studying medicine.

THE LETTER BOX

Montauk, Long Island, December 21, 1929.

My Dear Professor Boyd:

I wish to express my appreciation of your article on Arts and Sciences College in the November Kentucky Alumnus. My interest is largely due to memories, though glad to know the college grows greater all the time.

I do not know Professor Terrell, but remember with much admiration, much affection, Professors Pence, Pryor and Miller. As I traveled on the Cannon Ball Express to New York one morning I read through tears your tender words of my dear friend Professor Miller. His memory is a rich heritage for anyone who knew his quality: dignified and modest, cheerful and chaste, kind and not condescending, aristocratic and on the level with any faithful mind. He inculcated our love for his material earth and cosmos and made us wonder at and adore the Spirit that moved through them all. The energumen might shudder that his own interpretations, his words, were questioned by Professor Miller. Things material and spiritual were made alive and no one could through reason and him lose appreciation for things sacred in or of time or eternity. He was a man to make us admire his forbears, whom we do not know, and suggest envied attributes for posterity. Sincerely yours,

RUFUS L. WEAVER.

UNIVERSITY OF KENTUCKY SONGBOOK

A University of Kentucky songbook, containing the words and musical scores of "On, On, U. of K.," "Alma Mater" and "My Old Kentucky Home" has recently been published by the University Publicity Bureau and is obtainable at the University Book Store for 25c per copy.

The songbook comprises four pages, the cover design presenting a perspective of Memorial Hall and the words "Songs of U. K." in an interesting sketch which was executed by a student in the University department of art. The pamphlet was printed at the offices of The Kentucky Kernel, and is in blue and white.

This is the first time that a copy of these two popular school songs with full musical scores has been available and alumni will no doubt welcome the combination of songs which brings to them their three favorites. Get your copy now from the University Book Store, and know your school songs when football season opens next fall.

MISS RASCH ELECTED PRESIDENT OF GREATER CINCINNATI ALUMNI CLUB

Miss Lillian Rasch, teacher of romance languages at Holes High School, was elected president of the University of Kentucky Alumni Club of Greater Cincinnati at a meeting held recently at the Chamber of Commerce. Harry Whitney, Fort Mitchell, engineer with the Ferro Construction Co., Cincinnati, was elected vice-president, and George H. Hailey of the firm of Cleary, Hailey and Barry, Cincinnati, treasurer. Miss Adele Slade was elected secretary.

William Billiter, of Billiter, Miller and McClure, was named to head the committee that will have charge of the dinner dance to be given May 2 in compliment to the junior engineers of the University who will visit Cincinnati at that time on an inspection tour. Seniors of all northern Kentucky High schools will be invited to attend this function.

Mr. Billiter, together with Carl Reifkin, advertising manager of the Newport Rolling Mills, and Pat Farra, engineer with the Southern Railway, comprise the executive board for the coming year.

Plans will be completed for the dance at the next meeting to be held May 14, at the Covington Tennis Club.

HERNDON J. EVANS HEADS KENTUCKY PRESS ASSOCIATION

Herndon J. Evans, editor-manager of the Pineville Sun, was elected to guide the destinies of the Kentucky Press Association at the close of the mid-winter meeting, succeeding "Jim Allen" of the Cynthiana Democrat.

Our new president is a Kentuckian born and bred in this grand old state. He first saw the light of day at Morehead, Rowan county, on December 22, 1895. He was a member of the first journalism classes started by Professor Grehan.

He dropped out of the University in the spring of 1915 and went to the State Journal and worked a year. He returned to the University in the spring of 1917, but again withdrew on April 12 to enlist in the U. S. Army and served until July, 1919, with ten months overseas duty. He again re-entered the University in fall of 1919 and was graduated in 1921 from the College of Arts and Sciences with a journalism major. He is a member of Alpha Delta Sigma, national advertising fraternity.

MAY RADIO PROGRAM AT THE UNIVERSITY

May 1—"The New Training School and New Movements In Education," by Prof. M. E. Ligon.

May 2—"The Significance of May Day" by Miss Margaret Lewis.

May 5—Agricultural Talks.

May 6—Monthly Book Reviews, by Prof. W. R. Sutherland.

May 7—Agricultural Talks.

May 7—Girls' Glee Club, under the direction of Lenore Wilson.

May 8—"How Microbes Produce Disease," by Dr. M. Scherago in Talk No. 1.

May 9—"What Farm Folks Are Asking," by Prof. N. R. Elliott.

May 12—Agricultural Talks.

May 13—"Astronomical Dimensions," by Dr. H. H. Downing.

May 14—Agricultural Talks.

May 14—University Woodwind Ensemble, Lexington Junior High School Glee Club.

May 15—"Education for the New World," by Prof. Henry H. Hill.

May 16—"What Farm Folks Are Asking," by Prof. N. R. Elliott.

May 19—Agricultural Talks.

May 20—"Astronomical Phenomena," by Dr. H. H. Downing.

May 21—Agricultural Talks.

May 21—University Concert Band, under the direction of Elmer G. Sulzer.

May 22—"How Microbes Produce Disease," No. 2, by Dr. M. Scherago.

May 23—"What Farm Folks Are Asking," by Prof. N. R. Elliott.

May 26—Agricultural Program.

May 27—"Unfair Competition and the Federal Trade Commission," by Dr. Edgar Z. Palmer.

May 28—Agricultural Program.

May 28—University Philharmonic Orchestra, under the direction of Carl A. Lampert.

May 29—"Character Education," by Dr. Jesse E. Adams.

May 30—"What Farm Folks Are Asking," by Prof. N. R. Elliott.

James E. McMurtrey, Jr., B. S. in Agr., 1917, is Associate Physiologist with Tobacco and Plant Nutrition, B. P. I., U. S. D. A., Washington, D. C. His residence address is 7-H street, N. W.

J. S. Reed, A. B., 1928, is superintendent of schools at Van Lear, Ky.

GRIFFIN SELLS MYSTERY STORY

Gerald Griffin, instructor in the department of Journalism at the University, has sold a 4,000-word feature story, "The Bluegrass Murder Mystery," on the Lewis Hill murder which occurred in Lexington, to the True Detective Mystery Magazine, one of the McFadden monthly publications. The story will appear in a future issue of the magazine.

The True Detective Mystery Magazine specializes in tales of crimes that have proven difficult for the police to handle, publishing stories that have all the elements of mystery attached to them.

Called before the courts several times before a decision was reached, the trials of Lewis Hill for the murder of his wife, were replete with mystery; and before Hill was finally sent to the penitentiary for the murder, many unusual developments in the case were brought out.

Mr. Griffin, author of the article which is soon to be published, is at present a teacher of feature writing at the University, and is head of the Lexington Bureau of the Courier-Journal, of Louisville, Ky. He is a former graduate of the class of 1922.

During his undergraduate career at the University, "Jack" Griffin was editor-in-chief of The Kernel, cadet colonel of the R. O. T. C. unit, and a member of Sigma Alpha Epsilon, social fraternity.—Kentucky Kernel.

SCHOLARSHIP TO HONOR OLD GRADUATE

Foundation here of the Joseph Musselman Scholarship, established in memory of Joseph Franklin Musselman by his widow, Mrs. Susan Metcalf Musselman, was announced by Dean F. Paul Anderson of the College of Engineering.

This scholarship of one hundred dollars in gold is to be annually awarded, upon recommendation of the Dean of the College of Engineering, to a student in the engineering college at the completion of his junior year. The basis of the award will be high scholarship, character, and the need of financial aid in defraying college expenses.

Joseph Franklin Musselman graduated from the College of Engineering in 1900 and took his master's degree here in 1904.

C. L. Templin, B. S. Mec. Eng., 1919, is manager of Atlanta office of the York Heating and Ventilating Corporation. His address is 764 Greenwood avenue.

NEWS OF THE CLASSES

1920

Commodore B. Fisher, M. M., 1920, is principal of the American Boys' School in Hamadan, Persia.

* * *

1921

Katherine Christian, B. S. H. E., 1921, is now Mrs. W. R. Estill, and lives on R. R. 4, Lexington, Ky.

ANNOUNCEMENT OF INTEREST

The following invitations have been received:

Dr. and Mrs. Leon Henry Jastremsk
request the honor of your presence at the
marriage of their daughter
Gwinette Duval
to

Mr. Karl Ewart Lewis
on Wednesday, April the second
nineteen hundred and thirty
at seven-thirty o'clock
at home

Houma, Louisiana

Mr. Lewis was graduated from the University and was formerly a member of the reportorial and editorial staff of the Lexington Herald. He now has a position in Texas.

GRADUATE DIES IN WASHINGTON

A graduate of the University in the class of 1890, Dr. Keene R. Forston, 50 years old, formerly of Lexington and Lawrenceburg, died at a Washington, D. C., hospital as the result of injuries received when he was struck by a hit-and-run motorist.

Dr. Forston was the son of the late George Forston, and was a graduate of the University of Kentucky, Johns Hopkins and Northwestern universities.

He is survived by his widow, Mrs. Margaret Forston, and one brother, George Forston.

AMERICAN RADIATOR HEAT FOR APPROXIMATELY \$75 PER ROOM—WHY HAVE ANYTHING ELSE?

ARE you going through another winter with inadequate heating?... It is really an extravagance to do so, aside from the discomfort, when you can have an American Radiator heating plant installed for approximately \$75 a room. And now is the time to install it.

Radiator heat is so natural that it is used in conservatories to protect flowers—and it is equally vital to the health of the family. It is the only kind of heating that assures you clean, even warmth in every room, all winter long, regardless of the weather.

And see that your heating plant is "All-American"... part American and part something else means parting from efficiency. "All-American"—Boiler, Radiators, and Accessories—means perfect team work. Then get ready to see a transformation downstairs when the "Ideal" Boiler in its red enamel jacket gets busy. It sheds the glamor of a room into the gloom of the cellar.

CONVENIENT PAYMENTS IF YOU DESIRE

And don't worry about the cost. You can take out the old heater and put in American Radiator heating paying for it while you enjoy it. Defer the payments—not the benefits. Modernize your home now with a heating system that will promote the wealth of your property and the health of your family.

Write for details and call in a good local heating dealer.
