RECEIVED

FOREWORD

Each year the State Department of Education, through its Division of Supervision, prepares and issues a report giving pertinent information regarding the high schools of the state. This bulletin not only gives this information but in addition includes some discussion of the situation in our high schools in war-time, along with some recent regulations of the State Board of Education concerning the granting of high school credits for educational experience in the Armed Forces.

The high schools of Kentucky, both public and private, are accredited each year by the State Board of Education. The official rating given each high school by the State Board of Education is made on the recommendation of the Commission on Secondary Schools of the Kentucky Association of Colleges and Secondary Schools. This Commission is composed of the following members:

M. J. Belew	R. E. Jagers
J. M. Deacon	Lee Francis Jones
Sister Dolorosa	M. E. Ligon
Sister Catherine Teresa	W. G. Nash
Miss Dorothy Graff	C. V. Snapp
Carl Fields	W. H. Vaughan
William O. Gilreath	Arville Wheeler
J. M. Glenn	S. S. Wilson
Mark Godman	C. R. Wimmer

Duke Young

The material in this bulletin was prepared by Mark Godman and Sam Taylor of this Department.

JOHN FRED WILLIAMS
Superintendent of Public Instruction

Part I

HIGH SCHOOLS IN WAR-TIME—REGULATIONS

The war-time program continues. The war continues to make increasing demands upon the schools. Bond drives, salvage drives, and other war-time community enterprises to which the schools can contribute will continue to make demands upon the schools. The war-time emphasis that has been placed on the high school curriculum should definitely continue. Especially important in this regard are first aid, physical fitness and sanitation. In fact, increased emphasis upon all programs involving health education should be made. Increased facilities for providing occupational information and guidance of pupils into critical war services should continue to be provided. Along with all this should go an increased emphasis on high school mathematics, science, training for democratic living through community and classroom activities, and pre-induction courses that are most helpful to boys who face military training and assignments. According to military authorities, basic language skills, social science which includes map reading, and the causes for which we went into the war are most vital preparatory material for the inductee.

Considering the fact that there is a great demand for nurses in the military branches as well as in civilian hospitals, it is increasingly important that such pre-nursing subjects as chemistry, biology, mathematics, health and sanitation be given special emphasis in the school program.

Some of the effects of the war upon the schools. It was inevitable that the enrollments in our high schools would decrease because of the induction of boys into the armed forces and the employment of both boys and girls in war industries. The replacement of manpower by boys and girls on the farms has also been a factor in decreasing high school enrollments. However, these circumstances do not account entirely for the large percentage of boys and girls dropping out of high school before graduation. The natural restlessness born of the war emergency has had much to do with this result. The conclusion is clear. The schools must redouble their efforts to hold students in high school until they receive their high school diplomas. High school boys should be advised of the fact that preferred assignments and promotions in the military forces are more easily secured

if one has completed his high school education. Again, it should be impressed upon the students that they can make their best contribution not only to the armed services but also to business and industry if they are fortified with a complete high school education.

We hear much concerning juvenile delinquency due to the war. Naturally, the young person who looks out on the future as a thing that is uncertain and possibly full of tragedy for him is living under nervous tension and strain. This tension too frequently expresses itself in the breakdown of character. Many progressive schools are finding that one of the best ways to combat this problem is found in a well-rounded school and community program for young people. Hence we observe these schools and communities instituting wholesome social and recreational activities that make an especial appeal to youth.

The war has had many other adverse effects upon the schools. Because of it there has been a marked decline in the supply of available teachers, a reduction in the general level of the training of teachers employed, a reduction of physical facilities available for schools, such as buses and materials for repairs and maintenance, and a discontinuance of needed building construction.

Community Articulation. The war has brought about community cooperation on a scale that has never existed before in the history of education. It is now recognized as never before that the school must increasingly become an integral part of the community it serves. This it must do if it is to assume its full responsibility in perpetuating democracy. The transition of the school and its activities to a cycle of school-community inter-action will be slow because of the teachers' resistance to a break from traditional procedure, and also because the school has been so close to the community that it has failed to see and utilize its many educational resources and possibilities. Wherever the school has made a conscious effort to articulate its activities with those of its community, the result has been a new perspective and a new interest on the part of teachers and pupils. To them the community becomes a laboratory with a wealth of educational materials.

It would be well for the teachers and principal in a given high school to ask themselves such questions as these:

Is my school taking an active part in projects designed to better this community?

Does my school work closely with the various agencies and groups that are primarily concerned with the social improvement of

the community (the churches, health departments, governmental agencies, welfare organizations, etc.)?

Are the classes in health, biology, and home economics in this school doing anything to help in solving problems of disease and sanitation in the community?

Are the pupils themselves helping to eradicate these undesirable conditions?

Are the students allowed to visit municipal buildings, museums, factories or stores to find firsthand information related to the work in their classrooms?

Has the school invited persons with special talents and interests and who reside in the community to come to the classrooms and share these talents and interests with the pupils?

Do the teachers take an active part in the worth-while social and recreational activities of the community?

Does the school make its facilities available to recognized community groups for their meetings?

Are the pupils in the school active in studying problems of housing, agriculture, home and community beautification, recreation and nutrition?

These are but a few of the areas which one might mention that have to do with bringing about higher standards of living for the people of the community.

Regulations regarding high school credit for those in the Armed Forces. Thousands of young people are inducted into the Armed Forces before they have completed their high school education. The problem that many of them desire to solve is how they can best continue their education while in military service. Fortunately for them, the Army and Navy School, operated under War Department directive and called the United States Armed Forces Institute, has been established with headquarters at Madison, Wisconsin. The program of this Institute consists of four major divisions: (a) Institute correspondence courses, (b) University extension correspondence courses, (c) Self-teaching courses, and (d) Off-duty classes. Each high school principal should write the United States Armed Forces Institute, Madison Wisconsin and secure a Catalog and through it acquaint all prospective inductees with the opportunities that the Institute offers them in continuing their educational training while in the Armed Forces.

On September 15, 1944 the State Board of Education passed certain regulations regarding high school credit for educational experience in military service. These regulations follow:

Regulations Regarding High School Credit For Educational Experience In Military Service

Credit toward high school graduation may be allowed for educational experience in military service in cooperation with the recommendations of the United States Armed Forces Institute, Madison 3, Wisconsin. In order for a pupil to secure this credit, he must request the Armed Forces Institute to send a complete record of his educational training and experience to the school which he designates.

In evaluating the reports from the Institute regarding *Specialized Training courses*, the local school should give special consideration to the following items: (1) the name of each course successfully completed; (2) the grade made in each course successfully completed; and (3) the number of clock hours spent in each course successfully completed. In such courses a minimum of 180 clock hours will be regarded as the time allotment for one unit of credit; a minimum of 90 clock hours will be regarded as the time allotment for a half unit of credit.

Since it will not be possible for the Institute to indicate the exact number of hours involved in the completion of most of the *off-duty educational courses* (correspondence courses, for example), it is recommended that the local school evaluate such courses on the basis of the information provided by the Institute.

In order to receive a diploma from an accredited high school under these regulations, a pupil must comply with the following requirements:

1. He must have completed not less than twelve (12) units of high school work in regular attendance during the regular school term. Variations from this standard are subject to the approval of the Director of Supervision.
2. He must satisfy the regular subject requirements of the school granting the diploma.
3. The educational experience and achievement reported by the Armed Forces Institute should be evaluated in terms of units of work and must bring the total amount of credit to sixteen units in order to qualify the pupil for graduation.
4. No more than two units of credit may be given for the completion of the various **Basic** or **Recruit Training** programs.

It should be borne in mind that the United States Armed Forces Institute is not an accrediting agency. Service personnel on active

duty who desire to apply for high school credit for their military training or off-duty educational achievements will use the application blank, "Application for Credit for Educational Achievement During Military Service," USAFI Form No. 47, Revised September, 1944. The applicant will fill out page one of the blank, sign it, and then give the application to the officer at his post or station who has access to the service records of service personnel. This officer will fill out from the service record the information about the applicant's military training, sign and forward to the address named by the applicant.

When the school officer receives this application, he should read carefully the instructions. In order to reach an evaluation of the military training of the applicant as certified, it will be advisable for the school official to have available the handbook published by the American Council on Education, "A Guide to the Evaluation of Educational Experience in the Armed Services," and a copy of the pamphlet, "Earning Secondary School Credit in the Armed Forces," published by the National Association of Secondary School Principals, 1201 Sixteenth Street, N. W., Washington, D. C. The address of the American Council on Education is 363 Administration Building, Urbana, Illinois.

By referring to the above material the school official should be able to reach a decision as to the amount of credit to be granted.

Length of attendance required for semester credit before entering the Armed Forces. The State Department of Education has received many communications from superintendents and principals requesting information regarding what may be done relative to giving high school credits to their students who either *volunteer* to enter the Armed Forces or who are *drafted*. In order to clarify this situation the State Board of Education has passed the following resolution:

"That any student who enters the Armed Services of the United States may be given semester credit by the District Board of Education for any courses in which a passing standard is being maintained; provided, however, that six weeks of the semester shall have been completed in order to be given full semester credit."

Part II

SECONDARY EDUCATION IN KENTUCKY—1944-45

Schools and Types of Organizations. Kentucky now has 681 high schools. Of the 681 high schools now operating, 616 are complete organizations, that is, they offer high school work through the twelfth grade. Of the 65 high schools that are incomplete organizations, 41 are separate junior high schools offering work through grades seven, eight, and nine. The other 24 high schools either offer work through the tenth or eleventh grades but do not offer twelfth grade work.

Of the 616 complete high school organizations, 352 are operated by county boards of education and 186 are maintained in independent school districts. The remaining 70 complete high school organizations are either private schools or high schools that are operated by the state.

Fifty-one per cent of the complete high schools in the state are organized on the six-year basis (grades 7-12). Forty-four per cent are four-year organizations (grades 9-12). The other five per cent of our complete high schools represent modifications of the six-year or four-year high school organizations.

The following table presents data regarding the number of the various types of high school organizations that are found in Kentucky.

Table I
TYPES OF HIGH SCHOOL ORGANIZATIONS AND NUMBER OF EACH

Types of Organization	County Districts	Independent Districts	Private Schools	State or Regional	Total
Grades 7-12....	196	103	10	6	315
Grades 9-12....	144	70	54	2	270
Grades 8-12....	11	4	5	0	20
Grades 10-12....	1	9	1	0	11
Grades up to 11....	3	0	1	0	4
Grades up to 10....	14	4	2	0	20
Grades up to 9....	17	24	0	0	41
Totals.....	386	214	73	8	681

The preceding table not only shows the number of different types of high schools that are found in the state but it also indicates the number of high schools operating under different types of control. It will be noted that 386 are operated by county boards of education while 214 are maintained by independent districts. There has been a decrease during the year of two high schools operated by county boards of education and of one high school in independent districts. This decrease has been offset by an increase of three in the number of private high schools.

Of the 386 county high schools, 374 are operated for white pupils while 12 are maintained for colored. Of the 214 high schools found in independent school districts, 52 are maintained for colored. Of the state or regional high schools, six are for white pupils while two are for colored. One of the private high schools is operated for colored pupils.

Table II

Information Concerning High School Development. The three tables that follow should prove interesting to all who are concerned with the development of secondary education in Kentucky.

Table III shows that there was a continuous growth in the number of high schools from 1915 to 1935. It was in 1935 that the state had its greatest number of high schools—848. Since there are now 681 high schools, public and private, it is clear that there has been a

Table III
NUMBER OF HIGH SCHOOLS BY YEARS

School Year	Public White High Schools	Public Colored High Schools	Private High Schools	Totals
1915-16.....	316	No report	No report	316
1916-17.....	376	32	No report	408
1918-19.....	400	30	No report	430
1922-23.....	529	56	No report	585
1923-24.....	492	51	86	629
1924-25.....	496	50	84	630
1925-26.....	551	57	91	699
1926-27.....	552	55	88	695
1927-28.....	607	64	98	769
1928-29.....	614	73	97	784
1930-31.....	661	72	73	806
1931-32.....	676	70	86	832
1932-33.....	678	73	82	834
1933-34.....	682	74	84	838
1934-35.....	684	75	89	848
1935-36.....	680	75	83	833
1936-37.....	663	78	77	818
1937-38.....	652	80	76	808
1938-39.....	628	80	75	783
1939-40.....	605	78	75	758
1940-41.....	592	74	72	738
1941-42.....	574	71	71	716
1942-43.....	555	71	71	697
1943-44.....	541	70	70	681
1944-45.....	542	66	73	681

decrease in numbers of 167 since 1935. The decrease in the number of public high schools has resulted very largely from their being merged into larger school centers.

Table IV presents an interesting picture of the increase in high school enrollments in the different types of high schools since 1915. This broad statement should be modified, however, because one will observe that the total high school enrollment of the state has been decreasing since the school year of 1940-41. In that school year the total high school enrollment was 144,447. This school year, 1944-45, the total enrollment is 122,443, or, in other words, a decrease in the state high school total enrollment of 22,004 in the four-year period. The high school enrollment for the current school year represents an increase of 575 over the total high school enrollment for last year.

Table IV

1940-41.....	123,822	10,440	10,185	144,447
1941-42.....	119,398	10,173	10,339	139,910
1942-43.....	113,662	9,947	10,048	133,657
1943-44.....	102,546	9,422	9,900	121,868
1944-45.....	102,619	9,448	10,376	122,443

* Beginning with the school-year 1932-33, the enrollment of the seventh and eight grades of six-year high schools and of junior high schools are included in the totals.

There has been an increase of 99 in the total enrollment for public white and colored high schools and 476 for private secondary schools. The significant decrease in our high school enrollment since 1941 is, of course, accounted for by induction of boys into the Armed Forces, by boys and girls taking jobs in business and industry, and by the replacement of manpower by boys and girls on farms.

1943-44.....	494	55	69	618
1944-45.....	490	56	70	616

The table above shows the situation as regards the number of accredited high schools by years since 1910. When one thinks of a high school in its true sense one thinks of an institution that provides its students a program of work through the twelfth grade. High

schools that are organized to give work that does not extend through the twelfth grade should be looked upon as incomplete, feeder schools for regularly organized high schools; i.e., schools that offer pupils a program through the twelfth grade.

The high schools in Kentucky are accredited by the State Board of Education. This applies to both public and private schools. In arriving at the official ratings given the high schools the State Board of Education usually follows the recommendations of the Commission on Secondary Schools of the Kentucky Association of Colleges and Secondary Schools. The members of this Commission meet with the Public School Supervisors and canvas the annual high school reports that are made to the State Department of Education and also the reports of the Supervisors' inspections. This year it was the policy of the Commission and also the State Board of Education to maintain school standards unimpaired for the future but to apply them with liberality during the present war emergency. In accordance with this policy some schools, it will be noted, continue their A or B accredited classifications but continue them *on an emergency basis*. It will be noted that these schools are rated for accrediting purposes either as class AE schools or BE schools.

Teachers. There are 5,616 teachers employed in public and private high schools of the state. Of this number, 2,349 are employed to teach in county high schools while 2,600 are employed for high schools that are located in independent school districts. There are 584 teachers employed in the private high schools and 83 in high schools that are operated by the state.

* Interpretation of High School Ratings.

A—Accredited through the entire high school course (through grade twelve).

B—Accredited through the entire high school course (through grade twelve).

11 Gr.—Accredited through grade eleven.

10 Gr.—Accredited through grade ten.

9 Gr.—Junior high school—recognized through grade nine.

T—This initial when attached to the designated of any rating indicates that such rating is given in the face of some deficiency, that it is temporary for this year only, and that the school should be discontinued at the close of this school year or re-organized in full compliance with regulations for accrediting.

E—This initial suggests that an emergency is recognized to exist that may justify the operation of the school even with an observed shortage in the number of pupils or of teachers.

U—Unaccredited.
