January 5th, 1908.

W.S.Harkins, Esq.,

Prestonsburg, Ky.

Dear sir:-

We measured 85 logs 20" and up. If you want me to I will measure the other at 1¢ per inch general average or will measure all at 1-1/2¢ per inch general average including the 85 we have measured.

Please let me know and I will come up next Monday and measure them if it is agreeable, as it will be better for both parties for rolling and rafting.

Very truly yours,

H M Remyan
