## Classification of Schools

### Comprehensive

A school that meets regulatory requirements as prescribed by the State Board of Education, including the minimum days set for classroom instruction, and that provides an enriched program of studies and other features beyond those required for a Standard classification may be considered for Comprehensive rating. In the Comprehensive school, major emphasis should be placed on meeting the special needs and interests of students through broad academic, exploratory, and co-curricular experiences.

### Standard

A school that meets regulatory requirements as prescribed by the State Board of Education, including the minimum days set for classroom instruction, and that substantially meets all of the criteria included in these standards may be considered for a Standard rating. All criteria not otherwise specifically designated shall apply to this classification.

### Basic

A school that meets regulatory requirements as prescribed by the State Board of Education, including the minimum days set for classroom instruction, but fails to meet the minimum requirements for a Standard rating may be considered for Basic rating.

### Special School Accreditation

A school that meets regulatory requirements as prescribed by the State Board of Education, including the minimum days set for classroom instruction, but offers special programs or partial programs resulting from phasing in or phasing out of grades, alternative programs and certain other programs designed to meet individual needs of students may be considered for Special School Accreditation rating.

### Educational Arrangement

Local Boards of Education may make arrangements for certain types of educational opportunities not otherwise available through regular school operations and designate where school records will be kept and credit given.

### Emergency

Schools that do not fit the scheme of classification of Comprehensive, Standard or Basic.

KENTUCKY SCHOOLS 1980-81

Kentucky public and state or federally related schools are classified and accredited by the Kentucky State Board of Education. This requirement is set forth in the law which requires that each school district in the state provide an accredited twelve-grade program and that rules and regulations be adopted governing the quality of this program. The law also provides that the "Superintendent of Public Instruction shall annually prepare or cause to be prepared and submit for approval and publication by the Kentucky State Board of Education a list of all public and state or federally related schools in the state, showing their classification." Accredited classifications are given each year by official action of the Kentucky State Board of Education on recommendations of the staff in the Division of Accreditation and Program Audit, State Department of Education.

This year there are 309 public and state or federally related high schools. Table I shows the number of schools classified according to type of organization and the controlling authority under which they operate.
