

# Lexington & Eastern Railway Company,

LEXINGTON, KY.

C.M. Williams, of Lexington, Ky middle brakeman on No 11 May 5th states as follows.;

Saw Squire Crawford on end of last car of the cut on siding at Waller spur, working there, and when I was within 50 feet of him and the ~~men~~ other men about the cars called as loud as I could

"Look out", this was before the cars on the siding ~~xx~~ were coupled to and I believe the men had heard the engine coming in as the engine bell was ringing all the time, and I was letting off the brakes and looking under the cars to see that there was no obstruction on the rail. did not see Crawford fall but helped to get him out from between the car and the post of tie elevator.
