JOHN FRED WILLIAMS

Superintendent of Public Instruction

ISSUED MONTHLY

Entered as second-class matter March 21, 1933, at the post office at Frankfort, Kentucky, under the Act of August 24, 1912.

Vol. XII • April, 1944 • No. 2

FOREWORD

Each year the State Department of Education, through its Division of Supervision, prepares and issues a report giving pertinent information regarding the high schools of the state. It is the purpose of this bulletin to present this information.

The high schools of Kentucky, both public and private, are accredited each year by the State Board of Education. The official rating given each high school by the State Board of Education is made on the recommendation of the Commission on Secondary Schools of the Kentucky Association of Colleges and Secondary Schools. This Commission is composed of the following members:

M. J. Belew	R. E. Jagers
H. A. Cocanougher	Lee Francis Jones
J. M. Deacon	W. F. Jones
Sister Dolorosa	M. E. Ligon
Sister Catherine Teresa	W. G. Nash
Miss Dorothy Graff	E. E. Pfanstiel
Carl Fields	C. V. Snapp
William O. Gilreath	W. H. Vaughan
J. M. Glenn	Arville Wheeler
Mark Godman	S. S. Wilson
	Duke Young

The material in this bulletin was prepared by Mark Godman and Sam Taylor of this Department.

JOHN FRED WILLIAMS
Superintendent of Public Instruction

SECONDARY EDUCATION IN KENTUCKY—1943-44

Schools and Types of Organizations. Kentucky now has 681 high schools. Last year the number was 697, a decrease of 16 high schools within the year. Of the high schools ceasing to exist, one was a private high school and the other fifteen were public high schools. Of the 681 high schools now operating, 618 are complete organizations, that is, they offer high school work through the twelfth grade. Of the 63 high schools that are incomplete organizations, 40 are separate junior high schools offering work through grades seven, eight, and nine. The other 23 high schools either offer work through the tenth or eleventh grades but do not offer twelfth grade work.

Of the 618 complete high school organizations, 354 are operated by county boards of education and 187 are maintained in independent school districts. The remaining 77 complete high school organizations are either private high schools or high schools that are operated by the state.

Forty-nine per cent of the complete high schools in the state are organized on the six-year basis (grades 7-12). Last year fifty-two per cent were so organized. Forty per cent are four-year organizations (grades 9-12). Last year only thirty-six per cent were four-year high school organizations. The above figures indicate a definite trend away from the six-year organization to the four-year organization. The other eleven per cent of our complete high schools represent modifications of the six-year or four-year high school organizations.

The following table presents data regarding the number of the various types of high school organizations that are found in Kentucky.

Table I
TYPES OF HIGH SCHOOL ORGANIZATIONS AND NUMBER OF EACH

Types of Organizations	County Districts	Independent Districts	Private Schools	State or Regional	Total
Grades7-12	197	115	18	6	336
Grades9-12	157	62	50	2	271
Grades10-12	0	10	1	0	11
Grades up to11	1	0	0	0	1
Grades up to10	17	4	1	0	22
Grades up to9	16	24	0	0	40
Totals	388	215	70	8	681

The preceding table not only shows the number of different types of high schools that are found in the state but it also indicates the number of high schools operating under different types of control. It will be noted that 388 are operated by county boards of education while 215 are maintained by independent districts. There has been a decrease in the year of 17 of the high schools operated by county boards of education and an increase of one in the number of high schools found in independent districts. Of the 17 county high schools that have ceased to operate, two of them were colored schools.

Of the 388 county high schools, 375 are operated for white pupils while 13 are maintained for colored. Of the 215 high schools found in independent school districts, 55 are maintained for colored. Of the state or regional high schools, six are for white pupils while two are for colored. One of the private high schools is operated for colored pupils.

Table II

HIGH SCHOOL ENROLLMENTS BY GRADES, RACE AND CONTROL

Grades	County Districts		Independent Districts		State or Regional		Private		Total
	White	Negro	White	Negro	White	Negro	White	Negro

Information Concerning High School Development. The three tables that follow should prove interesting to all who are concerned with the development of secondary education in Kentucky.

Table III
NUMBER OF HIGH SCHOOLS BY YEARS

School Year	Public White High Schools	Public Colored High Schools	Private High Schools	Totals
1915-16	316	No report	No report	316
1916-17	376	32	No report	408
1918-19	400	30	No report	430
1922-23	529	56	No report	585
1923-24	492	51	86	629
1924-25	496	50	84	630
1925-26	551	57	91	699
1926-27	552	55	88	695
1927-28	607	64	98	769
1928-29	614	73	97	784
1930-31	661	72	73	806
1931-32	676	70	86	832
1932-33	678	73	82	834
1933-34	682	74	84	838
1934-35	684	75	89	848
1935-36	680	75	83	833
1936-37	663	78	77	818
1937-38	652	80	76	808
1938-39	628	80	75	783
1939-40	605	78	75	758
1940-41	592	74	72	738
1941-42	574	71	71	716
1942-43	555	71	71	697
1943-44	541	70	70	681

Table III shows that there was a continuous growth in the number of high schools from 1915 to 1935. It was in 1935 that the state had its greatest number of high schools—848. Since there are now 681 high schools, public and private, it is clear that there has been a decrease in numbers of 167 since 1935. Of the 167 high schools that have ceased to operate since 1935, 143 have been high schools for white pupils and 5 for the colored, and 19 private high schools. The decrease in the number of public high schools has resulted very largely from their being merged into larger school centers.

Table IV presents an interesting picture of the increase in high school enrollments in the different types of high schools since 1915. This broad statement should be modified, however, because one will observe that the total high school enrollment of the state has been decreasing since the school year of 1940-41. In that school year the total high school enrollment was 144,447. This school year, 1943-44,

Table IV
ENROLLMENT BY YEARS IN DIFFERENT TYPES OF
HIGH SCHOOLS

School Year	Public White High Schools	Public Colored High Schools	Private High Schools	Totals

1934-35	88,583	7,983	7,846	104,412
1935-36	101,017	6,546	8,173	115,735
1936-37	106,799	8,711	8,994	124,504
1937-38	109,587	8,938	9,610	128,135
1938-39	117,284	9,587	9,166	136,037
1939-40	121,204	10,342	9,999	141,545
1940-41	123,822	10,440	10,185	144,447
1941-42	119,398	10,173	10,339	139,910
1942-43	113,662	9,947	10,048	133,657
1943-44	102,546	9,422	9,900	121,868

* Beginning with the school-year 1932-33, the enrollment of the seventh and eighth grades of six-year high schools and of junior high schools are included in the totals.

the total enrollment is 121,868 or, in other words, a decrease in the state high school total enrollment of 22,579 in the four-year period. The high school enrollment for the current school-year, 1943-44, is less by 11,789 than the total high school enrollment for the school-year 1942-43. The significant decrease in our high school enrollment is, of course, accounted for by induction of boys into the Armed Forces, by boys and girls taking jobs in business and industry, and by the replacement of manpower by boys and girls on farms. The decrease in the total high school enrollment is more marked in high schools in small towns and rural communities than it is in the cities. The de-

crease in high school enrollment is conspicuous in all types of high schools, public and private.

1942-43	500	54	70	626
1943-44	494	55	69	618

The table above shows the situation as regards the number of accredited high schools by years since 1910. When one thinks of a high school in its true sense one thinks of an institution that provides

high
E,
s

its students a program of work through the twelfth grade. High schools that are organized to give work that does not extend through the twelfth grade should be looked upon as incomplete, feeder schools for regularly organized high schools; i.e., schools that offer pupils a program through the twelfth grade.

The high schools in Kentucky are accredited by the State Board of Education. This applies to both public and private schools. In arriving at the official ratings given the high schools the State Board of Education usually follows the recommendations of the Commission on Secondary Schools of the Kentucky Association of Colleges and Secondary Schools. The members of this Commission meet with the Public School Supervisors and canvas the annual high school reports that are made to the State Department of Education and also the reports of the Supervisors' inspections. This year it was the policy of the Commission and also the State Board of Education to maintain school standards unimpaired for the future but to apply them with liberality during the present war emergency. In accordance with this policy some schools, it will be noted, continue their A or B accredited classifications but continue them *on an emergency basis*. It will be noted that these schools are rated for accrediting purposes either as class AE schools or BE schools.

The State Board of Education has adopted definite rules and regulations for accrediting high schools. These rules and regulations cover such varied items as the library, length of school term, teacher qualifications, quality of instruction, science laboratory, teaching load, number of teachers employed, and number of pupils enrolled, etc.

It has already been pointed out that the war is decreasing high school attendance. In the light of this situation it is natural that many of our high schools that are accredited cannot meet the membership requirement for accreditation. Last year a number of high schools that did not meet the enrollment requirements were accredited on an emergency basis. This year it was found that we had 95 more high schools that failed to meet this regulation.

Teachers. There are 5,498 teachers employed in public and private high schools of the state. Of this number, 2,344 are employed to teach in county high schools while 2,512 are employed for high schools that are located in independent school districts.

There are 557 teachers employed in the private high schools and 84 in high schools that are operated by the state. It will be recalled that there has been a decrease of 22,579 in the total enrollment of the high schools since the school year 1940-41. Along with this decrease in enrollment has gone a decrease of 459 in the number of high school

teachers employed. Since last year there has been a decrease of 268 in the number of teachers employed in public and private high schools. In addition to this reduction it has been necessary to place in teaching positions approximately 500 teachers who do not meet the requirements for high school teachers.

High School Graduates and College Attendance. The public and private high schools of the state reported 15,914 graduates last year. Of this number, 14,215 graduated from public high schools and 1,699 from private high schools. Of the 15,914 graduates, 6,597 were boys and 9,317 were girls.

The high schools reported that 2,548 of their last year's graduates entered college this year. In other words, 16% of last year's high school graduates entered college. Of the girls graduating, 19% went to college, while with the boys who graduated only 11% entered college.

The War Program in the High Schools. During the school-year 1943-44 the high schools in Kentucky have made rather far-reaching adaptations in offerings and teaching procedures to meet the needs of the country under war conditions. Extensive modifications of the high school program have been made; great emphasis has been placed on an improved program in health and physical education; production and conservation of food, clothing and shelter have received increased emphasis in social studies, home economics, and agriculture classes. The content of existing mathematics and science courses has been modified to include emphasis upon practical and military application in these subjects, courses in the Fundamentals of Mathematics and in Refresher Mathematics have been added in many schools. Other courses have been added, such as Pre-flight Aeronautics, Fundamentals of Machines, Electricity, Radio, Automotive Mechanics, Shop Work; principals, teachers, and adults of the various school communities have been mobilized for contributing to the war effort on the home front through Victory Corps, registration, and other essential activities.

Emergency Regulation of the State Board of Education Affecting High School Students Who Enter the Armed Forces. The State Department of Education has received many communications from superintendents and principals requesting information regarding what may be done relative to giving high school credits to their students who either volunteer to enter the Armed Forces or who are drafted. In order to clarify this situation the State Board of Education passed the following resolution, November 7, 1942:

RESOLUTION

WHEREAS, it seems that many high school students will be called to the Armed Forces before their courses are completed; and,

WHEREAS, it will mean that, when students are called, there will be some loss in credit for high school work already completed, unless some provisions to correct same are offered;

NOW, THEREFORE, BE IT RESOLVED: That any student who enters the Armed services of the United States may be given semester credit by the District Board of Education for any courses in which a passing standard is being maintained; provided, however, that six weeks of the semester shall have been completed, in order to be given full semester credit.

* Interpretation of High School Ratings.

A—Accredited through the entire high school course (through grade twelve).

E—Accredited through the entire high school course (through grade twelve).

11 Gr.—Accredited through grade eleven.

10 Gr.—Accredited through grade ten.

9 Gr.—Junior high school—recognized through grade nine.

T—This initial when attached to the designation of any rating indicates that such rating is given in the face of some deficiency, that it is temporary for this year only, and that the school should be discontinued at the close of this school year or reorganized in full compliance with regulations for accrediting.

E—This initial suggests that an emergency is recognized to exist that may justify the operation of the school even with an observed shortage in the number of pupils or of teachers.

U—Unaccredited.
