Blinding Snow Storm Fails to Dampen Enthusiasm of Vast Crowd When Kentucky Outplays Tennessee to Tie Them With Six to Six Score

Approximately 20,000 persons sat through an almost blinding snowstorm on Thanksgiving day to watch the Wildcats of the University of Kentucky outplay the Tennessee Volunteers in every department of the game, only to be held back from national fame by a six to six tie at the end. It was the homecoming game for Alumni of the University and they made up a goodly portion of the largest crowd ever to witness a football game in Kentucky.

The inclemency of the weather did not dampen the spirits of these Alumni. It only served to increase their enthusiasm for the best football team which the University has had for years. They were loud in their praise for Captain Covington and his team mates who held the mighty Tennessee team to a tie and who outplayed them to a degree that is hard to believe in face of the evenness of the score.

Following the game Alumni and friends of the University gathered at President McVey's home on the campus at an informal reception. Here the game was played over again and again and time after time some ardent Alumnus would bemoan the fate that made Captain Covington's kick for extra point barely miss the goal which would have given Kentucky a victory.

On Thanksgiving night the Lexington Alumni Club was host at a dance in the Basketball Building, which was attended by more than 2,000 persons. Here again the spirit of the Kentucky followers asserted itself. The members of both the Kentucky and Tennessee football squads were the guests of honor and a large number of visitors from Tennessee also were present.

Seats for the Thanksgiving game were so much in demand that several weeks before the game it was apparent that the stadium would by no means hold the crowd that wanted to see the contest. S. A. "Daddy" Boles began to plan to use bleacher seats at one end of the field. These seats also were soon taken and then he faced a real problem. Bleacher seats were rented, borrowed and begged from every available place, extra field boxes were stretched along the cinder track which surrounds the field. Finally 3,000 extra bleacher seats were borrowed from the University of Tennessee and shipped here for the game. By the time that the

opening whistle blew standing room was being sold at the gates. This will give some idea of the huge crowd that saw the thrilling contest.

Tennessee came to Lexington with a record that no team in the South can equal. They have been undefeated for three years. They had been tied but once and that time by Kentucky in 1928. They were supposed to beat Kentucky by at least three touchdowns. In fact most of their supporters were too sure of this.

As for the game itself it was a classic. The score is by no means an indication of the kind of football that the Wildcats played. They were everywhere all the time. There was only one exception and that was when Dodd, the superb Tennessee quarterback, threw a long pass to Hackman, their touchdown ace. This pass took them from the center of the field to Kentucky's three-yard line and paved the way for their touchdown which tied the score. This touchdown came late in the final quarter when they were throwing pass after pass.

Kentucky surprised not only Tennessee but a great many of her followers by taking the offensive in the game, which according to all rules should have been a defensive game for Kentucky. The first two periods resulted in a punting duel between Covington and Dodd. In this department of the game Dodd seemed to out-punt Covington and from a standpoint of actual yardage succeeded. However, Captain Covington was placing his punts so that the famous McEver could not receive them. In doing this he sacrificed yardage for accuracy.

The game was a tribute to Kentucky's great line. They allowed but two first downs to the visitors, one of these resulting from the long forward pass in the fourth quarter. The famous ball-carrying combination of Hackman and McEver was thrown for losses time after time and their gains through the line and around the ends were held to a minimum. In all they advanced the ball but seventy-eight yards and more than forty of this was a result of the one long pass which they completed. In running plays they advanced but twenty-nine yards and lost from these plays fifteen yards. Kentucky fared much better. The total yardage gained was 246 and twenty of these were the re-

(Continued on Page Fifteen)

Centre Dropped From Schedule

Athletic Council Decides to Sever Relations With Praying Colonels; Eligibility Rules and General Policy Causes Action by Members of Board

The University of Kentucky Athletic Council at a meeting following the annual football game with Centre on October 26, decided to drop the Praying Colonels from the 1930 football schedule. The announcement was made by Dr. W. D. Funkhouser, chairman of the council, following the meeting.

It was decided that the University of Virginia will take the place of Centre on the schedule next year. The game will be played on Stoll field on October 25.

In the statement issued by the Council announcing its decision in the matter, one point was emphasized. The discontinuation of the annual game with Centre was a move to further Kentucky's efforts in the Southern Conference and not due to any unfriendliness between the two schools. The Centre game broke into the Wildcats' schedule at a bad place, while they were preparing for important games in the conference of which Centre was not a member.

Another difficulty in playing Centre arose from the eligibility rule in force there as opposed to the rules laid down by the officials of the Southern Conference. Centre, which is a member of the S. I. A. A., is allowed to play men on their teams who are graduates from junior colleges. This is not allowed in the Southern Conference, neither are conference teams allowed to play other teams where this is allowed. This condition gave rise to considerable difficulty this year just before the game with Centre. They refused to agree not to play these men and by playing the team with junior college graduates in its lineup Kentucky was violating the Southern Conference rules. For a time it looked as if the game would have to be cancelled. However, the Southern Conference officials made an exception in this one case since the preparations already had been made.

In dropping the Centre team from our schedules the Athletic Council and the University came in for considerable criticism from Centre alumni and friends of that institution. In some instances the criticism was so strong as to be entirely without foundation or cause. It was not the desire of the Athletic Council or the University of Kentucky to belittle the strength of the Centre teams or from a feeling of fear of them. It was entirely a matter of athletic and administrative policy, aiming at benefiting the University. The move was

made only after it had received the approval of the Board of Trustees of the University and the approval of a number of prominent Alumni throughout the state.

The University of Kentucky is the only team in Kentucky which is a member of the Southern Conference. It has the largest student body in the state and naturally has more men from which to draw a football team. Several years ago it began to drop the other teams in Kentucky from its schedule, retaining only Centre College because of the sentiment and historic background attached to this one game. It was not fair to the other smaller institutions in the state to discriminate against them in this manner. The proposition has been before the Athletic Council for the last few years.

It is the consensus of opinion among Alumni, students and friends of the University that this move is a wise one and that in the years to come will prove to be beneficial to both the University and to Centre College.

A copy of the resolutions passed by the Athletic Council upon making its decision follows:

The Athletic Council of the University of Kentucky formally adopted the following resolution in connection with its action regarding the game with Centre College.

"It is with much regret that the necessity for rearranging the football schedule makes it impossible to continue the long and very pleasant relationships with Centre College. It desires to place on record the fact that this action is entirely a matter of general athletic policy and is in no sense occasioned by a spirit of dissatisfaction or unfriendliness.

"The council therefore wishes Centre College an interesting development of its own athletic relationships and a continuance of its fine spirit of loyalty and devotion on the part of its students, alumni and administrative officers.

"If the University of Kentucky expects to receive the recognition in the Southern Conference which we believe it deserves, it will be forced to schedule more Conference and inter-sectional games and drop some games which have no bearing on conference standing. The University of Kentucky is the only institution in the state which

(Continued on Page Twenty-one)

Dean Thomas Poe Cooper

Head of College of Agriculture and Director of University Experiment Station and Agricultural Extension Work Is Nationally Known Farm Leader

(By Helen King)

To appreciate the quality of work of his associates and to commend it according to its merits, is the happy faculty possessed by Thomas Poe Cooper, Dean of the College of Agriculture at the University of Kentucky, and director of the University Experiment Station and of Agricultural Extension.

In replying to a question from the writer, as to the phenomenal growth and expansion of the many departments under his direction, Dean Cooper smilingly placed the burden of honor on the men who work under him, indicating that the high type of mentality apparent in the men in the College of Agriculture, and their unceasing efforts to further the development of experiment and research, have placed the University of Kentucky College of Agriculture upon the high plane educationally on which it rests today.

Dean Cooper was born in Pekin, Illinois, but received his grammar and high school education in the schools of North Dakota, in which state he lived until he was ready for college. He then entered the School of Agriculture of the University of Minnesota and later the College of Agriculture of the same school, and received his Bachelor of Science degree in Agriculture from there.

During his undergraduate days, Dean Cooper was a member of the Alpha Zeta, honorary agricultural fraternity, and Acacia, social fraternity, and was actively interested in many other student activities on the Minnesota campus.

In 1917 Thomas Poe Cooper was appointed Dean of the College of Agriculture of the University of Kentucky, with the additional duties of director of the Experiment Station and director of Agricultural Extension. At the time of his appointment to the University of Kentucky, Dean Cooper was connected with the North Dakota Agricultural Experiment Station.

Since assuming his duties at the University of Kentucky, the College of Agriculture has almost trebled its personnel, it has increased considerably in size, and its activities have increased in several definite lines.

During Dean Cooper's administration as head of the College, a fine Stock Judging Pavilion has been constructed, meat laboratories have been installed and a combined office and dairy building

is now under construction. Both Agricultural Experiment Sub-Stations, at Princeton and Quick-sand, have been established, the one at Princeton consisting of more than 5,000 acres and the Robinson Sub-Station comprising approximately 15,000 acres. The size of the Experiment Station farm has more than doubled, and a new Poultry plant has been constructed in recent years.

New departments have been put into operation under Dean Cooper's leadership, including a department of Agricultural Economics, a department of Rural Marketing and Rural Finance, and a department of Agricultural Engineering. A Creamery License and Tester law has been inaugurated, together with a Nursery Inspection Bureau and a Plant Pathology department. Great development has been evidenced in the Home Economics department and also in the departments of Genetics, Poultry and Animal Husbandry.

Since 1902 Dean Cooper has been almost continually connected with the Federal Department of Agriculture in several different capacities, having served during the past year as a member of the committee in the Department of Agriculture for the study of the Mediterranean Fruit Fly situation in Florida.

In 1925-26 he served as Chief of the Bureau of Agricultural Economics for the United States Department of Agriculture, and before and since that time has served on several different committees, including the committee to determine on an organization of economic work in the Federal Department of Agriculture.

Beside his undergraduate affiliations, Dean Cooper is a member of the Farm Economics Association, the American Association for the Advancement of Science, Epsilon Sigma Phi, honorary agricultural fraternity, and the Kentucky Academy of Science.

He has written numerous bulletins, reports, circulars and addresses on agricultural topics, including a series of seven bulletins for the state of Minnesota on farm and labor problems in that state. In his long list of writings are included three articles for the United States Department of Agriculture, Bureau of Statistics, concerning the cost of producing Minnesota farm and dairy products and the organization of research and teaching farm management.

Not only in physical equipment has the College of Agriculture developed during the administration of Dean Cooper, but in an intangible manner it has woven itself into the fabric of the Kentucky farmer's everyday life, to an extent that has made its influence far-reaching and definite.

ture are all proof of the vital influence for good which Dean Cooper has exercised in developing that important unit of University service.

Because of the cooperation of the people of the state of Kentucky and the splendid attitude they have assumed in regard to the Experiment Sta-

DEAN THOMAS POE COOPER

The development of the many fields of research that come under its organization, the standing with which the Experiment Station has been established in the hearts of Kentucky people and the public interest evident in the attitude assumed by the entire staff of the College of Agricul-

tion in particular, the College of Agriculture has been an important factor in the increasing development of the natural resources of the state, the better living conditions of its people and the prestige which the University of Kentucky maintains in the minds and hearts of its people.

Arts and Sciences College

Dean Paul P. Boyd Writes First of a Series of Articles on the Different Colleges Which Will Appear in Alumnus Each Month

By Paul P. Boyd

It is difficult to select material for a short report like this, written to alumni and former students. You are interested both in the personal side of the college and also in the material and educational phases that can in some cases be stated only in the form of statistics. But personal items come first, and if there is any space left after them, you will get some statistics.

The outstanding occurrence of last June was the retirement, under our new rule, of three of our old and well-beloved professors. It was the first time that anyone so far as I know had been required to retire before the "last call" or before the infirmities of age had made retirement absolutely necessary. The automatic rule, however, is recognized by all as good, even though once in a while it cuts some one off who is not yet through, mentally or physically.

Professor M. L. Pence, of the Physics department, had taught at the University since 1878—a long and honorable career. He is now living in Lexington busying himself with writing an account of the early days of the University and working on physical and mathematical projects in which he has always been adept.

Dr. J. W. Pryor, of the Anatomy and Physiology department, is here and hearty at seventy-three years, happy and enthusiastic as of old. He is still working on his ossification problems and is still intensely interested in his former students, in the present group of premedics, and in the development of his old department. His hosts of friends everywhere are wishing many more years with the best yet to be.

Professor Glanville Terrell, of the Philosophy department, had only twenty years at the University before attaining the honor of seventy years, but in that time he made a unique place for himself in the University family. Interesting always in his conversation, with one of those universal minds that finds nothing human foreign to his range of interests. He has returned to his beloved Virginia (Louisa), built himself a den out under the trees, where he will spend many happy hours talking to his friends, reading everything under the sun, and writing on certain matters for the benefit of the University. By the way, he remarked to Professor Gillis last summer:

"I certainly am glad that I'm a Virginian. But then everybody seems to be loyal to his native state. Why, there's Boyd; he's even proud of Arkansas!"

These three grand old men of the College of Arts and Sciences have discontinued their active service in the College and we miss them immensely, and many of you, their former students, will feel the loss and perhaps have the thought that the College cannot be the same nor your interest and affection for her so strong hereafter. But it seems to me that the opposite should be true. They have lived long and usefully and generations of you students have loved them and respected their scholarship and caught the messages of their lives and work. You would not, and could not if you would, prove false to the debt you owe them, nor fail to see that the only way that you can pay your debt is by living up to their standards and by staying true to the institution which they loved and served. Obey that impulse! Write to them!

One other man has passed, not only from the college scene, but also from that of the old earth's hills and valleys which he understood as did few others in Kentucky. Professor A. M. Miller was buried a few weeks ago in his boyhood home in Ohio. An emeritus professor for the last ten years, he had been living in the South, where his interest in science and affairs of public interest never flagged. He was a scholar of great ability and industry. He knew Kentucky geology in general and in particular. He was a specialist, but at the same time he had a breadth of scientific knowledge that seems to become rarer in these days of intense specialization. He was a valiant fighter for freedom of thought and the inalienable right of our youth to know the truth as it appears to the unshackled mind.

You older students will remember Professor Miller, because of his intrinsic human worth and because of his contributions to your mental life.

So the old order changes here in our beloved college and we are sad. But the old is succeeded by a new day that is full of interest and inspiration and hope. Under the masterly hand of our President and the loyal, progressive support of our Board of Trustees and the increasing friendliness and liberality of the public-spirited citizen-

ship of Kentucky, we have been moving with rather unexpected speed toward the place in the academic sun that rightly belongs to the University of the State of Kentucky.

In spite of the continued budding process which has given birth to the Colleges of Education and Commerce we are increasing in size. Our enrollment this fall is 1087 and our faculty numbers 124. Our class-work is carried on in the old buildings that all of you know, Administration, White Hall ("Old Dorm"), Neville Hall ("New Dorm"), Kastle Hall, Civil and Physics, Men's Gymnasium, Natural Science, Alumni Hall. Art and music are housed in the comparatively new Art Center, over near the former "Consolidated Baptist Church," while mathematics, English, journalism, philosophy and sociology have found quarters in the new McVey Hall. We hope to be given the old Education Building when the new Education Building is completed on Upper Street, opposite the main campus. We will profit greatly, too, by the completion of the fine new library building now being erected just north of the Civil and Physics Building. The new Memorial Chapel near the Agriculture Building, facing Limestone, has already proved its great worth in contributing to the comfort, enjoyment and edification of our faculty and students. Our large increase in attendance this Fall brings appreciably nearer the time when we shall need other buildings for the College work.

And progress other than the material sort is not lacking. There has been a remarkable growth of our graduate work under the efficient leadership of Dr. Funkhouser. This is retarded of course by lack of library and other facilities, but already five or six of our departments have met the requirements and have been approved for work leading to the doctorate. The training of the faculty as shown by degrees, by publications, by travel and study is increasing.

New courses for undergraduates have appeared, notably a four-year course leading to the degree of B. S. in Music, for which we now have thirty-two candidates, and a number of new courses in physical education designed to prepare students to conduct the physical education and coaching in our high schools.

Methods of teaching are matters of constant consideration. New devices designed to improve student performance, such as sectioning of freshmen classes, independent work courses, further differentiation between courses in the lower and upper divisions of the College, the stimulation to more scholarly performance on the part of upper classmen by means of special honors based on independent study and comprehensive examinations, perfecting of our practices for the handling of un-

satisfactory students and of our faculty advisory system, these should be mentioned to indicate that the faculty is "on the job" and ambitious to give the best service possible, to the end that Kentucky may have an Arts College "equalled by few, surpassed by none."

Nor do we forget that we are doing an important work for the other Colleges of the University. You know in a general way how large a service that is, but do you realize the actual dimensions as shown by the following figures? During the second semester of 1927-28 the enrollments of students instructed in the College of Arts and Sciences and the colleges from which they came were as follows: (Here each student is counted once for each Arts and Sciences class he took). College of Agriculture 582; College of Engineering 1524; College of Education 1107; College of Commerce 858; Graduate School 219; College of Arts and Sciences 5770. Thus the instruction load of the College for other colleges and schools of the University was 4290, while for her own students it was 5770.

There! I did succeed in working off some figures on you before you realized it. I wish I could give you an account, next, of a very interesting study we have made of the class of 1929. But I have already exceeded the bounds set for me by Mr. Kirk and I must dis-"obey that impulse."

And so adieu! Don't get the idea that we have forgotten you here on the campus, and don't believe for a moment that we have lost interest in you or your progress toward happiness and usefulness. Teachers such as we have here are not that sort! Forgive us whatever mistakes we made in our efforts to help you educate yourselves and let's from now on remember only the good that was to be found so abundantly in all.

Faculty Honors President

Surprise Party Given to Celebrate Sixtieth Birthday of University Head

Members of the faculty and the University Faculty Club gave a surprise birthday party for President Frank L. McVey on his sixtieth birthday, November 10. The party was given in the Faculty Club rooms on the third floor of McVey Hall.

Professor George Roberts of the College of Agriculture made the congratulatory speech in presenting President McVey with a present from the members of the Faculty Club in expression of their esteem. Seventy-five members of the club were present at the party.

During the course of the party a large birthday cake was presented to President McVey.

HOMECOMING

ALREADY we have devoted considerable space to the homecoming game which was played on Stoll Field Thanksgiving day. However, we cannot refrain from making some editorial comments on this game and day. As for the day, the weather was so bad that it took loyalty and a great interest in the game to cause approximately 20,000 persons to expose themselves to the driving snowstorm to witness the greatest game that Kentucky has played in years. The spirit was unquestionably a great improvement over that of previous years and games. Alumni and former students of the University made up a goodly portion of that huge crowd and to the writer, who has seen football games and Alumni reunions for several years, it was a revelation. Kentucky is definitely improving, improving in every way. As to the physical growth, you already have been told of that. The student body is growing yearly. That we have progressed in football goes without saying. The greatest thing to us, and we admit that we may be just a little bit prejudiced along these lines, is the increased interest shown by the Alumni of the University. Some may say that the interest generated by a winning football team is not a healthy growth. We are inclined to disagree with this. If we can get them interested and active through a football team, we will keep them so through other interests. After all it was a great game and a great day for the University of Kentucky. Alumni are at last waking up to the importance of the University. It only remains for us to give them a

little push in the right direction. Interest in one department will of its own accord bring interest in the others. Let's all get behind and push. Kentucky is bound for the top of the ladder.

SPORTSMANSHIP

IN THESE days when football has become so specialized as to lose some of its real glamour, it is refreshing to see a game played in so sportsmanlike a manner as was that between Kentucky and Tennessee. Never for one minute did the players or supporters of the teams fail to display a sportsmanship to be proud of. Even when the Tennessee team saw themselves outplayed and trailing behind in score, a championship definitely lost, they were gentlemen and sportsmen. Kentucky players never forgot for a minute that they were hosts and the bright light of a seeming victory over an ancient and honorable rival did not blind them to any act that was not sportsmanlike. It is good to see that the traditions of our state and those of our near neighbor have not been forgotten, even in the heat of a close contest.

THE COLLEGES

IN THIS issue of the Alumnus appears the first of a new series of articles. These are written by the deans of the different colleges of the University. It is an attempt of the editors of the Alumnus to give to you Alumni a clear and accurate picture of the workings and progress of the six different colleges and the graduate school. To some of the older Alumni this will prove especially interesting since a great many of them can remember when the University was composed of but two colleges. Then, too, the rapid strides that the University is making brings about changes so quickly that even the comparative youngsters in the Association will see a great many improvements.

REAL ALUMNI SPIRIT

THOSE persons who sat in the boxes in the center of section N on November 2 were delighted to see Kentucky play such brilliant football against Clemson. They were also very fortunate in having in their midst a certain Mr. Smith from Louisville, whose brilliant spontaneous wit kept pace with Shipwreck Kelly's dashes. This Mr. Smith established a record for continuous wit and continued absorption of our attention and coca-cola. Mr. Smith attended the University of Kentucky some years ago and at the game in question, displayed a college spirit which was refreshing and greatly to be desired in the Alumni.

THE PRESIDENT'S PAGE

In the last issue of the Kentucky Alumnus we called attention to the fact that the primary objective in this year's program of the Alumni Association of the University of Kentucky is to increase the membership of the Association to one thousand, and we further indicated in terms which left no doubt as to our meaning that we realize the extent of this undertaking.

The executive committee of the Alumni Association is attempting to make the Alumni realize how greatly the University needs, wants and expects their sympathetic support and interest.

Sympathetic support and interest do not mean loyalty of the passive type but active and expressed loyalty. These can be shown by taking an interest in the Alumni Association.

We have recently had the opportunity to visit the state universities of some of our neighboring states and to observe the interest and support the Alumni give to their alma mater. When we think of the time in the future when such interest and support will be given to our University by its Alumni, there is a most satisfying feeling that comes over us, and those who have worked for and dreamed of that time will feel well repaid for their efforts.

The Alumni as individuals can do much to aid the University, but they can do much more when their efforts are united and organized. And it is with this knowledge in mind that we are directing our attention to the formation of a well organized and strong Alumni Association. It is not that we wish to brag about a large membership but we want the co-ordinated interest and support of the Alumni for our University.

We must all agree that we have a splendid athletic system, a beautiful campus, a most capable faculty and a president who splendidly guides the unified interests of the University. The Alumni of the University of Kentucky must give more active support to the future program and development of its many departments.

The formation of local Alumni Clubs is the quickest and surest way to develop a more general interest in the University and we have started a movement to obtain a more active interest in the local clubs that have already been formed, to revive those clubs that have failed to function and to organize clubs in cities that have never had one.

It is our hope to see in the near future a system of local clubs in the following named cities of Kentucky: Ashland, Bowling Green, Carrollton, Hickman, Frankfort, Hopkinsville, LaGrange, Lebanon, Lexington, Louisville, Mayfield, Owensboro, Paducah, Pineville, Richmond, Somerset, Winchester, Henderson and Maysville. Other local clubs in the state will be formed as time passes and it is hoped that a renewed interest may be created in forming Alumni clubs in cities of other states.

The members of the executive committee feel encouraged by the willingness shown by a number of Alumni living in different cities to aid in the movement to form or organize local clubs.

After the local clubs have been organized, it is hoped that a reasonable number of the members of these clubs will join the Alumni Association of the University. It does not follow, however, that because an Alumnus joins a local club he should feel obligated to join the Alumni Association.

The active operation of these clubs is fundamental in developing a real Alumni Association and the executive committee of the Association is willing to assist as far as possible in their formation or reorganization.

In the near future letters will be sent to certain Alumni in each of the cities named, asking if a University of Kentucky Club exists in their city and to what extent the club is active.

In those cities that do not contain a club, assistance will be offered in the organization of a club.

The success of these clubs depends upon a few

CAMPUS SCENES

The newest picture of President McVey's home on the campus. A great many of the older Alumni will remember the time when this was Maxwell Place, the home of the late Judge James H. Mulligan. It still is known by its name, Maxwell Place, and now is a part of the campus.

Football Season Reviewed

Six Victories, One Tie Game and One Defeat Out of Eight Games Is Remarkable Record Set By Wildcats in Their 1929 Games

Trying to write a review of the football season just past is at this time a most difficult task. With the memory of the great game against Tennessee fresh in the mind of the writer he is prone to forget the defeat suffered at the hands of Alabama. However, there is one thing that can be said with safety. The season as a whole was most successful. With eight starts Kentucky finished with the impressive record of six victories, one tie and one defeat. The one defeat from the hands of a team that reached its real strength on that day, a day when Kentucky was at her worst during the entire season. By allowing Tennessee to tie them the Wildcats suffered no great disgrace, for Tennessee was the foremost team in the South. However, that game should have made the seventh victory for Kentucky. The Wildcats were better.

The first four games turned out to be easy ones, however, they were not so easy looking when they were scheduled. Washington and Lee always has a potentially strong team and this year the early season reports gave them credit for a real passing and running attack. They did have this, but the offensive and defensive playing of our great team held this in check. The one touchdown that they made came as a result of their famous passing game. Maryville and Carson-Newman were, we will admit, purposely easy games. The opener and then the Carson-Newman breather before meeting Centre. However, they could just as well have been harder. Centre was no task and could not even hold the second team.

With these first four games behind them the Wildcats prepared to meet their first major encounter. This was with the highly advertised and highly touted Clemson team. Here was an undefeated team, one that had made large scores against its opponents. Many and dire were the predictions made by the local fans before this game. Still there were some ardent supporters who were confident. Exactly two minutes after the kickoff in this game all this gloom was displaced by a frenzied crowd who had just seen the famous "Shipwreck" Kelly gallop almost fifty yards for the first touchdown. From that minute on it was merely a question of how many points Kentucky wanted to make. However, Coach Gamage did not want to make many points and sent in the second and third string men who ran up a

total of nineteen points on them in the last half, although they did allow them to make one touchdown, the final score being forty to six.

The next test was Alabama. Kentucky left for this game confident that they would win. Alabama had not appeared so strong during the first part of the year and had lost some games. However, old lady luck turned her back on Kentucky for this game and smiled warmly on the Crimson Tide. For the first time this year the famous Tony Holm hit his stride. For the first time this year Kentucky was minus the ever-present threat of "Shipwreck" Kelly, flashy and swift ball carrier whose runs had been disastrous to every team up to this time. A death in his family made it impossible for him to be in the game. In addition to this Captain Covington was still suffering from an old injury, received in the Centre game. The two Phipps brothers were hurt, leaving the brunt of the battle on the shoulders of Carey Spicer and substitutes that were sent in from time to time. Kentucky, however, gained a one point lead early in the game and held on until the final quarter, when the Crimson Tide rolled them over for two touchdowns, leaving the score 24 to 13. Alabama was a great team on that day and the games following showed her real strength.

The V. M. I. Cadets were the next victims and they were left behind by a score of 23 to 12. The first half of this game was without a doubt V. M. I.'s game. They were leading by a score of six to three when the half ended. The Wildcats got off to a ragged and sluggish start and the great line was outplayed by the lighter Cadets. After carrying the ball down almost to the V. M. I. goal, they failed to penetrate the lighter line and Covington was forced to try a place kick, which was successful. The Virginians took advantage of the laxity and sluggishness of the Kentucky players to make a touchdown during the second quarter. At the beginning of the third period the Wildcats came back strong and made three touchdowns before the second team was put into the game. It was through the second team that the second and final touchdown was made by the Cadets. A forward pass was intercepted by a substitute for the Cadets, who ran for a touchdown in the final minute of play. In this game Captain Covington came into his own for the first

time during the year. He made long runs from scrimmage and the manner in which he returned punts was something to be proud of.

As far as points go Kentucky was far ahead of her opponents this year. The final count shows a total of 233 points against 54 for the opponents of the Wildcats. The actual yardage gained is not available, but it leads that of opponents by the same proportion.

Followers of the Blue and White, long known as great optimists and greater believers in what will happen "next year," already are counting on a Southern Conference Championship. With the loss of but two of the first string players and only two from the second team, the squad will remain practically as strong as this year. Coming up from the first year men is a wealth of good material, with Johnson, stellar performer from Ashland, leading the list. He is hailed as another Red Grange, Tony Holm, or McEver. In fact, Coach Pribble is so well pleased with his performances this year that he says he would rather have him than both Hack and Mack of Tennessee fame.

20,000 SEE HOMECOMING GAME

(Continued from Page Four)

sult of passes. Kentucky made fourteen first downs.

The one touchdown for Kentucky which came in the fourth period came from straight football and a determined march down the field. They made end runs, went through the line and completed passes. Nothing could have stopped them. The Kentucky forward wall moved with a deadly certainty, pushing the fighting Volunteers back time after time, until at last Spicer, quarterback and star backfield man, placed the ball over Tennessee's goal line for the first marker in the game.

The next play, while it looked successful, failed, and Kentucky did not receive the extra point, even though the thousands on Stoll field cheered what looked to be a perfect place kick.

An attempted on-side kick by the Wildcats immediately following their touchdown was a failure and the ball was recovered on our fifty-yard line by one of the Tennessee linemen. McEver finally eluded a combination of tacklers that had stopped him on every play preceding this and made a short gain. Subsequent attempts failed and they resorted to an air attack, one heave of which was responsible for a gain of approximately forty yards. Their touchdown followed. The fast charging Kentucky line caused the kicker to hurry his place kick and they failed to take the one point lead which they so badly needed.

The game ended soon after the next kickoff.

As all Kentucky-Tennessee games have been before, the one on Thanksgiving day was filled with action and marked by good sportsmanship on both sides. Lexington and the University lived up to the traditional reputation as hosts to a huge crowd of Tennessee supporters here to see the game. The Tennessee team and supporters lost as sportsmen and gentlemen. In fact the whole day, with the exception of the weather, was perfect for Kentucky.

In this game Kentucky displayed her true strength and ability. They were fit in every department, even though some of the players who were good enough to get into the game were held on the sidelines by minor injuries. There was a reserve strength that could have been used if the emergency had arisen. Even the most rabid of Tennessee defenders were forced to admit that Kentucky had by far the strongest team, and that her strength and ability could not be told by the six to six score.

Captain Covington and Pete Drury played their last game for Kentucky, a last game that they, as well as those that saw it, will remember for years to come. Both proved themselves to be stars without a doubt and Drury made more fast his claim and certain selection as one of the members of the All-Southern team. However, one could not pick out any individual player on the Kentucky team that day. They were all stars.

New York Alumni to Meet

Annual Stag Dinner Will Be Held December 5
To Honor J. I. Lyle

Announcement has been made of the annual stag dinner of the New York Alumni of the University of Kentucky. The dinner will be held at the Harvard Club, 27 West Forty-fourth street, Thursday, December 5, at 6:30 p. m. The dinner is designated to honor J. I. Lyle, 1896, for the kindly interest and help he always has given to the New York Alumni and the University of Kentucky.

This date has been set aside for college reunions by the A. S. M. E., which will be in convention in New York at this time. The power show also will be held in New York during this week.

An invitation has been extended to all Alumni who are in New York at this time. The invitation comes from Mr. W. G. Hillen, secretary of the New York Alumni Club. Reservations can be made through him and his address is 850 Frelinghuysen avenue, Newark, New Jersey.

Ten Former Captains See Game

Wildcat Leaders of Former Years Are Interested Spectators at Homecoming Game; All Praise Ability of Present Blue and White Squad

Ten captains of University of Kentucky football teams of bygone years were on hand Thanksgiving day to witness the great game between Tennessee and Kentucky. There may have been other former football captains there, but these ten were all that the writer could find in the great crowd that was on hand to see the Wildcats attain their real strength against the Volunteers.

George Carey, who captained the team of 1894, is a member of the firm of Carey-Reed of Lexington. He is an ardent football fan and attended every game. He thinks that the team which he captained could have won over a great many of the teams of recent years but would probably find the one this year much too strong. There were fifteen men on the team of 1894 and not one of them had seen a football game until they entered the college. For the first few years the teams played without uniforms, but the team of '94 was able to procure some sweaters and trousers and felt themselves very well equipped.

Wellington Scott, who captained the team of 1900, now is located in Little Rock, Arkansas. He was an interested spectator at the game Thursday. White Guyn, the present city engineer for Lexington, was captain of the team of 1904. He, like Mr. Carey, never misses a football game.

James Park, Commonwealth's Attorney for Fayette County, was captain of the team of 1914. The squad in 1914 numbered thirty or forty members, according to Mr. Park, and were for the most part very much lighter than the present day team. At this time there was one head coach and one assistant. The equipment was very poor and vastly different from that of the team today.

Maury Crutcher, superintendent of buildings and grounds for the University of Kentucky, was captain of the team in 1916. This team also was considerably lighter than the teams of the present and, according to Mr. Crutcher, were lighter that year than most of their opponents.

John G. Heber, who is at present head coach at the Lexington Senior High School, has the distinction of leading a team that played but three games. This was in 1918, when the University was under the S. A. T. C. control. During the football season an epidemic of influenza swept the campus and so depleted the ranks of the football squad that all games were canceled and the squad

disbanded after the first three games. At the beginning of the season that year thirty-five men reported and the prospects were bright for a successful season until the epidemic blasted their hopes.

James Server, known to his team mates as "Big Jim," was captain of the team in 1921. This team was one of the best for several years. "Big Jim" is representing the Delco Light Company and has recently returned from South America, where he represented this company.

Birket Lee Pribble, "Big Boy," as he was known to all his team mates, was captain of the team in 1922. By this time the team was counted among the best in the South, with of course the usual exceptions. Pribble now is coaching the freshmen football men and giving them their first taste of University football. When he is not coaching Pribble is selling insurance and playing golf.

Frank Smith, captain of the 1926 team, was among the interested spectators at the game Thanksgiving. He is living in Ashland, Kentucky, where he is working for the American Rolling Mills Company and playing football on their professional team. He attended most of the games this year.

Claire Dees, who was captain of the team last year, is back in the University taking graduate work in engineering. He assisted Pribble in coaching the freshman team this year.

There was a host of former Kentucky athletes present at the game Thanksgiving but they are too numerous to mention. Doubtless there were also football captains of other days present who were not seen by the writer in the huge crowd that filled and overran the stadium.

However, it was generally conceded by all these former captains that the team which the University had this year was by far the best ever to wear the Blue and White of Kentucky.

Robert E. Sherman, B. S. M. E., 1927, is a sales engineer with the Cleveland branch of the Buffalo Forge Company. His address is 3018 East Overlook Road, Cleveland Heights, Ohio.

R. B. McClure, B. S., 1927, is county agricultural agent of Garrard County, Kentucky. He is living in Lancaster, Kentucky.

Air Law Will Be Studied

New Course Will Be Offered by College of Law in Near Future

The College of Law of the University of Kentucky is preparing to add to its curriculum a course in air law, according to an announcement made recently by Dean Evans. The course, which will be taught by Dr. Frank Randall, will deal with air law as it concerns property rights. This phase of the law has been rapidly developing since the more common use of the airplane.

At the present time only two other schools in the United States are giving courses of this nature. These schools are the institute of air law at Northwestern University and the law school of New York University.

Doctor Randall now is collecting material to be used in presenting the course. A large amount of this information probably will come from England and European countries, since the airplane has been used more extensively there than in the United States up to the present time. Prof. Randall said that he had no definite idea just what direction the course would take, as he has not yet made a thorough examination of the subject matter. He is of the opinion that it will come into universal use in the near future as the airplane comes to be used more commonly. Any work done now will be of a constructive nature, as the law on the subject is vague and indefinite, he says.

As soon as a thorough study has been made the faculty of the College of Law will submit a codification of it to the legislature and suggest that it embody it in a statutory form, Dean Evans said.

It is the theory of Doctor Randall that the new law would run counter to some of the old common law on rights of property. It was the theory of the common law that a man owned from the surface of the earth to its innermost parts and also from the surface to the highest realms of the air. Consequently when an aviator flies across the land of a farmer he is guilty of trespass and subject to legal action.

DUKE UNIVERSITY ON SCHEDULE

Duke University, of Durham, North Carolina, is the latest addition to the football schedule for 1930, according to an announcement from the Athletic Council of the University. The game will be played in Durham on November 8. Duke is the youngest member of the Southern Conference but always has a strong football team and this year played such non-conference foes as Pitt, Boston and the Navy. A return game has been scheduled in Lexington for 1931.

Coast Game Offered 'Cats

Football Team Invited to Meet St. Mary's in Los Angeles Christmas Day

The reputation of the 1929 University of Kentucky football team has attained nation-wide recognition. This has been shown by a recent invitation from the American Legion of Los Angeles, California, to play a game there on Christmas Day. The team which the Wildcats are invited to meet is that of St. Mary's University. This team has won all its games on the west coast this season and is counted as the strongest team in the West.

The American Legion of Los Angeles is trying to arrange a game with some southern team for Christmas Day and selected Kentucky as the first choice.

The matter has not been fully decided as yet and negotiations still are under way. The promoters of the game, it is understood, have offered the Wildcats an attractive proposition for the game. Since the members of the squad would not miss any classes and the trip would be one of great interest the matter is being given serious consideration by the Athletic Council. It is expected that they will decide within a very few days.

Hailey Talks to Engineers

Graduate of Class of 1901 Is Principal Speaker at Regular Convocation

George R. Hailey, who was graduated from the College of Engineering with the class of 1901, and who is now a staff member of the United Construction Company in Cincinnati, was the speaker at the regular assembly meeting at the Engineering College on November 27.

Mr. Hailey remained in Lexington over Thanksgiving to see the Homecoming Game and to visit his daughter, Mary Virginia Hailey, who is a junior in the College of Arts and Sciences and who is active in campus affairs.

Mr. Hailey is a widely known member of the engineering profession and for many years has had charge of the construction of railroads in the south. He is an ardent and enthusiastic Alumnus and takes a great interest in the affairs of the University and the athletic progress of the institution.

When invited to talk to the students of the College of Engineering, Mr. Hailey requested Dean Anderson to put him on the program some time near to Thanksgiving, so that he might attend the game. He is a member of Tau Beta Pi and Alpha Tau Omega.

Atlanta Alumni Organize Club

Officers Are Elected and Plans Made for Regular Monthly Luncheon Meetings

Alumni and former students living in Atlanta, Georgia have formed a University of Kentucky Club of Atlanta, according to a communication from J. A. Weingartner, who was elected secretary of the club. The organization meeting was held at the Atlanta Athletic Club on November 4. The officers of the club have announced that a regular monthly luncheon meeting will be held on the first Monday in each month at the Atlanta Athletic Club. The time has been announced as 12:30 p. m.

Ed Danforth, 1914, sporting writer of considerable note, took charge of the meeting and an election of officers was held. The officers elected are Joseph L. Shaw, EX, president; F. W. Clare, vice-president; J. A. Weingartner, 1926, secretary.

The members of this newly organized Alumni Club made up a delegation and attended the Kentucky-Alabama game in a body when that game was played in Montgomery. They also sent a delegation of members to attend the homecoming game Thanksgiving.

Those who were present at the organization meeting of the club were: C. R. Chappell, 1918; F. W. Clare, 1923; Ed Danforth, 1914; J. R. Marsh, 1916; M. J. McWhorter, 1924; R. L. Porter, 1924; L. A. Riedel, 1923; J. S. Shaw, EX; E. L. Shuff, 1910; M. J. Taylor, 1923; C. L. Templin, 1919; W. D. Thompson, 1921; J. A. Weingartner, 1926; G. A. Weisenberger, 1929. There are several other Alumni of the University living in or near Atlanta and they have signified that they will become members of the club at the next meeting.

Marshall Barnes, 1924, of Beaver Dam, Kentucky, was a visitor at the first meeting of this club.

All Alumni and former students of the University who are visiting or living in Atlanta are urged to attend the meetings each month.

ENGAGEMENTS

McElheny-O'Nan

Announcement has been made of the forthcoming marriage of J. W. O'Nan, who was graduated from the College of Engineering with the class of 1926, to Miss Mary Salina McElheny of Pittsburg, Pennsylvania. Mr. O'Nan, after leaving the University, went with the Duquesne Light Company of Pittsburg and still is one of the engineering staff of that company. Mr. O'Nan is living in Beaver Falls, Pennsylvania.

President Guest of Alumni

Luncheon Honoring University Head Is Given At Murray

Alumni of the University of Kentucky attending the First District Educational Association meeting in Murray, Kentucky, on November 30, gave a luncheon in honor of President Frank L. McVey, who was on the program at the meeting. The luncheon was given in the National Hotel and was attended by twenty-five Alumni. State Superintendent W. C. Bell and President Rainey T. Wells of Murray State Teachers College also were guests at the luncheon.

A list of the Alumni attending the luncheon follows:

S. E. Wrather, B. S. in Agr., 1927, Kirksen, Ky.; Kathryn Whitnel, B. S. in H. Ec., 1928, Fredonia, Ky.; Viola Harper, A. B., 1926, Kevil, Ky.; Clyde Filbeck, A. B., 1923, Tiptonville, Tenn.; Mattie Lou Lockwood, B. S. in Biology, 1929, Paducah, Ky.; (Mrs. Gordon B.) Dorothy Printz Pennebaker, A. B., 1928, Murray, Ky.; Kenneth R. Patterson, M. A., 1923, Mayfield, Ky.; (Mrs. Rainey T. Wells) Naoma Maple, Student 1925, Murray, Ky.; Bobby Hester, 1941, little son of Mrs. Cleo Gillis Hester, 1912, Murray, Ky.; Susan Peffer, M. A., 1928, Frankfort, Ky.; Walter C. Jetton, A. B., 1913, Paducah, Ky.; Rainey T. Wells, 1927, Murray, Ky.; G. B. Pennebaker, A. B., 1926, M. A., 1928, Murray, Ky.; Lucille Farmer, M. A., 1929, Murray, Ky.; Mrs. K. R. Patterson, 1919, Mayfield, Ky.; Frank Melton, 1927, Hazel, Ky.; Maryleona Bishop, M. A., 1929, Murray, Ky.; O. J. Jones, A. B. 1914, A. B., 1917, Frankfort, Ky.; Flo Imes, A. B., 1928, Almo, Ky.; Margaret Tandy, A. B., Feb. 1926, M. A., 1929, Murray, Ky.; Ed. Filbeck, student; Suzanne Snook, A. B., 1926, Paducah, Ky.; Sadie D. Wilgus, B. S. in H. Ec., 1925, Murray, Ky.

THE PRESIDENT'S PAGE

(Continued from Page Eleven)

factors such as the desire to meet and have a pleasant contact with men and women who have lived for a period of their lives at the University and have existed, in a measure, under the same influences, which should form a bond of interest. The factor of desiring to aid and support the program of the University should invite interest and if we keep a constant contact with the University, a youthful college spirit and viewpoint will be retained which is lost, all too soon, by some of us.

Alumnus Gets Yale Award

University Graduate Given Scholarship for the Coming Year

John Rice Bullock, Jr., who was graduated from the University in the class of 1928, and who has been a student in the Law College at Yale for the past year, has been awarded a scholarship for law work because of his excellent standing while at Yale. He will be graduated there next June.

Mr. Bullock was an outstanding student at the University, especially in journalistic work, being elected editor-in-chief of the Kernel, holding that position for three semesters and also during the summer session three years ago. He was the youngest editor of the publication at the time of his election, and just celebrated his twenty-third birthday last month.

He was well known on the campus for his scholastic record as well as his many activities, for he was a member of Phi Beta Kappa, national Arts and Sciences scholarship honorary fraternity, Omicron Delta Kappa, national campus leaders fraternity; Lamp and Cross, and Delta Tau Delta, social fraternity. In his senior year he was awarded the \$100 prize offered by Franklin Vaughn to the outstanding man in the graduating class.

BIRTHS

Mr. and Mrs. D. S. Sample of Chicago are the parents of a baby daughter who was born in Lexington, November 14. She has been named Shirley Ann Sample. Mr. Sample is a graduate of the College of Engineering and a member of the class of 1925. He is with the Bailey Meter Company in Chicago and his address is 5432 Harper avenue. He is president of the University of Kentucky Club of Chicago. Mrs. Sample formerly was Miss Lee Otis Drury of Lexington.

* * *

Mr. and Mrs. Guthrie H. Bright, of Shelbyville, Kentucky, have announced the birth of a baby daughter, born at the St. Joseph's hospital in Lexington, November 17. She has not yet been named. Mr. Bright is a graduate of the College of Arts and Sciences and a member of the class of 1927. He is engaged in the tobacco business in Shelbyville. Mrs. Bright formerly was Miss Pearl McCormick of Lexington, also a former student of the University.

* * *

Mr. and Mrs. Charles D. Graham of Ardmore, Pennsylvania, are welcoming a son who was born October 15, 1929. He has been named Charles Danne Graham, Jr. Mr. Graham is a member of the class of 1923 and a graduate of the College of

Engineering. Mrs. Graham formerly was Miss Louise Burks and was graduated with the class of 1925. Mr. Graham is manager of the engineering department of the York Heating and Ventilating Corporation of Philadelphia.

WEDDINGS

Slater-McNamara

The wedding of Mr. Jean Bert Slater, B. S. M. E., 1923, to Miss Madeline McNamara of Buffalo, New York, was solemnized July 16, 1929. Mr. Slater is a graduate of the College of Engineering of the University and is a sales engineer located in Buffalo. They will make their home at 4 Commonwealth avenue.

* * *

Prewitt-Dabney

The wedding of Mr. Edward S. Dabney, who was graduated from the College of Law with the class of 1920, to Miss Catherine Prewitt of Fayette county was solemnized recently in Lexington. Mr. Dabney has been with the Security Trust Company of Lexington for several years and recently was made assistant to C. N. Manning, EX., who is president of that organization. After spending several weeks in Cuba they are at home in Lexington.

Children of Alumni Meet

Sons and Daughters of Graduates and Former Students Organize Club

Alma Magna Mater, an organization made up of the sons and daughters of graduates and former students of the University of Kentucky, recently held its first meeting for the year. The meeting was at the president's house on the campus and Mrs. McVey, sponsor of the club, was hostess.

The program for the club this year includes a dinner which will be given some time during December, at which time the new members will be welcomed into the Club. The members of the Club assisted in the Homecoming Reception at President McVey's home on Thanksgiving day following the football game.

The purpose of the club is to foster loyalty to the University and its traditions. A drive is under way to get all eligible students into the Club.

Clarence A. George, B. S. C. E., 1927, is an ensign with the United States Coast and Geodetic Survey. He is at the present located on Kodiak Island, south-western Alaska. His address is 202 Burke Building, Seattle, Washington.

NEWS OF THE CLASSES

1890

Reunion June, 1930.

Dr. Keene Richards Forston, B. S., 1890, is a physician and is located in Washington, D. C., where his address is 1731 Pea street, Northwest.

* * *

1897

John Scott, B. A., 1897, is a Lieutenant-Colonel in the United States Army. He is attached to the Thirteenth United States Infantry and is located at Fort Adams, Newport, Rhode Island. Last year he was stationed at Fort Leavenworth, Kansas.

* * *

1898

Paul S. Ward, B. M. E., 1898, is located in Cincinnati, Ohio, where his address is 2968 Jessamine street. He is an engineer with the Triumph Manufacturing Company.

* * *

Margaret I. King, B. A., 1898, is Librarian at the University of Kentucky. Her address is in care of the University Library.

* * *

1901

Dr. John W. Gilbert, B. S., 1901, is a physician and is living in Lawrenceburg, Kentucky.

* * *

1902

Chester M. Smith, B. M. E., 1902, is a telephone sales engineer with the Western Electric Company. He is living in East Orange, New Jersey, where his address is 315 Rutledge avenue.

* * *

1903

Charles Duke Perrine, B. M. E., 1903, is chief engineer for the Merchants Heat and Light Company of Indianapolis. His address is 310 North Addison street, Indianapolis, Indiana.

* * *

1904

Walter P. Kelley, B. S., 1904, is professor of agricultural chemistry and chemist at the Citrus Experiment Station of the University of California at Riverside, California. His address is 350 Redwood drive, Riverside.

* * *

C. H. Gullion, B. M. E., 1904, M. E., 1906, is an industrial engineer with Swift and Company, Union Stock Yards, Chicago. His residence address is 4532 Drexel Boulevard, Chicago.

* * *

Charles Robert Gilmore, B. S. 1904, is an oil and gas broker and is located in Tulsa, Oklahoma,

where he has offices in the Tulsa Trust Building. His residence address is 1006 North Denver avenue.

* * *

1905

Reunion June, 1930.

William Jay Schoene, B. S., 1905, is state entomologist for Virginia and his address is Virginia Experiment Station, Blacksburg, Virginia.

* * *

1906

Albert Newton Whitlock, B. A., 1906, M. A., 1908, is an attorney and member of the firm of Murphy and Whitlock. He is located in Missoula, Montana, and his address is 511-515 Montana Building.

* * *

Philip M. Riefkin, B. M. E., 1906, M. E., 1909, is a consulting fuel engineer and is located in Washington, D. C., where he has offices in the Union Trust Building at Fifteenth and "H" streets.

* * *

1907

David C. Estill, B. M. E., 1907, is a farmer and his address is R. F. D. 2, Frankfort, Kentucky.

* * *

Fred J. Rankin, B. M. E., 1907, is located in New York, where his address is 2 Rector street.

* * *

Joseph Miles Sprague, B. M. E., 1907, is a steam engineer at the Fairfield Steel Works of the Tennessee Coal, Iron and Railway Company. He lives in Ensley, Alabama, where his address is box 66. His residence address is 1500 twenty-eighth street.

* * *

Viola Crosby Lewis, B. A., 1907, now is Mrs. Jesse Moreman Herndon and she lives in Irvington, Kentucky. She has one daughter who is five years old.

* * *

1908

Carter L. Wilson, B. M. E., 1908, is a bridge engineer for the Chattanooga and St. Louis Railway Company. He is located in Nashville, Tennessee, where he has offices at 924 Broad street. His residence address is 2113 Pierce avenue.

* * *

Arza Lytle Wilhoit, B. M. E., 1908, M. S., 1914, is a steam engineer for the Youngstown Sheet and Tube Company of Youngstown, Ohio. His address is 820 Michigan avenue.

CENTRE DROPPED FROM SCHEDULE

(Continued from Page Five)

is a member of the Conference and must try to uphold the prestige of Kentucky among the Conference members. It will be the policy of the Athletic Council, therefore, to attempt to arrange such a schedule as will justify claims for championship honors if the success of the team warrants such claim.

"The Centre game is a contest for which special preparation must be made, which prevents the orderly development of the squad and which has no bearing on the Southern Conference championship. This game will therefore not appear on the University of Kentucky schedule for the next year but the date will be filled by the University of Virginia which will be played at Lexington, Kentucky, on Oct. 25."

Thomson Ripley Bryant, B. S., 1908, is assistant director of Agricultural Extension at the University of Kentucky. He has offices in the Agricultural Experiment Station Building and his residence address is 241 South Ashland avenue, Lexington, Kentucky.

* * *

1909

T. C. Carroll, B. A., 1909, LL.B., 1910, is an attorney at law and is located in Shepherdsville, Kentucky. He has been county attorney of Bullitt County since 1918.

* * *

Frederick Harris Tucker, B. S., 1909, is senior chemist at the Delta Laboratories, Tallulah, Louisiana. His address is box 51.

* * *

Sara R. Kaufman, B. S., 1909, now is Mrs. Sidney B. Schwab. She lives in Denver, Colorado, where her address is 1079 South Ogden.

* * *

J. S. Horine, B. M. E., 1909, is associate professor of drawing at the University of Kentucky. His residence address is 252 East Maxwell street, Lexington, Kentucky.

* * *

1910

Reunion June, 1930.

Stephen E. Caudill, B. C. E., 1910, is an assistant division engineer with the Alabama State Highway Department. He is located in Decatur, Alabama, where his address is 438 East Moulton street.

* * *

Edward Hugh Lewis, B. C. E., 1910, is a supervisor for the Illinois Central Railway Company and is located in Jackson, Mississippi. His address is 640 Magnolia street.

Homer Wilson, B. A., 1910, is principal of the Union High School at Union, Kentucky.

* * *

1911

Wallace C. Duncan, B. M. E., 1911, is assistant manager of the lamp department of the International General Electric Company of New York. His residence address is 8 Orchard Square, Caldwell, New Jersey.

* * *

J. O. Lewis, B. A., 1911, is principal of the high school in Owensboro, Kentucky, where his address is 1802 Fredonia avenue.

* * *

Oscar Lee Day, B. M. E., 1911, is representing the Harbison-Walker Refractories Company in Cleveland, Ohio. His offices are at 1513 Rockefeller Building and his residence address is 1245 Lakeland avenue.

* * *

W. W. Stevenson, B. M. E., 1911, M. E., 1915, is located in Pittsburgh, Pennsylvania, where he has offices at 435 Sixth avenue. His residence address is 1125 Lancaster avenue.

* * *

1912

Robert Leslie Jones, B. M. E., 1912, is chief engineer for the Carrier Engineering Corporation and is living in Newark, New Jersey. His residence address is 312 Mt. Prospect avenue.

* * *

Jesse I. Miller, B. A., 1912, M. A., 1913, LL. B., 1914, is an attorney and counsellor at law and is located in Washington, D. C. His offices are located in Commercial Bank Building.

* * *

Derril W. Hart, B. A., 1912, M. A., 1916, is with the advertising department of Doubleday-Page and Company of New York City. His address is 244 Madison avenue, New York City.

* * *

1913

Mary Belle Pence, B. A., 1913, now is Mrs. George Martin Wolfe and is living in Winchester, Kentucky, where her address is 107 Potomac avenue. She recently moved there from Hazard, Kentucky.

* * *

Sylvan S. Price, B. S., 1913, is vice-president of the Omega Oil Corporation of Tulsa, Oklahoma. His offices are located at 1502 Philtower Building.

* * *
