

U. S. Steel Vice President A. B. Haswell, '11 Retires

Has Been Connected With TCI 43 Years

The retirement of Arthur B. Haswell as vice president-engineering of the Tennessee Coal & Iron Division of United States Steel Corporation was announced this fall by Arthur V. Wiebel, TCI president. The change was effective September 1.

Mr. Haswell joined TCI in October, 1812, as a detailer in the engineering department of the manufacturing division. He advanced to the position of draftsman, squad leader, chief draftsman and chief engineer, becoming assistant to vice president in construction in February, 1929. A year later he was made assistant to vice presidents in engineering and construction. Mr. Haswell was elected vice president in charge of engineering on January 1, 1947.

Directing engineering and construction requirements of all TCI improvements and enlargements since the late twenties, some of Mr. Haswell's major projects include the Fairfield Tin Mill and its subsequent improvements, modernization of the Fairfield Sheet Mill, No. 7 Blast Furnace at the Fairfield Steel Works, the Ore Conditioning Plant at Wenonah, and the Short Creek and Concord Coal Mines.

Mr. Haswell holds several patents on equipment and products concerning the steel industry, many of which are in use at TCI and elsewhere in United States Steel.

A resident of Birmingham since 1912, Mr. Haswell was born and reared in Hardinsburg, Ky. He earned his B.S. degree in Mechanical Engineering at the University of Kentucky in 1911, and completed post-graduate work there with the degree of Mechanical Engineer in 1914. He began his business career as a draftsman for the Atlantic Steel Company, Atlanta, in June, 1911.

Mr. Haswell is a member of the Alabama State Chamber of Commerce, the Birmingham Kiwanis Club, the American Iron & Steel Institute and the Mountain Brook Country Club. A 32nd degree Mason and Shriner, he

A. B. Haswell

is a past master of Ensley Lodge No. 560.

James W. Carnahan

books to cover up a sizable part of South Chicago. Their list has been a distinguished one, and they now look back on the history of the business with genuine pride. The list of authors includes Andrew Drushel, mathematician; Margaret E. Noonan, elementary education; John Withers, educator; Harry G. Paul, English; and Dr. George E. Payne, Dean of New York University. There were scores of others who produced books of high merit.

The Lyons and Carnahan House now has a fine list of authors and books. No adoption of textbooks in this country can overlook its solid list of books. Mr. Carnahan has the uncanny ability to visualize a good textbook in several major fields, and then he has the capacity to select the right author to do the writing. His readers, spellers, health books, and histories have been leaders. Educators everywhere have come to realize that the

Paul Warnecke, of Lexington, junior in the UK College of Commerce, was awarded a free trip to New York City for the 60th. annual Congress of the National Association of Manufacturers held there last December. He had been selected for an expense-paid trip by the national organization of Delta Sigma Pi, commerce honorary fraternity for outstanding students.

Carnahan spellers and readers constitute a good elementary education within themselves. The readers were adopted in the big California system and they have met competition elsewhere with a margin to spare. This is true of the spelling books. It is a highly satisfying thing to a publisher to know that he has books on his shelves which have been printed in many millions of copies.

Few men in the publishing field have ever had so great an impact on American education as has Mr. Carnahan. He has been a bold publisher who dared venture into new fields with new ideas. Like the Confederate veteran Robert, who had braved hardships of the Wilderness in Kentucky county following the Civil War, Carnahan has never hesitated to venture into new areas of publishing.

Today James William Carnahan is the dean of American textbook publishers. He stands alone in that field of American free enterprise with the warm satisfaction of knowing that he has made a great cultural contribution to his country. He has been an eminently successful businessman, and his precise knowledge of people kept him abreast of educational problems through his long and illustrious career.

Mrs. Mary Williams Carnahan died in 1954, and she lies buried in the native Laurel county at London. Carnahan's daughter, Edwina Karnahans, is married to Harry Karstens, active member of the Lyons and Carnahan Company.

No graduate of the University of Kentucky has done so much for education as has James William Carnahan. He has realized the dream of the University in applying so constructively his basic training. His distinguished list of authors and books is in fact an honor roll for the University of Kentucky.
