of Farawa. - Brown's Paint - Trees - Logging
addition and a plinters in 1800.

Thumb nail sketch of Grandfather Gibson
Grandmother, Grandmother Wetherley, Pappa,
Grandma,

1 Savings in blue small neck china caraf like jug.
Insurance policy when I was about 2 paid up life
Fourth of July fireworks. Charley Lunderson.

Sept 14, 1957

Get some special information
about the Highway to the
Highway 4 year project we heard
about.

Yesterday I was talking with
Jim Jermo and this topic came
up. He said that his brother's wife's
Uncle is really in on the deal,
as he is a great friend of one
of the committee.

The Uncle said he was
informed by this great friend of
his that they are going to put
in an experimental Highway so
only very few property owners
will be involved. A new alloy
has been only recently discovered
which will make this possible.
It is made of aluminum, magnesium
& fast. It's the fast that has
really made it possible.

The highway will leave the ground at a point and rise with the allowable 7 percent grade to the contact point in the mountain. What makes the possible is the use of Sky Hooks which will hold it in place.

Thus you see all the worries are over for the property owners as it will not hurt them in any way. The only noise will be a gentle and soothing hum like at B 29 when the traffic goes over it.

And added features will be safety bulges at certain points for hitch hikers to stand there way. Also in the event of wrecks, the wrecker will only have to dump the car over the side to the earth beneath.
