

London 10. 11. 1840

My dear Mr. Taylor

I have been thinking much of late of the
 various ways in which the mind is
 affected by the different parts of the
 body. It is a subject which has
 not been fully investigated, and
 I think it would be very
 interesting to see how far
 the different parts of the
 body are connected with the
 mind. I have been reading
 of the various experiments
 which have been made on
 the subject, and I am
 much interested in them.
