Student.

Walking back to the Law Library in Wednesday night's snowy deluge, two freshmen in the College of Law heard the anguished cries of coeds who had been locked in the Women's Gym.

Being Lafferty Hall gentlemen, they immediately waved and called back at the caged coeds.

When they realized the girls' blight, the two barrister apprentices rushed to their aid. They hurried across the moat of snow and attempted to free the imprisoned maidens.

An hour later with flashlight in hand, he searched the area to no avail.

And so a plea has been emitted from the all-male populus of Lafferty Hall—

"If anyone has found a green and silver Parker 51 fountain pen in the vicinity of the Women's Gym, please return it to the Office of the Dean of the College of Law."

Being fleet of mind, they sum-moned the campus police and the girls were set free within moments.

looks at

There are things going on in the world outside the grillostairs in the reading lounge, for example, the latest chapter of life, LIFE magazine, that is. LIFE, a virtual escape from life, is the pictorial condensation of the world's we- that gives you vicarious experience and inside info and makes you feel good inside because you weren't in the Moroccan earthquake last week. But you can be on the scene safely because the LIFE photographers were there to preserve it for you.

Civil Rights Riots

LIFE leads this week with the senatorial saga of the recent flibuster over civil rights. Those of you who are fighting the Civil War in American history classes will find the latest battle between the North and South good outside reading. You will find that UK is related to the world, since colleges are having rallies and there have been local sit-down strikes. Wisconsin

rioted last week. UK rioted too, a while back. Last week's record-time filibuster concerns the civil rights legislation hoped to be attained by the current wave of sit-down strikes in the South. A filibuster is a congressional marathon to which senator can shoot the most bull for the longest. Th articles will tell you why the Senate is playing this game. Editorially, LIFE defends the seemingly ridiculous move. Taxa-

tion without representation is tyranny, they say, and the Southern leaders know they are fighting a sham battle.

Harry Golden of North Carolina, where the current episodes began, writes two pages with graphic photos of the Southern racial incidents. You remember Harry Golden. He's the sagacious writer of the best-sellers "Only in America" and "For 2c Plain" who proposed to avoid sit-down strikes by re-moving seats from schools and restaurants. This article is serious though. Golden points out that the segregationist is dying, contrasting the clean-cut quiet Negro students with the white hecklers in black leather jackets.

Puritanism and Fig Leaves

LIFE is even provocative this week with the Garden of Eden scene available outside the boys dormitory walls. It's from the new movie, "Can Can," disapproved by Nikita Khrushchev, after a little prodding from Mrs. K., Shirley Macaine's in this one, without fig leaves. And the serpent has an hourglass figure.

he other extreme, there is the Amish sect, reactionaries gone wild, who are so adverse to progress that they won't let their children to modern schools. The Student Council is an tracurricular activity which distracts from their routine life. abridged to 13 families, the sect hibernates in the eastern hills of Pennsylvania. Thoreau, who went to the woods to live "deliberately," would admire their fervent purity, but 1 doubt that even Henry himself would survive for long in this anti-mundane movement. Of course as soon as these kids see what the outer world is like they are going to rebel and abound in

There's satire in LIFE this week. Princess Margaret's re-owned betrothed "commoner," Antony Armstrong-Jones, does satirical photography, including impressionism done by taking shots out of focus. And there's satirical drawing by blind hum-

shots out of focus. And there's saturical drawing by blind hum-orist James Thurber, who claims to sneeze for five hours in the morning with an allergy to consciousness.

"Let the meek inherit the earth—they have it coming to them," he says. His newest project is a book called "The Night-inghoul," about the people of a typical town called American-apolis and their reaction to a mechanical monster who "pecks the services of their public heldlings. away at the cornices of their public buildings

Thurber is a practical humorist, one who laughs perceptively, not merely to entertain but to effectuate a change, and

tively, not merely to entertain but to effectuate a change, and the people he hits the hardest go on laughing at him.

"I'm sort of a patron saint of all dogs," he says, unaware of UK's dog dilemma, which he could easily solve.

For those of you who will be in the botanical gardens doing your gardening as soon as the snow melts. LIFE has three pages of the 1960 chrysanthenums which have arrived just in time for spring. There are 15

LIFE

There's a feature-length article this week that reads like a short story. "The Great Quest of Robert Jones" is one of those strange but true stories, as search for gold in a desert cavern. Nine LIFE-sized pages worth.

worth.

Rounding out a well-rounded

Hope For The Future

Leaders of the third annual research conference sponsored by the Kentucky Research Foundation will present four awards tonight for outstanding research at UK in programs sponsored by the KRF.

The Kentucky Research Founda-tion administers all government and private grants for research at the University. Through the administration of these grants, KRF provides the University with one of the vital functions necessary to the maintenance of a high caliber educational in-

The foundation handles grants for cancer research from the National Institute of Health, funds for research in physics and chemistry from the Atomic Energy Commission, training of animals to be used in space flight test for the missile development branch of the U.S. Air Force, and exchange programs with underdeveloped countries to train technical per-

sonnel and teachers. Nearly every department on campus with a capa ity for research is working with funds being administered by the KRF.

Throughout the ages the unknown has been a challenge to men of science, and the providing of funds to capable researchers in universities all over the world has made a view into the unknown a possibility.

Research may mean a freer existence for those living in terror of still unconquered diseases, and may lead to a more plausible existence for the U.S. in a world fast being dominated by Russian supremacy in the field of missile development and space flight.

The Kentucky Research Foundation is to be commended for its admirable work in administering such vital

Its research may be the foundation of our future upon which we shall hope to build a better society free of ignorance and capable of providing security for generations.

The Readers' Forum

Money For Scholars

Would you, as a University student, give a dime to help educate a future president of this country?

The thought occurred to me after preparing a story about the upcoming Honors Program.

This program, scheduled to begin in September, will bring 25 outstanding students to the UK campus where they will embark on an intensive, fouryear, accelerated academic program leading to "graduation with distinc-

An Honors Program Committee and the program's director, Dr. Stephen Diachun, are concerned about financial gifts to relieve some of the students' money worries during their first year in the program.

For the price of a cup of coffee or a glass of beer, students on this campus could show their confidence in the Honors Program and play an important part in the higher education of a potential outstanding citizen.

I can think of nothing which would generate more pride in a university society and at the same time express a tangible confidence in the worth of higher education than a stipend provided by the students.

I envision no preference in the recipient, and would even suggest that students selected for the program go to democratic lengths of drawing numbers from a hat for the scholar-

As to what to call the scholarship, why not "Student Body Scholarship, or "Welcome Scholarship?

I'm not advocating the start of an annual solicitation of the student body. I don't even consider this suggestion as a solicitous advance.

Once the Honors Program becomes better known, it will probably be underwritten by funds from sources fully cognizant of the program's value.

I only suggest here that there's nothing like an expression of confidence or faith in a program at its beginning to bolster its chances for suc-

Ten cents from 5,000 students would provide a \$500 grant.

Even 800 students with a piece of "Coke money" could pay tuition far an Honor student for a semester.

My dime is in the pot. How about vours?

IIM PHILLIPS

Defends CORE

To The Editor:

It seems to me that the letter of March 8 defending local merchants misses the point about segregated lunch counters.

Variety store managers are happy to accept a Negro's money at the notions the jewelry counter, or whatnot. But if the same Negro tries to spend his money at the lunch counter in the same store, he will either be refused service or shunted to a special section "reserved" for members of his own race.

Let the store managers be consistent. They have three choices: (1) to exclude Negroes from their stores altogether, (2) to provide segregated notions counters, jewelry counters, etc. along with the segregated lunch counters, or (3) to give Negroes access to all parts of the store where commodities or services are

The commonsense choice is obvious, but the reluctance of the managers to elect it suggests that pressure of some kind must be applied (a lesson which Negroes have learned well after nearly a century of listening to empty promises). I admire the members of CQRE for their courage, intelligence, and de-termination to bring about long overdue changes by nonviolent means Aren't they being at least as "realistic as your anonymous correspondent?

In Defense Of Beatniks

Or, Whatever They Are

By BOBBIE MASON

I am always adverse to everything, even beatniks, but to be radical, I am going to defend something.

I underwent this transformation of character a couple of weeks ago when I was listening to a radio program, "Party Line," which airs the personal gripes of Lexington citizenry. I had to laugh-long and hard-when a lady called up and tearfully protested for 90 seconds against the noxious influence obeatniks on our black-jacketed youth.

Evidently she had just heard the inside story on these harmless creatu of rebelliously indifferent habits-that beatniks were perverted, shiftless sex maniacs dedicated to the evils of drug and drink. The coffee houses in town were her principal object of attack, since these places, unfit for public consumption, are responsible for r propagandizing the vices of coffee-drinking, smoking, fellowship, and hypersensuous music.

You are laughing, too. Whether this lady was serious, I do not know. But you know that these coffee houses, in all their "authenticity," are as harmless as the grill. In fact, that's what they are-the grill transported downtown. A night grill. A weekend grill-fest.

Perhaps these places do perpetrate corruption. I haven't seen any lately, from behind my front of naivete. I seriously doubt it, since they are as far removed from the Greenwich Village realm of beatdom as they are from the 18th century coffee houses of Samuel Johnson, the literary figure whose literary circle met intellectually to drink coffee and intellectualize. So, to follow suit, we gather to talk on nonintellectual topics. We join in scholarly pursuits on the mundane level. We drown out the music with conversation on how much we like jazz. We talk about the cultural aspects of college life, just like we do in the grill.

The local imitations only go to show how hard college conformity is to break down. We congregate and sociably sip abominable high-priced coffee and sample exotic ice cream creations or authentic Italian grape wine. Just like you read in the books. Just like Greenwich Village. Everything is genuine. Except ourselves. All we know is what we read in' the story books.

Yes, Mrs. X, we are corrupting our-

selves, being influenced by rather elusive

Since the campus is being overrun by aspiring beatniks, there are several things you must remember if you are planning to become a beatnik anytime soon. A friend of mine who is prospering out in Frisco as a professional beatnik advises on the standards of dress and behavior. She says that you must either have a beard or long, straight blond or black hair. You must have a black turtleneck sweater, sloppy clothes, and you must write poetry, smoke "pot," dig jazz, converse futilely, paint, and play the bongos. You must read widely and wildly of profound philosophies.

So, is an emphasis on ideas and culture perverted? Perhaps these "beatniks," wherever they are, are accomplishing more against the irrationality in society with a weapon of indifference than they would with active rebellion. At least, they are bringing attention to more important values in life and to the irrelevance of material things. If the right idea can't be put across by force, perhaps it can be by neutrality.

The "beatniks," as a rule, criticize conformity, but in their mass individu-ality they have been accused of being just as group-minded as the strongest organization. The people who follow their ideas apparently like them. They are the pseudos.

Probably after Mrs. X reads this, (which she probably won't because she seems to be out of contact with the world), she'll have a threefold misinterpretation, so I invite her to go inspect some of these places before she goes about condemning them.

But she's probably sitting at home right now with the door barred, frightfully glancing at the newspaper headlines, afraid that any minute a beatnik is going to come in and get her.

Fitz's Facts

By John Fitzwater

When basketball season was all over for the 1959-60 UK Wildcats, Coach Adolph Rupp took his stand and blasted the University student body for not supporting their team during the season

The men in blue played 13 games in Memorial Coliseum, nine while school was in session. It was a rare occasion when all of the seats alloted to the student body were filled.

Many times when the students elected not to attend the games, long lines of out-of-town Wildcat followers braved the weather to buy general admission tickets

Rupp remearked twice during the season that if the students didn't show more interest, a smaller section would be given to them in the future.

Seats occupied by the students could be sold to other

fans for \$2.50 and the Athletic Department could make a con-

fans for \$2.50 and the Athletic Department could make a considerable amount of revenue from them.

If Athletic Director Bernie Shively and Coach Rupp decide to cut the section, you can bet there will be a loud howl from the students, and those who howl the loudest will be the ones who chose a night on the town over the basketball games, and they have no howl coming.

Looking back over the past four years and high school All-Staters, you will find that only three of the boys hailed as the "commonwealth's best" cast their lot with UK.

These boys, Don Mills, Larry Pursiful, and Billy Lickert, all have done a good job for the Cats, but what a difference there

have done a good job for the Cats, but what a difference there would have been if others had come this way.

Ralph Richardson, 6-7 Eastern sophomore; Harry Todd, Bobby Rascoe, and Charlie Osborne, all at Western; and Dave Denton of Georgia Tech, to mention but a few.

Surely Kentucky, the biggest athletic machine in the state, can outbid the smaller state schools.

We are beginning to find out that even with LICKERT the nation's top coach, you have to have the material to stay Block And Bridle alive in the wake of a basketball surge by other schools.

If you believe in fate then you may believe that a decision made by Blanton Collier and the football coaching staff is a sign of good things to come.

The coaching staff decided to hold spring football practice after Easter vacation this season. They will have 30 days to get in 20 days of practice.

In the past, the team has practiced before Easter and many times would be halfway through drills by this date.

If they had tried to go on this year they would have lost a full spring drill.

I don't know who predicts the weather for Coach Collier but he might have saved the squad a lot of trouble this sea-

Useful Relic

Adolph Hitler built this concrete giant in 1940 to find whether the Berlin soil would support the weight of a huge arch of triumph he planned to build after winning the war. The structure is used today for a similar purpose—to determine whether Berlin soil will support new skyscrapers.

Mark Of Hitler's Vanity Aiding West Berlin Skyscraper Plans

BERLIN (AP)—An enormous years it sank another seven and a forms. Each platform was to covanity of Adolf Hitler is helping turn West Berlin into a city of small skyscrapers.

Most Berliners think the structure is just another air raid shelter left over from World War II. Several of these still dot the city.

In fact, it's an oddly shaped engineering laboratory.

The columns upholding it were down to stand on four concrete platforms. Each platform was to cover a surface 292 by 562 feet. This is between three and four acres, or roughly the area covered by the Capitol at Washington.

Naujoks says the tests at the mushroom show it could have been done.

All the Nazis would have had to do was win the war.

ngineering laboratory.

The Nazis built it to test the city's sandy soil. They wanted to see if the soil would bear the huge see if the soil would bear the huge triumphal arch they meant to put up after they won the war. For six years after the German defeat the mushroom lay idle.

Then someone got the idea of using it to test how much new weight could be borne by the foun-dations of bomb-damaged build-ings.

Successful experiments on this led to others. Now Lothar Naujoks, the young engineer in charge, always has a new project to take up when he has completed an old one. His tests have helped establish that Berlin's soil can support a lot more weight than anyone thought possible. "In spite of the proverbs about building on sand," Naujoks says, "it's not such a bad base. Clay is worse,"

worse."

He thinks it would be possible to bild 30-story structures in Berlin. So far the tallest is the new 21-story Telefunken Building— modest by American standards but American-looking to most Euro-

peans.

The Nazis began building their mushroom in 1940, to duplicate on a small scale the pressures their monument would bring into play.

monument would bring into play. It took them a year and nearly a quarter million dollars.

They sank it deeper than it is high. The overhanging head of the mushroom reaches a height of 48 feet. The narrow stem is mostly underground. In its first three
