

The Air Science Department offers two programs leading to a Bachelor of Arts or Bachelor of Science degree with a major in Air Science. In addition to general admission requirements, candidates must possess to a high degree the intellectual, physical and moral attributes desired in an officer of the armed services.

Uniform Equipment. Government uniforms and equipment are furnished the University for issue to students in the basic course without cost to the individual. Each student is required to make a deposit of \$10.00 with the Business Office of the University to cover the cost of any lost or damaged articles. If nothing is lost or damaged, the entire sum is refunded to the student when he completes the course or leaves school.

Students formally enrolled in AS III, The Advanced Course, will receive an Air Force uniform, under the commutation of uniform allowances system. This uniform is tailored to individual measurements. Students successfully completing the advanced course, Air Force ROTC, upon commissioning, will be permitted to retain these uniforms as personal property.

Subsistence. Advanced course, AFROTC enrollees receive an allowance of 90 cents a day for subsistence in lieu of rations.

Basic Course. The Department of Air Science offers a two year basic course. The basic course is required of all male freshmen and sophomores who are citizens of the United States, over 14 years of age, and who conform to the physical requirements as prescribed by the Department of Air Force for units of the Air Force Reserve Officers' Training Corps. (The basic course may also be taken in Military Science.)

Advanced Course. The elective and competitive advanced course of two years, including attendance at one Summer Training Unit for all students and the Flight Training Program for qualified personnel is offered to students who have been recommended by the President of the University and the Professor of Air Science for further training. Recommendations for this course will be limited to those students who have manifested special interest and demonstrated ability during the basic course, and who desire to pursue the course to completion, with a view to qualifying for a commission in the Air Force Reserve.

Reserve officers on active duty in the Air Force may compete for commissions in the Regular Air Force. Those who desire pilot or other technical training are permitted to train in grade as officers rather than as cadets.

ANATOMY AND PHYSIOLOGY

The courses offered by the Department are prepared with the purpose of making them of educational value and at the same time, providing a preliminary training in the theoretical aspects for those students who plan to study for advanced degrees in Anatomy, Physiology, or related subjects.

Premedical students who intend to obtain their degrees from the College of Arts and Sciences before entering a medical school and who choose Anatomy and Physiology as their major will have met all the requirements and recommended courses of study for all medical schools.

Students of Anthropology, Art, Agriculture (Animal Husbandry, Animal Pathology, Genetics, Home Economics), Education, and Sociology will find advanced courses that will be of practical value to them.
