SOLINET

John Bryant reports from ALA concerning SOLINET: The contract with OCLC has been signed. Tie in service should begin in December 1974. SOLINET will have a total of 150 terminals. UK will operate with two terminals.

A sizable grant for training purposes has been received in addition to \$600,000 from the Mellon Foundation appropriated to help finance SOLINET. Training sessions will be held in 11 southeastern cities sometime this fall.

UK is scheduled to receive terminals in Jan. 1975. However, with 50 other libraries also scheduled for installation in January, some delay may be anticipated.

Further details and plans will be forthcoming.
