

SECONDARY EDUCATION IN KENTUCKY

Schools and Types of Organization. There are 716 high schools in Kentucky. This number is in contrast to 738 operating last year, 808 five years ago, and 848 eight years ago. This means a decrease of 132 high schools in eight years.

Of the 716 high schools now operating, 643 are complete organizations; i. e., they offer a program of studies through the twelfth grade. Forty-four per cent of the complete high schools are organized on the six-year basis (grades 7-12). This represents an increase of 16 in the number of six-year high schools during the past year. The number of four-year organizations (grades 9-12) has decreased 13 in number during the same period. The number of junior high schools (grades 7-9) is 36. Twenty-one of them are found in independent districts while fifteen are located in county districts. There are only eleven senior high schools, grades 10-12. All are in independent districts except one which is a private high school.

The following table presents data regarding the number of the various types of high school organizations found in Kentucky:

TABLE I
Types of High School Organizations and Number of Each

Types of Organizations	County Districts	Independent Districts	Private Schools	State and Regional	Total
Grades 7-12	228	110	16	6	360
Grades 9-12	146	64	49	2	261
Grades 10-12	0	10	1	0	11
Grades 8-12	5	2	4	0	11
Grades 7-9	15	21	0	0	36
Grades 9-11	4	0	1	0	5
Grades 9-10	9	3	0	0	12
Grades 7-11	1	0	0	0	1
Grades 7-10	16	1	0	0	17
Grades 8-10	1	1	0	0	2
Total	425	212	71	8	716

The above table not only shows the number of different types of high school organizations but it also indicates the number of high schools under different types of control—county districts, independent districts, private, state, and regional. It will be observed that 425 high schools of all types are operated by county boards of education while 212 are maintained by independent districts. Seventy-one are

**PAGE(S)
MISSING**

private high schools. The remaining eight represent high school organizations which are operated by state teacher-training institutions, the State-supported high schools for colored at Paducah and Lincoln Ridge, the State School for Blind in Louisville, and Ormsby Village School in Jefferson County. The last named school is maintained by Jefferson County and the City of Louisville.

Size of High Schools. The following table gives an accurate picture of the size of the high schools operating in the State:

TABLE II
Size and Number of High Schools

Size Based on Enrollment	County Districts		Independent Districts		Private Schools		State and Regional		Total
	White	Colored	White	Colored	White	Colored	White	Colored	
Below 50	22	8	1	8	12	0	0	0	51
50-99	112	5	15	23	22	1	1	1	180
100-199	187	2	59	12	22	0	3	0	285
200-499	81	1	52	7	11	0	2	1	155
500 and above ...	9	0	29	4	3	0	0	0	45
Total	411	16	156	54	70	1	6	2	716

The table above shows that 51 high schools, public and private, enroll fewer than 50 pupils. Last year this number was 66. Two years ago the number was 86, a decrease of 35 in the number of these very small high schools in two years. Twenty-eight of the high schools enrolling fewer than 50 pupils are private high schools and high schools for Negroes. The above table also discloses that there are 231 high schools enrolling fewer than 100 pupils. Last year this number was 253 while two years ago this number was 302. A decrease of 71 in two years of the number of high schools enrolling fewer than 100 pupils. Of the present number of 231 high schools enrolling fewer than 100 pupils, 68 are private schools and high schools for Negroes. This table also shows that this year the number of high schools enrolling from 100-199 pupils is 285; last year this number was 279 schools. When one compares the number of high schools enrolling 200 or more pupils one finds a slight decrease in numbers when compared with those of last year. This year the number is 200, while last year the number was 206. The above figures indicate that the number of small forty,—fifty,—and seventy-pupil high schools are disappearing, with a tendency, through consolidation, to develop high school centers with enrollments from 100 to 200 pupils.

The number of small public high schools which continue to exist are not continuing so much because of a conviction of their worth but rather on account of such facts as sparseness of population in areas where they are located, poor road conditions for transportation to larger and better centers, or inadequate financial ability to operate a better system of schools.

As has been pointed out, the number of small high schools is decreasing. Considerable of this decrease is due to the regulations of the State Board of Education in reference to the number of teachers employed and the number of pupils enrolled in the various types of accredited high schools.

Class A High Schools

(1) Four-year high schools (grades 9-12) and three-year senior high schools (grades 10-12) shall employ at least five full-time teachers and have a bona fide enrollment of at least one hundred pupils.

(2) Six-year high schools (grade 7-12) shall employ at least seven full-time teachers and have a bona fide enrollment of at least one hundred and fifty pupils, one hundred of whom shall be enrolled in grades 9, 10, 11 and 12.

Class B High Schools

(1) Four-year high schools (grades 9-12) shall employ at least three full-time teachers and have a bona fide enrollment of not fewer than sixty pupils.

(2) Six-year high schools (grades 7-12) shall employ at least four full-time teachers and have a bona fide enrollment of not fewer than eighty-five pupils, sixty of whom shall be enrolled in grades 9, 10, 11 and 12.

The above regulations went into effect last year. Prior to last year, local school authorities were notified from time to time regarding the fact that these regulations were to go into effect. The Division of Supervision of the State Department of Education has cooperated and will continue to cooperate with local school authorities in adjusting their high school programs to meet these requirements. In passing, it might be noted that since the meeting of the Accrediting Committee of the College Association in December, county school authorities and the Division of Supervision have worked out a number of satisfactory programs by which their small high schools, failing to meet Class B requirements, will be provided for at larger high school centers next year.

Table IV shows a continuous growth in the number of high schools from 1915 to 1935. As pointed out earlier in this statement, since 1935 there has been a decrease of 132 in the number of public and private high schools in the state; 114 of this number have been public high schools while 18 have been private secondary schools. The decrease in the number of public high schools has come about very largely as a result of their merger into larger school centers.

TABLE V
Enrollment by Years in Different Types of High Schools

1941-42	119,398	10,173	10,339	139,910

* Beginning with the school-year 1932-33, the enrollments of the seventh and eighth grades of six-year high schools and of junior high schools are included in the totals.

Table V presents an interesting picture of the increase in high school enrollments in the different types of high schools since 1915 to the present day. It will be noted, however, when one observes the total high school enrollment for this year and the total high school enrollment for last year, that there has been a decrease of 4,537 pupils. Both the public white high schools and public colored high schools show a decrease. It is especially marked in the case of the public white high schools. It is only in private high schools that there has been an increase in enrollment as compared with the enrollment of last year. This increase has been slight. Doubtless our total public high school enrollment is now reflecting the decreasing enrollments of past years in our elementary schools. It is also probable that some of this decrease can be attributed to the fact that a number of high school pupils have dropped out of school either to enter defense industries or to enter some type of defense training that their local schools do not provide.

1941-42	510	56	70	636

Table VI shows the situation as regards the number of accredited high schools, by years, since 1909. When one thinks of a high school in its true sense, one thinks of an institution that offers a program of work through the twelfth grade. High schools that are organized to give work which does not extend through the twelfth grade, excepting junior high schools (grades 7-9), should be looked upon as incomplete, feeder schools for regularly organized high schools; i.e., schools that offer pupils a complete high school program through the twelfth grade.

Negro High Schools

The number of Negro people in Kentucky has been reducing for many years. They now constitute no more than seven to each one hundred people in the state. They tend to concentrate in coal mining areas, where the men work in industry, and in cities and towns, where the women and the men work in domestic and personal service. Outside of these areas the Negro population has become so sparse that it is very difficult and expensive to provide their separate school service. The problem of high school service for them is especially difficult.

No more than forty-five counties have enough Negro population to make a twelve-grade school seem practical. Fifty-nine counties have no Negro high school service, and must send all their colored pupils to high schools in other counties. Ten others have only junior (incomplete) high schools, and send the upper grades away. Only forty-seven counties have approved complete colored high schools, and four have unapproved schools.

This situation has led in some areas to cooperation by counties to maintain regional high schools. The high school in the city of Hickman serves all the city and county districts of Fulton, Hickman and Carlisle counties. The twelve-grade Paducah city school serves the counties of McCracken, Ballard and Livingston. Princeton has the only twelve-grade school in the counties of Caldwell, Crittenden, Lyon and Trigg. The Covington school serves several counties in the North, and Maysville several in its area. These two are the only twelve-grade Negro schools in the twelve Ohio River counties between Louisville and Ashland.

A county that has only six or eight high school pupils, widely scattered over the county, finds it cheaper to pay their board than to transport them each day to high school in some other county. Most of the pupils provided for on the boarding plan are sent to the state vocational high school at Lincoln Institute. Some go to the state trades school in Paducah. There a pupil in the last two years of high school may be taught a trade in two years and get high school credit. These two schools and the college at Frankfort, all operated by the state, have the only school dormitories open to Negroes in Kentucky. As a rule, districts within a county cooperate in colored high school service. The only exceptions are in Harlan, Hopkins and Montgomery counties, where separate districts have separate high schools. This weakness is about to be corrected in Montgomery, and should be in Hopkins. Long distance and large numbers justify two high schools in Harlan County. In Bell, Fayette and Warren the cooperation is limited to the upper high school grades, with separate schools for beginning grades. This is justified in Bell and Fayette by well equipped and efficiently operated junior schools, and in Bell by long distance, but the separate school is not justified in Warren.

Less than one seventh of the children in school census, ages six to eighteen years, are enrolled in our public and private high schools, grades nine to twelve. The percentages, rough measures of effort, are: white, 13.6% ; colored, 13.4%.

The grade distribution per hundred of this enrollment follows:

	Gr. 9	Gr. 10	Gr. 11	Gr. 12	Total
White,	31	28	21	20	100
Colored,	35	29	20	16	100

The percentage of loss from ninth to twelfth grade is 36 for the whites and 54 for the colored. 54 is 50% more than 36. This fifty per cent difference carried on year after year for a generation, constitutes a heavy handicap to the colored.

Why should membership loss in high school be fifty per cent greater for colored than for white? Is it due to the fact that some local school officials give the colored schools less time and encouragement? Less transportation? Poorer teachers? Impoverished curriculum? Fewer shops and less shop equipment? Our white high schools owe a debt of appreciation to the great leader Booker T. Washington, who taught us to train the hand as well as the head, to *do* as well as to *know*.

In the colored schools, as in the white, enrollments slightly short but meeting other requirements and assuring full compliance next year, were for this year only given the benefit of rating.

* Interpretation of High School Ratings.
 A—Accredited through the entire high school course (through grade twelve).
 B—Accredited through the entire high school course (through grade twelve).
 T—This initial when attached to the designation of any rating indicates that such rating is given in the face of some deficiency, that it is temporary for this year only, and that the school should be discontinued at the close of this school year or reorganized in full compliance with regulations for accrediting.
 E—This initial suggests that an **emergency** is recognized to exist that may justify the operation of the school even with an observed shortage in the number of pupils or of teachers.
 U—Unaccredited.
