## FOREWORD

Each year, the State Department of Education, through the Division of Supervision, prepares and issues this bulletin designed to give pertinent information for the high schools of the state.

The material found in this bulletin is divided into three parts. Part I sets forth recommended policies of the Department regarding granting high school credit for peacetime military service. Part II presents a short statement concerning library services that are now offered the schools by the State Department of Education. Part III presents a brief statement of facts regarding the present high school situation in the state and also a list of the public and private high schools. It is in this part of the bulletin that one will find the accredited rating of each high school.

It is hoped that the superintendents and principals will study the material found in this publication. The material was prepared by Mark Godman and Sam Taylor of the Division of Supervision.

JOHN FRED WILLIAMS

*Superintendent of Public Instruction*

## Part I

### RECOMMENDED POLICIES FOR PEACETIME MILITARY SERVICE

The State Department of Education receives many requests for a statement of policy and recommendations relative to the continuation in *peacetime* of the policies of the State Board of Education adopted during *wartime* regarding the matter of granting high school credit on the basis of educational training and experience in the armed services. The adopted policies of the State Board of Education in this regard were outlined and discussed in the April 1946 bulletin of the State Department of Education. It is assumed that principals and other school administrators are familiar with the policies set forth in this bulletin.

Thousands of young men will continue to serve in the armed forces during peacetime, and many of them will attain measurable educational growth while in the service, just as others did during the war. The State Department of Education believes that it is sound educational practice to grant appropriate high school credit for any measurable growth or achievement, however or wherever attained in the armed services. It is believed, however, that systematic education is best attained by regular attendance in school and that peacetime policies along this line should be so designed as not to encourage young men to leave school. If young men do leave high school before graduation to enter the armed services, then *they should not obtain their diplomas before such time as they would have obtained them by normal attendance.*

There are five recognized types of educational experience or growth in the armed services. These are: (1) basic or recruit training, (2) service schools, (3) correspondence courses conducted by the United States Armed Forces Institute (USAFI), by cooperating colleges, and by the Marine Corps and Coast Guard Institutes, (4) the off-duty class programs conducted in all the services, and (5) educational maturity as measured by tests of general educational development.

The following recommendations are made with respect to granting high school credit in each of these five types of educational experience:

1. *Basic or Recruit Training.* Since present Selective Service

regulations ordinarily do not require a man to leave high school before graduation, it is

NO LONGER RECOMMENDED that credit be granted for basic or recruit training toward a high school diploma, for young men entering the services *after the conclusion of hostilities*.

2. *Service Schools*. The recommendations for credit for service schools are contained in the *Guide to the Evaluation of Educational Experiences in the Armed Services*, published by the American Council on Education, Washington 6, D. C. These recommendations for credit are based upon measured achievement of valid educational experiences. Each high school principal should have a copy of this *Guide* book. It is

RECOMMENDED that high schools continue to grant credit in *peacetime* for educational experiences gained in service schools, as recommended in the *Guide*.

3. *Correspondence Courses*. Correspondence courses offered by USAFI, by collegiate extension divisions, and by the Marine Corps and Coast Guard Institutes will be available to men in the peacetime military services. Since these programs are similar to courses offered by civilian institutions, and achievements are measured by examinations, it is

RECOMMENDED that schools accept these courses for credit in the peacetime program, as recommended in the *Guide*.

4. *Off-duty Class Study*. The peacetime educational programs in the services provide for an expansion of off-duty class instruction, under competent direction, using USAFI educational manuals. Achievements in this program are measured by USAFI examinations. It is

RECOMMENDED that schools continue to grant credit for this class study, as recommended in the *Guide*.

5. *Tests of General Educational Development*. A recent bulletin of the Commission on Accreditation of Service Experiences, American Council on Education, has this to say regarding these tests. "Early in the war, it was recognized that many men in the armed services would acquire educational growth which would not lend itself to measurement in terms of conventional subject classifications. These educational achievements were attained

through civilian and military occupations, travel, reading, self-directed study, discussions, lectures, motion pictures, and a wide variety of other experiences. The tests of General Educational Development were designed to measure these attainments in general terms and to equate them to a level of education. The high school tests were standardized at the high school graduation level.

“The need for the measurement and recognition of this educational maturity is manifest. Hundreds of thousands of veterans, beyond the normal high school age, have had their educational development and competence recognized and have become eligible for job opportunities, entrance to college, and other advantages. This program has had almost universal acceptance and recognition as being educationally sound. There is nothing in the change from wartime to peacetime which modifies either the need for or the soundness of this type of educational evaluation.” It is therefore

RECOMMENDED that the use of tests of educational maturity, such as the Tests of General Educational Development, be continued as recommended in the *Guide*.

In accordance with the judgment stated earlier, it is

RECOMMENDED that such tests NOT be administered or recognized as a measure of high school equivalence until after the class of which the man was a member has been graduated.

In order that there be no confusion in the matter of the policy of the State Board of Education regarding the issuance of a high school diploma on the basis of educational training and experiences in the armed services, it is thought advisable to repeat the policies adopted by the State Board of Education, February 25, 1946.

“High Schools may issue regular diplomas according to either of the following plans:

“a. The high school may issue a regular diploma to a person in military service or to a veteran who has completed 12 or more units in regular high school attendance and who presents sufficient additional units of credit from the United States Armed Forces Institute, from service schools, and from other educational programs in the armed forces to complete the school's requirements for graduation. Variations from this standard are subject to the approval of the Director of Supervision.

“b. The high school is permitted to issue a regular diploma, regardless of the number of units that a person in the service or a veteran has earned in high school, provided he has established through use of the **General Educational Development Tests** edu-

cational progress equal to or above that required for the high school.

"It is further recommended that the high school require the examinee to satisfy **either** (not necessarily both) of the following requirements: (1) that he make a standard score of 35, or above, on each of the five tests in the battery, or (2) that he make an average standard score of 45, or above, on the five tests in the battery.

"The diploma granted on the basis of military credits or on the basis of results on the General Educational Development Tests must be granted by the school in which the student last earned credit. In the case of a person with no high school credits and who has passed the General Educational Development Tests satisfactorily, he may be granted a diploma from a high school that is designated by the school authorities of the district in which he, if a veteran, now resides or in which he as a person in active service may designate as his residence."

The following schools and officials have been designated and appointed to serve as Testing Centers and Directors to administer the United States Armed Forces Institute's General Educational Development Tests to veterans who elect to qualify for a high school diploma by means of taking the tests:

Name of Center	Director	Address
Ashland Junior College .....	Mr. Floyd Hall.....	Ashland
Centre College .....	Dr. T. E. Cochran.....	Danville
Eastern State Teachers College .....	Dr. Dorland Coates.....	Richmond
Kentucky St. College for Negroes.....	Dr. J. T. Williams.....	Frankfort
Kentucky Wesleyan College .....	Dr. H. M. Pyles.....	Winchester
Lindsey Wilson Junior College .....	Dr. John Montgomery.....	Columbia
Morehead State Teachers College .....	Dr. W. C. Lappin.....	Morehead
Murray State Teachers College .....	Dr. E. H. Smith.....	Murray
Pikeville Junior College .....	Miss Alice Record.....	Pikeville
Sue Bennett Junior College .....	Miss Ola Lee Barnett.....	London
Union College .....	Dr. S. W. Grise.....	Barbourville
Villa Madonna College .....	Sister M. Irmina.....	Covington
University of Kentucky .....	Dr. Lysle W. Croft.....	Lexington
Western State Teachers College .....	Dr. E. H. Canon.....	Bowling Green
Daviess County High School .....	Miss Margery Settle.....	Owensboro
Hazard High School .....	Mr. Roy G. Eversole.....	Hazard
Madisonville High School .....	Mr. Sam B. Pollock.....	Madisonville
Monsarratt Jr. High School .....	Mr. Charles H. Hargan.....	Louisville
Owensboro High School .....	Mr. J. W. Snyder.....	Owensboro

### Procedures

1. The veteran will initiate his application for the GED Tests or Subject Matter Tests with his high school principal or superintendent.
2. The principal or superintendent, whichever he may be, together with the applicant, will make out the application in duplicate; mail the original copy direct to the officer in charge of the Testing Center most convenient to the veteran; keep the duplicate copy for his own files. The fee should be inclosed with the application, preferably to be paid by the applicant's board of education.<sup>1</sup>

<sup>1</sup> The fee for the entire GED battery of five tests is \$2.25. The fee for Subject Matter Tests is \$1.25 for the first one and 25c for each additional one taken at the same time.

## Part II

### LIBRARY SERVICES OFFERED TO SCHOOLS

Recognizing that functional library service is an integral part of the total school program, and that the schools of the state need assistance with this phase of their instructional work, the State Department of Education added to its staff on February 1, 1947 Miss Louise Galloway, who is serving as School Library Consultant. Miss Galloway took her general college work and professional library training at the University of Kentucky and was graduated in 1941. She has had additional training at Columbia University in the fields of library service and general education. Her five and one-half years of experience as a school librarian in a variety of situations that encompassed the entire twelve grades admirably fits her to work with the school people of the state toward the development of adequate elementary and high school library service. It is Miss Galloway's wish that the program of services which she develops will evolve as a result of the expressed needs of administrators, teachers, and librarians as they plan and work toward more effective library service in their local schools.

*The chief requisites of effective library service are:*

1. An adequate supply of materials useful for enriching the curriculum.  
This involves more than books and pamphlets. The school library is the proper agency to develop, maintain, and dispense all multi-sensory aids to learning such as pictures, maps, charts, films, recordings, slides, models, and figures.
2. Proper housing, equipment, and organization to render the collection of materials useful.  
Depending upon the local situation, these three elements may be set up more simply, but with no less consideration to the ends to be served, than another situation that requires a more complex physical plant and a more elaborate organization of its materials.
3. A person in charge definitely scheduled to be on duty in the library for an adequate portion of each school day, and one who has both teacher training and library training.
4. Integration of the library services into the total school program.  
The end toward which all library service should lead is maximum use of all its phases by the teachers and the pupils. Only to the extent to which it is a cooperative undertaking of the entire staff will the results be successful.

*To help schools in their endeavors to achieve these essentials the School Library Consultant, through visits or correspondence, is ready to offer assistance in:*

1. Selection of books and other library materials by:
  - a. Providing critical evaluations of reference sets sold by agents
  - b. Suggesting criteria and procedure for the selection of materials
  - c. Advising upon reliable sources from which materials may be secured
  - d. Making available for examination a sample collection of recent books suitable for school libraries.
2. Analysis of the library situation with the local school staff to determine the best physical set-up to serve their particular needs. Suggestions might be in the form of:
  - a. Floor-plans for new or remodeled quarters
  - b. Lists of necessary equipment and the practical arrangement of it
  - c. Lists of supplies and the best sources for their purchase
  - d. Aid in planning a budget, setting up a circulation system, and organizing the collection of books and related materials.
3. Programs of in-service training of librarians and teacher-librarians, and advising with librarians, teacher-librarians, and administrators about professional library training during summer terms.
4. Expansion in the use of existing facilities and planning for the extension of services to include the entire school program.

Any school that is concerned with its instructional program must take heed of the materials of instruction. A curriculum confined to basal and supplementary textbooks is not enough. In schools where there is a variety of suitable library materials purchased for the purpose of enriching the curriculum and stimulating reading for pleasure the overall result has been a lessening of difficulty with the mechanics of reading and expansion of reading interests.

Schools are urged to contact Miss Galloway for help in building a more effective library program throughout their entire system.

### Part III

## KENTUCKY HIGH SCHOOLS—1946-47

*Schools and Types of Organizations.* There are 648 high schools in Kentucky. This number is in contrast to 674 that operated last year. These high schools are of various types of organization. Of the 648 high schools now operating, 590 are complete organizations in that they offer work through the twelfth grade. The remaining 58 high schools, because they do not offer work through the twelfth grade, are considered incomplete, feeder organizations. Of the 58 incomplete organizations, 39 are separate junior high schools, organized as one unit, offering work through grades 7, 8, and 9. The remaining 19 high schools are incomplete organizations that offer work only through the tenth or eleventh grades.

Of the 590 complete high schools, 340 are operated by county boards of education while 172 are maintained in independent school districts. The remaining 78 complete organizations are either private secondary schools or schools that are operated by the state in connection with state institutions.

This year the six-year high schools, grades 7-12, represent 45 per cent of the total number of organizations while the traditional four-year types of organization represent 43 per cent of the total number of high schools. The other 12 per cent of the complete organizations represent a modification of the six-year or four-year types of school organizations.

The following table presents data regarding the number of the various types of high school organizations in the state.

**Table I**  
**TYPES OF HIGH SCHOOL ORGANIZATIONS AND NUMBER OF EACH**

Types or Organization	County Districts	Independenent Districts	Private Schools	State or Regional	Total
Grades 7-12....	178	97	13	5	293
Grades 9-12....	156	62	52	1	271
Grades 8-12....	4	5	6	0	15
Grades 10-12....	1	9	1	0	11
Grades up to 11....	3	0	0	0	3
Grades up to 10....	14	0	1	1	16
Grades up to 9....	17	22	0	0	39
Totals .....	373	195	73	7	648

The above table not only shows the number of different types of high schools that are found in the state but it also indicates the number of high schools operating under different types of control. It will be noted that 373 are operated by county boards of education while 195 are maintained by boards of education in independent school districts.

The total number of high schools for the current year represents a decrease of 26 high schools when compared with the number that were in operation last year. Three of the high schools that have ceased to operate were maintained for colored pupils, two were private high schools, while 21 were public white high schools.

**Table II**

1934-35.....	684	75	89	848
1935-36.....	680	75	83	833
1936-37.....	663	78	77	818
1937-38.....	652	80	76	808
1938-39.....	628	80	75	783
1939-40.....	605	78	75	758
1940-41.....	592	74	72	738
1941-42.....	574	71	71	716
1942-43.....	555	71	71	697
1943-44.....	541	70	70	681
1944-45.....	542	66	73	681
1945-46.....	536	65	73	674
1946-47.....	513	62	73	648

Table IV shows there was a continuous growth in the number of high schools from 1915 to 1935. It was in 1935 that the state had its greatest number of high schools—848. Since there are now 648 high schools, public and private, it is clear that there has been a decrease in numbers of 200 since 1935. The decrease in the number of public high schools has resulted very largely from their being merged into larger school centers.

**Table V**

Table V presents an interesting picture of the increase in total high school enrollments in different types of high schools since 1915. From 1915 to 1941 the high school enrollment increased 128,900 or over 800%. After 1941, however, the enrollment began to decrease and continued to decrease until 1944. During these years, which represents the war period, the high school enrollment decreased about 23,000 pupils. Since 1944 the enrollment has begun to increase, there now being approximately 10,000 more high school pupils enrolled than in

1944. Unquestionably, high school enrollments are due for a considerable increase. This year there are 6,056 more pupils enrolled in public white high schools than were enrolled last year. In the public colored high schools, 542 more pupils are enrolled. The private high schools had an increase of 1,341 enrollment.

Table VI shows the situation as regards the number of accredited high schools by years since 1910. When one thinks of a high school in its true sense one thinks of an institution that provides its students a program of work through the twelfth grade. High schools that are organized to give work that does not extend through the twelfth grade should be looked upon as incomplete, feeder schools for regularly organized high schools; i. e., schools that offer pupils a program through the twelfth grade.

The high schools in Kentucky are accredited by the State Board of Education. This applies to both public and private schools. In arriving at the official ratings given the high schools the State Board of Education usually follows the recommendations of the Commission on Secondary Schools of the Kentucky Association of Colleges and Secondary Schools. The members of this Commission meet with the Public School Supervisors and canvass the annual high school reports that are made to the State Department of Education and also the reports of the Supervisors' inspections.

*Teachers.* There are 5,812 teachers employed in the public and private high schools of the state. Included in this number are 2,522 who are employed in county high schools, 2,601 employed in high schools located in independent districts, 79 in state or regional high schools, and 610 in private secondary schools. Of the total number of high school teachers employed in the state, 488 are teachers in public high schools for colored pupils.

*High School Graduates and College Attendance.* Last year the high schools of Kentucky had 16,396 graduates. Of this number, 5,486 entered college in the fall. Of the total number of high school graduates, 14,465 graduated from public white or public colored high schools, and of this number, 4,711 or approximately 32 per cent entered college. In the private secondary schools there were 1,931 graduates, of whom 775 or approximately 40 per cent entered college.

Interpretation of High School Ratings.  
 A—Accredited through the entire high school course (through grade twelve)  
 B—Accredited through the entire high school course (through grade twelve)  
 11 Gr.—Accredited through grade eleven.  
 10 Gr.—Accredited through grade ten.  
 9 Gr.—Accredited through grade nine.  
 9 Gr.—Junior high school—recognized through grade nine.  
 T—This initial when attached to the designation of any rating indicates that such rating is given in the face of some deficiency, and that the accredited rating of the school should be terminated at the close of this school year.  
 E—This initial suggests that an emergency is recognized to exist that may justify the operation of the school even with an observed shortage in the number of pupils or of teachers.  
 U—Unaccredited.
