

July 6 - 93 Sumner Ky

Prof James H Patterson Dear Sir Excuse me for  
not answering your letters I have bin very sick and but well  
now you spoke of heading & stave I wrote to Mr Reno  
in regard to them before I made any ties I told him I  
<sup>could</sup> ~~would~~ take advantage to some time to make it bring  
you more money by <sup>working</sup> some of them I have his answer  
it is satisfactory to make them  
the price of a car load ties  
a car load is 150 ties at 6 each would be 9 dollars  
a car load of heading is 5000  
at 3 pr 1000 will bring you 15<sup>00</sup> dollars  
So the heading & staves brings one third more than  
I would in ties over

47-M-64

So if you will give this letter  
good consideration you will see what timber  
I have worked I tried to make it bring the  
best price I could hoping all is satisfactory  
I handed in to Mr Reno 12<sup>00</sup>  
pay for 4000 the remainder will

be paid for as soon as I can have  
them to Central City and have them  
taken up + counted correctly

Respectfully yours Samuel Silvey

July 18, 1893

## WHAT IS A MUNICIPAL BOND?

Everybody knows that, you will say. But, it is a fact that many people do *not* know what a municipal bond is. It is the promise, or direct obligation, of a City, Town, County or School District to pay money at a certain specified time, secured by a *direct tax lien* upon all the property within the City, Town, County or School District. This constitutes a municipal bond.

We have just passed through a panic in the stock market. Fortunes have been wiped out, and people have daily seen their property depreciate in value but what has been the effect upon municipal bonds? Holders of these securities have lost nothing. The depreciation upon them in times of financial depression is slight, and they get their dividends at regular intervals, as usual. Stocks, being affected by all sorts of happenings and physical facts, go up and down, following the state of the money market, the state of the crops, the earnings of the roads, etc., but a depreciation in municipal bonds is *almost unknown*. The owner calmly walks up and presents his coupons every six months and draws his interest whether the stock market be up or down.

Long experience has taught that municipal bonds are probably the *safest* form of investment. The rate of interest is not quite so high, perhaps, as the income on stocks, but in the long run the amount received will, we think, be at least equal, for frequently stocks pass their dividends or largely reduce them, while such occurrences in municipal bonds are practically unknown. The tendencies of these latter securities is constantly *to increase in value*. An evidence of the esteem in which they are held, is the fact that a large percentage of all the savings of the banks of New England is invested in municipal bonds. In nearly every State in the Union the issuance of such bonds is hedged about with careful constitutional and legislative restrictions. It is very seldom nowadays that you hear of a default or case of repudiation. The laws are now well defined, and municipalities are educated in the matter of issuing bonds. In times of financial excitement, this is a strong feature.

Another strong feature is that they are the best of collateral, the banks being willing at all times to lend close to their face value.

BANK NO. 4356.

## FIRST NATIONAL BANK.

GREENVILLE, KY., July 12 1893

Mr Patterson

I enclose letter from  
Mr Silvey in reply to the  
one I wrote him.

I think I sent you his  
statement of timber cut when  
I made the remittances to  
you for his acc't

I hope all of you enjoyed  
the trip to Old Point and  
were much benefited  
Heard unusual health and  
am in love to all -

Geo Gordon was sick for  
a few days is about well

Yours &c  
Lewis Reno

47-M-64

Mercer Ky July 23-73  
James N Patterson Esq  
Lexington Ky

Dear Sir

Your favor of the  
11 inst to hand in answer  
Will say I have investigated  
The business you mention and  
Find that Sylvia has put  
About 75.000 Staves and heading  
and has moved away from  
Here and there is no one on  
The land at present

Yours Truly  
C. J. Clemmons

July 29 - 1893

Dear Mr. Ly

Mr. Louis Reno find enclosed  
18.42 Eighteen dollars & 42 cts  
to pay for 309 tires taken up  
in July

I will clean up now in  
a short time

& give a final settlement  
for all

Yours truly

Samuel Sidney

BANK NO. 4356.

## FIRST NATIONAL BANK.

GREENVILLE, KY., Aug 2 1893

Mr James H Patterson  
 Lexington Ky My Dear Sir  
 Enclose  
 letter from Mr Selvey showing  
 \$1842 due you for 307 lbs  
 and I enclose check for  
 same amount.

You will see his remarks  
 as to final settlement.

We are moving along very  
 quietly here - The town will  
 flourish does not seem to have  
 effected our people very much.

Hope the prospects are good  
 for an increased attendance  
 at the college this year

We have in love to all

Yours Truly  
 Lewis Reno

A. J. JOHNSON CO., NEW YORK,  
PUBLISHERS.

ROBERT LILLEY, Managing Editor.

Madison, Wisconsin, November 29, 1893.

President James K. Patterson,  
State College of Kentucky,  
Lexington, Kentucky.

Dear President Patterson:

I regret exceedingly that my first letter, sent on the 27th of October, should have been lost, for it contained not only the original article on Kentucky but also certain suggestions as to the nature of the new article desired. I should be very much gratified if you could prepare the article; and I will now send a copy of the plan of the article, subject, of course, to such modifications as you may deem necessary. It is intended only as suggestions. The article should contain between seven and eight thousand words. In my former letter I stated January 1st, as the time when the article should be in my hands. I think in view of the delay I can provide for its extension to January 15th.

The compensation allowed for these articles, as for very much literary work, is not large; but the publishers have found writers not unwilling to comply with the conditions offered. A set of the Cyclopaedia, in eight volumes, half Turkey morocco, royal octavo, price \$56.00, is given. I hope you can do the work. If you should think it out of the question, you would confer a great favor upon me by indicating some person in Kentucky who would do the work well, and who is so well known that his name appended to the article would be a voucher for accuracy. An early reply is respectfully solicited.

Accept of my thanks for your kindly words at the end of your letter. We are very happy here, and the University is very prosperous.

Very truly yours,

47-M-64

President James K. Patterson,  
State College of Kentucky,  
Lexington, Kentucky.

Dear Sir:

I am requested by President Adams to state that he very much regrets your inability to write the article on "Kentucky" for Johnson's Universal Cyclopaedia, but that he will avail himself of your suggestions in reference to other writers.

Very truly yours,

*W. J. Hestand*  
Private Secretary.

Abbreviated Address for Telegrams: U.S.A. London!

EVERY READER HIS OWN IMPORTER OF  
ENGLISH BOOKS AT ENGLISH PRICES.

B. F. STEVENS'S American Library and Literary Agency was established in London in 1864 for the supply of European books to Public Libraries and private collectors in the United States. The facilities and economies offered by this agency to book buyers in America include:

Prompt execution of orders. All books are despatched by early mail or steamer.

New Books are charged at trade prices, which are usually twenty-five per cent off the price of publication.

OLD OR SECOND-HAND BOOKS are charged at lowest nett prices.

Commission of ten per cent on trade or nett prices. Book postage to America is only one halfpenny for every two ounces up to four pounds weight.

B. F. STEVENS makes weekly consignments to his New York agents, thus affording a prompt and economical means of receiving parcels of books.

The packages are cleared and delivered in New York without trouble to the consignees, each package being charged with its proportion of the cost of freight, expenses, and clearance at the Custom House. Larger shipments are consigned as the buyer instructs.

Priced lists of current publications, with publishers' announcements and literary notices, are printed in the *Publishers' Circular*, issued weekly, and in the *Bookseller*, monthly. Special attention is paid to forwarding catalogues of English and Continental publishers and booksellers when desired.

Superior Library Binding can be done in half levant morocco in a few days, and costs considerably less than in the United States.

The United States duty of twenty-five per cent is taxed on the nett prices of English books printed within twenty years. All older books, and books in languages other than English are duty free.

Public Libraries, Colleges, Academies, and other incorporated institutions are entitled to make all their importations free of duty.

THE extensive experience of this Agency in the selection and purchase of rare old books and manuscripts is placed at the service of book Collectors in the United States. Book auctions are carefully watched and good knowledge kept of the stocks of the old booksellers of Europe. Lists of desiderata have the best attention, and in the selection of books the most careful comparison of copies is made.

Advance copies of sale catalogues, when they are printed in sufficient time for orders to be sent before the sale takes place, are supplied when desired.

Special attention is also paid to binding old books in the most appropriate manner by the best English and French binders.

Engravings, Drawings and Paintings, Philosophical Apparatus, Scientific Instruments, and all other wants of libraries receive due attention.

This being a strictly ready-money commission business, it is necessary that orders should be accompanied by funds, and that current accounts should be kept well covered.

Remittances to B. F. Stevens, 4, Trafalgar Square, Charing Cross, London, England, may be made in sterling by Bankers' drafts, or Post Office orders on London; or in American currency at five dollars to the pound sterling, this being 25 cents to the shilling. For odd amounts send postage stamps.

The New York agents of B. F. Stevens are Messrs. TICE & LYNCH, 45, William Street, who will receive payments on his account.

Dear Sir,

I am in receipt of your undated letter, and in compliance with your request have continued your subscriptions to certain periodicals for six months, and enclose invoice herewith £2.9.3.

Trusting to be favoured with your further orders and always at your service,

I am, dear Sir,

yours faithfully,

B. F. Stevens

THE

## GALVESTON NATIONAL BANK.

*Galveston, Texas, January 4th, 1894.*

Dear Sir:

Find herein Statement of our condition at close of business December 30th, 1893. Our earnings for the past six (6) months were as follows:

Gross Earnings from July 1st to Dec. 30th, 1893,	\$33,267 31
<b>LESS</b>	
Expenses, Salaries, Attorneys Fees, Etc. - - -	10,911 82
<b>LESS</b>	\$22,355 49
City Taxes for 1893, - - - - -	5,625 00
Carried to undivided profits, - - - -	\$16,730 49

We hardly think it necessary to apologize for not paying a dividend since you are perfectly familiar with the financial conditions prevalent during the greater part of last year. During this period of unrest and disturbance, we paid very little attention to money making, our chief concern being to keep going and to save our property, both of which aims we successfully accomplished. From May to September, our deposits run off \$850,000 without stopping, forcing us to borrow larger amounts (about \$250,000), and for longer periods than at any time within our experience, but we close the year with every dollar of this indebtedness liquidated and with the bank in good shape. For the past two years we have at different times discussed the advisability of reducing our capital, and at our

regular meeting in December, final action was taken on the matter by the unanimous adoption of the following resolution:

RESOLVED,

"That it is the sense of the Board of Directors of this Bank, that the Capital Stock be reduced to \$250,000 as early as practicable, and that the President be instructed to ascertain the sense of the non-resident stockholders and report same to this board."

This reduction will save us about \$5,000 per annum in taxes, and we have already reorganized our office force, effecting a further saving of \$4,000. Aside from this, the reduction will curtail our business within safer limits, at the same time we do not anticipate any serious reduction of deposits, as an effect of the reduction.

Please write me your views on this point as early as possible, and when convinced that the necessary two-thirds of Stockholders will consent to the reduction, we will call a meeting for a formal vote on the proposition and fix a date when the reduction will be effective. I think I am safe in the declaration that all of the local Stockholders will vote for the reduction.

Respectfully,

T. J. GROCE,  
President.

*St. Louis, Mo.* Jany. 8th, 1894.

Mr. J. K. Patterson,  
Lexington, Kentucky.

Dear Sir;-

I am in receipt of two proxies instructing me to vote in the aggregate your 40 shares Continental Bank stock at the meeting of stockholders to-morrow. I shall be glad to do so in pursuance of your instructions and hope, for the benefit of your stock and the well being of the Bank, that it will be decided to reduce the capital.

Respectfully,

*Jack Blair*

Mr J. K. Patison  
 Lexington Ky  
 Dear Sir

In Reply to yours of  
 1st Jan. and in Reference to  
 what Mr Clemmons says in  
 regard to timber: I think  
 Mr Clemmons a gentleman  
 yet I do think he is  
 mistaken about the value  
 of same. as I am thoroughly  
 acquainted with all the  
 surroundings and am sure the  
 timber is not there. if  
 the timber was worth half  
 what Mr Clemmons prices it at  
 I mean marketable timber  
 I would not hesitate amount  
 at your figure: at same  
 time there is some timber

# CATES & LACEFIELD,

That is good Farm timber  
 of course you know the  
 Condition our County is in  
 and there is plenty of Land  
 Improved that can be Bought at  
 \$500 and Less per acre: yet  
 that is not connected with  
 our Business: But only  
 speak what I know: I have  
 of course all the Land I  
 know about here at present  
 and I am not interested in this  
 Trade except as a friend  
 to the Party who intends to  
 Buy Land before long:  
 and I am authorized to  
 make you a Proposition  
 as we are familiar with the  
 Land and c.

Esteemed Friend

About a year since we sent samples of our pens for distribution to your pupils; we trust they were found entirely satisfactory, and that Esterbrook's pens have been adopted in your school.

If your supply of pens for this season has not already been obtained from the local dealer or elsewhere, or if it is not convenient to procure them near your place, an application to us direct will receive prompt attention.

Enclosed is a Price List of leading school pens from which prices we offer as an inducement for general school introduction and continued use of our pens, the following special discounts to Teachers and Schools.

On orders from 10 to 25 gross	15%	} <u>Free of Cost of delivery</u> to any address

47-M-64

**DELIGHTFUL CLIMATE.** Almost all the days are sunny. The crisp air is a stimulant. Mere existence is a joy. Fifty thousand, or one-third, of Denver's people came here for the climate alone.

**NO COMPETITION.** Denver has no competitor. Her tributary region is immense and undeveloped.

**COLORADO'S GOLD EXCITEMENT.** Fifty new gold camps since September, 1893. A thousand millions practically in sight. A \$50 Denver lot at Leetsdale (\$5 cash) is an interest in 50,000 gold, silver, copper, lead, iron and coal mines.

**CITIES OF THE SAME SIZE** Were distanced by Denver in real estate sales, even in 1893. Listen to the music of the figures: Kansas City, \$16,782,210; Omaha, \$13,534,200; Minneapolis, \$21,762,600; Denver, \$32,272,417.

**INEXHAUSTABLE DEMAND FOR SILVER.** The annual increase of Asia, even at the present low per capita, will more than absorb twice the world's annual silver output. Of 1,500,000,000 people in the world not 400,000,000 ever saw any gold money. Ten times as much silver as gold is in the actual pockets of the world's population. To raise the per capita of Asia to that of France would take the world's silver output for 200 years. Silver is indestructible. Silver has not gone down. Gold has gone up.

**"AN ACRE NEAR THE CITY."** Cheaply purchased and persistently held has made many a man rich.

**THE BEST SAVINGS BANK** Is a cheap suburban lot in a growing city. Some lots which I sold in Globeville, Denver's smelting and manufacturing suburb, six years ago at \$100, on \$5 monthly payments, were cashed at \$600 during the panic last summer when all of the savings banks were suspended. Savings banks loan the money of their depositors on real estate, and when a panic comes it is as difficult for them to realize and pay as it is for you to sell your lot and get cash in that way. I have more Globeville lots farther out, at \$500 down to \$100, but a \$50 Leetsdale lot is the best investment. If it sells in three years for \$150 the purchaser will pay out \$5 cash and \$8.10 interest, at six per cent. for three years on \$45, or \$13.10 all told, leaving \$136.90 profit, or more than ten-fold the investment. All previous experience in similarly situated Denver suburban property justifies this estimate.

**LOANS.** Perfectly secured Denver first mortgages placed at six to ten per cent. Denver bank stock for sale.

Refer to United States Senators Teller and Wolcott, Chamber of Commerce, Real Estate Exchange and the American National Bank. Write for further information.

**JOHN E. LEET, 1515 Tremont Street,  
Denver, Colorado.**

## Colorado's Gold Revival

A \$50 Denver Suburban Lot on 5 year 6 per cent time (Only \$5 cash) is a Certain Interest in all the Dazzling Wealth of the Rocky Mountain Region.

"AN OUNCE OF SILVER BUYS AS MUCH AS TWENTY YEARS AGO, AND AN OUNCE OF GOLD BUYS TWICE AS MUCH."

"Rapid Transit is Throwing the Population of Large Cities far out into the Suburbs."—St. Louis Globe-Democrat.

LEETSDALE—"The Best Growth is Southeast."

MAP OF LEETSDALE AND VICINITY.

400 Feet Higher than the Union Depot.

The best growth of Denver is indisputably southeast. It is up-hill. Two main rapid transit lines extend seven

miles from the State House, one due east on Colfax, and the other south on Broadway. They form the southeast quadrant of the city's circle which contains all the fashionable residences, and within which prices are firmest and rise most rapidly.

**LEETSDALE** Adjoins the city limits, is less than five miles southeast of the State House, and is in the center of this quadrant, the best growth being south from Colfax and east from Broadway. These two growths are reaching directly toward Leetsdale, and will envelop it in a few years.

It is by far the **Highest Point** in this favorite southeast quadrant of Denver, being 400 feet higher than the Union Depot, and about 100 feet higher than the top of the State House dome. From Leetsdale the State House, perched on Capitol Hill, looks as if it were down in a valley.

**THE LEETSDALE DRIVE** Is the only good road out of Denver in any first-class direction. It is a natural gravel road, free from dust in summer and free from mud in winter.

**LEETSDALE** Has the finest view of the mountains in the whole world. The snowy range is visible to the naked eye for **Three Hundred Miles**.

**ELECTRIC ROADS** Are revolutionizing the structure of cities by spreading them out, and the suburban acres around growing cities are advancing so fast, in spite of panics, that they have paid four times as much income as improved inside property, and are no trouble to hold.

Land on both sides of Leetsdale, the same distance from the center of the city, was advanced to **\$3,000** an acre by obtaining rapid transit four years ago. Construction was then checked by the Baring failure, but one line has now reached within four blocks and two more are developing in that direction. I start in at one-sixth rival prices with as good lots.

The Union Pacific began purchasing the right-of-way for a **City Belt Line**, extending along the outside of Leetsdale, when the recent panic compelled a temporary suspension. It will make the property accessible for manufactures and raise the price to \$300 a lot or \$3,000 an acre.

**LEETSDALE** Has ditch water for irrigation. It has a city water main, supplying the best hydrant water. It has a telephone line. It has a winter garden that makes \$3,000 a year. It has alfalfa which yields \$30 per acre. It is a fine fruit place.

I have platted 120 acres, which I am selling fast at \$50 a lot, or \$500 an acre, **all on five years' time** at only six per cent. interest, if you improve, or ten per cent. cash if you do not. **I Sold 300 Lots** from July 1 to December 31,

1893, in the worst of the panic, when other property was dead. I am selling this property solely to get out of debt, when I intend to hold the remaining 360 acres, just beyond, for \$3,000 an acre, which it is sure to bring in the coming revival. I will advance my price one hundred per cent each year. Thus my customers can make money. Will select the best lots for absentees. Will agree to return the money in one year if buyer is dissatisfied. This is not business, but I am certain every purchaser will be delighted. No dicker-ing. I always have one invariable price for everybody. No trading. This is better than any property I could trade for. All my customers for the fifteen years in which I have been in the real estate business in Denver have made money.

### Is Denver the Next Chicago?

Denver has increased **2,141 per cent. in 20 years**; Chicago only 267, and St. Louis but 44 per cent. Silver mining is only one-sixth of our resources. Agriculture already doubles it. Our coal output retails for as much. Colorado is another Pennsylvania.

JOHN E. LEET.

eastern city, built in the west by eastern men."—[Richard Harding Davis in Harper's Weekly.

### EASTERN GATEWAY.

Denver, where a billowy sea of fertile prairies dashes against a continent of mineralized mountains, is more than a seaport. She is the eastern gateway for the vast region that last year produced \$30,000,000 of gold and \$60,000,000 of silver.

### THE EAST IN THE WEST.

come from the East we would boast that no man in the state lacks work.

Colorado is the most loyal, debt-paying community in the world. She has the most barbarous attachment laws and a cruel trust-deed, cut throat foreclosure act upon her statute books expressly to please Eastern capital. Even the present legislature, which is Republican in both branches, repealed the very moderate railroad law we had over Governor Waite's veto. Such a body will pass no law impairing the obligation of contracts. Public sentiment here is as strong against anything of that kind as it is in Boston. The only real misfortune which the state labors under just now is the widespread depression in the East. From that region our development capital must largely come. Eastern people, seeing stagnation all around them, cannot understand how prosperity can exist in a state which but a few months ago was supposed to be so prostrate that it was an object of pity.

JOHN E. LEET.

Montgomery, Printer, 1314 Tremont St.

## "COLORADO'S BRIGHT OUTLOOK"

[From the *North American Review*, February, 1894.]

The statement of Governor Waite in the January Review that "the annual production of 27,000,000 ounces of silver cut off by the closing of the mines has deprived Colorado of about \$24,000,000 per annum" is one which will not bear examination. The official figures just published in the annual reviews of the Denver papers show that in 1893 the silver product of the state was 23,017,089 ounces. This great product of the year sold for \$17,797,890. The slight loss in quantity was unnecessary and wholly caused by the needless shutting down of many rich mines for three or four months. The loss in value was only about 17 per cent. as compared with the prices obtained the previous year. Even this was a relative and not an actual loss, because the shrinkage in the average of all commodities which are purchased by the sale of silver has been fully as much, if not more, and the cost of labor in the mines has been reduced almost precisely as much as silver has fallen. At this moment all the smelters worth mentioning have resumed, and nearly all the silver mines which have pay ore are producing. It is certain that the output for the coming year will be within a few millions, more or less, of the previous average.

Intelligent Colorado business men believe that silver mining is not only as permanent an industry as iron or coal mining, but they are now convinced that the purchasing power of an ounce of silver bullion is more permanent than that of the unit of any other commodity produced in the world. It will purchase about as much of the staple commodities like wheat, cotton and iron now at 68 cents as it would purchase before demonetization at 129 cents, at par with gold. By this tremendously important fact we prove that the purchasing power of gold has doubled during the life of any debt that is twenty years old, and that the "honest" lender receives, besides his interest, twice as much as he loaned to the "dishonest" borrower. To the objection that this cannot

be so, because labor has not fallen, we reply that labor's decline has been offset by modern inventions which increase the value of its product.

While we all angrily opposed the silver repeal, we are rapidly coming to the conclusion that it is to prove a blessing in disguise. It has not permanently hurt silver, while it has already revived our comparatively dormant gold-mining industry to the very verge of a boom. In this time of great stagnation, and in the dead of winter, two rival railroads are actually running a construction race through the mountain canons to the newly discovered gold mines in Cripple Creek, where, besides many rich veins, actual mountains of low grade ore containing not less than a hundred millions practically in sight, only await cheap transportation and cheap milling processes to be ground up. One tunnel is started to cut the old and deep gold veins near Central half a mile below the surface, which will be four miles long and take four years to finish. The established veins which it will make profitable again are estimated to contain \$200,000,000 of gold.

The great gold belt of Colorado, reaching from Long's peak to beyond the southwest corner of the state, is over 200 miles long by eighty miles wide. All over it, every ten or twenty miles, gold has been found generally in low grade ore. There are in the state, perhaps, 5,000 opened veins in old or abandoned camps which were discovered years ago, but which it did not until recently pay to work. While improved transportation and improved mining machinery have probably reduced the cost of mining one-half, the triumph of the gold standard has apparently doubled the value of the gold and all the mines are starting up. A mine with vast deposits of low grade ore worth \$18 a ton had to stop because the cost of production was \$20. But now, when production costs only \$10, and the purchasing power of \$18 is raised to \$36, the profit in resuming is very clear. It is not extravagant to say that there are in Colorado a thousand millions of gold in the low grade ore in sight, most of which will pay for working under existing conditions. The new gold mining revival is less than four months old, and yet it increased the the old average gold product of less than \$5,000,000 per annum to \$7,802,453 for 1893. Experts estimate the gold output for the incoming year at \$20,000,000.

It is a nut for both free traders and protectionists to crack that Colorado manufacturing industries are all prosperous

and running full force and time, whereas there seems to be everywhere else a partial shut-down. Aside from the \$43,336,385 worth of precious metal ores, one-third of which was from other states, which our smelters handled in 1893, and which was an increase over any previous year, the manufactories proper of Denver alone produced \$20,000,000 of goods which found a market all the way to the Pacific. Among the newer products of these factories are paper, cotton goods, shoes and woolens. The Pueblo steel-rail mills, employing 2,000 men, are just resuming. No fear of tariff reduction checks these industries. This is a point for free-traders. But the long rail haul from the East is an actual protective tariff which will remain whatever congress does. Here is an illustration of flourishing industries directly fostered by the operation of the protective principle.

Our agricultural and live stock products for the year just closed are returned at \$56,900,000. Of lead we produced \$3,811,223. We supply the vast region between the Missouri and the Pacific with its petroleum. Our state produced 4,200,000 tons of coal in 1893, against 375,000 tons in 1880. This rapidly increasing product will soon be worth more than our silver. Indeed, its retail price amounts to more now. It is both bituminous and anthracite, and is sold all the way from Omaha to Los Angeles. We have endless quantities of it, as well as of iron. Of many minor items I will add only one. The colony of farmers which Horace Greeley founded in Colorado in 1870, and which is named after him, receives a million dollars a year for its fine potatoes, which are distributed from San Francisco to Chicago and New Orleans, and are so famous that they have immortalized the philosopher who advised their producers to go West.

Half the decline in Denver bank clearings is due to the fall of prices rather than to the reduction of business, and the other half to a stampede of customers from the banks which temporarily suspended last summer to the few that stood the storm. Denver real estate, which shows symptoms of revived activity, carries large mortgage indebtedness, next in per capita size to Chicago, but it is mostly due to home building associations. It is a significant fact that the Rio Grande railroad, which threads the mountain mining camps for more than 1,400 miles weathered the storm without falling into a receiver's hands. Nearly all our idle workmen are now employed again, and if several thousand had not recently

97-11-64

much of the staple commodities such as wheat, cotton and iron as it did twenty years ago; and thousands of low grade gold mines that did not pay then do pay now. With this and the hundreds of recent rich discoveries it is not strange that a gold mining excitement already exists. On the other hand, silver has declined no more than the average of other commodities. An ounce buys as much now as when at par with gold before demonetization began. No good silver mine is now closed. All the smelters have resumed. The cost of silver mining has declined as much as the price of silver. Tariff agitation does not hurt our numerous manufactories, none of which are closed down. The long rail haul will always protect them. Two new railroads actually building to fresh gold camps are employing 2,000 men. The steel rail works have resumed and employ 2,000 more. Nearly all our own idle have work, but the unemployed are flocking in from the East."

**The Best Savings Bank** Is a cheap suburban lot in a growing city. Some lots which I sold in Globeville, Denver's smelting and manufacturing suburb, six years ago at \$100, on \$5 monthly payments, were cashed at \$600 during the panic last summer when all of the savings banks were suspended. Savings banks loan the money of their depositors on real estate, and when a panic comes it is as difficult for them to realize and pay as it is for you to sell your lot and get cash in that way. I have more Globeville lots farther out, at \$500 down to \$100, but a \$50 Leetsdale lot is the best investment. If it sells in three years for \$150 the purchaser will pay out \$10 cash and \$7.20 interest, at six per cent. for three years on \$40, or \$17.20 all told, leaving \$132.80 profit, or more than seven-fold the investment. All previous experience in similarly situated Denver suburban property justifies this estimate.

Perfectly secured Denver first mortgages placed at six to ten per cent. Denver bank stock for sale.

Refer to United States Senators Teller and Wolcott, Chamber of Commerce, Real Estate Exchange and the American National Bank. Write for further information.

**JOHN E. LEET, 1515 Tremont Street,  
Denver, Colorado.**

## "The Best Growth is Southeast."

JOHN E. LEET.

The best growth of Denver is indisputably southeast. It is up-hill. Two main rapid transit lines extend seven miles from the State House, one due east on Colfax, and the other south on Broadway. They form the southeast quadrant of

the city's circle which contains all the fashionable residences, and within which prices are firmest and rise most rapidly.

**Leetsdale** Adjoins the city limits, is less than five miles southeast of the State House, and is in the center of this quadrant, the best growth being south from Colfax and east from Broadway. These two growths are reaching directly toward **Leetsdale**, and will envelop it in a few years.

It is by far the **Highest Point** in this favorite southeast quadrant of Denver, being 400 feet higher than the Union Depot, and about 100 feet higher than the top of the State House dome. From **Leetsdale** the State House, sitting on Capitol hill, looks as though it were down in a valley.

**The Leetsdale Drive** Is the only good road out of Denver in any first-class direction. It is a natural gravel road, free from dust in summer and free from mud in winter.

**Leetsdale** Has the finest view of the mountains in the whole world. The snowy range is visible to the naked eye for **Three Hundred Miles**.

**Electric Roads** Are revolutionizing the structure of cities by spreading them out, and the suburban acres around growing cities are advancing so fast, in spite of panics, that they have paid four times as much income as improved inside property, and are no trouble to hold.

Land on both sides of **Leetsdale**, the same distance from the center of the city, was advanced from **\$500 to \$3,000** an acre by obtaining rapid transit three years ago. Construction was then checked by the Baring failure, but one line has now reached within four blocks and two more are developing in that direction.

The Union Pacific began purchasing the right-of-way for a **City Belt Line**, extending along the outside of **Leetsdale**, when the recent panic compelled a temporary suspension. It will make the property accessible for manufactures and at once raise the price to \$300 a lot or \$3,000 an acre.

**Leetsdale** Has ditch water for irrigation. It has a city water main, supplying the best hydrant water. It has a telephone line. It has a winter garden that makes \$3,000 a year. It has alfalfa which yields \$30 per acre. It is a fine fruit place.

I have platted 120 acres, which I am selling fast at \$50 a lot, or \$500 an acre, all on five years' time at only six per cent. interest, if you improve, or twenty per cent. cash if you do not. **I Sold 300 Lots** from July 1 to December 31, 1893, in the worst of the panic, when other property could not be traded. I am selling this property solely to get out of debt, when I intend to hold the remaining 360 acres, just beyond, for \$3,000 an acre, which it is sure to bring in the coming revival. Will select the best lots for absentees. Will agree to return the money in one year if buyer is dissatisfied. This is not business, but I am certain every purchaser will be delighted with the bargain. All my customers for the fifteen years in which I have been in the real estate business in Denver have made money.

#### **IS DENVER THE NEXT CHICAGO?**

Denver has increased 2,141 per cent. in 20 years; Chicago only 267, and St. Louis but 44 per cent.

Silver mining is only one-sixth of our resources. Agriculture already doubles it. Our coal output retails for as much. Colorado is another Pennsylvania.

**The East in the West.** "Denver is an eastern city, built in the west by eastern men."—[Richard Harding Davis in *Harper's Weekly*.

**No Competition.** Denver has no competitor. Her tributary region is immense and UNDEVELOPED.

**Colorado's Gold Excitement.** Fifty new gold camps since September, 1893. A thousand millions practically in sight. A \$50 Denver lot at **Leetsdale** (\$10 cash) is an interest in 50,000 gold, silver, copper, lead, iron and coal mines.

**Cities of the Same Size** Were distanced by Denver in real estate sales, even in 1893. Listen to the music of the figures: Kansas City, \$16,782,210; Omaha, \$13,534,200; Minneapolis, \$21,762,600; Denver, **\$32,272,417.**

**Inexhaustible Demand for Silver.** The annual increase of Asia, even at the present low per capita, will more than absorb twice the world's annual silver output. Of 1,500,000,000 people in the world not 400,000,000 ever saw any gold money. Ten times as much silver as gold is in the actual pockets of the world's population. To raise the per capita of Asia to that of France would take the world's silver output for 200 years. Silver is indestructible. Silver has not gone down. Gold has gone up.

#### **WHY DENVER WILL GROW.**

The January number of the *American Land and Title Register* contains interviews on the real estate outlook for 1894 with what it terms "a number of the most prominent real estate men in the country." Among them is the following from John E. Leet:

"Whatever may happen in other cities, Denver will experience a revival of real estate activity in 1894, because she is the Eastern gateway and the metropolis of the gold mining region of this country. Gold is now the only commodity produced in this world which is booming. Its value advances as all other things decline. An ounce of gold now buys approximately twice as

be so, because labor has not fallen, we reply that labor's decline has been offset by modern inventions which increase the value of its product.

While we all angrily opposed the silver repeal, we are rapidly coming to the conclusion that it is to prove a blessing in disguise. It has not permanently hurt silver, while it has already revived our comparatively dormant gold-mining industry to the very verge of a boom. In this time of great stagnation, and in the dead of winter, two rival railroads are actually running a construction race through the mountain canons to the newly discovered gold mines in Cripple Creek, where, besides many rich veins, actual mountains of low grade ore containing not less than a hundred millions practically in sight, only await cheap transportation and cheap milling processes to be ground up. One tunnel is started to cut the old and deep gold veins near Central half a mile below the surface, which will be four miles long and take four years to finish. The established veins which it will make profitable again are estimated to contain \$200,000,000 of gold.

The great gold belt of Colorado, reaching from Long's peak to beyond the southwest corner of the state, is over 200 miles long by eighty miles wide. All over it, every ten or twenty miles, gold has been found generally in low grade ore. There are in the state, perhaps, 5,000 opened veins in old or abandoned camps which were discovered years ago, but which it did not until recently pay to work. While improved transportation and improved mining machinery have probably reduced the cost of mining one-half, the triumph of the gold standard has apparently doubled the value of the gold and all the mines are starting up. A mine with vast deposits of low grade ore worth \$18 a ton had to stop because the cost of production was \$20. But now, when production costs only \$10, and the purchasing power of \$18 is raised to \$36, the profit in resuming is very clear. It is not extravagant to say that there are in Colorado a thousand millions of gold in the low grade ore in sight, most of which will pay for working under existing conditions. The new gold mining revival is less than four months old, and yet it increased the old average gold product of less than \$5,000,000 per annum to \$7,802,453 for 1893. Experts estimate the gold output for the incoming year at \$20,000,000.

It is a nut for both free traders and protectionists to crack that Colorado manufacturing industries are all prosperous

and running full force and time, whereas there seems to be everywhere else a partial shut-down. Aside from the \$43,336,385 worth of precious metal ores, one-third of which was from other states, which our smelters handled in 1893, and which was an increase over any previous year, the manufactories proper of Denver alone produced \$20,000,000 of goods which found a market all the way to the Pacific. Among the newer products of these factories are paper, cotton goods, shoes and woolens. The Pueblo steel-rail mills, employing 2,000 men, are just resuming. No fear of tariff reduction checks these industries. This is a point for free-traders. But the long rail haul from the East is an actual protective tariff which will remain whatever congress does. Here is an illustration of flourishing industries directly fostered by the operation of the protective principle.

Our agricultural and live stock products for the year just closed are returned at \$56,900,000. Of lead we produced \$3,811,223. We supply the vast region between the Missouri and the Pacific with its petroleum. Our state produced 4,200,000 tons of coal in 1893, against 375,000 tons in 1880. This rapidly increasing product will soon be worth more than our silver. Indeed, its retail price amounts to more now. It is both bituminous and anthracite, and is sold all the way from Omaha to Los Angeles. We have endless quantities of it, as well as of iron. Of many minor items I will add only one. The colony of farmers which Horace Greeley founded in Colorado in 1870, and which is named after him, receives a million dollars a year for its fine potatoes, which are distributed from San Francisco to Chicago and New Orleans, and are so famous that they have immortalized the philosopher who advised their producers to go West.

Half the decline in Denver bank clearings is due to the fall of prices rather than to the reduction of business, and the other half to a stampede of customers from the banks which temporarily suspended last summer to the few that stood the storm. Denver real estate, which shows symptoms of revived activity, carries large mortgage indebtedness, next in per capita size to Chicago, but it is mostly due to home building associations. It is a significant fact that the Rio Grande railroad, which threads the mountain mining camps for more than 1,400 miles weathered the storm without falling into a receiver's hands. Nearly all our idle workingmen are now employed again, and if several thousand had not recently

**BILL LADING ONLY  
AT 385 BROADWAY, N. Y.  
MAR 6 1894**

**SPECIAL.**

For shipments to points EAST of Buffalo, Black Rock, Suspension Bridge, on the N. Y. C. & H. R. R.R., the minimum rate for any single package will be 25 cents. For points on the Rochester & Pittsburgh R.R., it will be 25 cents additional or 50 cents through. For points in Canada, via Buffalo, Black Rock and Suspension Bridge, the minimum rate on a single package will be the regular proportion of the first-class rate at 100 lbs. weight to the last-named places, and 35 cents additional from thence to competing points on the Grand Trunk, Michigan Central and Canadian Pacific Railways.

Any package containing articles of more than one class will be charged at the tariff rate for the highest classed article contained therein.

No single package or small lot of freight classified first-class or lower will be taken at less than 100 lbs. at the class to which it belongs, or if classified higher than first class, at less than 100 lbs. at first class rate; and in no case will the charge for a single consignment be less than 25 cents.

*Wm. Geagen*  
Agent.

Present Claims to Agents of THIS COMPANY, or mail to A. D. PENFOLD, Gen'l Auditor, New York, if no Agent at residence of claimant, within 30 days after shipment of property.

## CONDITIONS.

### Circular No. 1124, Joint Committee.

No carrier or party in possession of all or any of the property herein described, shall be liable for any loss thereof or damage thereto, by causes beyond its control; or by floods or by fire from any cause or wheresoever occurring; or by riots, strikes or stoppage of labor; or by leakage, breakage, chafing, loss in weight, changes in weather, heat, frost, wet, or decay; or from any cause if it be necessary or is usual to carry such property upon open cars.

2. No carrier is bound to carry said property by any particular train or vessel, or in time for any particular market, or otherwise than with as reasonable despatch as its general business will permit. Every carrier shall have the right, in case of necessity, to forward said property by any railroad or route between the point of shipment and the point to which the rate is given.

3. No carrier shall be liable for loss or damage not occurring on its own road or its portion of the through route, nor after said property is ready for delivery to the next carrier or to consignee. The amount of any loss or damage for which any carrier becomes liable shall be computed at the value of the property at the place and time of shipment under this bill of lading, unless a lower value has been agreed upon or is determined by the classification upon which the rate is based, in either of which events such lower value shall be the maximum price to govern such computation. Claims for loss or damage must be made in writing to the agent at point of delivery promptly after arrival of the property, and if delayed for more than thirty days after the delivery of the property, or after due time for the delivery thereof, no carrier hereunder shall be liable in any event.

4. All property shall be subject to necessary cooerage and baling at owner's cost. Each carrier over whose route Cotton is to be carried hereunder, shall have the privilege, at its own cost, of compressing the same for greater convenience in handling and forwarding, and shall not be held responsible for unavoidable delays in procuring such compression. Grain in bulk consigned to a point where there is an elevator may (unless otherwise expressly noted herein, and then if it is not promptly unloaded) be there delivered, and placed with other grain of same kind, without respect to ownership, and if so delivered shall be subject to a lien for elevator charges in addition to all other charges hereunder. No carrier shall be liable for differences in weights or for shrinkage of any grain or seed carried in bulk.

5. Property not removed by the person or party entitled to receive it within twenty-four hours after its arrival at destination, may be kept in the car, depot, or place of delivery of the carrier, at the sole risk of the owner of said property, or may be, at the option of the carrier, removed and otherwise stored at the owner's risk and cost, and there held subject to lien for all freight and other charges. The delivering carrier may make a reasonable charge per day for the detention of any car and for use of track after the car has been held forty-eight hours for unloading, and may add such charge to all other charges hereunder, and hold said property subject to a lien therefor. Property destined to or taken from a station at which there is no regularly appointed agent, shall be entirely at risk of owner when unloaded from cars, or until loaded into cars; and when received from or delivered on private or other sidings, shall be at owner's risk until the cars are attached to, and after they are detached from, trains.

6. No carrier hereunder will carry, or be liable in any way for, any documents, specie, or for any article of extraordinary value not specifically rated in the published classifications, unless a special agreement to do so, and a stipulated value of the articles, are endorsed hereon.

7. Every party, whether principal or agent, shipping inflammable, explosive, or dangerous goods, without previous full written disclosure to the carrier of their nature, shall be liable for all loss or damage caused thereby, and such goods may be warehoused at owner's risk and expense, or destroyed without compensation.

8. Any alteration, addition, or erasure in this bill of lading, which shall be made without the special notation hereon of the agent of the carrier issuing this bill of lading, shall be void.

9. If the word "order" is written hereon immediately before or after the name of the party to whose order the property is consigned, without any condition or limitation other than the name of a party to be notified of the arrival of the property, the surrender of this bill of lading, properly endorsed, shall be required before the delivery of the property at destination. If any other than the aforesaid form of consignment is used herein, the said property may, at the option of the carrier, be delivered without requiring the production or surrender of this bill of lading.

10. Owner or consignee shall pay freight at the rate within stated, and all other charges accruing on said property, before delivery, and according to weight as ascertained by any carrier hereunder; and if, upon inspection, it is ascertained that the articles shipped are not those described in this bill of lading, the freight charges must be paid upon the articles actually shipped, and at the rates and under the rules provided for by published classifications.

11. If all or any part of said property is carried by water over any part of said route, such water carriage shall be performed subject to the conditions, whether printed or written, contained in this bill of lading, including the condition that no carrier or party shall be liable for any loss or damage resulting from the perils of the lakes, sea, or other waters; or from explosion, bursting of boilers, breakage of shafts, or any latent defect in hull, machinery, or appurtenances; or from collision, stranding, or other accidents of navigation; or from the prolongation of the voyage. And any vessel carrying any or all of the property herein described shall have liberty to call at intermediate ports, to tow and be towed, and to assist vessels in distress, and to deviate for the purpose of saving life or property. And any carrier by water liable on account of loss of or damage to any of said property shall have the full benefit of any insurance that may have been effected upon or on account of said property.

THIS INSTRUMENT, witnesseth that, on the 17th. day of March, 1894, the undersigned James K. Patterson and Lucelia W. Patterson, of the City of Lexington, Kentucky, sold and by their deed of that date conveyed to S. Lacefield and G. R. Hays, of Muhlenberg County, Kentucky, a certain tract of land containing 207 acres, situated on Cypress Creek in Muhlenberg County, Kentucky, for the consideration of one thousand dollars, of which sum five hundred dollars was paid cash in hand to them upon the delivery of said deed, and for the remainder, five hundred dollars, of said consideration that said Lacefield and Hays executed and delivered to said James K. Patterson their two certain promissory notes of the same date of said deed for the sum of two hundred and fifty dollars each, due and payable in one and two years respectively from their date, to secure the payment of which a lien was retained in said deed on the property conveyed, which is now of records in the office of the Clerk of the Muhlenberg County Court in deed book No. 42, page 268.

And whereas said two notes above described have been fully paid off and satisfied, now, said James K. Patterson and Lucelia W. Patterson, in consideration of the premises and in consideration of the full payment of said purchase price, now hereby release and relinquish unto said Lacefield and Hays all claim or claims they have or may have by reason of said lien retained in said deed, and convey unto them all the interest they have or might have in and to said tract of land.

In witness whereof the said James K. Patterson and Lucelia W. Patterson have hereunto subscribed their names this 8th. day of October, 1904.

-----  
-----  
State of Kentucky,  
County of Fayette, Sct.

I, \_\_\_\_\_, Clerk of the County Court of the County and State aforesaid, certify that the foregoing instrument of writing was this day produced to me in my said County and acknowledged before me in due form by James K. Patterson and Lucelia W. Patterson, parties thereto, to be their act and deed, for the purposes therein contained.

Given under my hand this \_\_ day of \_\_\_\_\_, 1904.

----- \$ Clerk

By \_\_\_\_\_, D. C.

James K. Patterson and wife

To- Deed of Release

Lacefield and Hays.

MEMORANDUM.

From  
Sharp & Company,  
Ironfounders,  
Alexandria,  
Dumbartonshire.

9 April 1894  
To Chief J. H. Patterson  
Livington  
Ky  
Mississipi

My Dear Sir  
Just a few lines to ease my sense of responsibility -  
I am sorry that our visiting American Air Commare is not to be thought of  
In the first place I am fixed to the above business firm - than ever  
and my presence meantime is almost indispensable. Again we  
have taken a nice villa at Bullade and remain at May.  
This will come a turn off. Should you again visit us our  
accommodation & privacy will be all that could be desired.  
Uncle James was very well a fortnight ago, and his old  
woman were preparing for a periodic flight to Washington  
He is not very well pleased at the prospect, no money change  
we getting welcome to him, Uncle M's is somewhat  
better, but not his old self. I was glad to see by your  
last that you were all finally well and that William is  
still convalescent. Friday is working away, and Lewis quite

47-M-64  
at home, I never interfere with him. I intend taking  
a run thro' the Manchester Canal in a week or so  
and thence on to London. You have given me a  
letter for Harsh. We expect a burst up of the Govern-  
ment soon. Rosebery is taking his words a bit  
hardly, and he lacks the cunning of the old man.  
~~Cladstone~~ are getting disheartened.

I have been advised to buy American Rail; It is  
said that an improvement is imminent. Safer  
with Rail, than Bank's at all events.

We send our united love to Mr. P. Williams, Walter  
your mother & yourself.

Yours aff. Cousin

John W. Lambert

[with letter May 23, 1894]

Received, this 1 day of April 1894

of J K Paterson

Greenville, Ky. Apr 25 1894

Dear Mr Patterson

Yours of 23 inst. I saw  
Mr Gray and have just seen  
Mr Hickliff. Mayor.

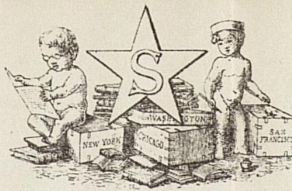

Both agree that there is a mis-  
take and that it can be corrected  
at the next meeting of the  
Board and I will call their  
attention to the matter at that  
time. Board meets May 7<sup>th</sup>

Hope Aunt "Lida" and Nellie  
will be with us again soon  
and that the visit here will be  
from both of them.

Hope you will be able to come  
again this year. We all enjoyed  
your visit so much last year.  
We are in usual health and  
love us much love

Very Affectionately  
Lewis Reno

# THE GALVESTON NATIONAL BANK.

Galveston, Texas, December 11th, 1894.

Dear Sir:

At a meeting of the Stockholders of this Bank held on November 6th, for the purpose of considering the reduction of our capital stock, the following resolution was unanimously adopted:

"RESOLVED, That we concur with the resolution of the Board of Directors of this Bank, adopted at their regular meeting of December 6th, 1893, recommending the reduction of the capital stock to \$250,000, and we leave the time and method of said reduction to the discretion of the Directors, only recommending that it be accomplished prior to January 1st, 1895, and that one-fourth of the eliminated capital be paid in cash and the balance in three certificates of deposit of equal amounts, running thirty, sixty and ninety days, and bearing interest at the rate of four (4) per cent. per annum."

The Comptroller of the Currency has since approved the action of the Stockholders' meeting, and Friday, December 28th has been fixed as the date to make the reduction effective.

Kindly forward at once, direct to this bank, the certificates of stock now held by you, for which we will send you temporary receipt, and at the proper time we will mail you in lieu thereof new certificates of stock, check and certificates of deposit, in accordance with the tenor of the resolution of the Stockholders' meeting.

It is probable that we may be able to discount a limited amount of the certificates of deposit at eight (8) per cent. per annum in the event you prefer to discount any or all of your certificates at this rate, so advise us and we will meet your wishes as far as possible. In issuing the new certificates of stock, we will not issue any half shares. Should a division of your stock leave a half share, please indicate whether you prefer a half share more or less, and we will endeavor to meet your views.

Requesting your prompt attention to this matter, I am,

Respectfully,

T. J. GROCE,

President.

Mr James K. Patterson.

Dear Sir

Enclosed you will please find  
draft for one hundred & eight  
teen dollars \$118 the remaining  
half of the past seasons rent  
less \$7.00 seven dollars which I  
will put in grass seed again  
to sow the same land which  
I seeded last spring and failed  
Mr Aikin instructed me to buy  
\$14 fourteen dollars of grass seed  
to sow over the same land this  
spring that I had sown twice  
before. I could have sent this  
money ere this. But Mr Aikin  
has been sick and I put it  
off thinking he would probably

47-M-64

get around again but he is gradually growing weaker all the time he is past transacting any business now whatever Mr Aikin asked me to send it to you and state his condition so that you might not expect him to look after any affairs now I rather think Mr Aikin has consumption he is bedfast all his time now and dont speak above a whisper

Answer this soon that I may know if you get it all right

Yours Truly  
J. W. Logan

Dear Sir

We will be ready for the first note we think - unless something turns up we are not looking for - and in case we should raise the full amount would you take \$5-15<sup>00</sup> just supposing we could raise that amount would it take in the two notes if I will please let us know now - so we will have a few days to look around # times are so close - and our crops almost entire failure - or we would have had no trouble about getting up the money - and you just struck it right as the R.R. Tax is pressing down please send us your old bonds as they are of no use to you - Trusting you will consider this matter at an early date - we are -

Yours very truly S. Lacefield

STATE OF KANSAS, COUNTY OF COFFEY, SS.

I, T. N. BELL, County Clerk in and for said County in said State do hereby certify the foregoing to be a true and correct statement of all levies for taxes for the year A. D. 1894, duly made in accordance with the laws of the State of Kansas, on each One Hundred Dollars (\$100.00) assessed valuation of all taxable property in said County, in the amounts and for the purposes as above specified, except as to railroad.

Witness my hand and the Seal of said County, this 30th day of August, A. D. 1894.

[SEAL]

T. N. BELL, County Clerk

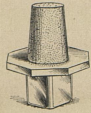

47-M-64

June 1895

# BOTTLES.

E. & A. New Reagent Bottles with improved Stoppers, Chemical Name and Symbol distinctly and deeply cut in the glass.

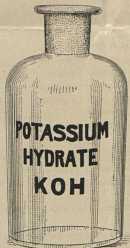

These Bottles are made of the best German Glass, to resist the action of reagents, and are provided with a very strong polished stopper, with projecting rim and square top. The advantages of this improved stopper are evident at a glance: The rim protects the mouth of the bottle from dust, and the shape of the stopper makes it so strong that considerable force may be used in removing it from the bottle without fear of breakage; moreover, the shape permits of its being placed on the table either inverted or sideways, without the ground part touching. There has long been needed a really good, and at the same time, Cheap Reagent Bottle especially adapted for College Laboratories and students' use, and it is to meet this want that we place Our New

Reagent Bottles on the market, feeling sure that they will prove to be what we claim, the best and cheapest ever offered for the purpose.

- 9028. E. & A. New Reagent Bottles, 4 1/2 oz. capacity; height, 5 1/2 in.; per doz., \$1.75 net.
- 9029. E. & A. New Reagent Bottles, 8 oz. capacity; height, 6 1/2 in.; per doz., \$2.25 net.
- 9030. E. & A. New Reagent Bottles, 16 oz. capacity; height, 7 1/2 in.; per doz., \$3.25 net.
- 9030a. E. & A. New Reagent Bottles, 32 oz. capacity; per doz., \$4.00 net.
- 9030b. E. & A. Saltmouth, 4 oz. capacity; height, 4 1/2 in.; per doz., \$2.00 net.

For the present we only keep in stock these bottles with the names listed below, all of 4 1/2 oz. capacity, and the first four also of 8 oz. capacity, from which a selection may be made to suit convenience. Other 8 oz. bottles with names as per list, will be imported to order at regular prices, but for special names for all sizes there will be a charge of \$2.00 for the mould for each name, to be added to prices quoted above.

See below about this special stopper.

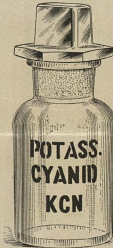

- 9031 Set of 40 New Reagent Bottles, as per list below, consisting of 5-8 oz. Tinctures, 28-4 1/2 oz. Tinctures, 6-4 oz. Saltmouths and 1 oz. Dropping Bottle. . . . \$ 7.17

BLUE GRASS  
Building & Loan Association,

(INCORPORATED)

OF LEXINGTON, KENTUCKY.

THE Blue Grass B & L. Association is organized on the National plan, and is therefore nothing less than an immense cooperative bank chartered by the State. Its object is consolidate the capital and collect the savings of its members and employ them for the mutual benefit of all those who are members of the Association.

The experience of years has brought the business of Building and Loan Associations to a perfect and scientific basis. The life and vitality of these institutions are found in the system of compound interest, which accumulates monthly. This enables the non-borrower and investor to place small savings in a safe place, and in a few years to draw all out in a lump, possibly at a time when he needs it most. The stock of minors may mature at such times as the young man desires to form business engagements, and no better place can be found for making provisions for old age.

Those who desire to build homes for their families find in these associations a lender who receives payments in small monthly installments, while the principal and interest are both being decreased by the participation which the borrowers have in the earnings and profits of the Association.

**THE CAPITAL STOCK.**

The capital stock of the Blue Grass Building and Loan Association is fixed at \$50,000,000 and is to be issued in monthly series, in shares of \$100 each.

**NUMBER OF SHARES.**

Any one may subscribe for any number of shares, not exceeding two hundred.

**MEMBERSHIP FEE.**

At the time of subscribing, a payment of \$1 is required on each share of stock taken. This is the admission fee.

**MONTHLY INSTALLMENTS.**

In Class "A" the monthly payment of each share is 50 cents and Class "B" 60 cents, payable at the home office, or to an authorized collecting agent, or at any of the local boards. The payment must be made on or before the last Saturday in each month.

**FINES.**

A fine of five cents per share per month will be imposed on every member who does not pay his monthly installments, interest or premium, on or before the last Saturday in each month. All such fines when paid become a part of the loan fund.

**WITHDRAWAL OF STOCK.**

Any member of this Association, after having made six monthly payments of dues upon the stock, will be permitted to withdraw from the Association on the following terms:

If withdrawn before one year, only the amount paid to Loan Fund on the stock will be refunded with six per cent. per annum for average time.

If withdrawn after one year and before two years, all paid upon the stock (except the admis-

sion fee), with six per cent interest per annum, for average time will be refunded.

If withdrawn after two years and before four years, the same with eight per cent. interest per annum for average time; and if withdrawn after four years and before maturity, the same with ten per cent. interest for average time.

**STOCK TRANSFERABLE.**

Upon the payment of \$1 any member may assign his certificate of stock by filling out the assignment blank on the back thereof and sending the same to the home office for approval and transfer on the books. All payments, including admission fee and all profits constitute the transferable interests. No assignment will be approved unless the stock is in good standing. If the member is a borrower, his security must also be transferred or the loan paid off.

**REDUCING THE NUMBER OF SHARES.**

A member may reduce the number of his shares at any time by returning his certificate and receiving a new one for a less number, the amount paid on the old certificate being used to extend the new, except the admission fee. A member having carried a certificate of ten shares for one year would pay up five shares for two years, or two shares for five years. A fee of one dollar is charged for issuing a new certificate.

**FORFEIT OF STOCK.**

If the payments on regular monthly dues are allowed to fall in arrears for a period of six months, the stock will be declared forfeited by the Board of Directors to the other members and the stock will be cancelled.

**PAID-UP STOCK.**

Is issued at \$100 per share in Class "D". A cash dividend of nine (9) per cent. per annum will be paid semi-annually on the cost price.

This stock can not be withdrawn until after one year from date of issue, after which time, sixty day's notice may be given by either the holder or Association, and said stock will then be withdrawn or cancelled. The holder will receive \$100 per share with interest to the date said stock is withdrawn or cancelled, less dividends paid.

**DEATH OF A MEMBER.**

On the death of any member of this Association his legal representatives or heirs may either continue the stock or receive from the Association the total amount paid into the Loan Fund, together with all profits. By this means, in case of death, a man's savings become available to his wife and children.

**EXPENSE IN SECURING LOANS.**

The only expense of getting loans is the local attorney's fees for making an abstract of the title and recording the mortgage which must be paid by the borrower;

**MATURITY OF STOCK.**

Shares mature when the monthly payments, profits, etc. apportioned to them amount to \$100.

Experience and expert mathematical calculations demonstrate that shares under this plan will mature in Class "A" in about eight years, and in Class "B" in about seven years.

**THE BENEFIT TO INVESTORS.**

When the monthly payments with the profits added are equal to the face value of the stock, it will be matured, and the holder may then withdraw the same in cash and receive therefor the

full face value of \$100 for each share. The terms upon which the money is loaned, compounded and repaid as it is, insures a profit of at least twenty per cent. per annum which may be increased by miscellaneous profits. It is safe to say that the stock will mature in seven years in Class "B" and eight years in Class "A."

The following table illustrates:

**CLASS A.—Illustration No. 1.**

Showing profits to investors on ten shares. Payments 50 cents a month Estimated to mature in eight years.

Maturity value of ten shares is .....	\$1,000 00
Ten shares cost, first month, entrance fee .....	\$ 10 00
Ninety five monthly payments of \$5 each .....	475 00
Total cost in eight years, ..	485 00
Net profit .....	515 00

**CLASS A.—Illustration No. 2.**

Showing cost to borrower of \$1,000 for eight years. Annual interest, six per cent. Premium, thirty-five cents per \$100 per month. Monthly payments, \$13.50 up to maturity. \$100 advanced on each share, if loan made two months after joining Association.

First month's payment, entrance fee of \$1 per share .....	10 00
Ninety-five monthly payments as dues on shares of \$5 each .....	475 00
Ninety-three monthly payments of interest at six per cent. per annum on \$1,000, being \$5 per month .....	465 00
Ninety-three monthly payments of premium at \$3.50 per month .....	325 00

Total payments in eight years .... \$1,275 50  
Amount advanced by Association, 1,000 00

Total cost as interest in eight years, \$ 275 50

NOTE.—This class is especially suited to members of small monthly income, or who have large expenses and cannot spare more from their monthly earnings. Whenever the shares mature the Association cancels a mortgage, and the member has a home of his own. The same rule applies to all classes.

#### CLASS B.—Illustration.

Admission.....	\$ 10 00
Monthly dues, eighty-three months, \$6..	498 00
Total cost .....	\$ 508 00
Cash withdrawn in seven years .....	1,000 00
Net profit .....	\$ 492 00

If these payments had been deposited in a savings bank, the profit would have been about \$72.

#### BENEFIT TO BORROWERS.

The Association will lend the face value of the stock to members desiring to borrow, if they will furnish satisfactory real estate security. This represents the value of the stock in seven years, including all profits and payments. As the borrower thus receives in advance not only the money he will pay on his stock, but the profits on it for seven years, in order to make an equitable division of benefits between the borrowing and non-borrowing members, he is required to pay a premium besides the six per cent. interest. A careful computation shows that the borrower should pay 50 cents per month on each \$100 borrowed, as a premium besides his interest, in order to make it equitable and just to all members. Upon this basis the cost of getting a loan of \$1,000 on ten shares of stock at \$6 per month, three months after subscribing, is as follows, viz:

Admission fee on ten shares .....	\$ 10 00
Monthly payments at \$6 for first two months .....	12 00
Interest at six per cent. \$5 per month, remaining eighty-one months.....	405 00
Premium at 50 cents per \$100, \$5 .....	405 00
Dues on stock at \$6, eighty-one months ..	486 00

Total cost of repaying loan . . . \$1,318 00

Or \$318 interest for the use of \$1,000 for seven years by waiting three months for his money, and to offset this the borrower has had the rent for eighty-one months. It will be seen the total cost of carrying and repaying a loan of \$1,000 is \$16 per month. This is a moderate rental value of the house. The same sum of money, borrowed of an individual at six per cent., would cost \$1,420 to repay it.

#### LOANS AND SECURITY.

The Loan Fund of this Association is each month invested in first mortgages on real estate, or the stock of its members can be accepted as security. But in neither case will the Association loan more than from fifty to seventy-five per cent. of its appraised or withdrawal value. Loans are made upon real estate, no matter whether the borrower builds or not. The loans are made to members of the Association only, and as each borrower is an investor, he is interested in the safety of the loan. If the member owns a reasonably good lot, clear of encumbrance, the Association will furnish the money to build the house, and will take a mortgage upon the house and lot for security. Thus any man may own a home at a cost no greater than the rent required upon the same property. All that is necessary is to acquire the title to the lot, which is not difficult to do.

#### ONE VOTE TO EACH SHARE OF STOCK.

Every member of this Association is entitled to one vote for every share of stock he holds. The general directors are elected by a popular

vote at the annual meeting held in December, each year after the first board retires. All amendments to the by-laws must be made by vote. Members can vote in person or by proxy, but no one person can vote more than 200 shares by proxy, except delegates appointed by branches, who may cast the entire vote of their branch, but no delegate can represent more than one branch.

**A GOOD FEATURE.**

One of the best features connected with this Building and Loan Association is: The longer you wait before you borrow, the less you pay into the Association. You pay 50 cents per share each month in Class "A" up to the time you get your money, and then you pay \$1.35 on each share. If you wait twelve months for your money you only have to pay 50 cents per share each month during that time, after which time you pay \$1.35 per share each month until your stock matures likewise if you wait two, three, four, five or six years before you borrow. In Class "B" you pay 60 cents per month for each share up to the time you borrow, and then \$1.60 on each share, until your stock matures. The longer you wait the less you pay into the Association, as the following table will show.

**CLASS B.—Illustration.**

In this class you pay 60 cents per month on each share each month, up to the time you borrow, and then \$1.60 on each month. Estimating that your stock will mature in seven years—

\$1,000 borrowed three months after you join, costs you altogether.....	\$1,318
\$1,000 borrowed one year after you join, costs you altogether.....	\$1,228
\$1,000 borrowed two years after you join, costs you altogether.....	\$1,108

\$1,000 borrowed three years after you join, costs you altogether.....	998
\$1,000 borrowed four years after you join, costs you altogether.....	868
\$1,000 borrowed five years after you join, costs you altogether.....	748
\$1,000 borrowed six years after you join, costs you altogether.....	628
And if you wait seven years you get \$1,000 at a cost of only.....	508

**HOW IT IS DONE.**

Our plan is not one evolving something out of nothing. The profits are actually made by careful management and keeping the loan fund constantly at work. Under our charter our money need never be idle a day; it can always be loaned, and *our loans are safe while real estate is safe.* The largest risk is at the date of the loan; every subsequent payment reduces the debt and risk and increases the security in proportion. The security of banks is mainly that they are conducted by men of integrity and business capacity. Stock in this Association is not only more secure, but twice as profitable as any bank stock.

The Bluegrass is in the hands of men of widely known integrity and business success in private, public, corporative and trust capacities. The officers handling its funds are bonded, so as to absolutely prevent loss to stockholders through them.

**LOCAL BRANCHES.**

All the business of the Association is transacted through the local branches. Members in towns organizing a branch, shall elect a President, Vice-President, Secretary and Treasurer, Attorney, and not less than three Directors. All applications for loans shall be passed upon by this body, and, if approved, shall be forwarded to the home office for completion. The Secretary and Treasurer shall collect the dues, interest and fines, and remit the same to the general office monthly.

He shall take applications for new stock and have a general supervision over the affairs of the Association in his branch. Payments must be made to the local treasurer on or before the last Saturday of every month. Each local branch is guaranteed the refusal of all the money they pay on stock, and their proportionate part of all the money received at the general office from investors in paid-up stock and from towns that want no loans. In this way much more money can be furnished the borrowing towns than the members therein pay in dues. The local boards are entrusted with authority that necessitates great care in the valuation of securities and selections of the loans, and they should always remember that they are personally interested in the prosperity of the Association.

#### OUR AGENTS.

The agents of this Association are given commissions bearing the signature of the President, Vice-President or Secretary, and the seal of the Association attached. The powers given such agents are explicitly set forth therein, and any acts of the agents so commissioned, which are authorized by the provisions thereof will be binding on the Association, but any promises or acts not authorized by their commissions will not be recognized. The Association has been careful in the selection of its agents and aims to employ only worthy and honorable men. If the authority of any agent is questioned, a telegram to the home office will always settle the question. The secretaries of local branches

are authorized to act as local agents and it is their duty and the duty of all officers of the branches to increase the membership whenever possible.

#### OUR ASSOCIATION.

Its authorized capital is \$50 000,000.

Its business is confined to no State; it is national and not local. Thus, its business is capable of indefinite enlargement and extension, and it is the purpose of its projectors to make it the most useful, the most extensive and beneficent of its kind, to adopt and improve upon every new and valuable feature, to manage it in the interest of its stockholders, and make it more and more profitable to investors and cheaper to its borrowers, in the course of its progress.

#### THINGS TO REMEMBER.

Building and Loan Associations are conceded to be among the safest of all investments. *The Blue Grass* is absolutely safe.

It is a combination or league of many associations in many different places, operating under one general charter.

All obligations are guaranteed not only by one association but by a league of many associations.

No idle money can accumulate in its treasury, from the fact that somewhere among the various associations there will always be a demand for money at a high rate of premium.

The general officers of *The Blue Grass* are men of integrity and high commercial standing, under bonds.

Do not suppose you are getting something for nothing; remember that the officers are amenable to the laws of the land.

Do not forget that the records of the home office are open to your inspection.

Each town or branch of the league is respon-

sible for its own losses. Therefore no loss can be inflicted upon the members at large by any act of the local officers, as all are under bond.

All profits are divided equally among all shares of good standing from time to time.

#### EXPENSE AND LOAN FUND.

The loan fund consists of forty cents in Class A and fifty cents in class B per month, per share, and all interests, premiums, fines, forfeitures and profits of all kinds, and no part of this fund can be used for expenses, except for taxes.

The Expense Fund consists of all admission and transfer fees, and ten cents per share per month on monthly payments. Out of this fund must be paid all expenses of the general and branch officers.

#### ADVANTAGE TO INVESTORS.

It will be noticed that the Blue Grass offers better inducements to investors to buy paid up stock, by offering larger guaranteed annual dividends, and greater security, and for this reason will be able to sell a larger amount in the money centers of the North and East, and in the larger cities where capital is plentiful and borrowers few, and thus will be able to furnish more loans to local branches in smaller towns than any other building and loan association.

#### IMPORTANT.

We direct special attention to the fact that this plan will mature stock, other things being equal, in the same time as in those associations requiring members to carry two shares of stock for each \$100 borrowed, and the borrower saves \$1.00 per month in dues on a loan of \$1,000.

#### GUARANTEED PROFITS.

The Blue Grass does not specifically guarantee profits beyond the surrender value named heretofore, but the members have a guarantee of much greater profits notwithstanding. This assurance is found in the fixed rate of interest, premiums and dues which all pay alike, so that, knowing the terms upon which loans are made, the profits which will be made are easily estimated. There is no guess work about it. The profits will be about twenty per cent. per annum to the investor, and the cost to the borrower about six per cent. per annum. It is this positive profit which enables this association to guarantee such a large surrender value on stock withdrawn.
