The College of Education

New Building to House Teachers' Training School Nears Completion; College Shows Marked Growth Since It Was Established Seven Years Ago; 408 Have Received Degrees

By William S. Taylor

The College of Education, organized at the University in 1923, is the outgrowth of the work of the Department of Education in the College of Arts and Sciences. Dr. J. T. C. Noe, serving as head of the Department from 1911 to 1923, laid the foundation of professional training upon which the College of Education was built.

The University has maintained a program for the professional education of teachers for half a century. In 1880 a Normal School was established in the A. and M. College, now the University of Kentucky. The purpose of this new school was to train teachers for the public and private schools in the state. This was long before the Department of Education at Frankfort had prescribed professional requirements for teachers.

In 1893 the college authorities, in response to a demand for advanced courses for teachers, organized a full collegiate curriculum leading to the degree of Bachelor of Pedagogy. Ruric N. Roark was made principal of the Normal School and Professor of Pedagogy. Professor Roark remained as head of the Normal School and the Department of Pedagogy until 1905, at which time he resigned from this position. He was succeeded by Professor Milford White, who in 1906, one year after being made head of the teacher training work, was instrumental in having two full collegiate courses added, each with education as a major. One of the new courses led to the degree Bachelor of Arts in Education and the other to the degree Bachelor of Science in Education. This was the first change of consequence made in the curriculum established in 1893. It is probable that these two new curricula were stimulated by the establishment of the two normal schools in Kentucky, one at Richmond and one at Bowling Green.

The General Assembly of the State of Kentucky, by an act approved March 16, 1908, established in the State University a Department of Education with collegiate rank. This act gave to the University the right to confer the degrees of Bachelor of Arts in Education and Bachelor of Science in Education. It provided also for the issuance of a teacher's certificate by the Department of Education, which when signed by the State Superintendent of Public Instruction, entit-

led the holder to teach in any of the common schools or high schools of the Commonwealth without further examination during life or good behavior.

Milford White died April 4, 1908. Dr. J. T. C. Noe was made acting dean of the Normal School and Department of Education after Professor White's death and remained in this position until the opening of the fall term in 1909. At that time Dr. Lewis F. Snow became the dean and the Board of Trustees changed the name Department of Education to Teachers College. The Normal Department and all sub-freshman work had been eliminated by the Act of 1908. Doctor Snow served as dean of the Teachers College until 1911, at which time he was succeeded by Doctor Noe. Doctor Noe recommended to the Board of Trustees of the University that the Teachers College be eliminated and that a Department of Education be created in the College of Arts and Sciences. This recommendation was accepted and Doctor Noe was made head of the Department in 1911, which position he continued to hold until 1923, when the College of Education was created. Under the administration of Doctor Noe as head of the Department, and Dr. Paul P. Boyd as dean of the College of Arts and Sciences, the professional program in education grew into a place of useful service in the institution.

The University High School was organized in 1917 to provide better facilities for practice teaching for the students enrolled in the Department of Education. It has become a vital factor in the professional training of the young men and the young women of the University who plan to enter the teaching profession. Since 1918 the Department of Vocational Education, which was a separate department in the College of Arts and Sciences until merged with the Department of Education to form the new College of Education, has maintained a practice center for agricultural teachers at the Picadome High School. This has worked out most satisfactorily both to the high school and to the University. In 1925 the program in practice teaching was enlarged in the field of home economics through a working agreement with the boards of education at Versailles and Georgetown. This arrangement with these

two schools has been most satisfactory. The superintendents of Georgetown and Versailles city schools have given excellent cooperation in helping to provide facilities for the young women who are planning to go out as teachers of home economics.

The Department of Education, under the administration of Doctor Noe, and the College of Education have emphasized three major programs of work: the training of high school teachers, high school principals, and city superintendents of schools. Recent studies show that the University for the past quarter of a century has trained more teachers for public high schools than any other institution in the state.

The members of the faculty in education have felt that the program for training high school teachers has met the standard for this field of work in a satisfactory way. They have never been satisfied with the facilities for training men and women for administrative positions.

In order that the men and women who desire to qualify for administrative work in the state might have the opportunity to procure the best type of professional training, the University asked the General Education Board of New York City to Give the University of Kentucky \$150,000 to be matched by a like sum from the state for the purpose of building a training school on the University campus. The General Education Board made the grant of \$150,000 to the University in May, 1927. The General Assembly appropriated a similar sum at its session in 1928, and in 1930 appropriated an additional \$75,000 for furniture and equipment.

This building when completed will house the following units: pre-school, elementary school, junior high school, high school, and the college of education. It will be possible for persons working toward principalships and superintendencies to study the organization and administration of education on any level.

The new training school will also make possible programs of training for pre-school, elementary, and junior high school teachers. The University

has been sending its graduates into the junior high schools and, to some extent, into the elementary schools, but the persons who went into these fields went without adequate preparation. Curricula are being worked out for kindergarten, elementary, junior high, and senior high school teachers. All curricula are four years in length. No person will be allowed to do his practice teaching before his senior year. The University has no intention to place itself where it will be in competition with the four Teachers Colleges whose programs of training elementary teachers are two years in length.

The University hopes to make the new training school so interesting from

the standpoint of organization, good teaching, and completeness of equipment that men and women from all over Kentucky will visit and study it.

The real measure of the worth of any institution such as ours is the quality of the product sent out. The Department of Education, while a part of the College of Arts and Sciences, sent out such men as Doctor Joseph Roemer, Professor of Secondary Education, University of Florida; J. O.

DR. J. T. C. NOE

Appropriation Reduction Defeated

Legislature Refuses Proposal That Would Reduce University Maintenance by \$105,000; Also Defeats Bill to Create a University Junior College at Paintsville

The bills introduced in the session affecting the University were not large in number, but one of them threatened a disastrous cut in the annual maintenance tax. As a consequence a marked reduction in University activities would have ensued if the bill had passed. The proposal was made that the 30 cent state tax on real estate should be reduced to 20 cents. The effect of this act would have cut state revenues \$1,500,000 and the University income \$105,000 annually, with proportional reductions in the support of other institutions. The bill passed the house and after a varied career in the senate was reconsidered and recommitted to the rules committee.

A new procedure was developed in this session in the matter of appropriations. In the past the legislature has taken the results of the work of the budget commission and passed the bill in the form that it came from the committee. The house and senate committees reviewed the requests quite properly, but reduced the allowance of the University by \$75,000. Prior to that the budget commission had cut the requests for buildings in two. In the final passage of the appropriation bill the University received its regular maintenance and the long standing appropriations passed by previous legislatures mainly for the support of the Experiment Stations and agricultural extension. The new appropriations were as follows:

- For equipment of new buildings, \$75,000.
- Building for agricultural engineering, \$75,000.
- A service building, \$25,000.
- Complete purchase of land, \$50,000.
- Barns at Lexington and Princeton, \$29,500.
- To meet the Capper-Ketchum Act, \$37,500.

For a number of years the Experiment Station has administered a seed law without appropriation. Early in the session a bill was introduced placing the inspection work in the office of the commissioner of Agriculture and the laboratory work in the Experiment Station. This legislation involved a division of authority and introduced a new principle in such acts. The bill was pushed vigorously by its proponent and passed both houses and at this writing rests in the hands of the governor. The bill was fought vigorously be-

cause it points to further efforts to take activities from the Experiment Station and place them in the political field.

The bill introduced by Hon. J. W. Preston of Prestonsburg proposed the establishment of a Junior College at Paintsville under the direction of the University. At the time the suggestion was made the proposal was received as complimentary by the University and with no other thought than that of rendering a service. Opposition developed on a number of grounds; first, that the proposal was a departure from the educational development in this state because junior college work was left to the denominational colleges. It was also argued that it foreshadowed a series of junior colleges under the University developing a competition unnecessary and unwise, and finally that the revenues of the state were insufficient to maintain additional institutions. In view of these considerations and the opposition developed the University withdrew from the original proposal. The bill passed the senate and was not acted upon by the house rules committee in the closing hours of the session.

Three other bills dealing with the profits of the college book store, the filing of the deeds and contracts for lands with the Secretary of State and a bill requiring the state librarian to give the University law school five sets of all law reports, were passed.

The great problem before the session was the matter of revenue. About the middle of the session an income tax law was introduced. While many members felt that such taxation was desirable, the bill was held in committee.

Perhaps some years of education must follow before Kentucky can develop a better revenue system. Many problems are pressing hard upon the state and their solution in practically every case is a financial one.

The resolution authorizing a joint committee to study the tax system was presented and passed the house but was not voted upon by the senate. So the question must come up again in the next legislature to be threshed and pounded, it is hoped, into a workable system that will give the state more revenues for its government.

PASSING

(By Raymond L. Kirk)

WITH this issue of the Kentucky Alumnus begins a new regime in the office of the secretary of the Alumni Association. The writer of this, has served in this capacity for more than three years and personal affairs have become so pressing that he is forced to resign his position as secretary of the Alumni Association of the University of Kentucky. It is with a feeling of sadness that the work is relinquished and passed on to other hands. The associations in work of this kind are always of such a character that it makes parting more difficult. However, one must bow to the necessary and pass on when duty demands.

The work which we have carried on throughout our more than three years of service is nothing to greatly marvel at, however we do feel that we have begun the ground work for a structure of Alumni interest and activity which will enable our successor to build thereon a firm and active Association which will be of great benefit to the University and the State. Just how far-reaching this has been we cannot say, but we do hope and trust that it has gone far toward that ideal Alumni Association which every institution needs and desires.

In establishing the Kentucky Alumnus we have put forth our best efforts. It is a new departure from the Alumni Association of the University and one that is comparatively new throughout the whole of the United States. At the first we felt our way along and made many mistakes but we feel justly proud of the official publication as it stands today, even so far from perfection. We

trust that our successors will carry on the work as it has been started and not allow the magazine to wane.

In conclusion we bespeak your loyal support to our successors and to the University. Only through you who are the finished products of our Alma Mater is the University of Kentucky known and judged. To the University you owe a great debt and one that you can repay only through loyalty and your support in the many activities of the future. The University and the Alumni Association will always have tender spots in our hearts and the greatest wish is to see the University go forward as Kentucky justly deserves.

EDUCATION

THE College of Education of the University of Kentucky which is featured in an article in the forepart of this issue of the Alumnus, is one of the younger of the six colleges of the University. Despite its youth it has grown until it has reached a most important place in the scheme of things at the University. With the completion of the new Education Building, now more than seventy percent finished, it will take on an even greater importance. The training of young men and young women to teach in the schools of Kentucky is an outstanding service to the State and one that should not go unnoticed. Under the able guidance of Dr. William S. Taylor, an Alumnus of the University of Kentucky, the College of Education is destined to become year by year an even greater factor in the education of Kentucky. This college now offers training from the kindergarten to the doctor's degree. A placement bureau and the Summer Schools each year are added services offered by this college.

DR. G. D. BUCKNER

AS THE end of the present school year approaches, so draws near the end of the second year as president of the University Kentucky Alumni Association of Dr. G. D. Buckner. A word in commendation at this time would not be amiss for one who has devoted so much of his time and energies to the welfare and improvement of the Association and the University.

Since his election to this office, Davis Buckner has given unsparingly of his time and talents to the duties which it required. He has gladly supported every movement and was the originator of many intended to benefit both his Association and the institution of which it is a part. Always present in spirit when forced to be personally absent by other obligations, which he oftentimes unselfishly neglected, Doctor Buckner has been a

(Continued on Page Fourteen)

THE PRESIDENT'S PAGE

With the coming of June, my second year or term of office as president of the Alumni Association of the University of Kentucky comes to an end. These two years have passed swiftly, pleasantly, and profitably for me and I have learned many things about the University and university life which are not known or understood by the undergraduates.

I have been associated with a most excellent executive committee and I feel that we have made some progress in developing those things which are possessed by a real spirited alumni association.

I have filled the office of president of the Alumni Association to the best of my ability and I have given all the time to it that I could spare from my work. The real reason that caused me to be elected to this office was because it was well known that I had a deep love and sincere interest in the University of Kentucky and that I would willingly and gladly do my best in performing the duties attending such an office. It certainly was not because of any unusual talent. No things I have said are based on facts and yet I have cared to put them aside and consider my election to this office the highest honor that can be given to a person who has graduated from the University of Kentucky.

As the matter stands today, the president of our Alumni Association is selected because he is willing to give some of his time and energy in assisting others to form a program whereby the graduates of the University of Kentucky may be bound more closely together and to the University, with the ultimate object of serving the University.

Sometime in the future the president of our association will be selected from the most outstanding alumni and such a selection will be considered a great honor. Such a time is not far in the future. I feel that the office of president of the Alumni Association should be changed each year unless conditions warranted the second term. A new president bringing new vigor and ideas

into the association seems to be a wholesome view, and besides, the honor should go to the deserving.

We have graduated from the University of Kentucky approximately 5,500 persons during its 61 years of existence. The early classes were small in numbers, the later ones have gradually increased until 518 persons graduated in the class of 1929. This means that we would have reached the place where our Alumni will increase very rapidly and this increase in number means an increase in force and power.

Our efforts to form local clubs in various cities and towns in the State this year have been confronted in most instances by the small numbers of graduates located in the various places. The

formation of these clubs should be encouraged and developed as rapidly as possible. These clubs will unify the strength and force of the alumni throughout the State and country and by so doing exert a real influence in the educational, moral, and spiritual development of the University and the State as a whole.

As the number of graduates increases our potential power increases and the clubs and the Alumni Association will make effective this power. We should be in a position to demand and obtain from the State the things that the University needs and the things we would want our Alma Mater to have.

DR. G. DAVIS BUCKNER

As an alumnus, my greatest desire is to obtain for the University of Kentucky those material things and educational advantages which some of our boys and girls of Kentucky seek and obtain in other state universities.

Some days ago I attempted to estimate the strength of our alumni in the State. I found it to be greater than it has been in the past and stronger than I had anticipated.

And, so I venture the hope, that care and consideration will be used in the selection of the next president of the Alumni Association. You will confer a great honor on him and at the same time obligate him to further the development of our Association and the interests of the University of Kentucky.

About Doctor Funkhouser

Dean of Graduate School and Anthropology Professor at University Numbered Among Nation's Greatest Scientists; Is Recognized As Entomological Expert

"I've worked off all my requirements," remarks the University of Kentucky senior, "so that I may elect some of Funkhouser's courses." Such is the undergraduate estimate of the instruction offered by Prof. W. D. Funkhouser, head of the Department of Zoology, Dean of the Graduate School and Professor of Anthropology at the University of Kentucky.

It is hard to estimate in mere words the value of this man's work in relation to his students, the University which he serves, and the state of Kentucky, to which he has become a valuable citizen. If an undergraduate, receiving information through his fellow students as to the quality of the courses of instruction which Doctor Funkhouser teaches, is thus able to appreciate his opportunity, how much more does the alumnus, schooled now in the lessons of experience, come to know and understand the quality of Doctor Funkhouser's work, and the breadth of his experience.

William Delbert Funkhouser is a native of Indiana, and attended the Shortridge High school in Indianapolis before entering Wabash College, from which he was graduated with a Bachelor of Arts degree in 1905. In 1912 he received his M. A. degree from Cornell, returning in 1916 to obtain his Ph. D. In 1916-17, Doctor Funkhouser was made an Honorary Fellow at Cornell and in

1929 Wabash College, his first alma mater, conferred upon him the honorary degree of Doctor of Science, in recognition of his outstanding contributions to the scientific field.

Dr. W. D. Funkhouser received his appointment to the University of Kentucky faculty as head of the Department of Zoology in 1918, which duty entailed the teaching of courses in Zoology and Anthropology. In 1925 Doctor Funkhouser

was appointed dean of the Graduate School and at the commencement exercises in June of this year the first candidate for a Ph. D. degree ever to be graduated by the University of Kentucky will be presented by Doctor Funkhouser.

Classical Archaeology has been a hobby with Doctor Funkhouser for several years, and in his travels has spent much time in Rome, Greece and Egypt studying classical remains, but upon coming to the University of Kentucky, Prof. A. M. Miller succeeded in immediately interesting the young professor of Zoology in the research specimens available

in the state, to the extent that Doctor Funkhouser, first with Professor Miller and later with Prof. W. S. Webb, of the department of Physics at the University, have unearthed some remarkable materials indicating the manner of living of pre-historic peoples in Kentucky.

During the summer of 1919 these men worked

DR. W. D. FUNKHOUSER

in the caves of Kentucky, and since that time they have spent some part of their vacations in every section of the state with the result that valuable contributions have been made to the records of Kentucky's pre-historic era. Doctor Funkhouser considers that the most valuable excavations they have so far made are those in Logan county last summer, which disclosed evidences of cremations among pre-historic people, a theory that has never been advanced before.

Not only is Doctor Funkhouser interested in pre-historic remains, but his knowledge of snakes, their habits and their haunts, has made him one of the most popular lecturers in this section of the country, his fearlessness of the reptile, and his ability to handle the most poisonous of the species, adding both fear and fascination to his learned discussions.

Although it would seem that this man of diversified talents would have little time to devote to other studies, his chief field of research is in Entomology, and specimens from all over the world come to his desk daily to be classified. Taxonomic Entomology is the technical study in which he is constantly doing extensive research work.

Doctor Funkhouser, as chairman of the University of Kentucky Athletic Council since 1919, represents the University in the Southern Athletic Conference, having acted as secretary to the Conference since 1924. He is a member of the American Association for the Advancement of Science and a Fellow in the Association; a Fellow in the Entomological Society of America, and vice president of the organization since 1928; a member of the New York Entomological Society; the Brooklyn Entomological Society; the Wilson Ornithological Club; the Kentucky Ornithological Society; the New York Geographical Society; the Kentucky Academy of Science; the University of Kentucky Research Club; the American Eugenics Society; the American Association of University Professors; the Kentucky Educational Association; the Kentucky State Historical Society; the Bradford Club; Filson Club; American Museum of Natural History and the American Society of Zoologists.

Besides these numerous organizations which claim the attention of Doctor Funkhouser, he is a member of both Phi Beta Kappa and Sigma Xi, honorary organizations in the field of arts and science which hold the highest rank in the field of scholastic attainments. He is also a member of Omicron Delta Kappa, national campus leaders' fraternity, Omega Beta Pi, and Kappa Sigma social fraternity. Since Doctor Funkhouser's appointment to the University of Kentucky faculty he has held the position of chairman of the Uni-

versity of Kentucky Extension committee from 1920 to 1925; was vice president of the Lexington Boy Scouts from 1921 to 1926 and was president of the Lexington Rotary Club in 1925-26.

An author as well as a scientist, Doctor Funkhouser has made several contributions to the field of scientific literature, chief among them being a work entitled "Bibliographical and Synonymical Catalogue of the Membracidae of the World," "Biology of Membracidae," "Outlines of Zoology," "Wild Life of Kentucky," "Neotropical Homoptera," "Membracidae of Connecticut," "Kentucky Birds," also about 100 technical papers in scientific journals chiefly on entymology, ornithology, and archaeology.

U. K. ENROLLMENT OF 1880 IS TRIPLED

If we could view the University of Kentucky as it was fifty years ago, when James K. Patterson was president, we would see that it has undergone many remarkable changes. The main building, now the Administration building, is used as such at present. White Hall was then used as the old dormitory, but it has not been used for lodging purposes since 1919 when it was remodeled into class rooms and renamed White Hall in honor of Professor James Garrard White. The president's house was occupied by President Patterson continuously from 1882 until his death in 1922, and has since been set aside as a repository of his library. In 1922 the property of the college was estimated to be worth \$500,000 more than it was in 1880.

Before that date the University had six professors and offered a single course leading to a degree. The enrollment at that time was 767. The members of the faculty were John Henry Neville, professor of Latin and Greek; James G. White, professor of mathematics; A. R. Crandall, professor of history; Dr. Robert Peter, professor of chemistry, and John Shackelford, professor of English.

As it stands today the University has grown from its few small buildings to its twenty buildings adequately equipped. Its alumni are recognized among the best educated men and women in the land and the members of the faculty are too numerous to mention.—Mary Cecelia Burk in *The Kentucky Kernel*, March 21, 1930.

KERNEL AWARDED LOVING CUP

The University of Kentucky Kernel was awarded a loving cup by the Kentucky Intercollegiate Press Association, in their closing session Saturday morning, March 15, at Georgetown College, for the best advertising make-up.

NEWS OF SPORTS

Basketball Season Is Success

Wildcats Go to Semi-Finals of Tourney Held in Atlanta

Advancing to the semi-finals of the Southern Conference basketball tournament for the second time in the last three years, the Wildcat basketball team ended one of the most successful seasons in their history. Winning fifteen out of eighteen games with the best teams in the South and Middle West, is a record of which any team could justly be proud.

Victories over Georgetown, Berea, Miami, and Clemson inaugurated the Kentucky net season. The first defeat came at the hands of the Creighton Blue Jays, who eked out a one-point win before succumbing on the following night to the Blue prowess. The only other loss on the regular schedule was accomplished by the Tennessee quintette, that had previously fallen before the Kentuckians, while such teams as the Mississippi Aggies, Georgia, Georgia Tech, and the touted Washington and Lee Generals are being numbered as victims of the Wildcat attack.

The Men of Mauer swooped down on Atlanta on February 28 for the annual conference tournament and were named, along with Alabama, Duke and Washington and Lee, as a seeded team. The Old Liners of Maryland and Sewanee's Tigers were eliminated by Kentucky in the first two rounds of the tourney. The sensational Duke five was to be their semi-final opponent. Kentucky lost this game, the score being 37 to 32, after playing a beautiful game and setting a record that will probably stand for all time by shooting 14 foul goals out of 14 chances. The strenuous game with the Wildcats took all the life out of Duke and they in turn lost in the finals to Alabama. With this defeat went all of Kentucky's championship hopes but the Blue team had made a distinct impression on the tournament fans by showing that it was of highest championship calibre.

At the close of the tournament, Captain Paul McBrayer was named as unanimous choice for All-Southern guard.

Carrying out an annual custom begun several years ago, the Lexington Alumni Club entertained on March 10 at the Lafayette hotel with a banquet in honor of the members of the Kentucky basketball varsity and the state championship

freshman squad. It was on this occasion that the lettermen elected Carey Spicer, of Lexington, to succeed Paul McBrayer as captain of the Wildcat team.

Miss Marguerite McLaughlin, president of the Lexington Alumni Club, presided as toastmaster at the banquet which was attended by members of the teams, coaches, managers, and friends of the players. Speeches were made by President McVey, Coaches Mauer and Potter, and Dr. Funkhouser, member of the athletic council, who presented the lettermen with their certificates and the five graduating seniors with miniature gold basketballs.

Varsity letters were awarded to Captain Paul McBrayer, Lawrence McGinnis, Stanley Milward, Cecil Combs, Hays Owens, Carey Spicer, Louis McGinnis, Jake Bronston, and George Yates.

Thomasson Wins First Race

Captures Half-Mile Run at Cincinnati to Lead Cinder Team in Ohio Meet

Coach Bernie Shively and his track candidates opened their season on March 15 by participation in the Ohio Relays, held in the St. Xavier field house in Cincinnati.

Waymann Thomasson, sensational middle-distance runner, was the only Wildcat performer to win his event. He circled the difficult indoor track six times, a half-mile, in the excellent time of 2:05 to win easily from the field. Jones in the 440-yard dash, Porter and Gibson in the pole vault, and Wright in the weights, were the other Wildcats to score and push the Kentucky total up to 20 points.

Inclement weather has prevented the track from being put into condition and has seriously hindered the Blue squad in its workouts. However, Coach Shively has abundant promising material on hand and when good weather sets in the Kentucky prospects for a winning cinder aggregation will brighten considerably.

HIGH SCHOOL TOURNAMENT ATTRACTS LARGE CROWDS

The twelfth annual state high school basketball tournament, which is conducted by the University of Kentucky Athletic Association, was held in

Lexington on March 20, 21, and 22. The Class A championships were won by boys of Kavanaugh high school, Lawrenceburg, and by the Hazard girls. Class B titles went to Corinth boys and the Woodburn misses, while the Corinth and Hazard fives achieved the crowns in the state-wide finals.

The high school tournament is one of the foremost contributions of the University to the state. It is promoted by the University athletic association for the Kentucky State High School Association and is yearly becoming more important as a part of the annual program. Expenses of the competing teams and their coaches to and from the tournament and during its progress, are paid by the University.

The new rating system by which schools are divided according to their enrollment into A and B classes more nearly equalize the chances of the representatives of large city schools and the small community teams to compete for state honors. The district and regional preliminaries assure every section of the state of being represented at Lexington and consequently draws loyal groups of fans and supporters from each. The 1930 meeting proved this with teams from Tolu, a western Kentucky hamlet, to Betsy Layne, on Big Sandy, from the east, Hazard and Carr Creek from out of the mountains, and Louisville Manual and Lexington, the larger schools.

Baseball To Begin Soon

Game With Miami on March 31 to Open Big Blue Diamond Schedule

With the budding leaves, bright sunshine, and other evidences of the arrival of spring, Coach Pat Devereaux is holding daily workouts on the Stoll field diamond for his baseball candidates. The horsehide season for Kentucky will open on Monday, March 31, with the Miami nine furnishing the opposition.

The baseball squad of last season, which suffered only one loss and one tie out of fifteen games, was hard hit by graduation in June when three of the regulars were lost from the team. However, the bulk of the lettermen have reported this spring and from all indications of the early practice sessions the team will boast of plenty of hitting power and fielding skill during the coming campaign.

The pitching staff will be built around Captain Raymond Rhoads and Paul McBrayer, veterans of plenty of talent. Barnes and Augustus, also veterans, will share the catching duties. The infield will be taken care of by Kruger, Toth, Mau-

ser, and the freshman football and baseball star, Cecil Urbaniak. Four hard-hitting, experienced outfielders, Kellogg, Trott, Murphy, and Kelly are available for the gardens.

The tentative schedule at the present contains eleven games. They are:

March 31—Miami, here
 April 4-5—Ohio State, here
 April 14-15—Ohio State, there
 April 21—Illinois, here
 April 25-26—Vanderbilt, here
 April 29—Miami, at Oxford, Ohio
 April 30—Cincinnati, there
 May 12—Cincinnati, here

Coach Mauer Resigns at U. K.

Basketball Mentor Accepts Four-Year Contract at Miami University

According to a recent announcement, John Mauer, for the past three years head basketball coach, freshman baseball coach, and assistant football mentor at the University, has severed his connections with the Kentucky school. He has accepted a four-year contract as head basketball coach at Miami (Ohio) University.

Mauer began his coaching duties at U. K. in the fall of 1927. He has attended the University of Illinois where he played basketball under Craig Ruby, being a member of the championship team from that school and winning the honor of being named All-Western conference forward. His coaching experiences at Kentucky have been most successful, two of the three Mauer-coached teams advancing to the semi-finals of the Atlanta tournaments. His slow-breaking offense, featured by the novel submarine bounce-pass attack, have met with much success and imitation in the South.

When his present contract expired, Coach Mauer accepted the Miami offer because it extended over a longer period and contained more favorable salary stipulation than did the Kentucky renewal contract offer. He will continue his duties here, coaching the freshman nine this spring, and will report to his new position this fall.

No announcement has been made as to who will coach the Wildcat basketball team next season, although it is reported that several of the high school coaches in the state are being considered as Mauer's successor.

Capt. James M. Morris, LL. B., 1915, is captain in the United States Army. He is with the Military Department, University of Florida, Gainesville, Florida, and his residence address is 707 East Columbia street.

Building Nears Completion

New Home of the College of Education Will Be Ready August 1

Education from the kindergarten to the highest academic degree, that of doctor of philosophy, will be available at the University when the new education training building now under construction is completed, Dean W. S. Taylor, of the College of Education, announced Saturday.

The new building, facing the University administration building near the intersection of South Upper and Limestone streets, will be completed and ready for occupancy by August 1, according to the latest report received by Dean Taylor.

The University will be one of the few institutions in the entire country and the only one within an area of several hundred miles to offer such complete educational training. When the new building is completed, a child can enter the University at the kindergarten age and continue its education through graded school, high school, college and post graduate study to master's and doctor's degrees.

The new building is to contain all the most modern equipment for the education of children and youths of all ages and for the educational training of students in the University College of Education. The faculty of the College of Education will be enlarged to take care of the elementary and graded classes being added and students of the college will be given practical training in the teaching of students of all ages. Practice teachers will be under the observance of experienced demonstration teachers and supervisors, at all times assuring the children the best instruction and the student-teacher practical experience.

Built with two interior courts for recreation and ventilation purposes, the new two-story building will be provided with all educational facilities. It will contain a complete gymnasium for the University high school and elementary and high school libraries. A cafeteria which is to be operated as a branch of University Commons will be equipped in two divisions, one for the children and one for the older students.

Dean Taylor will have charge of the enlarged College of Education, which will be housed entirely in the new building.

With the opening of the complete educational unit in the new building next fall, the College of Education at the University is expected to attract undergraduate education students from a wide area. Operation of the improved educational training school is expected to result in the raising of standards of neighboring states. Before many

years have passed, University trained teachers are expected to be numerous in adjoining and nearby states. Better training facilities will have a tendency to create a demand for University of Kentucky College of Education graduates throughout the middle west and south.

The erection and opening of the new building cannot but add to the University's already rapidly growing prestige throughout the nation, according to educators familiar with conditions and educational facilities provided by other large universities.

Opening of the new building will bring increased educational opportunities to the entire state, but especially to Lexington. Through the operation of the elementary, graded and high schools under the supervision of experts, Lexington children will be able to acquire the finest possible education at a minimum cost just as Lexington college students enjoy a financial advantage because of the location of the University in this city.

Far from being confined to Lexington or the vicinity, however, the benefits will be more than state-wide as one of the major benefits of the training school will be improved teachers in the public schools of every county.

Kirk Resigns Alumni Post

Former Association Secretary Is Succeeded By James Shropshire

Raymond L. Kirk, secretary of the University of Kentucky Alumni Association since 1926, has resigned from this position to go into other lines of work. James S. Shropshire, of Lexington, has been named by the executive board of the Alumni Association to fill this position until June.

Kirk was graduated from the University in the class of 1924. In the period of more than three years, during which time he has been Alumni secretary, he has promoted the organization of many Alumni clubs, groups, and reunions, and has otherwise done much to gather the 5,000 scattered Kentucky graduates into a more or less compact organization for the betterment of the institution and the state. The establishment of the Kentucky Alumnus was one of the steps taken to do this, and this magazine, devoted exclusively to Kentucky Alumni, has shown a marked growth since its first issue was made.

The pressure of other business pursuits has taken Kirk to Florida, and he was reluctantly forced to resign as secretary of the association. Shropshire, who was graduated from the College of Agriculture in 1929, is at present the manager of all student publications on the campus.

Reunion Plans Are Being Completed

Classes of Years Ending in Zero and Five to Hold Their Get-Togethers at Commencement Time; 500 Returning Alumni Is Goal Set For Occasion

Plans are rapidly going forward for the annual class reunions which will be held in Lexington during the commencement exercises about June 1. Five hundred returning Kentucky Alumni is the goal that has been set for the 1930 reunion.

For the past several years booked as a main feature in the Alumni Association program, the establishing of a regular system of rotation for the class reunions is daily growing in importance. The present plan is to have each class reunion to the campus at intervals of every five years for a renewal of acquaintanceship with each other and with the University. This spring will be the year for the reunion of classes which end in 0 or 5, such as 1915, 1920, 1925, etc.

The University and Association officials feel that it is the obligation of every graduate and former student of Kentucky to return to these reunions if possible. Such a system of rotation is used by many others of the larger schools in the country and it is achieving remarkable results. The growth in enrollment at U. K. in recent years has enabled it to turn out in excess of 500 graduates annually. Such a large number necessitates some workable systematic plan whereby contact can be maintained with the alumni.

Kentucky's first reunion was held in 1928 when the Class of 1908 returned to the campus. Out of a class of 92 in this group of graduates, 47 returned for the exercises, a surprisingly large percentage. The following year, when the Classes of 1904, 1909, and 1927 held their reunions, 262 former students out of approximately 700 members of these classes, again put in their appearances at their Alma Mater.

A general program as formulated by the executive officers of the Association for the whole of the Alumni reunions will be sent out soon in a form letter. These letters will be followed immediately by letters from the secretaries of the various classes containing more specific and detailed information about each particular reunion arrangement. Class Day programs at graduation time will be interspersed with reunion luncheons, banquets, and meetings, while plans will carry the returning Alumni through enjoyable programs until the formal commencement exercises.

The response with which the Alumni reply to these plans about reunions have much to do with

their success and also with the progress of the University. The reunions renew their contacts with the schools and makes them more familiar with the actual workings of their own University. In addition to these factors, the encouragement and stimulation arising from the flattery of the return of some of their former students is most beneficial to members of the faculty.

EDITORIAL

capable leading light at all of the meetings and functions arranged by the Association. The Alumnus wishes to express to him, on behalf of all the Alumni which it represents, their appreciation for his sincerity to his duties and the conscientious execution of his offices.

SOUTHERN HOSPITALITY

SOUTHERN hospitality in its highest form was exhibited by the newly-organized Kentucky Alumni Club of Atlanta who played hosts to the members of the Wildcat basketball team when they invaded the South for the conference tournament. This group of loyal Alumni are one of the most recently formed units of the University of Kentucky Alumni Association.

The players and coaches were greeted upon their arrival by members of the club who transported them to the palatial Atlanta Athletic Club where they were guests of honor at a luncheon. The Wildcats were introduced individually to the Alumni who in turn introduced themselves, with their class and graduation year, to the visitors. Speeches were made by some of the Alumni, Coaches Mauer and Gamage, and Captain Paul McBrayer.

On Sunday afternoon during cessation of tournament activities, the alumni called for the players and took them on a sight-seeing tour of the many interesting places in and around Atlanta, and otherwise helped to royally entertain the Kentucky team and its supporters.

Chester A. Kuebler, B. M. E., 1910, is president and general manager of the Uniflow Manufacturing Company, Erie, Pennsylvania. His address is 1460 South Shore Drive.

WHO'S WHO AMONG THE ALUMNI

DEAN W. S. TAYLOR

William S. Taylor, dean of the College of Education, University of Kentucky, and author of the feature article of this issue, was graduated from U. K. in 1912. He was born January 20, 1885, at Beaver Dam, Ky. His early education was received in the rural schools of Ohio county, and at the high school at Hartford, Ky. In 1910, he was graduated from the Western Normal School and Teachers' College at Bowling Green, where he was president of the senior class and prominent in various scholastic activities. Two years later he was an honor graduate of the University of Kentucky. In 1913 Dean Taylor was the holder of a fellowship at the University of Wisconsin, at Madison, and was granted a master's degree.

Dean Taylor taught five years in one-room schools and high school. From 1913 to 1917 he was Professor of Education and high school visitor at University of Texas, with the exception of one year, when he was in charge of vocational work in agriculture under the Federal Board for Vocational Education. For two years he was the head of the department of rural life at the Pennsylvania State College, and for three years was with the department of public instruction of Pennsylvania, in charge of the training and certification of high school teachers.

In 1923 Mr. Taylor was appointed dean of the newly created College of Education, University of Kentucky, in which capacity he has since served.

(Continued on Page Sixteen)

Dean Sarah Blanding

Sarah Gibson Blanding, present Dean of Women at the University of Kentucky, was graduated in the class of '23. She was born in Lexington, Ky., on November 22, 1898, and attended the public schools of that city. After completing the course of the Lexington Senior High school, she attended the New Haven Normal school of gymnastic where she was graduated in 1919.

Miss Blanding first came to the University in the fall of that year as an instructor in physical education, at the same time enrolling as a student. She was graduated in 1923 and was soon appointed acting Dean of Women. Given a leave of absence in 1925, she went to Columbia University where she received her master's degree the following year. Returning to the University in the fall of 1926, she was made the Dean of Women, which position she has held ever since. She has been granted a leave of absence during the next school year, which she will spend in London.

Since her graduation from U. K., Miss Blanding has been very active in civic and educational affairs. For two straight years, she has represented the American Association of University Women as a delegate to the Conferences on the Cause and Cure of War, held annually in Washington. From 1926 to 1928, she served as president of the Kentucky Association of Deans of Women, and for two years was vice president of the Kentucky League of Women Voters. She is

(Continued on Page Sixteen)

DEAN W. S. TAYLOR

(Continued from Page Fifteen)

In 1924 he held a research scholarship at Columbia University and received a doctor's degree.

Dean Taylor is a member of the American Association for the Advancement of Science; the National Society for Study of Education; National Educational Association and American Vocational Association; Alpha Zeta, Phi Delta Kappa, Kappa Delta Pi, honorary educational fraternities; Acacia, social fraternity for masons; and Kiwanis, being president of the Lexington chapter in 1926.

Dean Taylor, a writer of note, is editor of the High School Quarterly of the University of Kentucky, author of "Professional Education" and various contributions to periodicals and bulletins for schools.

THE COLLEGE OF EDUCATION

(Continued from Page Five)

Lewis, Principal, Owensboro High School; J. F. Bruner, Principal, Whitesville County School; Doctor H. L. Donovan, President, Eastern Teachers College, Richmond; John Howard Payne, President, Morehead State Teachers College, Morehead, Kentucky; Miss Mary West, teacher, University High School, University of Kentucky; Mr. C. V. Snapp, Superintendent of Schools, Jenkins, Kentucky; Mr. O. J. Jones, Supervisor of Rural Schools, Kentucky; Miss Virginia McClure, principal high school, Fayette County; Mrs. Cleo Gillis Hester, Registrar Murray State Teachers College; Mr. R. L. McPheron, Superintendent of Schools, McAllister, Oklahoma; Mr. R. A. Edwards, Director Training School, Eastern Teachers College.

The College of Education, although not yet seven years old, has been able to train large numbers of young men and young women for responsible positions in Kentucky's school program. Of the 408 persons who have received their degrees in education since the college was established more than 350 are now serving the public schools and the colleges in the state. It is not possible to give a list of all of these people and tell what they are now doing, but I think you will be interested to know that some of them are teaching in the Teachers Colleges at Morehead, Richmond, Bowling Green and Murray; some are teaching in the private colleges and the University; some are serving as city superintendents, county superintendents, high school principals, and elementary school principals; but the great majority are high school teachers.

The College of Education maintains a placement service for persons in any college of the University who desire to teach. In the five years that this service has been in operation 433 graduates have been placed. All teachers placed are carefully followed up to determine their success and to ascertain whether they deserve promotions. The graduates of the University who have prepared themselves to teach are in demand in the public high schools. Even though there has been a great oversupply of teachers for the past two years the University has had little difficulty in finding satisfactory positions for its graduates.

The College of Education is making a consistent growth every year. We have grown from an enrollment of 69 in the first semester of 1923-24 to 407 in the second semester of 1929-30. Our graduating class has increased from 15 in 1924 to 115 in 1925. When we are in our new building and have our new program in operation we may safely expect to render a much larger service and render it more effectively.

SMITHSONIAN AIDS U. K. RESEARCH

Prof. W. D. Funkhouser, head of the University of Kentucky zoology department, received word from Washington, D. C., yesterday that the Smithsonian Institute would match the annual appropriation set aside by the University for archeological research. Dr. Funkhouser said that this gift from the Washington institute will allow the University zoology department to carry out an extensive research program each summer in explorations for prehistoric relics.

The offer was an unconditional one and any specimens found will remain the property of the University.

MISS McCLURE APPOINTED SUPERVISOR

Miss Bertha McClure, graduate of the University and a native of Fayette county, has been appointed night supervisor at the Shriners' Hospital for Crippled Children at Maxwell street and Lexington avenue, Lexington, Ky. Miss McClure received her nursing training in the University Hospital at Ann Arbor, Mich.

DEAN SARAH BLANDING

(Continued from Page Fifteen)

also a member of the National Girl Reserve Committee of the Y. W. C. A.

In addition to her official duties, Miss Blanding is an assistant professor in the department of political science.

NEWS OF THE CLASSES

1900

Reunion June, 1930.

J. B. Wilson, B. M. E., 1900; M. E., 1905, is a mechanic engineer for the Louisville Water Company. He lives in Louisville, Kentucky, where his address is 727 South Fourth avenue.

* * *

Willa Bowden, B. A., 1900, now is Mrs. P. A. Vallandigham and is with the department of Latin, Morris Harvey College, Barboursville, West Virginia.

* * *

1901

Frank T. Siebert, B. M. E., 1901, is an inspector with the Interstate Commerce Commission. His business address is 406 Postoffice Building, Philadelphia. His residence address is 127 Merbrook Lane, Marian, Pennsylvania.

* * *

1903

Thomas H. Cutler, B. S. M. E., 1903, is the chief engineer for the Missouri State Highway Commission. He will direct a road constructing program of \$32,000,000 and oversee maintenance costing \$4,500,000 during 1930. He is located in Jefferson City, Missouri, where his address is 1213 Elmerine avenue.

* * *

1904

W. E. Freeman, B. M. E., 1904, is assistant to the dean of the College of Engineering of the University of Kentucky. He is living in Lexington and his address is 1020 Fincastle Road.

* * *

O. K. Dyer, B. M. E., 1904, is located in Buffalo, New York, where he is the assistant sales manager for the Buffalo Forge Company. His business address is 490 Broadway and his residence address is 11 Russell avenue, Buffalo, New York.

* * *

Madison B. Porch, B. S., 1904, is Chemist and Plant Pathologist with H. J. Heinz Company. His business address is 545 Orchard avenue, Pittsburgh, Pennsylvania.

* * *

1906

Bess Goggin, B. S., 1906, is now Mrs. L. J. Parigin and is living at Paintsville, Kentucky.

* * *

J. S. McHargue, B. S., 1906, M. S., 1914, is a chemist at the Kentucky Agricultural Experi-

ment Station and his residence address is 411 Transylvania Park, Lexington, Kentucky.

* * *

1907

Louise M. Kornfeld, B. S. 1907, is teaching at the Western High School for Girls, Louisville, Ky., where her residence address is 1637 Windsor Place.

* * *

John G. Allen, B. C. E., 1907, has retired and his address is 2012 Felix avenue, Memphis, Tennessee.

* * *

W. D. Nicholls, B. S., 1907, M. S. Agr., 1915, is head of the Department of Farm Economics in the College of Agriculture at the University of Kentucky. His residence address is 126 University avenue, Lexington, Ky.

* * *

Louis E. Hillenmeyer, B. S., 1907, is a nurseryman with Hillenmeyer & Sons, R. F. D. No. 6, Lexington, Kentucky.

* * *

A. B. Beaumont, B. S., 1908, is a teacher in Massachusetts Agricultural College, Amherst, Massachusetts, where his address is 51 Amity street.

* * *

H. H. Downing, B. C. E., 1908, is Assistant Professor of Mathematics at the University of Kentucky. His residence address is 138 State street, Lexington, Kentucky.

* * *

F. M. Wilkes, B. M. E. 1908, is General Manager of the Arkansas Power & Light Company, 1202 Cherry street, Pine Bluff, Arkansas.

* * *

1909

V. Y. Moore, A. B., 1909, is a lawyer in Washington, D. C., where his address is 605 Transportation Building.

* * *

B. D. Wilson, B. S., 1909, M. S., 1914, is Professor of Technology, Department of Agronomy, Cornell University, Ithaca, New York.

* * *

O. H. Taylor, B. C. E., 1911, C. E., 1914, is an engineer auditor with CMS. & P. & P. Railroad Company in Chicago, Illinois. His business address is Room 288, Union Station, and his residence address is 8228 Blackstone avenue.

R. W. Smarr, B. C. E., 1909, is with Kanawha City Company, Charleston, West Virginia. His address is P. O. Box 1135.

* * *

1910

L. S. O'Roark, B. M. E., 1910, is information manager with Bell Telephone Laboratories, 463 West street, New York, N. Y. His residence address is 14 Ralph Place, Morristown, New Jersey.

* * *

Grover Thompson, LL. B., 1910, is an attorney-at-law in Lexington. His business address is 1512 Fayette Bank Building, and his residence address is 1721 Cherokee Park.

* * *

1911

Paul Francis, B. M. E., 1911, is now a coal operator in LaFollette, Tennessee. His address is 101 Indiana avenue.

* * *

1912

James T. Lowe, B. M. E., 1912, is employed by American Telephone and Telegraph Company, Department of Development and Research, New York, N. Y. His business address is 195 Broadway and his residence address is 141 West 16th street.

* * *

M. M. Harrison, B. S., 1912, is a chemist with Miller Rubber Company, Akron, Ohio, and lives at 334 Merriman Road.

* * *

Harry A. DeAtley, LL. B., 1912, is legal adviser and head of law division, office prohibition administrator at 21 East Jones street, Savannah, Georgia.

* * *

1913

Lucille Gastineau is now Mrs. W. C. Wilson and is living at 145 Kentucky avenue, Lexington, Kentucky.

* * *

A. H. Colbert, B. M. E., 1913, is living at 7455 Greenview avenue, Chicago, Illinois. His business address is 333 North Michigan avenue.

* * *

W. C. Wilson, A. B., 1913, is Commissioner of Public Works, Lexington, Kentucky. His business address is 235 Limestone street and he lives at 145 Kentucky avenue.

* * *

Iley B. Browning, B. S. in Geology, 1916, is a petroleum geologist and has his offices at the Ashland National Bank Building, Ashland, Kentucky. His residence is Breezemont, Ashland avenue, Ashland, Kentucky.

Mabel H. Pollitt, A. B., 1913, A. M., 1916, is head of the Department of Foreign Languages at Eastern Kentucky State Normal School and Teachers College, Richmond, Kentucky.

* * *

H. K. Gayle, B. S. Agr., 1914, is County Agent of Marion County. His address is Morganfield, Kentucky.

* * *

Sallie E. Pence, A. B., 1914, M. A., 1928, is Instructor of Mathematics at the University of Kentucky.

* * *

Henry N. Marsh, B. S. Ind. Chem., 1914, is assistant to the Technical Director of the Hercules Powder Company of Wilmington, Delaware, where his residence address is 107 South Grant avenue.

* * *

1915

C. R. Rainey, B. M. E., 1915, is office engineer for Lynch Construction Company, 730 Merrill avenue, Los Angeles, California. His residence address is 3810 W. 59th street.

* * *

W. K. Clore, B. S., 1915, is vice president of the Hoosier Mineral Feed Company, Greenwood, Indiana. His address is 200 North Brewer street.

* * *

Wayland Rhoads, B. S., 1915, M. S., 1923, is with the Experiment Station, University of Kentucky. His address is 1435 South Limestone street, Lexington, Kentucky.

* * *

* * *

Fred Whitely, B. M. E., 1916, is district Manager for Wisconsin Power & Light Company, at Fon Du Lac, Wisconsin. His address is 153 14th street.

* * *

Kathleen Howard, A. B., 1916, is now Mrs. K. U. Meguire and is living at 2521 Ransdell avenue, Louisville, Kentucky.

* * *

1917

Bart N. Peak, A. B. Hist., 1917, is Secretary of University Y. M. C. A. His residence address is 118 University avenue, Lexington, Kentucky.

* * *

A. B. Crawford, A. B. Edu., 1917, is superintendent of Anchorage Public Schools, Anchorage Kentucky.

The Succession

WARREN GAMALIEL HARDING
"The king is dead..."

Bachrach
CALVIN COOLIDGE
"...long live the king!"

Keystone
JOHN C. COOLIDGE
Justice of the Peace

In the summer of 1923, his term of office half complete, his cabinet not yet discredited, Warren Gamaliel Harding, 29th U. S. President, was prostrated by ptomaine poisoning, complicated by bronchial pneumonia. For days the country waited anxiously, and on August 2nd, doctors became confident of recovery. . . . As *TIME*, in part, reported subsequent events:

... Towards evening the President seemed in good health. Mrs. Harding and a woman nurse were with him. Mrs. Harding was reading aloud. Without warning a tremor shook his frame and he collapsed. Physicians were summoned. It was announced that the President had died of cerebral apoplexy at 7:30 p.m., Pacific time. . . .

In the early morning hours of August 3 an automobile full of newspaper correspondents sped over Vermont roads to Plymouth Notch at the southern end of the Green Mountains. It drew up at the

two-story, white frame house of John C. Coolidge, father of the Vice President. Word was sent upstairs of the tremendous news from San Francisco. The Vice President had retired for the night. In a few moments he had dressed and descended the stairs with his wife. The scene was in effect, if not in words, a representation of the ancient theme: "The King is dead; long live the King!"

In an unpretentious New England living room Mr. Coolidge, pale, and silent, read the telegrams telling of President Harding's death. Then he slowly dictated a statement expressing his sorrow, and his intention of carrying out the policies of his predecessor, and also a telegram of condolence and sympathy to Mrs. Harding, signed "Calvin Coolidge; Grace Coolidge."

The next morning, the oath of office having been wired from Washington, Calvin Coolidge was sworn in as President of the United States, by his father, a Justice of the Peace. . . .

Cultivated Americans, impatient with cheap sensationalism and windy bias, turn increasingly to publications edited in the historical spirit. These publications, fair-dealing, vigorously impartial, devote themselves to the public weal in the sense that they report what they see, serve no masters, fear no groups.

The Weekly Newsmagazine

American Radiator heating adds new home comforts to old home ties!

A peculiar sentiment attaches to an old home . . . the longer you live in it the less you like to give it up . . . But you can't keep warm on sentiment . . . old homes are usually cold homes, and family health is more important than family memories . . . Yet it is not necessary to sacrifice either . . . keep the old home, but get rid of its antiquated heating equipment . . . keep the old memories, but install a heating plant that will keep an even temperature . . . the benefits of American Radiator Heating are equally desirable in new homes and old . . . If, for example, you are thinking of buying

a new home, specify the equipment which the best architects specify for themselves . . . Your architect will also confirm our warning not to combine American Radiator Heating with other types of equipment . . . it must be All-American to ensure perfect coordination and efficiency.

You can modernize your present home with American Radiator Heating for approximately \$75 a room . . . and you can spread the cost over a long period of time . . . Ask us for particulars of **TIME PAYMENTS** . . . or ask your local heating dealer . . . he'll tell you more about it than we have room to tell you here.
