## FOREWORD

The bulletin on Organization and Rating of Kentucky High Schools, published in July, 1935, met with such universal approval, and was in such demand, that it was thought wise to publish this year a bulletin containing similar information.

This compilation has been made by Mark Godman, O. J. Jones and L. N. Taylor, Public School Supervisors, and in a very careful manner.

It is hoped that the facts contained herein will be of much service to school officials, as well as laymen, interested in facts of the nature of those contained in this publication.

H. W. PETERS,  
*Superintendent of Public Instruction.*

## ORGANIZATION AND CLASSIFICATION OF KENTUCKY HIGH SCHOOLS

By MARK GODMAN, O. J. JONES, L. N. TAYLOR,  
Public School Supervisors

Boards of education in Kentucky have adopted many types of organization for the high schools of the state. The 6-3-3 organization is limited primarily to large independent school districts. The independent school districts have also led in the organization of junior high schools, or schools with 7th, 8th and 9th grades only. Six-year high schools, grades 7-12 inclusive, predominate in the county school districts. Four-year high schools, grades 9-12 inclusive, are found in both independent and county school districts.

There are 833 high schools in Kentucky. Of this number <sup>84</sup>~~83~~ are private high schools and 75 are high schools for colored. There are 675 public high schools for white children in the State of Kentucky. Reports were received from 29 junior high school organizations this year.

The total enrollment in high schools in the State of Kentucky for 1935-36 was 115,735 pupils; 101,017 of these were enrolled in public white high schools and 6,546 were enrolled in public high schools for colored. The private high schools in Kentucky enrolled 8,172 pupils with 542 teachers. <sup>198</sup>

There are nine high schools in the state that have enrolled one thousand or more pupils this year, and twenty-five that have enrolled between five hundred and one thousand. Of the total number of high schools in the state, 313 enrolled between one hundred and five hundred pupils and 486 enrolled less than 100 pupils.

In accordance with recommendations made by the Commission on Secondary Schools of the Kentucky Association of Colleges and Secondary Schools, which met in Frankfort on May 15, 1936, the State Board of Education accredited 687 high schools extending through grade twelve. Of this number 348 were accredited Class A and 339 Class B.

There are 324 high schools in the state organized on the six-year basis.

The high schools of Kentucky employed 5,527 teachers. All of them were college graduates except 308.

For the school year 1934-35 there was a total of 848 high schools in the state, and for this year only 833, or a decrease of 15 high

schools. For the same year there were 89 private high schools. This year there were 83. The number of public high schools for colored remained the same for both years.

Public high schools for white children decreased from 684 in 1934-35 to 675 in 1935-36. The total enrollment reported for junior high schools increased from 9,622 in 1934-35 to 11,577 in 1935-36. The total enrollment in all public high schools in the state increased from 105,796 in 1934-35 to 115,735 in 1935-36, while the total enrollment in public white high schools increased from 89,375 in 1934-35 to 101,017 in 1935-36.

The total enrollment in private high schools increased from 7,846 in 1934-35 to 8,173 in 1935-36.

In 1934-35 eight high schools enrolled more than one thousand pupils each. One high school was added to this list in 1935-36. High schools enrolling from 500 to 1,000 pupils numbered only 22 in 1934-35. These have increased to 25 in 1935-36. In 1934-35 there were 243 high schools reporting an enrollment from 100 to 500 pupils. This has increased to 313 for 1935-36. The number of Class A high schools increased from 321 in 1934-35 to 348 in 1935-36, and the number of Class B high schools increased from 326 in 1934-35 to 339 in 1935-36. Sixty-year organizations increased from 227 in 1934-35 to 324 in 1935-36.

According to the 1934-35 reports, there were 4,545 teachers employed in the high schools of Kentucky. This number increased to 5,527 according to the 1935-36 reports. There were 364 teachers employed in the high schools of Kentucky in 1934-35 who had not graduated from standard four-year colleges. This number decreased to 308 in 1935-36.

The average enrollment in Class A high schools increased from 1934-35 to 1935-36, and the average number of pupils per teacher showed a slight increase. The average enrollment in Class B high schools in 1935-36 was eight more than in 1934-35, and the average number of pupils per teacher in Class B high schools increased four over the same period.

The biggest high school problem facing the school administrators in the state is still that of small high schools and most of these are found in the county school districts. This problem is being solved in two ways. Much more transportation is being provided by county boards of education than has been furnished in the past. In some county school districts the high school enrollment more than doubled from 1934-35 to 1935-36. This increase in enrollment is attributed primarily to the increase in transportation. The number of school busses used for transporting children in 1935-36 compared to the number in 1934-35 shows that many boards of education more than

doubled their transportation in this one year and the total number of children transported almost doubled from 1934-35 to 1935-36.

Many county boards of education are combining small high schools at strategic centers and furnishing transportation to these centers. This is proving less expensive than the maintenance of many small high schools, and at the same time is enabling boards of education to furnish richer programs of work. With further improvement of roads and more transportation, the high schools that are now being maintained will greatly increase in enrollment or they will be discontinued and transportation furnished to other high schools. Many boards of education at the present time are planning their bus routes for next year, and one county board that has never transported children has just purchased ten new buses. Several boards are doubling their transportation facilities for next year. The aggressive educational leadership that is now found in the counties is rapidly solving the problem of high school service for the rural boys and girls. To a very great extent this accounts for the great increase in county high school enrollment.

The table set out below gives information regarding high schools in Kentucky for 1935-36.

KENTUCKY HIGH SCHOOLS—1935-36
