FOREWORD

It is a distinct privilege to present this bulletin on the accreditation of Elementary Schools for 1961-62. Here for the first time in the history of education in Kentucky is a list of accredited elementary schools and their classification issued by way of the official Educational Bulletin of the State Department of Education.

I note with a great deal of pride, the improvements being made in the area of elementary education. I want to express my sincere appreciation to all those who through their dedicated services are helping to bring about this improvement from the classroom teacher to the staff in the Department of Education and the Commission on Elementary Schools of the Kentucky Association of Colleges, Secondary and Elementary Schools.

WENDELL P. BUTLER
SUPERINTENDENT OF PUBLIC INSTRUCTION

The Education Right of Every American Child

*(As viewed by the followup conference on the White House
Conference on Children and Youth)*

- A school where he is welcome.
- A teacher who attempts to understand him as he is and may become.
- A broad and deep curriculum personalized to his needs.
- An environment which stirs his curiosity and causes him to think, preparing him to meet each change the present and the future hold.
- Room to meet his needs for work and play.
- Materials which he finds useful for his purposes.
- Experiences which help him grow in self-respect and service to mankind.
- Evaluation of his progress on the grounds of his intrinsic human worth.

KENTUCKY ELEMENTARY SCHOOLS SCHOOL YEAR 1961-62

Four years ago in June 1959, the Kentucky State Board of Education adopted regulations providing for the accreditation of elementary schools. These regulations were an outgrowth of a two-year comprehensive study involving a state-wide committee of many members recruited from all levels of education which prepared the standards to be included in the regulations. In terms of a *Standard Elementary School* which was defined by the committee as a school of eight teachers or more, the regulations legalized the standard school concept and therefore, it requires the accreditation of all elementary schools with at least eight classroom teachers—one per grade for an eight-grade school. In addition, the services of sufficient specialized personnel to insure an effective program of instruction was also required. All other schools and even the eight-teacher schools or more which do not meet the standard satisfactorily are *Approved* annually which means they are either temporary schools or schools that are on their way toward improving their programs for meeting the Standard classification.

The regulations for accrediting elementary schools contains eight standards briefly described as follows:

1. They require compliance with the law and all statutory provisions other than that included in the regulations; such as the age for entering school, length of school day, length of school term, instruction in alcohol, narcotics and conservation must be observed by all schools.
2. The school personnel must study and know the educational needs of their pupil-population, and the purposes of public education to which they will strive to reach. Evidence of this understanding should be supported by reports of reliable studies and research produced in written form. The information should be kept up-to-date in the files of the school as a basis for planning the educational program. This together with a statement of beliefs on the part of the staff—its philosophy—and a set of common and specific objectives will be evidence of the educational services the school is endeavoring to perform for the state and, consequently, it will meet the requirements of this standard depending on the application made of it.

3. The school and the community must maintain a wholesome and beneficial working relationship. It is incumbent upon the school to keep the community informed, through an appropriate organized plan of public relations concerning the progress of the school. The facilities are to be kept in readiness for community meetings and groups when the meetings are for community improvement. The staff should be active participants in community affairs. On the other hand, it is required of the community to give its support to the schools in all their good and constituted endeavors. Progress and adaptation in education come through public understanding and support.
4. An approved educational program must be provided including the areas of: (1) Language Arts—(reading, writing, spelling, oral and written English and Literature); (2) Social Studies; (3) Mathematics; (4) Natural Sciences; (5) Health and Safety; (6) Physical Education; (7) Art; (8) Music; (9) Large group activities (assemblies, dramatics, etc.).
5. Supplementary to the program of studies, the school to receive accredited status must provide certain other essential services including, (1) Library Services, (2) Guidance and Pupil-Personnel Services and (3) Health Services. Requirements to be met in these areas are described in the regulations.
6. The organization of the educational program and the essential services for effective instruction within the school are required. The scheduling of classes and services, pupil-teacher ratio, provisions for the handicapped children as well as children of advanced status are important factors in evaluating the effectiveness and outcome of the educational program.
7. The seventh standard relates to the characteristic of the professional personnel—the principal, regular and special teachers and their recruitment, qualification and assignment to an area of duties. A school is no better than the degree of excellence of the staff.
8. The school is required to have an adequate building wherein to house its program and services. It must be provided with sufficient equipment, and supplementary materials to meet the classification of a standard school.

Accreditation is defined as an official decision by the State Department of Education that, in the judgment of the department, a

school or school system has met the standards of quality established by the state. It is based on minimum requirements only or on a system of classification reflecting higher levels of adequacy. It is a means to an end, the end being the attainment of a superior quality of education. When a school seeks accreditation for any purpose other than this one, it is failing to meet the requirements for accreditation.

PROCEDURES USED IN THE PROCESS OF ACCREDITATION

Elementary schools, like the high schools, are accredited annually by the State Board of Education. Previous to the official action of the State Board there is an enormous amount of follow-up work performed by certain staff members in the State Department of Education. It is the assigned responsibility of the Division of Instructional Services and its staff of supervisors to assemble and prepare information on the condition of the schools for evaluation and to consult and advise with the local school personnel concerning the standards to be met. The Division of Instructional Services is assisted by other divisions, such as the Divisions of Teacher Education, Guidance Services, School Lunch, Agriculture and Home Economics. Much of this information is submitted to the Department of Education with the annual report required from each school. However, in addition to the report, visits are made to a representative number of schools each year for study and evaluation as well as for conferences with the school personnel. When there is indication that previous ratings are in need of change one way or the other an evaluation team of staff members are assigned to make a more thorough study and evaluation.

Following the preliminary work of the supervisors in the State Department, a meeting is held with the Commission on Elementary Schools of the Kentucky Association of Colleges, Secondary and Elementary Schools. This commission is a professional advisory body appointed in accordance with provisions of a constitution adopted by the association. It is composed of members from all levels of education. Its function is to advise and consult with the State Department personnel, concerning recommendations to be made to the State Board of Education.

Members of the present commission on Elementary Schools are as follows:

Golda Pensol, Chairman, Supervisor, Barren County Schools, Glasgow, 1963

number of the organizations conform to a 1-8 type of organization or a 1-6 organization. Of these 559 were organizations offering a program from one through the eighth grade and 275 offered a program from one to six grades or a total of 834 schools out of the 933.

Table 1 below shows the number of accredited elementary schools classified according to the type of control for three years from 1959-62.

**TABLE I
NUMBER OF ACCREDITED ELEMENTARY SCHOOLS CLASSIFIED
ACCORDING TO THE TYPE OF CONTROL 1959-62**

Year	County Districts	Independent Districts	State, Federal, Regional,	Private	Total
1959-60	537	244	---	83	864
1960-61	565	238	---	87	890
1961-62	584	235	15	99	933

It may be of interest to know that all the elementary schools operating in Kentucky for the school year 1961-62 numbered 2,550. In 1959-60, the beginning year of the accreditation program, the number was 3,070. The number of one-teacher schools decreased by 400 from 1,382 to 982 during this period of three years.

Table II gives the number of schools according to the type of the elementary school organization and the control under which the school is operated.

**TABLE II
TYPES OF ELEMENTARY SCHOOL ORGANIZATIONS AND
NUMBER OF EACH**

Types of Organizations	County District	Independent District	State, Federal, Regional	Private	Total

Grades 4-8	1	1	0	0	2
Grades 4-6	1	0	0	0	1
Grades 3-8	1	0	0	0	1
Grades 2-5	0	0	1	0	1
Grades ---7	1	0	0	0	1
Grades 1-5+8	0	1	0	0	1
Total	584	235	15	99	933

Of the number of accredited elementary schools for the school year 1961-62 only 282 or about 30 per cent were fully accredited which indicates they are meeting the regulations satisfactory for the standard classification. All of the others are classified as provisional schools and schools which are approved.

There were 407,057 pupils enrolled in the accredited elementary schools for the year. Of this number 242,923 were in the schools under the control of the county school districts, and 106,066 were enrolled in the schools under the control of the independent school districts. The others were enrolled in schools which were operated by State, Regional, or Federal authorities or in the private schools.

Table III gives the enrollment in the accredited elementary schools according to the grades and the control under which the school operated.

**TABLE III

Totals	242,923	106,066	7,614	50,454	407,057

In all of the elementary schools there was a total staff of 16,410 teachers, supervisors, principals, and other special instructional personnel serving during the school year of 1961-62. Of this number 14,565 or 88 per cent were serving in the schools of eight or more teachers or schools accredited by the State Board of Education. There is indication that the professional staff is growing not only in quantity but in quality as well. During the school year of 1961-62, approximately 71 per cent of the total staff had a quality of training of a Bachelor's Degree plus, 11.4 semester hours. This was an increase of approximately 8 per cent over the previous year and over 19 per cent in three years from 1959-60 to 1961-62.

Table IV below gives the median prepared of all elementary school personnel for a fourteen-year period from 1948-62.

1961-62	16,410	Bachelor's +11.4	71.3

Source: Division of Teacher Education and Certification

In the following table, there is presented a comparison of the preparation of all personnel serving in the elementary schools for the school year 1961-62 and the school year 1959-60. The purpose of this table is to show the growth in preparation of all personnel serving in the elementary schools for a three-year period, since the beginning of the accreditation program for elementary schools in Kentucky. Approximately 88 per cent of the total personnel were serving in the accredited elementary schools.

TABLE V
THE PREPARATION OF ALL PROFESSIONAL PERSONNEL IN THE
ELEMENTARY SCHOOLS — SCHOOL-YEAR 1961-62 COMPARED
WITH SCHOOL-YEAR 1959-60

Level of Preparation	School Year			
	1961-62		1959-60	
	Number	Per Cent	Number	Per Cent
Master's Degree plus 24 Semester Hours and above	188	1.1	125	.8
Master's Degree through 23 Semester Hours and above	1,675	10.2	1,370	8.6
Bachelor's Degree through 32 Semester Hours and above	9,853	60.0	7,549	47.1

32-63 Semester Hours	343	2.1	842	5.3
1-31 Semester Hours	57	.4	261	1.6
No college training	8	.5
Total	16,410	16,020

A problem of no small meaning related to the elementary school program is the problem of improvement of instruction. The organization of an educational program to meet satisfactorily the wide-range of pupil abilities and needs depend on many factors, some of which are implicated in the eight standards of the regulations for accreditation. In addition to those spelled out in the regulations, the size of the elementary school in terms of staff and pupils is probably the most important factor. Although, it is possible for an eight-teacher school to provide a program of education required by Standard 4 of the regulations, it is unlikely it will be provided since the cost per pupil makes it all most impractical.

The difficulty which the small schools face in meeting the standards requiring a complete effective program of education is mostly associated with the specialized programs of instruction and services such as art, music, physical education, library services, guidance and health services. An example of this is found in the library services. During the last three years nearly a million volumes of library materials have been added to the library collection in the accredited elementary schools and this is being increased by some 400,000 volumes each year. This is being accomplished at an initial estimated cost of \$1,000,000, plus an annual expenditure of nearly \$500,000.00. The services of trained personnel beyond the classroom teacher is required for the care and organization of these materials for effective use together with adequate space to store and accommodate them. Progress is being made toward meeting this objective. In 1959-60, there were 103 full-time trained librarians serving in the elementary schools. By the school-year 1961-62 this number had increased to 170 or by an additional 67 librarians.

The trend in the development of the elementary schools throughout the state is towards the larger elementary school unit in order to make it practical to offer an effective program of education. Table VI following shows the number of elementary schools accredited for the school year of 1961-62 compared with the school year of 1959-60, classified according to size.

TABLE VI
NUMBER OF ACCREDITED ELEMENTARY SCHOOLS FOR THE
SCHOOL-YEARS 1959-60 AND 1961-62 CLASSIFIED
ACCORDING TO SIZE

Size Classification	Number	
	1959-60	1961-62
8-12	401	405
13-16	215	206
17-20	100	127
21-24	71	97
25 and up	77	98
Total	864	933

It will be seen from a study of Table VI that the schools of 16 teachers and below, have decreased in number from 616 to 611 during the three-year period while the schools of 17 teachers and above have increased from 248 to 322.

It might be of interest to know that this problem and this trend is nation-wide in scope. From a national survey made of the practices and policies of more than 6,000 elementary schools in 555 places of a population of 2,500 or more, the United States Office of Education reports the highlight of the study as follows:

1. One-third of the public school systems are organized on a 6-3-3 plan of organization which means that the elementary schools are organized for grades 1-6. One-fourth of the schools are organized on the 8-4 plan. In these districts, the elementary schools are operated for grades 1-8.
2. Some form of primary unit is being used by 18 per cent of the public elementary schools.
3. Most public elementary school children attend at least 5½ hours a day for at least 180 days a year.
4. For instructional purposes, children are grouped heterogeneously in 72.1 per cent of the public schools in grades 1 through 6 and in 60 per cent of the public schools in grades 7 and 8. Indications are that there will be a future increase in homogeneous groupings on all grade levels.
5. In 70 per cent of the public elementary schools, children are promoted primarily upon the basis of academic achievement.

6. The most common method of reporting pupil progress is upon the basis of a letter scale which may be combined with personal conferences with parents or with informal notes to parents.
7. Each local public elementary school remains dependent upon the central office for policy determination. As yet, no widespread swing to individual school autonomy has developed.
8. As reported by public school officials, the most persistent problem for elementary school principals is the improvement of instruction.
