Please handle*

Coal Mine Operators:

In order to enable us to properly distribute coal cars to the various mines please specify on your car orders each day the maximum number of gondas you can use. We will then endeavor to fill the requirements for hoppers and avoid placing gondolas in mines that have no market for their coal unless loaded in hoppers.

It should be understood, of course, that no shortage of cars will be recorded at a mine that declines to accept gondolas as necessary in filling orders provided gondolas are available.

Your cooperation in this matter will be greatly appreciated.

W. R. Winkler,
Asst. Superintendent.
