ADDITIONAL BOILERS - BENHAM.

Dear Sir:

I want to say now that the time is not far distant when, considering the way things are growing at Benham, that you will have to install two (2) additional 400 HP boilers, and the cost to provide, bricked up and piped up, ready for service complete with smokestack, etc., and necessary extension of building between engine room and boiler room for housing will be about \$50,000.00.

In our planning we appreciated this would be an item on your program before long and the present area between the end of boiler house and engine room was indicated on our drawings for these boilers.

Very truly yours,

F L STEVENSON D
