After the acute attack is over, if there is any constipation, it should be relieved by LYDIA E. PINKHAM'S LIVER PILLS; and if there is any discharge from the uterus LYDIA E. PINKHAM'S SANATIVE WASH should be used once or twice each day, in order to hasten recovery as much as possible.

### **Inflammation.**

Inflammation of the womb is a very frequent ailment, and it is probable that seventy-five women out of every hundred suffer from it more or less.

It is invariably relieved by LYDIA E. PINKHAM'S VEGETABLE COMPOUND. So many thousands of letters have reported complete cures through its use that there is not the least room for doubt as to its efficiency.

### **White Discharge.**

One of the commonest symptoms of female ailments is a discharge similar to that from the nose in case of a cold in the head, and arising, like that, from inflammation of the mucous membrane.

Constant bearing down pain is also present with a dragging sensation as if a heavy weight were pressing upon the womb.

All treatment of chronic inflammation should be directed toward relieving the congestion of the blood in the womb,

LYDIA E. PINKHAM'S SANATIVE WASH was until recently sold only in the form of a dry herb-packet to be steeped and strained before using. It can still be had in this form, but is also furnished in a much more convenient form, that of a concentrated liquid extract, *made from the same materials* comprised in the dry package and containing all their medicinal elements. It is necessary only to add one teaspoonful of the liquid extract (or two teaspoonfuls in severe cases) to one pint of warm water, mix thoroughly and instantly it is ready for use. Apply once a day as a vaginal injection (or douche) by means of any good fountain syringe. It is best first to take a cleansing douche. For this purpose use warm water in which has been dissolved boric acid (one teaspoonful to a quart of water), or "Paxtine," according to the directions on the package. "Paxtine" is a fine toilet preparation, cleansing and antiseptic, sold by the druggists.
