# AIDS symposium educates community

Mapping helps researchers predict spread of infection

Lexington, San Francisco, Nai-robi, Cleveland and the Bronx have one thing in common: re-ported cases of AIDS.

And during a semina at UK last weekend, national experts dis-cussed how Acquired immune De-ficiency Syndrome spreads and the effects it has on social groups in different geographic locations. Several national experts on the sociology and geography of AIDS presented papers Friday at the symposium, "AIDS and the So-cial Sciences."
Peter Gould, a professor of ge-ography at Penn State University, used dynamic color slides to illu-strate the effectiveness of geograph-trate the effectiveness of geograph-

ic models charting the spread of AIDS.

"This is the first epidemic in modern history of which we have virtually no idea of the extent (of AIDS) in geographic space," Gould said.

Because of confidentiality concerns among those infected with the HIV virus that causes AIDS, epidemiologists are plotting an inaccurate picture of the disease, Gould said.

Simply placing a number of AIDS cases in a courty or state outline doesn't give an accurate picture of infection, he said.

Gould showed a slide of AIDS infection of a neighborhood block

infection of a neighborhood block in Los Angeles to demonstrate the way the infection can be tracked in detail, and therefore predicted.

Using geographic modeling, prediction maps have been used with a 96 percent accuracy, Gould

with a 96 percent accuracy, counsaid.

"AIDS is not something remote," Gould said. "It is literally all around us. ... The trouble is that many young people exhibit the well-known 'immortality syndrome,' the feeling that 'it can't happen to me,' "Gould said.

"We also know from many studies in health education that the simple provision of information is not enough to change behavior. There must be a perception of some quite personal health risk before behavior changes," Gould said.

When people see the geographic

When people see the geographic

Portions of the Names Project Quilit, which is made of patches sewn by the family and friends of AIDS victims, was displayed at the "AIDS and the Social Sciences" symposium held in the Student Center this weekend. The quilt has more than 10,900 patches and is now too large to publicly display in its entirity.

# UK students learn ways to prevent the spread of HIV virus

At UK's Acquired Immune De-ficiency Syndrome conference this weekend, Fayette County Health Department AIDS Manager Sandy Joseph read a proclamation from Governor Wallace Wilkinson, de-claring October as "AIDS Preven-tion and Awareness Month" in Kentucky.

AIDS experts from areas hard-hit by the disease offered advice to Kentuckians and UK students or ways to deal with and prevent the

disease.

Ernest Drucker, who works with AIDS patients at Montefiore Medical Center in the Bronx, said that Kentuckians should realize that "it can happen here. In an epidemic you have to think in terms of decades.

"Kentucky has 300 AIDS cases (reported). We have 3,000 in the Bronx. Six years ago, we had 300 cases in the Bronx, so you can't take comfort in those numbers:"
Drucker said that an "attitude of denial and antagonism" about AIDS hinders an area's ability to deal with treatment and prevention.

tion.
"It's got to be okay to have
"It's got to be okay to have
AIDS," Drucker said.
He said a community must be
able to be compassionate about
people who have AIDS on the
same level they are with people
who have other diseases, like cancer.

"From a public health perspec-tive, the welfare of everyone is

vention, agreed.

"It doesn't do any good to squelch frank discussion about AIDS," Stall said. "In my experience, even if a controversy is created (by discussing AIDS), it serves an effective public health purpose because both sides of the controversy are educated."

Stall, who received a master's degree at UK and whose research focuses on AIDS prevention in the gay community, said, "There are lots of gay men on this campus, and not all are young-some are faculty. That fact should be acknowledged.
"It makes a lot of sense to people to group together to talk about how they facelled."

It makes a lot of sense to peo-ple to group together to talk about how they feel about AIDS. The student groups and faculty mem-bers should work with the University to set this type of thing up," Stall said, citing the highly effective Stop AIDS Project on the University of California at San

UK has approved an AIDS poli-cy for students, faculty and staff, and recently conducted AIDS training sessions for all Lexing-ton campus employees.

Student AIDS education has been undertaken by several depart-mental offices on campus, includ-ing Student Affairs and Student Health. The UK Student Government

The UK Student Government Association funded a trip to an AIDS conference for two UK medical students last year, who were to return and formulate a campus-wide plan for AIDS education.

The UK Medical Center recent-ly formed an AIDS Task Force to address issues of patient care and

However, no student group exists solely to address the issue of AIDS at UK.

Gary Shannon, a UK geography professor who presented a paper on AIDS origin theories at this weekend's AIDS conference and weekend's AIDS conference and who soon will publish a book titled *The Geography of AIDS*, said that the most distressing thing he discovered in his research is "the lack of information about human behavior."

"We don't have broad enough information whether it's in Zaire or in Lexington," Shannon said. "One reason we put together this conference is to try to get some cooperation and provide some impetus for social scientists to get involved."

### District judge upholds ban, takes herself off Bush case

By MICHAEL JONES

In a pre-trial hearing Friday, Fayette County District Court Judge Julia Tackett upheld a ban forbidding local social activist Chris Bush from setting foot on UK's campus. Tackett also removed herself from the Bush case because she is a member of the UK Board of Trustees.

However, Bush said that Tackett never should have ruled on the case.

never should have ruled on the case.

"I was surprised she would rule on it," Bush said. "Reaffirming the banning order was not fair. Assigning it to another judge was the correct thing to do."

Bush said he will go to Circuit Court to fight the ban.
"What vou have is a Board of Trustees member ordering someone off of campus and I have a big problem with it," Bush said.
Tackett said she was not familiar with Bush's case before it came before her and that she reaffirmed the ban only because it had been one of the conditions for bush's release on bail.

be continuous for bush's release on bail. She said that in effect she only reminded him of something he had already agreed to.

Tackett also said she took herself off any case involving UK unless the defense and prosecution have already agreed to a guilty plea.

"I've been doing that routinely on any case that has any involvement with UK," Tackett said.

She also said she did not know hy the prosecution sent the case to her court, "since they know I'm tot going to sit on UK cases."

The case has been reassigned to another judge and a pre-trial hearing another process.

The case has been reassigned to other judge and a pre-trial hearing

### Rescuers optimistic in finding survivors

Associated Press

SAN FRANCISCO – Rescuers
cuphoric over finding a survivor in
a collapsed freeway resumed work
at a frustraingly cautious pace yesterday, and earthquake-shaken
Northern Californians mapped strategy for Monday's commute
through gridiock.

More than 100 people were evacuated yesterday afternoon from an
Oakland housing project located
within 10 feet of a four-block
stretch of interstate 880 abutting
the portion that gave way in the
quake.

the portion that gave way in the quake.

The evacuation came after a cement column fell from the structure and new cracks were discovered in the previously stable section of the double-deck freeway.

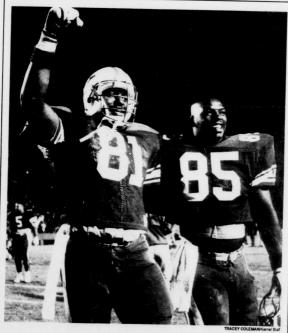

Longshoreman Buck Helm, who spent four days in a tomb of 1-880 concrete and steel, was in critical-stable condition at Highland General Hospital in Oakland with some slight improvement, hospital officials said.

Engineer Steven Whipple, hailed

cials said.

Engineer Steven Whipple, hailed as a hero of the rescue, said he was a hero of the rescue, said he was checking the fallen double-deck freeway for stability on Saturday when he spotted the back of Helm's head with his flashlight, and then he saw a hand wave at him. "It stopped my heart," Whipple said. "I thought maybe the wind was blowing and that's what caused us. I thought I might be losing it."

### Brady's stock rises after market crashes

Associated Press

WASHINGTON - In the altermath of the Friday the 13th stock market dive, Treasury Secretary Ni-cholas Brady's political stock has risen for successfully avoiding the pitfalls that ensnared the Reagan administration two years ago. Before the crisis, the low-key Brady tended to pale in comparisons with his predecessor, James A. Baker III, new secretary of state.

But in spearheading the government effort to prevent the Crash of '87 from repeating, Brady is winning praise for deft handling of the situation.

"It was clear that the government

"It was clear that the government

"It was clear that the government stood prepared to help prevent a repeat of that 508-point debacle," said Allen Sinai, chief economist of the Boston Co. "The policy makers all said the right things and helped to contain any problems."

When the market dropped 108 points on a Friday two years ago, it followed with a 508-point plunge the next Monday. This time, Friday's 190-point decline was largely offset by an 88-point rise the next Monday.

Offset by an 86-point rise use rices.

Monday.

That success notwithstanding,
Brady hinted in an interview Friday
that he may soon recommend several steps aimed at promoting more
coordination among regulators. He
would not be specific about what
changes were being considered.

In a free enterprise system, government policy makers are not necessarily concerned with imposing
rules that inhibit the normal ebb
and flow of market forces. But they

particularly those unique to the high-speed, computer driven trading of the modern era - threaten to undermine or overwhelm the more natural forces.

In addition to directing the fact-finding operation that insured a supply of accurate information upon which to base decisions dur-

Local experts differ on fluctuation of market, Page 6

market, Page 6

ing the market plunge earlier this month, Brady worked to have government policy makers from the president on down speak with one voice to project an air of calmness. This time, there was no verbal gaffe to worry markets, such as then-SEC Chairman David Ruder's comment to reporters two years ago that trading might be halted, a remark widely believed to have led to further panic selling. Other key roles were played this year by Federal Reserve Chairman Alan Greenspan, who also navigated the shoals of the '87 crash, Gerald Corrigan, head of the New York Federal Reserve Bank, and Richard Breed, and he exclusion of the Securities and Exchange Commission.

But Brady, who took the lead in the crisis-management effort, and his top aides at the Treasury De-

But Brady, who took the lead in the crisis-management effort, and his top aides at the Treasury Department are coming in for much of the congratulations for avoiding a repeat of Black Monday.

### Lottery's new game illegal and irrational

Greg HALL

The traditional fall meeting at Keeneland — "racing as it was meant to be" — is drawing to a close this weekend.

But as this meet closes, officials at Keeneland and throughout the horse industry are asking, "Will the addition of a gambling lottery partially endanger "racing as it was meant to be?"

The State Supreme Court uling in a suit brought by the racing in dustry, on the constitutionality of the game, is expected to be handed down early this week.

The proponents of the Super-Sports lottery say that the game is based on chance, due to the point spreads counteracting the odds. Meanwhile, the crux of the industry's argument against the Lottery Commission's new game is the amendment to the state constitution that only permits games of chance.

Does SuperSports, a computer game in which players select NFL teams to beat point spreads, fall within those guidelines?

The question then becomes, "Is football a game of chance?"

Hardly, While there are many elements of luck that come into play during gridiron battles, the primary reason for victory is the strengths of one team monopolizing upon the weaknesses of the loser.

Similarly, as football is more than just Luck, handicapping horse races is an inexact science which is influenced by luck.

This state should protect one of its most enduring past times, racing, However the lottery itself goes against that thought. SuperSports would have the greatest effect on racing of the all the lottery games to date. Yet banning this football wagering game does not negate the effect of the other games.

racing industry can protect its collec-tive butt. The handle at Churchill

racing industry can protect its collective butt. The handle at Churchill Downs' spring meeting was down, while concurrently the first lottery games were started.

But protection of the pari-mutuel dollar is not a valid question, at least or the Kentucky Supreme Court. The lottery's setup does not have to work around the wishes of state's nine pari-mutuel establishments.

The lottery probably will lose this case. But the lottery can survive without betting on the NFL. The racing industry also will dodge a bullet, thinking that the court is protecting them, when in reality the court only is interpreting the letter of the law.

Racing will continue "as it was meant to be" as will the lottery according to what the logislature thought "It was meant to be."

The lottery will bring about new games. The racing industry will make new claims. And this 'Hatfelds versus the McCoys' dispute will fuel Kentucky politics throughout the 1990s.

Even though this year's World Series is bordering on becoming a right of the Winter season, the deci-sion by Major League Baseball Commissioner Fay Vincent and San Francisco Mayor Art Agnos to delay Game 3 until Friday at Candlestick Park was necessary.

Park was necessary.

If the Series goes seven games, it will reach November for the first time in history.

It won't feel right possibly ending

time in history.

It won't feel right possibly ending the Series in November, but the feeling would be much worse if baseball was being played and bodies were still between layers of the Nimitz

still between ayers.

The Giants as the home team in Dodger Stadium? It's almost a contradiction in terms.

As Vincent and Agnos said in a joint statement yesterday, reported by the Associated Press, "We have agreed that baseball should resume with enthusiasm. But Tuesday was too ambitious."

Staff Writer Greg Hall is a jour-ulism freshman and a Kernel co-mnist.

# Cats break LSU jinx, win 27-21

### Big plays were factor in breaking 6-year drought

By BARRY REEVES Sports Editor

Big plays. When a team makes big plays whether it be on offense, defense or spe-

Well, the UK football team, which has lacked big plays in the past, made the big plays and Louisiana State University did

not.

And the Cats (4-2) beat LSU 27-21 Saturday night in front of 53,967 fans in Commonwealth Stadium.

"That was the difference," UK defensive tackle Donnie Gardner said. "We made the big plays when it was gut-check time, when we had our backs up against the wall.

And I think that's a trait of a good football team."

LSU (1-5), which has been a perennia power in the Southeastern Conference for many years, has had a problem making the big play all season and their problems con-

big play all season and their problems continued.

"We just haven't made the big plays all season long, and tonight was no different,"
LSU coach Mike Archer said. "If we had made the big plays this year, then we could have a 6-0 or 5-1 record instead of the 1-5 record we have... We had the opportunities but couldn't do it."

Archer did not point to his team's lack of big plays as a reason for the loss. Instead he noted that the Tigers "did not have the effort as in our previous games... Our intensity in the first half was just not there."

Of UK's number of big plays, perhaps none was bigger than the one pulled off by Gardner and linebacker Billy Swanson.
With UK ahead 21-14, the LSU offense was driving deep into UK territory with

Wildcat defenders stuff LSU tailback Eddie Fuller during Saturday night's game at Commonwealth Stadium. UK won the game 27-21 to improve their record to 4-2.

just under 3:30 remaining in the game. In the second half, little pressure had been put on LSU quarterback Tommy Hodson, but Gardner broke through the LSU line on first-and-10 from the UK 24-yard line. Gardner hit Hodson's arm foreing a wobbly pass and Swanson stepped in front of Tiger receiver Calvin Windom for the

of Tiger receiver Calvin Windom for the interception.
"I just tried to get in there and get a piece of (Hodson) and luckily I got his arm, which caused the pass to be wobbly." Gardner said. "And Billy made the catch."
"All I saw was a wobbly pass coming my way and I just instinctively cut in front of the receiver and caught the ball and started running," Swanson said.
"Oh Lord yes, that was a really big play," UK coach Jerry Claiborne said. "It stopped them when they had the momentum. It was a big, big play."

"That was a really big play," said UK linebacker Craig Benzinger, who had 20 tackles, including 12 solo, in the game. "It looked like they were ready to make their move and maybe take the lead, but we came up with the big play when we really had to have it."

The first play after Swanson's interception, the UK offense countered with a big play of their own. Tailback Alfred RawIs took the handoff, went through a gaping hole on the right side of the line, bounced to the sideline and scooted 73 yards for the touchdown giving UK a 27-14 lead with 3:11 remaining in the game. Ken Willis' PAT was blocked. PAT was blocked.

"All I tried to do was hit the hole as fast

as I can and when I did, I saw the outside was open and that's where I went and thank

### Hodson breaks SEC's TD record but not satisfied

Louisiana State University quarterback Tommy Hodson was not in the mood for celebrating after he broke the Southeastern Conference career-touchdown passing record

Saturday night.

Instead, the frustrated quarterback was instead, the frustrated quarterback was longing for a long-deserved win, and not the 27-21 loss UK handed his team in Commonwealth Stadium.

"I've played long enough to get this," Hodson said, "I would trade (this) for a win any day."

any day."

The preseason Heisman Trophy candidate did not get any other satisfactions, especially in the first half.

He led an offense which only accumulated 42 combined yards, 16 coming through the air, and could not move the ball across midfield.

midfield.

"I think that was the worst offensive performance since I've been here," Hodson said. "We couldn't get it going in the first two quarters. I guess you come out and have rotten days. Coming in 1-4, we didn't need a rotten day."

However, the second half was different for LSU as Hodson caught fire connecting on 20 of 23 passes, including two for touchdowns.

touchdowns.
"Every pass they dropped so far back that I hit them underneath," Hodson said. "I had great protection. I was throwing the ball pretty well."
About midway though the fourth period, Hodson rifled a 21-yard TD pass to Tony Mass, who was standing in the middle of

### **Cool Cats** begin year with sweep of Ga. Tech

By GREGORY A. HALL

If UK Cool Cat Jason Swithwick could have had a better start
to his college hockey career than
the one he had this weekend, he
might have to be the only man
on the ice.

The Minneapolis freshman
right winger scored two goals in
Friday night's 7-2 win over
eleorgia Tech and accomplished
the hat trick on Saturday night.
Swithwick's three goals Saturday night propelled UK to 4-2
win over the Yellow Jackes,
sweeping the weekend series befree a near capacity crowd. Fridray night the Cool Cats played
before their first sellout in their
six year history.

"I got lucky tonight," Swith-wick said.

The freshman said he experienced the typical first night jit-ters. "The first period (Friday) I was real nervous," Swithwick said. "My legs were shaking. I couldn't do nothing right. It was hard to stand up. I kind of got the crowd off of my mind and

Cool Cat center Chad Cooper (15) heads down the ice during Friday night's 7-2 victory over Georgia Tech at Lexington Ice Center. UK also defeated Tech 4-2 Saturday for the sweep.

hockey."
The Cool Cats' opening series sweep put their record at 2-0, dropping the Yellow Jackets to 0-2.
"It wasn't what I call pretty, but it was a win and we'll take that anytime," Davenport said. "It was definitely not as good as

they can play, but they can play a whole heck of a lot worse than they did too. It's still early in the season and there's still a lot of work to be done." Georgia Tech coach Steve Elliott was pleased with his team's efforts for this point in the season.

son.
"It was only our second game together," Elliott said. "We've got a couple major injuries and a couple major guys out of the lineup. We had a lot of shots on

net, but we just didn't capitalize. Kentucky played well tonight."
The Yellow Jackets had 32 shots on goal, while UK only forced Tech goalie Rick Norwood to make 15 saves.
"I definitely would have like to have seen us get more shots on the net, but when you're playing respectively well on the power of t

on the net, but when you're playing revolving door on the penalty box it's kind of tough," Davenport said.

### NBA, Big East style coming to Bluegrass

By BARRY REEVES Sports Editor

New UK basketball coach Rick Pitino is bringing the style of the National Basketball Association and the Big East to the Southeastern Conference.

Association and the Big East to the Southeastern Conference.
And Pitino hopes this will the the advantage his team will need to be competitive in the 1989-90 season.
"It better be an advantage because, if it's not, then we are in real big trouble," Pitino said. "We are going to press full-court the entire 40 minutes and we are not going to be shy about taking the three-pointer."
The UK coach is implementing the offenses and defenses that he used to turn the New York Knicks and Providence College teams into contenders in only a couple of years.
And Pitino hopes this will

when the SEC by surprise.

"We are going to do the same basic things that we did with the Knicks and at Providence," Pitino said. "This style of play will be almost totally foreign to the SEC. I don't think any-body has playo" when the style we are going to.

What about Louisiana State University last season with Chris Jackson?

"Well, they ran a lot, but only when Chris Jackson wanted to," the UK coach said. "But we are going to push the ball up the floor all of the time, not just when one or two want to."

Stamina, not speed, is the key for a Pitino team, especially when this team has only eight scholarship players.

"Billy Donovan is the best example," Pitino said of his See PITINO, Page 7

See PITINO, Page 7

UK basketball coach Rick Pitino instructs his players during Friday's practice. Pitino hopes impliting an NBA, Big East style will surprise Southeastern Conference foes.

### Pitino book signing an event for his fans

By JENNA STAHM

A book signing was held Saturday at the UK Bookstore to promote Born to Coach, a book written by UK basketball coach Rick Pitino and Bill Reynolds, Rhode Island sports columnist for the Providence Journal Bulletin.

In the book, Pitino tells about the challenge of coaching the National Basketball Association's New York Knicks.

To write the book, Pitino said, "Bill Reynolds came to the Knicks' games and practices, and we talked each night on the phone."

Pitino said the book is about his coaching experiences with the team.

"I had to overcome the adversity of a losing team in one of the most pressurized cities in America," Pit-

ino said.
Over 200 hardbacks and 50 paper-back copies of Pitino's book have been sold, said Paul Little, manager of the UK Bookstore. He said the book has been "fairly well received

by the public."
Pitino also was autographing posters, pennants and basketballs that fans brought.
"It's not too often you get to see Coach Pitino up close like this," said Ion Wexler, a freshman from Washington, D.C.
Many took advantage of the opportunity and stood in line with their families for a snapshot with Pitino.
But only a few actually had read Born to Coach.
"I've read some excerpts from the

"I've read some excerpts from the book in the Herald-Leader, and it seems quite interesting," said Don-

book in the Herald-Leader, and it seems quite interesting," said Donnie Gardner, of Cave City, Ky.

"Born to Coach gives people an inside view on a pro team coach's perspective," said Scott Young, a sophomore from Lancaster, Ky.

As suspected, the big question is whether or not a book will be written about the UK basketball team.

"Many people have asked for a book about UK, but I don't think so," Pitino said. "I'll get through the obstacles to turn around the Wildcats, and then it might prove

UK men's basketball coach Rick Pitino signs autographs for Sean, 4, Scott, 6, and Matthew, 12, Saturday at the UK Bockstore. The bockstore has sold 250 copies of Pitino's Born to Coach.

### New game may lose Governor's support

Louisville, Ky. - Governor Wal-lace Wilkinson says some members of his administration want the Ken-tucky Lottery Corp.'s board of di-rectors to retire a lottery game based on professional football con-tests before it even starts.

Wilkinson, who previously has expressed support for the new lottery game, SuperSports, said Saturday night he doesn't know whether he will continue to support the game, which has been delayed in starting because of a legal battle with the horse industry.

The governor said some members of his staff have recommended that he ask the lottery's directors to abandon the game.

"I haven't made up my mind about that," he said.

Wilkinson's comments came on the same night that he helped kick-off the lottery's first drawing for a \$1 million "lotto" prize.

SuperSports, which was sched-uled to begin last Wednesday, has been at the center of a courtroom battle involving lottery officials and three horse-racing groups for the past month.

At Wilkinson's request, lottery officials have postponed sales for the game until the State Supreme Court rules on at least some of the legal issues involved.

# Return of partisan politics a bad sign for Bush

WASHINGTON — President Bush was cruising along in the po-litical mainstream until recently. But the cross-currents are getting stronger and Bush is being forced into some tricky work with the

### **ANALYSIS**

First, Bush sent the wrong sig-nals by semaphore up to Capitol Hill when he agreed to strip away the capital-gains tax break to get a clean and simple budget bill. That didn't go over well with congressional conservatives. Espe-

cially the more than 60 Democrats who broke with their leadership to back Bush on capital gains. To some of them, it looked as if Bush gave up too easily.

Bush said he will try to get the capital gains tax cut passed as a separate bill, but he's lost a lot of legislative momentum. In the future, some might question his word.

Second, Bush seemed to hedge on the abortion issue.

This month Congress voted to broaden federal policy to allow for government-supported payments for abortions in the cases of inest and rape.

Bush didn't respond quickly, leaving the impression that he would seek a deal to modify the language, allowing him to sign the

# Actors' Guild offers Lexington unique brand of theater

The Actors' Guild of Lexington, Inc. prides itself on being an inti-mate theater with a contemporary flair that attracts an unpredictable

audience.
"Our plays are not for every-body," said Vick Chaney, artistic director for Actors' Guild. "We try to go for the highest common de-nominator. We don't want to go over anyone's head - but challenge them a little bit. All of our plays

them a little bit. All of our plays tend to be a little more thought provoking. Most people start with comedy, People underestimated the audience in the past."
Funded by the Lexington Arts and Cultural Council, the Kentucky Arts Council and the National Endowment for the Arts, the company was formed in 1983. ed in 1983

The group came together at a

time when Lexington was in need of an alternative playhouse. Unique from large repertory theaters, all 11 members of the board have their own function within the company and an equal say in the artistic aspects of the production. All members select, produce and direct the plays, build the sets and design costumes.

plays, build the sets and design cos-times.

The administrative make-up is similar to the UK eight-member theater department that also coordi-nates its activities. But because the University has a larger staff, the fa-culty distributes creative responsi-bilities to the various members in areas such as set design, costume design and construction.

Philosophically, however, the Actors' Guild Theater and the UK Theater differ. Actors' Guild is more concerned with thought-provoking, contemporary produc-

provoking, contemporary produc-tions, often involving no more than

being written for small casts.

In the guild's recent production of Athol Fugard's The Road to Meca, the candle-lit set was embedded in the middle of the curtained-off room. Half of the audience walked across a covered front prort to arrive at their kitchen-side seats where they could see the steam rise from the tea-pot.

On the other hand, UK prides itself as a training institution that

two or three actors as in last year's production of Beirui.

The play involved interaction between two lovers who were separated by a deadly disease similar to AIDS. Beirui relays the message of how promiscuity can lead to the destruction of people's lives.

"We do a lot of small cast shows tend to do going for that intimate feeling," said Chaney, who added that many contemporary plays are being written for small casts.

In the guild's recent production of

and ceiling fams.
Patrick Kagan-Moore, associate professor of theater at UK, said the department sees itself as training artists and scholars in the theater as well as providing a needed and missing service to UK and Lexington.
"We're the closest thing in this town to a repertory company," Kagan-Moore said, "We see ourselves as providing an important role artistically to the community. If we weren't there they just wouldn't have them (large-scale plays).

Although both groups provide

specialized services to the community, Actors' Guild is more accessible to Lexington's closet actors and actresses by providing an "open auditions," policy. In accordance with their teaching philosophy, UK's auditions, which differ with each director, are only open to UK students and faculty.

"We were founded with an opendoor policy that anyone can audition for us," Chaney said, "We pride ourselves as being real open."

Chaney said many of their performers have lived in New York and other cities with major theater companies but that the Actors' Guild does not recruit people from those areas.

search of acting opportunities and end up as waiters and waitresses.

The Actors' Guild theater will host its fifth annual theater festival in May, showing three world premiere plays and five regional premieres.

Chaney said the quality of the premieres varies. As of now the company has more than 60 plays to select from and is expected to receive a total of 200 scripts.

"Every play was a new play once," he said, because many times problems can't be detected until the play is produced.

does not recruit people from those areas.

"We eventually want to offer an opportunity for people (actors and actresses) to stay here," he said, adding that many people from the telest for all eight plays are \$25 to \$20 for students & senior citizens.

# Excellent script, chemistry carries 'Fabulous Baker Boys'

By KIP BOWMAR

Picture the scene: velvet covered smoke filled lounges with a medio-cre piano team playing "Memories" or some other worn down show tune. Such is the gritty life of Jeff and Beau Bridges in director Steve

Beau Bridges in director Steve Kloves' new film "The Fabulous Baker Boys."

The movie marks the first time

two brothers have starred opposite each other in a major Hollywood

each other in a major honywood production.

Beau plays the older brother who is a little less talented but is the glue and stability which keeps the act together, while Jeff plays the ir-responsible younger brother who may have once had talent but has

The two realize something is missing and hold auditions for a singer. The result is one of the fun-

# Quake likely in Kentucky, analysts say

In the wake of the destruction from the Northern California earthquake, many Kentuckians probably consider themselves lucky not to live near California turbulent San Andreas fault. But according to local geological and engineering experts, a fault along Kentucky's western border could pose just as big a threat.

The New Madrid fault, which runs approximately 200 miles from Memphis, Tenn. to Cairo, Ill., was the location of a power ful series of earthquakes during ful series of earthquakes during

III., was the location of a powerful series of earthquakes during the winter of 1811 and 1812. Earthquakes estimated at about 8.6 on the Richter scale shook the Mississippi and Ohio River valleys, temporarily caused the Mississippi River to flow backwards and created several lakes in the region. Because of past destruction, experts say another major carthquake can happen. "I would say an earthquake of 6.5 to 7.3 on the Richter scale looks likely in the next 50 years," said John Kiefer, the assistant state geologist.

sistant state geologist.

Although an earthquake of that strength would be about the same as the one that hit the Bay Area

last week, Kieter saud the damage, would be much more severe in Kentucky.

"San Francisco is much more aware of earthquakes than we are," said Kiefer, who noted that different rock formations in the Central United States would cause waves to travel much longer than the quake in California. He said such an earthquake could affect the cities of Memphis, Louisville, Paducah, Owensboro and Lexington.

Kiefer said that while many new buildings are built with earthquakes in mind, most of the older buildings were constructed before earthquake codes were implemented. He also said the roadways would present a problem.

"We cannot rely on our interstate system," he said. "We would have to use the older two-lane roads."

Dr. Vincent Drnevich, acting the College of Civil Endone of the College of Civil Endone in the college of Civil Endone of the College of Civil Endon

roads."

Dr. Vincent Drnevich, acting dean of the College of Civil Engineering, also said most interstates would be crippled. He said, for example, the Western Kentucky Parkway averages one bridge per mile.
"On an interstate, just a few bridges can knock you out," he said.

said.

Drnevich, who is in the last

### Rescuers hope to find survivors

nued from page 1

The number of dead pulled from the 1-880 disaster rose to 38, including a 4-year-old boy, bringing the earthquake's toll to 59, with thousands injured and homeless and dozens still missing.

Damage estimates topped \$7 billion, making the quake the costliest natural disaster in U.S. history, according to the Independent Insurance Agents

year of a four year project with the Kentucky Transportation Cen-ter and the Federal Highway Ad-ministration, is helping to select priority routes of travel in case of an earthquake and to determine features that would be vulnerable. Kiefer and Drnevich both are members of the Governor's Earthquake Advisory Panel, and agree that because Kentuckians don't consider a major earthquake to be a serious threat, it hurts the ability of the state to prepare. "Too many people have the attitude that 'I've got better things to spend my time on," Kiefer said.

Yesterday was a day for both mourning the dead and giving thanks for the living at churches across the bay area,

Special services were set be-cause some damaged churches remain too dangerous, and congregants praying for peace with the Earth were encour-aged to share their quake ex-periences.

"By the uncertainties of this hour, we pray to be spared from further suffering," Archbishop John R. Quinn told 700 people at St. Mary's Cathodral.

### Local experts differ on market fluctuation

By DAVID A. HALL Contributing Writer

Contributing Writer

Stock market experts in Lexingtion and at UK had several theories
for the recent fluctuation of the
Dow Jones industrial average.

UK economists and area investment specialists differed on reasons
to why the Dow dropped 190
points on Friday, Oct. 13, only to
rebound 88 points the following
Monday.

Dr. James Fackler, a UK economies professor, said that it is difficult to give a single factor to the
plunge, but indicated the U.S. Senate's postponement of its vote on
the capital gains tax could have influenced investors.

"I think (the postponement) can
explain about 90 points worth,"
Fackler said.
Joe Bryant, an investments specialist with Shearson Lehman Hutton Inc., disagreed with Fackler,
saying that program trading was
most responsible for the drop in the
market.
"I think the drop had more to do

market.
"I think the drop had more to do

"I think the drop had more to do with program trading than with the junk bond market," Bryant said. Program trading involves the buying and selling of futures against what investors predict will be the price of these futures later in the year. Futures are commodities such as

utures are commodities such as d currency, grain, soybeans and

cattle.
"For example, if November fu-tures predict that the price of a commodity will be way up, inves-tors will sell the futures and buy the actual commodity," Bryant said

tors will sell the tutures and buy
the actual commodity." Bryant
said.
Program trading, which is computer operated, drives stock prices
down by forcing investors to sell
large amounts of stock at one time.
Opinions differed on whether the
failed takeover of UAL, United Airtines' parent company, played a
role on the selling spree.
UK economist Frank Scott said
he felt the drop could be linked to
the takeover attempt.
"The sharp drop and sudden rebound could be seen to indicate that
there are no long-term effects, and
would make the UAL theory a little
more appealing," Scott said.
Scott also said that Transportation Sceretary Samuel Skinner's
suggestion that airlines again be
regulated may have worried investors.
"I think it may have seconthics."

regulated may have something to do with the Transportation Secretary making noise about blocking airline mergers by re-regulating the industry." Scott said. Scott added that the possibility of a re-regulation of the airline industry "sends shivers up the spines of investors."

try "sends shivers up the spines of investors."
Fackler said he doesn't believe the takeover attempt could have affected the market as a whole.
"I cannot see why the incident with United Airlines would spread into other areas of the market," Fackler said.
Last Monday, the Dow rose 88 points to dismiss notions that it would continue a plunge similar to Black Monday, Oct. 19. 1987, when the market crashed 508 points, after a drop of 108 points the previous Priday.
Bryant said the Federal Reserve's announcement that it would provide money to those banks that were giving loans to investors, may

### Brady's stock on rise after recent crash

Continued from page 1

Continued from page 1
Reviewing events during the interview in his office, Brady played down his own role, saying policy makers were better prepared this time around and armed with more sophisticated means of monistring market developments.
Brady was on hand Monday morning watching the flashing signals that tracked developments in the stock markets, stock futures, international currency and bond trading not only in the United States but in the markets around the world.
For Brady, market monitor-

world.

For Brady, market monitoring was nothing new. He spent 35 years on Wall Street as an investment banker. He also headed the Brady Commission, the panel which issued the first, and many be lieve the best, review of the causes of the record 508-point market plunge on Oct. 19,1987. In addition, the two Harvard professors who directed the Brady commission investigation are now working as top aides to Brady commission investigation are now working as top aides to Brady at the Treasury Department.

Known as the "gold dust twins," Robert Glauber, Treasury anderscertary for finance, and David W. Mullins, Treasury assistant socretary for domestic finance, are considered experts on the operations of financial markets. When the market began tumbling late in the afternoon on Cct. 13, Brady turned to these two aides to start a fact finding operation that continued throughout the weekend.

The Federal Reserve did its part by letting it be known that it was ready to inject large doses of cash into the banking system as a way of assuring jittery markets that cash-short brokerage houses would not have to sell more stock.

have helped prevent a crash similar to Black Monday.
"One thing that might have been different this time is that the Federal Reserve stepped in and made clear al Reserve stepped in and made clear al Reserve stepped in the right in the day, and it was too late," Bryant said.

late," Bryant said.
Fackler also said he believes the Federal Reserve's announcement helped ease the tensions of inves-

helped ease the tensions of investors.

"Evidently, the Fed announcing it would supply liquidity might have helped the market rally," he said.
"It could have boosted the confidence of those in the market."

Most experts said that the market will remain unstable for a while, but soon will show signs of growth.

"I think you are going to see quite a bit of volatility for the next week or two." Bryant said. "But it should start to subside quickly."

### District judge upholds ban, takes herself off Bush case

Continued from page 1

Continued from page 1
has been set for Nov, 14 in District
Court.

Tackett said if she hadn't taken
herself off of the case that she probably wouldn't have heard the case
in trial because Bush's lawyer, public defender David Graves, requested
a trial by jury. Tackett then would
be only one of six judges that could
be chosen to hear the case.

Bush was arrested on Sept. 26 on
charges of criminal trespassing after
refusing to leave the office of UK

## Big plays lead to UK victory over Tigers

Continued from page 3
the Lord that I was able to outrun
them," said Rawls, who rushed for
192 yards on 19 carries.
"It don't take a genius to see that
was a well blocked play," UK running back coach foreg Nord said.
"Rawls is the most explosive and
scary back that I've ever coached.
"And I've got four hanging in
there on my wall that are in the
NFL," Nord said referring to
George Adams, Mark Logan, Mark
Higgs and Iyo Ge Hunter.
But the game was not over.
After Willis' kickoff was downed
in the end zone, Hodson and his offense took over at their own 20yard line and took little time in
scoring. After completing passes of
seven, 14 and four yards, Hodson
it receiver Tony Moss for a 55yard "fluke" touchdown.
"It was just poor communications between the coaches and the
linebackers calling the defense,"
UK defensive back Albert Burks
said. "We had too many people on
the field and nobody was in the
right place. It was just a fluke that
should not have happened."
And David Browndyke's PAT

pulled the Tigers to within 27-21 with 2:22 remaining.
LSU's ensuing onside kick was covered by reserve running back Darren Bilberry at the UK 38-yard line. The Cats still had over two minutes on the clock to kill before the victory would come.
At that point, the Wildcat offensive line dominated LSU and the Cats picked up two first downs, solely on running plays, and drained the remaining time from the clock.

drained the remaining time from the clock.
"I thought that series of running plays was as well as we blocked all night," Claiborne said. "We went right at them and got the first downs. The whole line came off the ball really well ... and was our best surge off the ball in the game."

The Cats got on the scoreboard first when Willis capped a 11-play drive with a 44-yard field goal into the wind to give UK a 3-0 lead with 13:38 remaining in the first half.

And after missing a 38-yard field

half.
And after missing a 38-yard field goal on UK's next possession, Willis hit a 42-yarder with 5:34 left in the first half to give the Cats a 6-0 lead.
The Cats would finally get into

the end zone on their last drive of the first half, when UK quarterback Freddie Maggard hit tight end Rod-new Jackson on a 2-yard pass to put UK ahead 12-0 with 1:02 remaining in the half. The 2-point conversion attempt failed. The Windton of the Widea of the second half when Rawls broke one tackle and outran four LSU defenders for a 57-yard run. UK's PAT was broken up and the Cats led 18-0 with 13-44 remaining in the third quarter.

PAT was broken up and the Cats ted 18-0 with 13-44 remaining in the third quarter.

Willish it his third field goal of the day, a 31-yarder, with 7:27 remaining in the third to give UK the 21-0 lead.

LSU fullback Victor Jones capped a 17-play drive with a 1-yard run with 0:11 left in the third quarter to pull the Tigers within 21-7.

Hodson hit Moss on a 21-yard pass with 8:59 left in the game for LSU's other score.

WILDCAT NOTES

UK defensive guards Joey Couch and Jerry Bell suffered injurés during the game, but Claiborne does not expect them to miss much practice. Bell has a burner in his kneck and Couch has a knee sprain.

### Record not satisfying

Continued from page 3

the end zone to make the score 21-14. This tied the SEC record of 56, which was set by the University of Florida's Kerwin Bell during the 1984-87 seasons. Hodson would go on to break the SEC career mark. But the Cas had already secured a victory when UK's Billy Swanson intercepted a Hodson pass after UK defensive tackle Donnie Gardner, thir Hodson's arm while in delivery. "It never came down to just that one play," Hodson said. "If we would have came out and played at all, we would have came out and played at all, we would have energiage though, a guy hit my arm and the ball came wobbling out."

out."

But after Alfred Rawls' touch-down gallop gave the Cats a 27-14 lead, Hodson broke the mark with a 45-yard pass to Alvin Lee with about two minutes remain-

with about two minutes remaining.
"We were going in a hurried situation," Hodson said. "I think (UK) was trying to get in some substitutes, and I think they had some communication problems.

We snapped the ball and they forgot to cover Al."
However, touchdown pass number 57 was not very special.
"It really doesn't mean much when your playing on a losing team," Hodson said. "You really don't celebrate much. I can show my parents. But I don't when you manage to celebrate with."
To add to his misery. LSU

To add to his misery, LSU dropped to 1-5, a complete turn-around for Hodson who went 8-3 last season.

last season.

"Last year was frustrating but we won," Hodson said. "That's the difference. I've never been of a losing team. I've always won, usually only had one or two losses in a season."

LSU coach Mike Archer din't have much to say shou Hod.

have much to say about Hod-

have much to say about Hod-son's accomplishment either.

"If he had the record, it's prov-en what he has done for LSU," Archer said.

Hodson said that he would probably remember his success years later.
"It's not special now," the LSU quarterback said. "I guess it

"It's not special now," the LSU quarterback said. "I guess it would be special in five or 10 years."

### Cool Cats sweep 2-game series with Ga. Tech

Kentucky had 19 penalties in 40 minutes to Tech's 18 penalties for

41 minutes.

Chad Wagoner received UK's only four minute penalty because of a scuffle at the end of the second period Saturday night. At the other end of the scuffle was Yellow Jacket Jim McConville, who also received a double minor roughing violation.

olation.

Tech captain Chris Ciavacco received four minutes in the box midway through the final period for a
double minor roughing.

Spending the most time in the
box was Georgia Tech's Chuck

Shendl, who was penalized a total of 17 minutes. (Shendl had 6:04 of penalty time left when the game ended.)

nded.)
Swithwick scored his first goal
Chad Cooper assist at 11:03 Swithwick scored his first goal from a Chad Cooper assist at 11:03 in the first period. The Yellow Jackets tied the score at 1:16 in the second period when a Jeff Rouse shot made it into the net off of passes from Jay Slater and Mark Goggans.

Rouse teamed up again for the final Yellow Jackets' goal at 16:08 in the second stanza.

The Clast Followed the Tech score with two goals at the end of the period, giving them a lead which they would not relinquish.

At 16:44 Swithwick scored again off a Jim Klapheke pass. Rob Beil closed the half scoring from a Swithwick assist at 17:58. Swithwick closed off the scoring in the third period with his final goal from a Nick Pelligreen pass at 6:38.

6:38.

UK goalie Randy Darnell, who had 30 saves, said: "We rose to the occasion when we were down one goal. We've got the kind of team if they're down in a matter of minutes they can be back up again." "It was his first college win," Davenport said. "Randy did an outstanding job tonight. He deserves a lot of credit."

Swithwick started two games on

the road last year; both were losses against Tech.

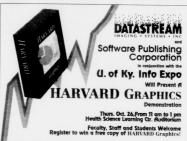

"I was just trying to play like I play in practice," Darnell said.
"The defens helped a great deal." Swithwick described the team's performance as "a little naty,"

"With (all of) the penalties, we've been very lucky," Darnell said.
"The pucks been going our way."

UK travels to Athens, Ga. this coming weekend to play the Georgia Bulldogs in a weekend double-header.

header.

The Cool Cats will be in action at home next when they host the University of Cincinnati Bearcats on Nov. 3 and Nov. 4.

### Pitino hopes to surprise SEC with style

also his former point guard at Providence. "Billy was fast, but he was quick and he never got out of the game mentally. He had great mental touchness."

tal toughness."

The UK coach said his team is ahead of schedule, as far as learning

The UK coach said in steam is ahead of schodle, as far as learning his complex system.

"They're way ahead of my first teams at Boston University and Providence," he said. "These guys are really learning a lot in a short amount of time."

And Plinio credits the watching of Providence and Knicks films as the key. Before practice begins he shows the team films of Providence and the Knicks executing what he is going to teach them that day.

"Watching the films have been a tremendous help," UK sophomore quard Richie Farmer said. "By watching the films, we are able to

watching the films, we are able to visualize what Coach Pitino is wanting us to do. And then we go out on the court and do it. It makes learning a lot easier."

### Crowd creating loud 'Mayhem'

Continued from page 3

Of the first two nights of the UK hockey season, Friday night's crowd was much more impressive. A huge crowd of 1,175 turned of the the thing thing the thing thing thing thing the thing thing thing thing the thing thing the thing thi

"We heard that the Cool Cats were the hottest thing on campus," Hayes said. "This is my first game and we are really wild and wound

"It's a pretty physical game," said Walter Zausch, a communica-tions sophomore, who also was at-tending his first Cool Cats game with his Kappa Sigma fraternity.

"They are really going at it," he said. "In the first period they were going for blood and the crowd was turned on to it. At football games they (the crowd) are really spread out, but here you're right on top of things."

Senior guard Derrick Miller said:
"The films have been a great tool
because we are able to see the results of what he wants us to do.
Like how his style of play will
wear the opponents down and then
we come from behind and win in
the end."

we come from behind and win in the end."

The UK coach believes the film work and explanations of his style are necessary in this era.

"In my day, which was not too long ago, the coach would tell you to do something and then you would go out and give 110 percent and do it." Pitino said. "But today, these guys want to know why. And after you take the time to tell them why, then they will go out and give 110 percent and do it."

The most difficult thing Pitino has been able to teach his new team in the first week is what a good 3-point shot is.

"We have to teach them what a

in the first week is what a good 3-point shot is.
"We have to teach them what a good 3- is. They are having trouble distinguishing between a good 3-and a bad 3-," UK's first-year coach said

Well, what is a good 3-pointer?

"A good a is when you pull up on a fast break and you are wide open, when the ball is rotated inside and then kicked back out and the (opponent) is not in your face and when the ball is rotated around the outside until an open shot becomes available," Pitino said. What's a bad 3-pointer?

"A bad 3- is when you put up a shot with a guy in your face or you were not set and ready to take the shot," the UK coach said.

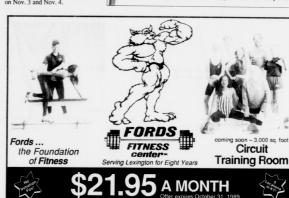

And contrary to the belief most college coaches, not taking an open 3-pointer will displease Pitino more than anything on offense.

"That has been one of the hardest things so far is to get these guys to shoot the 3- without hesitation," he said.

And Pitino is serious about the

said.
And Pitino is serious about the 3-pointer. He ordered sophomore swingman John Pelphrey to do a "Buddy-run" after passing up a 3-

point opportunity.
"It really shocked me when he told me to hit the buddy," Pelphrey said. "I guess he is just trying to prove his point."

November 3 – 5

Deadline Oct.23rd

# SGA shuttle plan does not promote alcohol awareness

Keeping drunken drivers off the road to make driving safer is a good idea, but the idea by the UK Student Government Association to establish a shuttle bus service next year does more to promote irresponsible drinking than reduce drunken

driving.

The free service, sponsored by SGA's Committee on Alcohol Responsibility and Education, is still in the planning

stages, according to CARE Chairperson Amy Butz.
SGA needs to secure about \$20,000 from local businesses to sponsor the service, which it plans to get from a phone-a-thon next month.

The purpose of the program is to provide safe, reliable

transportation for those who have one too many at local bars.
The shuttle bus will run a regular route from campus to area bars from 10 p.m. to 2 a.m., Wednesday through Saturday.
Butz said she hopes the service will reduce alcohol-related

accidents and promote responsible drinking. According to state police, 46 percent of traffic fatalities in Kentucky last year involved a driver who had been drinking.

Drivers of the shuttle bus service will be required to have a

chauffeur's license, complete a CPR and general first aid course, and know where police stations and area hospitals are located. But who would be willing to drive a bunch of drunk college kids around town for a few hours, even if they are paid

While a shuttle bus program may reduce the number of

drunken drivers on the road, it is doubtful whether it will do much to promote responsible drinking.

In theory, the shuttle service would be used only by those who unexpectedly have one too many at a bar. But in reality, a shuttle bus service likely would be used as an excuse for m

The van might prevent more senseless deaths on the nation's roads, but at what cost?

As students forget about having to drive, many undoubtedly

will drink until they drop at local bars, which could create future alcoholics for society to deal with and to build treatment centers for.

A shuttle bus service does little more than tell students it is

all right to go out and get smashed because there always will be someone to see they make it home in one piece. As critics of the shuttle bus service correctly have pointed out, when students leave UK, there will not be a van or car out, when students leave UK, incre will not be a van or care a false sense of security while they're in college. A college is a place that should teach students to accept responsibility, not shirk it as a shuttle bus service would.

So when alumni and businesses are called by CARE next

month asking for donations, they should show their concern for alcohol abuse and drunken driving by writing a check to their favorite charity that specializes in alcohol and substance

### Kernel Checklist

A weekly service of the Viewpoint Page to keep its readers abreast of the hot items of the universe.

√Red Hot What? Alternative Music week.
WRFL-FM deserves recognition for bringing together such a wide variety of artist for this year's Alternative Music Week and making it such a success. Bands like the Red Hot Chili Peppers and Syd Straw played to sold-out crowds. So contrary to what some may think, people wants to hear music that is not sung by Debbie Gibson and Tiffany. (Are you listening Saj Rizvi?) Now if someone would explain just what alternative music is.

√Helping Each Other. San Francisco VHelping Each Other. San Francisco
Earthquake. In less than a month a hurricane has
wreaked havoc on the East Coast and an earthquake has
caused more than a billion dollars worth of damage and
killed hundreds in Northern California. And both times
relief and support efforts poured in from the rest of the
nation to help the victims. In an age where selfishness
and self-centered lifestyles are supposed to be in vogue,
it is refreshing to see that some Americans still care
about their fellow man.

VBurning The Constitution. The Flag
Thine. President Bush expressed dismay last week

Thing. President Bush expressed dismay last week over the recent bill passed that would outlaw descration of the American flag — whatever that means. Continuing to ignore issues like the federal deficit and

Continuing to ignore issues like the federal deficit and changes in Eastern Europe, the president repeated his desire to clutter up the Constitution with an amendment.

\*Motoring Along. The U.S. Economy.

Despite reluctant signs from the White House and Congress to deal with the federal deficit, the stock market rebounded last Monday from a 190-point drop on Oct. 13. Many analysts say that the Oct. 13 drop was less a sign of economic weakness and more a signal that less a sign of economic weakness and more a signal that the days of easy take-overs have come to an end.

### Deadheads

### Followers of 60s band could be America's saviors

While Congress busies itself fighting over flag burning and Wall Street has more ups and downs than a schizophrenic on valium, there is a serious problem hanging over America's head that is being ignored. A problem that left unsolved could destroy the American economy.

To those of you not in the know, a "Deadhead" is a person that follows the Grateful Dead from shot so that the to show as they tour the country. I'm not talking about the college student who saw 30 shows over the summer, true Deadhead's whole lives revolve around the band.

They might support themselves

They might support themselves by selling tie-died t-shirts, beads, food or sometimes "the kind drug" at Dead shows, but they never leave the group. They are part of "the family."

the group. They are part of "the family."

Don't get me wrong, I think that the whole dead scene is pretty cool. Sit around, be mellow and do whatever you do, but I have one problem with this lifestyle.

What happens when the Grateful Dead stop louring?

My friends and I have spend countless hours pondering this question. Imagine the implications. Thousands of people collecting so-cial sercuity or unemployment would be too much strain on to-day's work force.

Yes, we could get a look-alike band to keep touring, sort of like Beatlemania, but how long could that last. It would be too hard for them to capture whatever it is about the Dead that makes them so popular.

Deadheads set up a commune in someplace we're not really using

like Arizona or New Mexico. I have a friend named Krista Baer who could find them some really cheap land in New Mexico. They might have three headed babies because of the radiation, but you take

cause or the radiation, but you daw what you can get. It could be like Disneyland, but it would be "Deadhead Land." They'd play "Space Truckin" and "Touch of Grey" as you entered the gates and everyone would throw flowers at you. Timothy Leary could be the Mavor!

Mayor!
On second thought, I have a better idea. Why don't we use them as a weapon to sabotage other na-

Everyone is always complaining that rock-n-roll, the 60's drug scene and the beat generation ruined this nation so why don't we send them

to other countries? Instead of wor-rying about improving education in America we could just make it worse everywhere else. Consider this - twenty thousand Deadheads go to Japan, pretty soon all the Japanese kids (who love everything American) are listening to American Beauty. The next thing you know is all the kids are

wearing tie-dyes and talking about Ashbury-Haights.

But we wouldn't stop there.
Then we'd send over Jefferson Air-plane, the Who, the Rolling Stones, the Beach Boys and any other washed up 60s icon who is milking the American youth dry

Artist Dan Atkins' depiction of a "Steal Your Face," a symbol that is popular among followers of the Grateful Dead.

with their nostalgia fad.
Pretty soon all the Japanese kids
would be skipping classes to wait
in line for Stones tickets.
They would rather become writers than business men and they

ers than ousiness men and they would actually give money away. Imagine the first Deadhead Prime Minister!

"Hey, you know that 13 trillion dollars you owe us? Let me have that lava lamp in your attic and we'll call it even."

Next we could send the group West Germany or any other plat that we want to take down.

Then America really would be

If everybody is into peace we won't have to spend money on

bombs or other weapons. We'd just have to supply the Deadheads with dyes and chemistry sets.

The Deadheads could become the fourth branch of government.

The Legislative the Executive.

fourth branch of government.

The Legislative, the Executive,
the Judical and the Dead.

They could strike down any legislation that was unpsycheldic.

Lawmakers should consider my
proposal seriously (even though it
wasn't given that way).

Jesse Helms might be angry for
a while, but at least Americans
would be safe.

Heck, we wouldn't even want to
Heck me wouldn't even want to

Heck, we wouldn't even want to burn flags then.

# Drinking not the only sign of adulthood

I cleaned my toilet yesterday.
For many of you this may seem insignificant, but the relevance lies in the fact that I knew, by this act, I was entering "adulthood".

hood".

Many look forward to their 21st birthday with great enthusiasm. They head for the local bar with their buddies and proceed legally to fall off their respective barstools.

I lacked this sort of zeal when my birthday approached. What does a non-drinking female do to celebrate her ascent into the adult wordd?

celeorate net ascern fune ure auau-world?

I think most people associate adulthor ' with being able to make the r own decisions, being responsible for themselves and in control of their destinies.

A week before my birthday I was a nervous wreck, because I believed the day after I turned 21, I was supposed to behave in this manner. I knew that I wasn't ca-pable of making this fantastic transformation overnight.

"I can't do this," I thought.

Contributing Columnist

"I'm still a kid. God, I'm not ready for this."

After living alone in an apartment for the first time, I realized that being responsible was equivalent to being employed and taking out your garbage. That making your own decisions equalled which kind of toilet bowl cleanser to buy and making sure the check to GTE South didn't bounce was controlling your own bounce was controlling your ow

destiny.

I survived my birthday without transforming. The next day I discovered I hadn't magically turned into this "adult" overnight. I can't convey the relief I felt. I looked and talked the same. I automatically didn't want to buy china or own a land rover.

Eventually as I returned to my normal routine, these fears of impending adulthood left me. I

would be okay, I told myself.

I wouldn't have to metamorphose for at least a few more

years. I was safe.

Speaking about making my
own decisions, I found myself in
the local K-Mart store in the
home section. I was amazed by
the wide choice of cleansers and sprays available to dwellers with rust-stained toilet bowls like

mine.

I left with a bottle of blue
Sani-Flush, chosen because of its
fragrance, and a wonderful, \$99
peach toilet brush with great
little scrubber things and a
LONG handle. I was ready to per-

LONG handle: I was swell form.

I headed for home with the excitement of trying something new. I was prepared for my toilet bowl with the appropriate tools, but was my toilet bowl prepared for me?

I wouldn't find the answer for a week or so as other "adult" responsibilities such as work, school and picking the hair up off my carpet kept me from my

task.
Finally, I was ready. I took the peach brush and bottle of Sani-Flush in hand.
The instructions said to raise the seat, unscrew the cap of the cleanser and squeeze about four ounces under the rim. I don't know about you, but how does the average person know how much four ounces of Sani-Flush is?

is?
Along with what I hoped were rust stains, I found other microorganisms under my rim. I attacked the stains with my freshly scented liquid and scrubbed like a hanshee.

My task was complete. The My task was complete. The only hing that remained was to flush to see all the muck float away. In less than five minutes, I had entered the adult world, at least in a domestic sense. Somehow I knew life would never be quite the same again. Contributing writer Holly Houston is a journalism junior and a Kernel contributing columnist.

# Mapping of AIDS virus helpful to researchers

dimension of the epidemic in the video, many begin to reflect on their own personal danger, Gould

said. ("After making one program (of the maps) on public television, even the hardened and blase television crew and cameramen came up to me and said "My God, we never realized it's that close," Gould

realized It's that cooks said. Dr. Ernest Drucker, the head of community health and drug addic-tion programs at Montefiore Medi-cal Center in Bronx, NY, said the difference between AIDS in the Bronx and a city like Lexington is "between putting out a fire and pre-venting one."

Drucker displayed neighborhood maps of the Bronx, illustrating the intensity of AIDS infection on each city block.

intensity of AIDS infection on each city block.

The high level of AIDS infection in the Bronx is the result of many social factors, including intravenous (IV) drug use, crack and poverty, Drucker said.

Despite the detail of AIDS infection data available about the "high-prevalence" area, because of the 10-year latency period for AIDS, Drucker said the map he displayed was only "a good map of infections in 1978."

Response in Lexington in-

Edwin Hackney of the Bluegrass East Comprehensive Care Center runs a support group in Lexington for people with AIDS and coordi-nates services for those infected, in conjunction with community

adequate.

Although AVOL has had more volunteers for "buddies" for AIDS patients than it can assign, outside of community groups AIDS patients have few supports available,

tients have few supports available, Hackney said.

Hackney also said that outside of the Lexington Health Department's education efforts, education and knowledge about AIDS in Lexing-tion is spotty at best.

Sex education classes in Fayette County schools are constrained by policies that forbid the discussion of birth control and homosexuality, Hackney said.

"One of the things that we're

of birth control and homosexuality,
lackney said.

"One of the things that we're
finding in Central Kentucky ... is
that even though we look like a
city, we're not, 'Hackney said.

"A colleague in Louisville says
Lexington's a big city run by
small-town folks. I think that's
true. People here do not relate to
some of the same techniques that
are used in larger cities. We've had
to go very low-profile in our work
in the gay community and other
parts of the city.

"We've had to basically hide
most of our services. Our support
group has a location that is undisclosed." Hackney said.

Medical care for indigent people

Medical care for indigent people with AIDS is hard to obtain in Lexington, Hackney said.

"The University of Kentucky Medical Center has constantly

groups like AVOL — AIDS Volunteers of Lexington.

Hackney said in his presentation that the response to AIDS in the Lexington community has been in adequate.

Emergency room care for people with AIDS is good at UK, Hackney said.

But AIDS patients who need check-ups and ambulatory care to avoid becoming acutely ill have trouble getting that care at University clinics, Hackney said.

sity clinics, Hackney said.
"Those clinics think of them-selves as private," Hackney said.
Some patients have been turned away from the clinics because they didn't have \$20, Hackney said.

Although "the history (of AIDS care at UKMC) is not good at all," it's improving, Hackney said.

There is an increase in awareness at the UK Medical Center and "they're trying to get different departments together for a comprehensive care plan for AIDS patients," he said.

tients," he said.

Another problem Kentucky
AIDS patients face is a lack of
treatment drugs.

State funding for AZT, the only
federally-approved drug for the treatment of AIDS, was cut off last
year, forcing many Central Kentucky AIDS patients to drive to
Cincinnati to participate in federally-funded clinical trials, Hackney
said.

Hackney said that in his experi-ence as a mental health profession-al, he has seen Kentucky give people with complex mental health problems "a one-way ticket to Cin-

AIDS discrimination is a prob-

lem in Kentucky, Hackney said be-cause "AIDS is still not a discussa-ble subject in polite society in Central Kentucky."

Discussion key to preven-

Ron Stall, of the Center for AIDS Prevention Studies at the University of California at San Francisco, said discussion of AIDS is one of the ways to prevent the disease from spreading.

In extensive research in San Francisco on large cohorts of gay men, Stall and his colleagues found that one of the ways to stem the growth of AIDS is by promoting an atmosphere that encourages safesex behavior.

"The typical gay man moved

sex behavior.

"The typical gay man moved from high-risk in 1984 to low-risk to 1985," Stall said. "The level of high-risk sex that's occurred within the continued samples over time has had a precipitous drop, from 30 percent in 1984 to about seven percent in 1987. To our knowledge, this is the largest behavior changes this is the largest behavior change community-wide that has occurred in response to any public health

campaign."

Beth Schneider, a professor of sociology at the University of California at Santa Barbara, outlined a research agenda for socio-cultural study of women and children, who are a growing group of AIDS patients.

res; motherhood and AIDS; women and condom use; mobilization for supports for female AIDS patients; and healthcare and government policy needs to be initiated to prepare

healthcare and service organizations for treatment of female and children AIDS patients, Schneider said.

AIDS patients, Schneider said. William Darrow, of the Centers for Disease Control in Atlanta, GA., the federal agency responsible for AIDS surveillance and epidemiology, described the process by which the first breakthroughs in understanding AIDS transmission was made and described the CDC's efforts to understand the socioepidemiology of heterosexual transmission of the disease.

In less-developed nations, however er, officials say much still needs to be done to prevent the spread of AIDS.

In African nations the world

Feldman, who has done research in Zambia, Uganda and Rwanda, said the problem of AIDS in Afri-can nations is intertwined with oth-er cultural, economic and political problems endemic on that conti-

The World Health Organization has tried to assist African governments and health organizations deal with the problem.

"AIDS and the Social Sciences "AIDS and the Social Sciences" was sponsored by the UK depart-ment of geography, and several oth-er UK departments and community groups, with substantial support from the College of Arts and Sci-ences' Enrichment Fund.

### Series delayed

SAN FRANCISCO - The

SAN FRANCISCO – The World Series will not resume until Friday night, three days later than originally hoped, baseball commissioner Fay Vincent amounced yesterday. Games 3 and 4 and, if no cessary, Game 5 and 4 and, if no class of the control of t

land Coliseum. Oakland leads the Scries 2–0.

"We have agreed that base-ball should resume with enthusiasm this coming week," Vincent said in a joint statement with San Francisco Mayor Art Agnos. "But Tuesday was too ambitious."

The Series was interrupted last Tuesday night when an earthquake shook Candlestick Park 30 minutes before the start of Game 3. Baseball had hoped to resume tomorrow, but Vincent strongly said that the Bay area's priorities were much more important than the World Series.

the World Series.

"For most San Franciscans, the shock and grief have just begun to wear off," Agnos

said.
So now, this Series, which had already been delayed, the longest layoff ever, will go 11 days between games.
All games will be played at their original starting times.

# Frat hazing a dying tradition

Hazing, an old tradition among many fraternities, is being swept out of fraternity life to save future brothers from a potentially fatal method of discipline.

Today fraternities are taking a hard look at the hazing problem and are considering ways to place the beastly tradition to bed, for good.

Hazing was once considered a necessary part of becoming a brother. Sharing unpleasant experiences like strenuous exercising, being paddled and gulping hard liquor until the stomach couldn't take it anymore made pledges part of the family, for life, beith pariet. ly, for life

But the high price of brother-hood ended up costing some pledg-

es their lives.
James Callahan, 18, of Rutgers
University, in New Jersey, was
given 200 to 300 drinks during an
all-night party at his fraternity,
Lamda Chi Alpha. He died of alco-

Lamda Chi Alpha. He died of alcohol poisoning.

At New York's Alfred College,
Chuck Stenzel also died of alcohol poisoning.

At New York's Alfred College,
Chuck Stenzel also died of alcopoisoning during a fraternity initiation. After the tragedy, his mother, Eileen Stevens, began Committee to Halt Useless College
Killings to lobby against hazing.

"Hazing is contrary to the idea
(of friendship). (Unfortunately),
hazing, many times, is synonymous with pledging," she said.

Though pledging has often
served as the perfect guise for hazing, some universities are quickly
spotting this dangerous practice and
are giving some fraternities more
than just a slap on the wrist for
their involvement with hazing.

After Callahan's death, the uni-

versity withdrew all recognition of Lamda Chi Alpha. "The (Lamda Chi Alpha) house was permanently closed," said Amy Melvin, spokesperson for Rutgers' news services. As far as the univer-sity is concerned, the fraternity "doesn't exist."

equently, two of the na subsequently, two of the na-tion's largest fraternities, Zeta Beta Tau and Tau Kappa Epsilon, have joined the fight against hazing and made significant changes in their traditions, eliminating the pledging system.

system.

Now, instead of having to go through any type of hazing, a prospective member only has to receive a bid (invitation), accept it and learn the history of the fratenity, according to David Addock, fratenity, according to David Addock, fratenity executive of Tau Kappa Epailun.

"The fratenity is given prosper to the common of the initiation," Addock stud.

The initiation," Addock stud.

for the initiation," "Addock said.
The initiation ceremony allows pledges to enter the fraternity with full membership, he said.
Actually, Zeta Beta Tau is the only fraternity to have already implemented a new system. Tau Kappae Epsilon, which also volunteered to change its practices, chose to complete its changes by 1991.
"It's not right to force (the new system) on our chapters," Addock

said. "It's gonna take some time to get used to the program."

Other fraternities are closely observing ZBT and TKE to see

observing ZBT and TKE to see how well the changes work. "We're not seriously considering adopting a new system without pledging," said Joseph Langella, alumni director of Sigma Phi Epsi-lon. "We're just observing what happens with ZBT." Sigma Phi Epsilon, like many other fraternities, believes that eliminating the pledging system would not necessarily stop the haz-ing.

would not necessarily sup the ....ing.
"Without pledging, there's still going to be the differentiation of first-year brothers from other brothers." Langella said. "They'll still be treated differently."

The fruternity said its education

treated differently."

The fratemity said its education development program, Brotherhood Development Program, teaches pledges and brothers not to participate in hazing.

"The Brotherhood Development

Program's goal is to prepare pledges for initiation," Langella said.
Goals include teaching:

A sense of the fraternity's his-

# ZBT fraternity halts pledging after 44 deaths in last 10 years

USA TODAY/Apple College

NEW YORK — Zeta Beta Tau Fraternity has halted the traditional pledge because of the high incidence of hazing that, according to ZBT president Danny Siegel, has caused 44 deaths in the past 10 years in different fraternities nationally.

This fall, ZBT's 100 chapters in the United States and Canada have discontinued their pledge programs in favor of simple initiations to take place if prospective brothers accept "bids" from the fraternity's members within 48 hours.

tember.
"I think it's an exciting experiment, and I know all the fra-ternity executives and advisers of challowing the control of the contro

er fraternities and sororities, "rushed" potential pledges, then offered bids to preferred rushess. If the prospective brother acceptance, the then started about six to eight weeks of pledging, which included attending weekly meetings, learning local and national history and participating in social service events.

But pledges often were forced to do more than go to meetings or give blood.

"Because there's a two-tier membership, the pledge is at the brothers' mercy. ... (The pledge) could be blackballed if he doesn't do what's asked," Siegel said.

Dr. Ronald Taylor, an alumnus and vice president of ZBT national, said pledging was eliminated because "we just couldn't stop the hazing. There were always incidents going on. We tried education programs, penalties and punishments, we had to remove that window."

Taylor said that although there was "initially some anxiety," the students in ZBT were accepting the alternative program, and the number of prospective

members was up this fall.
Siegel said that the alternative program still provides ways
in which newly initiated members participate in "bonding activities (such as) going to baseball games and social events and
having a big brother."

Also, to prevent "dead
weight," every brother will be reviewed by the entire fraternity
twice a year, regardless of status,
and may be ousted.
"I think we're returning to

"I think we're returning to what fraternity is all about," Tay-lor said. "And it's not human ser-vitude."

In addition to the physical hazing that pledges often endured, students often suffered mental harrassment.

Encouraged by alumni, the decision to end pledging met with "a lot of resentment and opcostition at first" from undergrad-

uates.

"Times are changing. Fraternities are too," said Bobby Nejat, vice president of ZBT and the NYU Interfraternity Council

The power to be your best."

(Customized Campus Information)

The Neanderthals:

Anthropologists crawl around on their hands and knees. sifting through piles of rubble, slate, and bedrock looking for bits and pieces of ancient human bone. After collecting hunbits and pieces of ancient human bone. After collecting hundreds of bone fragments, some barely larger than small rocks or pebbles, these scientists make broad, sweeping assertions about how this, that, or the other part of human anatomy looked one, two, or three million years ago. Understandably, considering the amount of evidence that they have to work with, anthropologists occasionally make mistakes. In the case of Neanderthal man, they made a doozy. For, unlike the common perpresentation, Neanderthal man, when the properties of the common perpresentation. mon representation, Neanderthal man was not a beetle-browed, hunch-backed, knuckle-dragging, muscle-bound savage at all. In fact, if recent findings prove correct, he more closely resembles a broad-foreheaded, long-armed, buff mental midget like those found in todays weight rooms. Granted, it's not a heck of an improvement but it's one that warrants further discussion and research

thought the earth (being flat as a pancake) was supported in mid-air on the shoulders of a giant, who in turn stood squarely on—you guessed it— the back of a tremendous tortoise. The point being, human progress is based on scientists righting the intellectual wrongs of the past. In which case, today's anthropologists have their work cut out for them. For, as scientist Jim Avery recently stated in the Weekly National Star, "Our
