Gordon — good faith

Byron Lee —

may not see race in any fashion

vestiges - exist and emerge

- visible signs of something from the past

- footprints from the past

return to racially identifiable schools

- guidelines - 15-50%

how it is implemented

- what the school board might then do

- demography of community

- lack of significant change

- 7 simulations - various scenarios

Steve Porter - 1. burden of proof - can not meet burden

2. "racially identifiable" - definition
black majority schools

3. good faith - do not concede that they
have always acted in good faith

4. vestiges -

- footprint of past ~~residential~~ residential segregation
which was contributed to by BSA

- desegregation inside the school house
