SEED INSPECTION IN KENTUCKY, 1959-1960

The twenty-eighth year of operation of the Kentucky Seed Law began May 1, 1959, and closed April 30, 1960. During this time 937 official samples were taken from the various lots of seed inspected.

Enforcement officials have passed upon all violations and irregularities and helped to solve many of the problems of farmers and seedsmen.

EXPLANATION OF TABLES

The following tables show the results of analysis of official samples. Table 1 shows the percentages of purity and germination stated on the tags and the percentages found, a statement of excessive amount of noxious weed seeds when present, irregularities in tags and absence of tags. The variations allowed in purity, germination and weed seed per ounce are described on pages 39-42, USDA Service and Regulatory Announcements, No. 156, Rules and Regulations Under the Federal Seed Act, reprinted June, 1960; paragraphs 201.59, 201.60, 201.63 and 201.65. Results within the allowed variations are marked with "+" if above or "-" if below statement on the official tag.

Variations greater than those allowed constitute violations of the Kentucky Seed Law and such results are underscored. In the table "L" means listed on the tag and "F" means found in our test. The long line means "not listed".

Table 2 shows violations found in samples classified according to wholesale dealers from who they were purchased.

Table 3 contains a summary to show the kind and number of violations detected.

The percentage of unlawful samples this year is 7.15. The average for the last three years is 5.33 (1959 - 7.15; 1958 - 4.80; 1957 - 4.05).

The work summarized in this report was performed in compliance with the provisions of the Kentucky Seed Law and in accordance with the rules and regulations promulgated by the Director of the Kentucky Agricultural Experiment Station for the enforcement of this law.

The seed law is specific in demanding that certain information be given on a Kentucky seed tag attached to containers or bags of agricultural seed offered for sale. If the buyer will be just as specific in knowing and demanding what he actually wants, the quality of seed on the market will continue to improve.
