UNIVERSITY OF KENTUCKY

ORGANIZATION AND RATING OF KENTUCKY
HIGH SCHOOLS

By MARK GODMAN, O. J. JONES, L. N. TAYLOR,
Public School Supervisors

Practically every type of high school organization can be found in Kentucky: junior high schools, grades 7, 8 and 9; six-year high schools, grades 7-12; traditional four-year high schools, grades 9-12; three-year senior high schools, grades 10-12 and two- and three-year high schools, grades 9-10 or grades 9-11.

There are 848 high schools in Kentucky. Of this number, 89 are private schools, 75 are public high schools for colored children, and 684 are for white children. Only 14 strictly junior high school organizations made reports to this Department. Their total enrollment is 9,622.

The total enrollment of both public and private high schools is 105,796. Of this enrollment, 89,374 are in public white high schools, 8,576 are in public colored high schools and 7,846 are in private high schools. The reports for 5 small public high schools and 2 private high schools did not give enrollment figures.

Eight public high schools have an enrollment of over 1,000 each while 22 have an enrollment between 500 and 1,000; 243 have an enrollment between 100 and 500 each and 481 each have an enrollment of less than 100.

There are 647 accredited high schools of which 321 are Class A and 326 are Class B. Two hundred and twenty-seven public high schools are six-year organizations.

In the public and private high schools of Kentucky there are 4,545 teachers employed. Of this number 364 teachers are not yet graduates of standard four-year colleges.

From the point of view of administration, the high school problems of the state of Kentucky are largely concerned with the small high schools, since the number of small high schools constitutes such a large percentage of the total number of high schools in the state. The great problem of these small high schools is that of working out a program of studies that will have a sufficient variety of interest to appeal to the needs of the pupils and will at the same time be kept within the narrow range of subjects that they can possibly offer. Naturally, if the small high schools attempt to offer a range of subjects that will appeal to pupil interests, the number of teachers that

will be required will be so large that pupil costs will be excessive. Due to the fact the small high school is necessarily limited in the program which it can offer and since it is usually very expensive from the pupil cost standpoint, it is evident that high school facilities in the state could and would be greatly improved by further consolidation and the elimination of many small, weak and struggling high schools. In this connection it is admitted that because of the geographic location of many of the smaller high schools in the state, their consolidation with other high schools is not only undesirable, but practically impossible. The State Department of Education is fully cognizant of this situation and when the Supervisors attempt to aid in the further consolidation of small high schools, they take this fact into full consideration.

Anyone who is at all familiar with high school conditions throughout the state must and will admit that Kentucky has many small high schools that are so situated that the pupils could be transported to adjacent schools more economically and with greater educational advantage to the pupils than is the case in their being continued as small separate school units. Fortunately, a number of the counties are aware of this truth and are voluntarily developing programs of high school consolidation that will eliminate many small and expensive high schools. The Supervisors of the State Department of Education are desirous of co-operating with boards of education in their efforts to develop a more efficient and economical organization of their high school program.

In order that both school officials and taxpayers may know the high school situation in their respective counties, the following data have been prepared for the school year 1934-35 and are herewith presented.

KENTUCKY HIGH SCHOOL DATA 1934-1935
