Pinero Fable is Cleverly Presented by Able Cast Under the Direction of Miss Kay and Jack Frume

The Romany Theatre opened its fifth engagement of its subscription season before an enthusiastic house Monday evening, with the presentation of Arthur Wing Pinero's "The Enchanted Cottage." Romany goes are unanimously declaring this production the greatest success that the theatre has achieved. Tonight and Saturday nights are "student nights."

The play, a fable in three acts, is under the direction of Miss Claribel Kay and Mr. Jack Frume, and the beautiful dream scene at the end of the second act is under the direction of Miss Rosette March. Miss Harriett Elliott, of the University of North Carolina, spoke to the women students of the university at the new gymnasium last Friday afternoon at the sixth period on, "The Joys of Teaching."

This condition is being changed rapidly, however, and the number of women principals, superintendents, and heads of departments is increasing rapidly, Miss Elliott said.

UNIVERSITY WILL BE INDEPENDENT OF CITY SYSTEM

Main Switchboard to be in Administration Building

BE IN USE BY JUNE 1

Will Connect All Buildings on Kentucky Campus

The University of Kentucky will soon have a private telephone exchange of its own which will connect all buildings on the campus, with the exception of the men's dormitory, with a central switchboard which will be placed in the present location of the Stenographic Bureau on the first floor of the main building. The Stenographic Bureau will be moved to the offices in the southwest corner of the Basketball Building. It is thought that the new system will be ready for operation by June 1.

The main cable comes from the point on Winslow street where the power transmission lines enter the university grounds to the Administration building. From that point connections will be run to all the other buildings on the campus, by means of underground cables. An underground cable will also be run to the Experiment Station, the telephones of which will be controlled by the university exchange. The present exchange of the Experiment Station will be removed. All calls will be handled by the operator at the switchboard in the Administration building.

The cables are being placed at an approximate depth of 27 inches under the ground in three inch orangeburg fibre conduits, encased in concrete. It will make for better service to all departments and will improve the appearance of the campus by doing away with all telephone poles and overhead wiring. The conduits are being laid by the department of Buildings and Grounds of the university. The Fayette Home Telephone Company is laying all the cables and is making the connections in the buildings.
