## Mandela calls for South Africa fair to all races

Associated Press

Nelson Mandela said yesterday that he seeks a South Africa that is fair to whites and blacks, and he insisted that violence against apartheid is justified.

The 71-year-old black leader, enjoying his first full day of freedom after 27 years in prison, defended the policies of his African National Congress but said talks with the government could be held soon.

In the tribal homeland of Ciskei, 10 blacks celebrating Mandela's release Sunday night were shot and killed by police, and 20 were injured, according to the Daily Dis-

patch newspaper in nearby East London. Homeland authorities refused to comment, and civil rights groups demanded a judicial inquiry.

In Washington, President Bush expressed optimism that Mandela's release was a sign the country was "at last" on the way to ending apartheid, but he showed no inclination to move quickly to lift U.S. economic sanctions.

MANDELA

Bush said that the legislation imposing the sanctions against South Africa also prevents him from ending them until specified liberalizing measures are taken.

"What I want to do is discuss these provisions with Mr. Mandela and with Mr. de Klerk," he said referring to the freed black leader and to South African President F. W. de Klerk who ordered his release.

In Mandela's hometown of Soweto, schools were deserted as thousands of students marched and danced in the streets, anticipating his return home.

Believing Mandela was due back for an afternoon rally, tens of thousands of Sowetans crammed into a soccer stadium, and dozens were injured in the crush.

Hundreds of youths heading home from the stadium surrounded a police van and freed 13 prisoners inside, according to Gen. Herman Stadler, a police spokesman. He said the officers in the vehicle decided not to use their firearms, and no injuries were reported.

The activists making arrangements for Mandela decided that he should not re-enter Soweto until today when a massive welcoming rally was planned. They refused to disclose where

he would spend the night, although television networks deployed helicopters to pursue him.

"I am absolutely excited to be out," Mandela told reporters in Cape Town before taking an evening flight to Johannesburg.

Mandela said negotiations between the ANC and the government could begin "very soon" if de Klerk continues his peace initiative and makes further reforms.

"The state of emergency has to be lifted in its entirety and political prisoners have to be released," Mandela told more than 200 journalists assembled on the lawn outside the official residence of Angli-

can Archbishop Desmond Tutu in Cape Town.

Andries Treurnicht, leader of the pro-apartheid Conservative Party, accused the government of falling victim to "Mandela hysteria" and moving toward white surrender.

Eugene Terre Blanche, leader of the neo-Nazi Afrikaner Resistance Movement, said de Klerk is now powerless to control Mandela, and he warned that his movement "will protect itself and its property when the government can no longer do so."

Mandela said whites should not fear the prospect of an ANC-led government.

## U.S. ignorant of world, ex-CIA says

By JEANNE CARY  
Contributing Writer

American businessmen are the last to arrive on the international scene because their educational system has failed them, according to former KGB and CIA agent Vladimir Sakharov.

At a press conference yesterday at the Lafayette Club, Sakharov said that the U.S. educational system teaches students very little about foreign relations, which is taking its toll on America's business community.

Sakharov said many Soviet consumers are hungry for Western products.

Sakharov said that a multi-party system can work in the Soviet Union. The Communist Party's grip, and if Soviet President Mikhail Gorbachev wants to stay in power, he will have to create a strong presidency, Sakharov said.

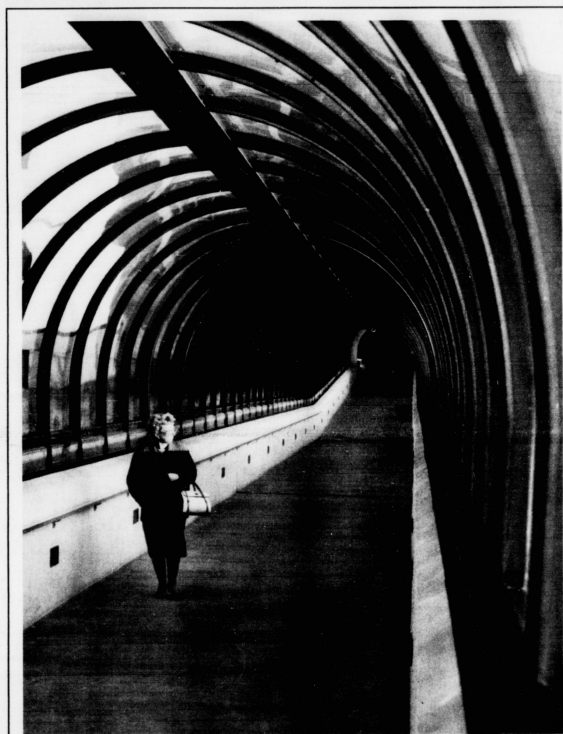

The most pressing issue in the Soviet Union is the rise of women's liberation movements, Sakharov said. The ratio of women to men is 5-to-3.7, and 19 million women between the ages 18 and 22 will not get married, he said.

"Women are the suffering majority in the U.S.S.R.," which will make or break Gorbachev, Sakharov said.

Sakharov said that "women run Russia" because many Soviet men are complacent. As a result of women's efforts to organize, the Soviet Union may have a woman president before the United States does, Sakharov said.

Unless the United States gives the Soviet Union financial help, Sakharov said a civil war could erupt or Russia might revert to its czar rulership.

Pamyat is one of the movements pushing for a return to a dictator regime, Sakharov said.

## UK and tennis clinic to test training methods

By ANNE BARNES  
Contributing Writer

UK and the Lexington Clinic are conducting a research project to find out if sprint training is as useful as aerobics in training tennis players.

The U.S. Professional Tennis Registry, an organization of teaching tennis professionals, provided the \$3,600 grant for the project. The eight-week research project will be conducted by UK exercise physiologist Ronald Bulbulian and Lexington Clinic exercise physiologist Jeff Chandler.

"It basically originated between Mr. Chandler and myself," Bulbulian said. "The reason for the project is because we have tennis players training in a specific manner, and we thought that there might be a more efficient way for tennis players to train."

Sprint and aerobic training condition different areas of the body, Bulbulian said.

"Aerobic training conditions mainly the heart and lungs. The focus is mainly on those two areas," Bulbulian said. "Sprints generally train the muscle in high power and fast work. It trains the heart and lungs, but not as well as aerobics."

He said the two training methods also set a different pace.

"Aerobics is long-distance and slow-pace training," Bulbulian said. "Sprints are faster and are repeated and are more like tennis."

The money for the project will be used for training and equipment, Chandler said.

A series of tests will be conducted in the research project.

"The tests involve a maximum treadmill test for maximum oxygen consumption, a Cybex strength and endurance test," Chandler said. "We also do a USTA (United States Tennis Association) test protocol, which includes a hexagon test, 20-yard dash, and five-point agility run."

## Lectures discuss Europe

Staff reports

The second lecture in the "And the Wall Came Tumbling Down: Post-Communism in Europe" will be held 7:30 tonight in the Peal Gallery of the Margaret I. King Library North.

Robert Kohrschneider, professor of political science, will speak on "European Problems in a Divided Nation."

Other lectures in the series include:

•Feb. 20: "From a Centrally Planned to a Market Economy," by economics professor Curt

Harvey.

•Feb. 27: "Individual and Society," by anthropology professor Susan Abbott.

•March 7: "International Implications," a panel discussion with history professor Ray Betts, political science professor Karen Mingst, John Siempel of the Patterson School of Diplomacy and history professor G. Herring.

All lectures will be 7:30 p.m. in the Peal Gallery. The series is supported by the Patterson School of Diplomacy, the German and political science departments and the honors program.

## Student earns recognition by helping NASA robot see better

By AYSER SALMAN  
Contributing Writer

A UK student has given the National Aeronautics and Space Administration's Research Center a "new vision."

Tim Weatherford, a computer science and mathematics junior from Murray, Ky., invented a vision system for a robot while working at NASA's Langley Research Center in Hampton, Va., as a cooperative education student last semester. The computerized robot will be used to construct space station Freedom.

Weatherford received NASA's Superior Achievement Award for his efforts, which normally goes to professional engineers.

"I was fortunate enough to receive this award for my innovations

in Robotic Vision Systems," Weatherford said. "I had no idea it would be me. Normally it takes the top engineers 10 years of work to earn such an award."

The robot is pre-programmed to build a Truss Structure, which is the configuration for the new space station.

The robot will do an astronaut's job in building a space station, which is too time-consuming and risky for humans, Weatherford said.

"It's too strenuous on them," he said. "And it would be detrimental if we lose someone. But if we lose a robot, big deal. We'll make more."

Despite Weatherford's invention, the robot is still a long way from taking over human functions completely.

"Right now the robot is programmed to work under supervision, where if it looked like it was going to make a mistake it could be stopped," Weatherford said. "But the problem is if the robot was off by an inch, especially in space, if you construct something wrong and it's deployed or let go, it could be difficult to fix. Hopefully it'll be ready by 1995."

"A lot of people don't realize that robotics isn't as far along as we perceive it to be. We see all the movies with robots like R2-D2 and others. But the engineers above us (at NASA) were always preaching the same sermon, that we as a society are fooling ourselves thinking that robots can do so many wonderful, intricate things."

Weatherford said that his experience from growing up on a farm

helped him to design his invention. "I was raised on a farm, and I've wired so many trucks and tractors," he said. "I've learned that if you don't know something, you just have to figure it out. And with all this electrical training from home, this all fell into place."

Weatherford's vision system is made up of infrared sensors in conjunction with the program he wrote on the computer. At first it could see only five inches.

Weatherford said he solved the problem with a bicycle reflector. "I saw a bicycle sitting in the corner of the lab," he said. "I took the reflector off and tied it onto the Truss Structure, and by golly the robot responded to it, and could see six feet in front of it."

## Sean Woods a savior for UK as Cats get first road win

Associated Press

GAINESVILLE, Fla. — Reggie Hanson scored 14 second-half points and Sean Woods delivered a key 3-point play and two free throws in the final two minutes last night to lead UK to a 78-74 Southeastern Conference win over Florida.

The victory was the third straight for UK (11-10, 8-5 SEC) and the team's first on the road in eight tries under first-year coach Rick Pitino.

Florida (6-13, 2-10) shot 56 percent and led most of the way, but still couldn't avoid its ninth consecutive loss.

Deron Feldhaus led a balanced UK attack with 17 points. Derrick Miller and Hanson scored 16 apiece and Woods and John Pelphrey added 12 and 10, respectively.

Hanson's layup tied the score 71-71 with 3:14 to go, and Woods' 3-point play put the Wildcats ahead for good with 1:58 remaining. Another Hanson basket, making it 76-71, capped a 13-4 spurt but it didn't end Florida's hopes.

The Gators, who got 24 points from Stacey Poole, battled back on Renaldo Garcia's 3-point play and had a chance to tie the game when Woods stripped Garcia of

the ball as the Florida player went up for a shot with nine seconds left.

Woods was fouled by Dwayne Davis and made both ends of a one-and-one to seal the victory.

Davis and Garcia each had 16 points for Florida, which led 44-36 at halftime, and watched the game slip away because of an inability to handle UK's full-court press.

The Gators had 12 second-half turnovers, and UK wiped out a 52-43 deficit with a 10-point burst keyed by Hanson and Woods. Florida regained its composure and built a 70-64 advantage before faltering again.

## Ref's count matters, not the timekeeper's

By HAL BOCK  
Associated Press

### COMMENTARY

NEW YORK — Blinking through eyes blurred by the force of a punch, his brain racing after the anxiety of a knockdown, the fallen fighter sees a referee flashing fingers in front of his face and shouting over the din of the crowd.

"Four ... five ... six."

When that happens, the only thing that matters to the man on the canvas are those fingers.

"Seven ... eight."

They are his lifeline, the boxer's barometer for survival and veteran officials agreed yesterday that those fingers are why Buster Douglas ought to be recognized as the heavyweight champion of the world.

Douglas went down from a Mike Tyson punch near the end of the eighth round in Sunday's title fight in Tokyo. Referee Octavio Meyran bent over him, and, apparently missing the timekeeper's call, was a second or two slow in picking up the count. Douglas was up at nine on Meyran's count and at least two referees agree that ought to end all debate right there.

"The way it is supposed to occur," referee Mills Lane said, "is once a fighter is down the ref's first concern is getting the other fighter to a neutral corner. If he goes without delay, the ref turns and picks up the timekeeper's count, generally at two or three. If he doesn't go without delay, you can penalize the failure by picking up the count at less than where the timekeeper had it."

There was no indication of any delay by Tyson or any penalty imposed by Meyran. To Lane, however, when Meyran began counting, that had to be the only thing with which Douglas needed to be concerned.

"Once the ref picks up the count, that's the official count," he said. "What he should have done, if Tyson went without delay, was pick up the count where the timekeeper had it. If he erred, you can't penalize Douglas."

"He looks at the ref. He has no way of knowing anything else. He depends on the ref for the call. The bottom line is Douglas has to rely on the referee. If the ref was off, how can you penalize the fighter?"

Sometimes, confusion occurs. It happened to Lane in a middleweight title fight between Frank Tate and Michael Nunn.

"Nunn had Tate down," the ref said. "I thought he was up at nine. The bell rang. It turned out he didn't get up till 11. But Nunn took him out in the next round."

Davey Pearl, who, like Lane, regularly officiates fights in Nevada, said that state's rule book is clear on the referee's responsibility.

"He must pick up the count from the timekeeper," Pearl said. "I've had fights where the timekeeper's count reached six or seven before I got to it. It hasn't happened often, but it has happened that I would just do the last three numbers in the count."

Pearl and Lane agreed that Douglas' reaction to the knockdown was perfectly understandable.

"He did the only thing he could do, which is get as much rest as he could and shake the cobwebs," Pearl said. "The ref has to be the judge as to whether he can continue. He's the guy closest to the action. It's his call. He's the boss, the guy in charge."

## Hopscotch Army breaks through to Lexington crowd

MICHAEL MU Kernel Staff

Staff reports

The Louisville-based band Hopscotch Army made a triumphant return to Lexington Friday night with a performance at a packed Bearded Scale.

Friday night's show was so successful for the group that they plan to return to the Bearded Scale for a weekend performance in March, according to David Hoback, the group's drummer.

An approximate crowd of more than 300 people filled the club at one time or another during the night. Many people waited outside for longer than a half an hour to see the group. Those waiting in line had to wait for others to leave the club before they were allowed in.

Hopscotch Army is currently playing shows to support their new compact disc *Blurry*.

## Simpsons become newest TV family

By SCOTT WILLIAMS  
Associated Press

NEW YORK — "The Simpsons," five pop-eyed suburbanites with funny overbites and bad hair, could become America's favorite TV family — and the biggest prime-time cartoon hit — since "The Flintstones."

"Unquestionably, Fox has a hit of the first magnitude," said David Marans, media research chief for J. Walter Thompson advertising. It even could outshine Fox's other hit, "Married ... with Children," he said.

The Fox Broadcasting cartoon series, shown on Sunday nights, is, as the Monty Python gang used to say, something completely different.

Homer Simpson is an accident-prone supervisor at the local nuclear power plant, Martha is his unenlightened hausfrau, Lisa is a Good Little Girl, Bart is a pre-teen rebel

and Maggie, well, Maggie sucks on her pacifier.

They bear no resemblance to those Stone Age suburbanites Fred and Wilma Flintstone, who came to prime time in 1960 from Hanna-Barbera Productions and stayed for six years, then lived on through syndication.

The Simpsons blunder through a surreal suburbia with a vague sense that something is wrong in the Republic, a key theme of their creator, "Life in Hell" cartoonist Matt Groening (rhymes with "complaining," as he has noted).

Not everyone is comfortable with its satire of American culture, but it's well-animated, with colors that glow and dazzle, and the cutting humor underlines a basic affection for things Simpsonian. It is clever writing.

It's also clever programming, said Betsy Frank, a senior media analyst for the giant Saatchi and Saatchi advertising conglomerate,

because it appeals to the young, hip audience that Fox so very much wants to attract.

Frank said Fox deserves its reputation for taking risks with "The Simpsons" and other unconventional programs.

"Granted, they had not a lot to lose," she said, "but this is certainly a risk that's paid off for them."

"The Simpsons" began Dec. 11 as the No. 1 show in its early prime-time Sunday slot in the key demographic groups of adults 18 to 49, teen-age boys and girls, and children, said Fox Entertainment Group president Peter Chermín.

"The only thing it wasn't No. 1 in was adults 55 and over," Chermín said. "I think this looks like a big hit show."

The show's Christmas special helped lead Fox to its highest-rated Sunday evening. On Feb. 4, "The Simpsons" beat competing ABC and NBC sitcoms in its time period, finishing a distant second to

CBS' "Murder, She Wrote," which is aimed at older viewers.

"The Simpsons" has done better among men 18 to 49 than such notable hits as 'Golden Girls,' 'Bill Cosby,' 'L.A. Law' and '60 Minutes,'" Marans said. "What's really impressive about this is that Fox isn't available in about 12 percent of the country."

"I don't think we expected to do quite this well," Chermín said.

Running against the Jan. 28 Super Bowl blowout, "The Simpsons" had a 17 share, and it consistently has placed in the high teens or low 20s. "I would be thrilled if it keeps at the same level," Chermín said.

## Mandela's release leaves Pretoria uncertain future

The release of African National Congress leader Nelson Mandela Sunday is a reason to rejoice, but the uncertainty of what lies next for South Africans should cause world leaders to pause.

Mandela said Sunday and yesterday that while he hopes for a peaceful settlement between blacks and the white-controlled government, he refuses to rule out violence.

Mandela has spurred some radical elements of the black South African resistance to proclaim that it is time for blacks to overthrow the white Pretoria government violently.

Those statements understandably upset whites who fear that their nation is in danger of slipping into social anarchy and violence.

It may be tempting for some black leaders to advocate violent overthrow of the South African government, but that route surely would be more costly than beneficial to South Africans. A civil war likely would do even more to polarize blacks and whites, which could take generations to mend.

Mandela's role should be to stabilize relations between ethnic groups through peaceful negotiations. He appears to be one of the few South Africans who can command the respect of many blacks and whites, and therefore, he should act as a negotiator to bring an eventual end to apartheid.

Pretoria also should not pretend that releasing Mandela will be enough to satiate blacks' demands. President F.W. de Klerk should work with Mandela toward achieving a peaceful resolution to the nation's domestic turmoil.

The developments in South Africa are yet another example in which there is little opportunity for the United States to affect the outcome directly. The Rev. Jesse Jackson has been conducting his 1992 presidential from Cape Town by becoming a sudden spokesman for black South Africans. But most U.S. leaders have been limited to issuing press releases or commending de Klerk for freeing Mandela.

One action the United States can take is to encourage de Klerk's government to meet the remaining four conditions and remove the U.S. sanctions imposed by Washington.

Washington should join other Western nations in prodding both sides to avoid the temptation of violent confrontation and work to ensure a peaceful resolution for South Africans.

## Letters

### Bush not a DSA member

The recent (Tuesday, Feb. 6) Kentucky Kernel article entitled "Trail of local activist gets under-way today" contains a subtle error, if my reading is correct. The article notes that Mr. Chris Bush "was involved in a number of campus activist groups, including Socially Concerned Students and Democratic Socialist of America," although not a student, at the time of his arrest during the fall 1989 semester.

This is not precisely true. Mr. Bush paid membership dues to join

the Central Chapter of Democratic Socialist of America in 1988 and interacted significantly with the campus chapter during much of that year. (As in most cities with community and campus chapters are quite porous, and members — like myself, Mr. Bush and others — did and do float between them.) However, by the fall of 1988 Mr. Bush was no longer interacting significantly with DSA, but was operating primarily within the organizational boundaries of Socially Concerned Students.

Donald Jones is an anthropology and psychology senior.

## No 'good' or 'bad' career, just 'right' and 'wrong' choices

Dear Counselor: I need to decide on a major, but I'm stuck. I've never really made a major decision on my own. I hate to admit it, but I'm not sure I know how to make a good decision. Can you give me some help with this? Barry, undecided freshman.

Dear Barry: First, I admire your candor. However, being inexperienced at making decisions doesn't mean that you can't make an effective decision.

There is a process that allows you to make a "considered" choice which reduces the probability of picking an "unwise" alternative. So let's talk about how to get started in this process.

Being undecided is not bad. The tension associated with being undecided provides the motivating force to initiate the decision-making process.

## Letters Policy

Readers are encouraged to submit letters and guest opinions to the Kentucky Kernel in person or by mail.

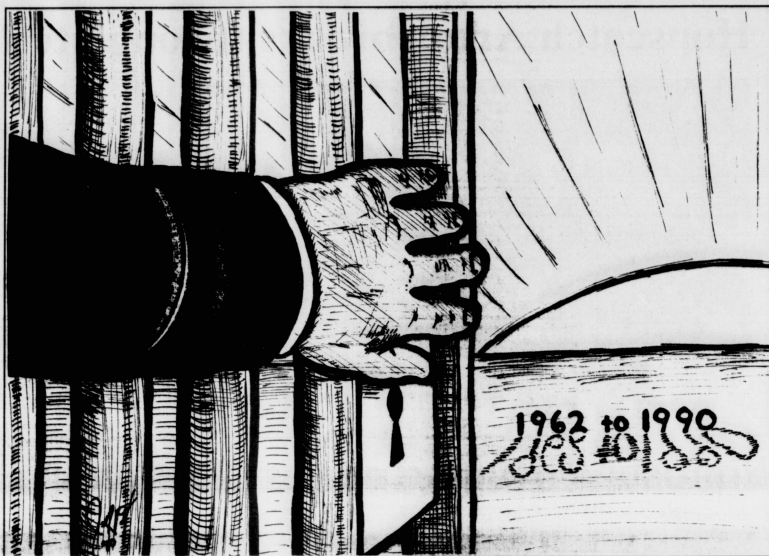

Writers should address their comments to: Editorial Editor, Kentucky Kernel, 035 Journalism Building, Lexington, Ky. 40506-0042.

Letters should be 350 words or less, while guest opinions should be 850 words or less.

We prefer all material to be typed and double-spaced, but others are welcome if they are legible. Writers must include their name, address, telephone number and major classification or connection with UK on all submitted material.

Frequent contributors may be limited so that we may publish letters from as many writers as possible.

We reserve the right to edit all material.

## Trump

### A how-to guide for catching your own millionaire

It has finally happened. Just when you were about to lose all hope, the event of the decade happens.

I'm not talking about Nelson Mandela being let out of jail. I'm very excited, of course, but I feel it's about 20 years too late.

I'm not talking about Mike Tyson getting dumped, although that's about five years too late.

And I am definitely not talking about that stupid Brady show. Man that's just plain late!

What I am referring to is that Donald Trump is going to be a single man. That's right ladies, start your adrenaline pumping and your checkbooks humming. Old McDonald Trump is dumping his numero uno personal asset and going solo.

Just in case you're sitting out there waiting for the phone to ring and wondering when Donald deary is going to show up on your doorstep, let's take a moment and think this through.

Now Donald ain't no ordinary multi-millionaire. Shucks, no. He's a billionaire darlin' and it takes a bit more planning to hook

### Contributing COLUMNIST

one of those.

I'm going to make it easy for you. I have condensed all the valuable information from various help manuals, psychologists and a couple of good Oprah shows into several easy steps to catch that rascal.

#### JULIE'S SIMPLE STEPS TO TRAP THAT TRUMP:

Let us discuss the necessary physical attributes one must possess. I would say that Trump is seeking for a woman preferably over 18, but that may be negotiable.

Next, it would be nice if you were six feet tall, weighed 95 pounds, were natural (no dyebabies, please) blonde, had blue eyes and had an IQ equal to your shoe size.

I realize that Brigitte Neilson is already taken, but I know there must be another "Red Sonya" type

out there somewhere.

Let's skip back to the part about intelligence. It will be necessary that you have read "The Art of The Deal" at least 50 times. It will be essential that you can converse about your "man" at all times.

Next, if you've made it that far, it is important that you are unfamiliar with the workings of a prenuptial agreement. If Trump swans you to sign something, just lift your little old hand and make the mark. Also, make sure you are quite unaware of the phrase "communal property."

It is very important that you are up to date on all of the latest trends in fashion. Being scrutinized by the public daily, it's very important that you keep that lime-green leisure suit quite packed away.

Besides, you'll be loaded. You can buy all the clothes you want. Never mind that Ivana's wardrobe last year could have paid the foreign trade deficit about 20 times.

It's much better to look marvelous rather do anything worthwhile. I guess being poor does stink.

Finally, if you do happen to

rope that rascal and actually get him to the altar, what are you going to do all day when you are Mrs. Trump?

You do realize that shopping, doing your nails and watching "Family Feud," only takes up so much of your time. I guess his wife had that problem so he bought her something to amuse herself with, namely the Plaza Hotel.

You, baby, are worth much more than a stupid hotel. Make sure it's something good he buys you. Maybe Hawaii or, heck, why not Europe. He can afford it.

I hope these wonderful bits of knowledge are helpful. I just want to wish you luck and hope I get an invite to the wedding.

Don't worry about any competition from little old me. I'm waiting for a real man to get divorced. Someone like Arnold Swartzengger. Just something simple, "cause that's what I am at heart.

Staff writer Julie Gilkerson is a political science sophomore and a Kernel contributing columnist.

lenged and clarified.

Comparing your values with other members of the University community.

Through self-exploration you can determine your interests, work values and life goals. There are rewards associated with pursuing a career such as salary, prestige and opportunity to operate independently.

In one career the salary may be good and it may be prestigious, but there may not be much chance to operate independently. In another career there may be an opportunity to be creative and independent and to feel good about helping others, but there may be lower salary and less prestige.

The point is that different careers provide varying reward structures. The task is to discover which rewards you value most. (By the way, salary is not the most important aspect in choosing a career for many people.)

Examining life goals means looking at the number of different roles you will want to assume as an adult — e.g., parents, spouse, worker, group member, etc. — determining the amount of time, energy and motivation you will devote to each of these roles.

Your objective is to ascertain the relative importance of the career role in your life.

The next step is to generate a list of career alternatives that might meet your needs and specifications. Here are some helpful hints for generating your alternatives:

List careers that are related to the majors you are considering.

List majors that will provide the necessary background for the careers that seem attractive to you

— a person doesn't have to be a business major to have a career in business.

Make up your "ideal" career even if you don't know whether such a career exists. If you have never made a survey of different career and/or you don't have much work experience, you may need to gather some career information.

The longer your list of possible careers the better.

One key issue at this point is not to forget or forego your interests and your desires by being overly concerned with being practical.

A highly desirable alternative may be more practical than it first appears.

Another obstacle is being overly picky and idealistic about what you want from a career. Everyone wants a career that is tremendously fulfilling, pays an enormous salary and makes every day a pure joy because you get to go to work.

Realistically, you don't get everything you want or hope for in a career — some compromises have to occur.

Once you have your list of career

alternatives, get specific information about them concerning the three R's:

Requirements for entry and advancement; "good" choices, and any of them will be a right decision.

Routines associated with doing the work.

Rewards that come from the career.

You have to find out how compatible each alternative is with your interests, abilities, values and life goals.

The way you obtain this detailed information is through reading about careers, talking to people in the careers and getting your own first-hand experience working in the field.

The last phase is to compare what you want from a career with what the career has to offer. Consider the personal costs and benefits to you and the significant others in your life — each will have phases. There won't be a perfect choice.

The career you determine has the most benefits and advantages for you should be your first choice. The other desirable alternatives give you backup choices.

Often people put undue pressure on themselves by imagining there is only one "right" career for them. Generally, there are a number of "good" choices, and any of them will be a right decision.

Another unnecessary pressure is believing this initial choice is a "final" decision — one you have to stick with throughout your life. Making several changes within the original career field or across career paths is the norm rather than the atypical experience.

You may find yourself a little overwhelmed by the first stage. You may want to consider getting some help. In fact, you may need help with any of the four steps just outlined and the Counseling Center is the place to come.

Students who wish to address these issues can contact the UK Counseling and Testing Center, 301 Frazer Hall, or call, 257-8701.

If you have a problem you would like addressed in "Counselor's Corner," write: "Counselor's Corner," 301 Frazer Hall, UK; Lexington, Ky. 40506-0031.

## Roselles to be out of Maxwell Place by weekend

By GREGORY A. HALL  
Staff Writer

The final step in the process of David and Louise Roselle's departure from UK is complete, as their last few items from Maxwell Place were packed away yesterday. "It's been almost three years," Louise Roselle said. "So many friends. Both the campus community and the town, we've made lots of very good friends. That's what I'll miss the most in the general scheme of things." Roselle said she likes the looks of her new home in Delaware. "There is a beautiful presidential home that we're going to live in,"

she said. "It's a similar situation as here, but on the edge of campus." Roselle said that their new home is about the same size as Maxwell Place and contains "lots of tradition." She said that their new home is not as old as the UK home, which was built in 1870. "We will sure miss living in Maxwell Place and living at UK and Lexington and Kentucky," Roselle said. "I know I'll miss being on the path of many students that come by. We got to know so many students. It's just such a pretty house. There's a lot to miss." Roselle helped renovate the Maxwell Place grounds and establish a long-range construction plan.

Some of the changes the Roselles initiated included improving lighting and building a new brick wall near the Chemistry-Physics Building. The construction plan also calls for a front lawn patio and an extension of the wall to Rose Street, with flower beds along its side. "I hope that (the next president) finishes it and really makes it a little spot of beauty on campus," Roselle said. "I think the next person will work from that plan because it was done in such a professional manner." The University of Delaware's new first lady said she has not seen

much of Newark, Del. "I've only been there to visit a couple of times," Roselle said. "We've made the transition as quickly as we could. Moving is always an ordeal, but we've got good movers." Roselle said she expects the movers to leave Lexington Thursday or Friday. David Roselle already has started his duties at Delaware, she said. "He's been there pretty much every weekend since February," Mrs. Roselle said. "He's officially starting right about now. And he will be president-elect for a few weeks."

Abel Baker and John Payne help move the Roselles' belongings from Maxwell Place yesterday.

## Student's invention earns praise

Continued from page 1

After the robot was designed, it was found to have practical applications in helping the handicapped. It could be designed to respond to a voice and fetch food or call an ambulance, Weatherford said. "I think it's very important to keep in mind the scope that, sure, it's wonderful that we can reach out to space with this and do all this stuff, but by all means turn it around and directly and quickly use it to help those on Earth," he said. Weatherford was the first UK student to go to NASA-Langley through the co-op program, which allows students to work for a corporation before they've graduated. Deborah Krautter, coordinator of the co-op education program, said that Weatherford had paved the

way for other co-op students through his accomplishments. "Tim put UK on the map with NASA," she said. "He certainly has opened the doors for other UK students to work there and really get the experience and learn about research." Weatherford said co-op students are used by corporations because some new technology is invented by students. In a letter sent to Weatherford, Sid Pauls, associate director for NASA-Langley, commented Weatherford for "providing leadership" and serving "as the primary link between (his) group and the space center." Weatherford said that he has been offered a job at NASA when he graduates. "UK got me through clearly," he said.

**90% of campus rapes start here**

Sex without the other person's consent is considered rape. A felony, punishable by prison. And drinking is no excuse. You see, a little sobering thought now can save you from a big problem later.
