Dear Mr. Drew.

I must apologise for
not answering your letter
sooner, the fact has been that
I contemplated no pressure in
the matter of the window, especially
as it would be practical my
gift, because the sum which
is forthcoming would leave
me practically no result.
However as there is pressure
and I could not do the design
for a month or two, and further
that I should only care to
make the roughest sketch
before making the full size
cartons I had better stick
the temperate back and then
I have done today. I am sorry
but I will understand you cannot
wait. I hope whatever window
is put up will be beautiful.

Yours always sincerely
W. B. Nichman
