

INLAND STEEL COMPANY

INTER-COMMUNICATION

WHEELWRIGHT, KY.

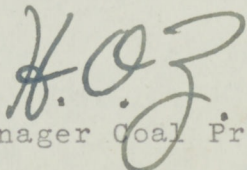

11 December 1957

To: R. I. McKinney
From: H. O. Zimmerman

Please add to your schedule of projects the installation of some type of substantial guard on the side of the road opposite the unloading platform near the Wheelwright shop.

As a suggestion, this could be a series of posts made up of heavy railroad rail substantially set in concrete. This was discussed last night with Joe Peraino and George Leatherman present.

Before making the installation, please discuss it with both Joe and George in regard to the manner in which it should be made and its extent.
