

## Closet

It is hard to imagine that such small areas can be organized into so much storage space. The use of drawers in varying depths customizes storage for personal items. Velvet lined jewelry drawers are a must for anyone's keepsakes. Baskets allow laundry, dry cleaning or clothes to be efficiently stored, yet ready for toting to the laundry room or car. Slanted shoe shelves with Lucite toe stops keep footwear organized and allow for a quick visual inventory. Doors over shelving or hanging area help maintain a fresh and dust free environment. Don't forget to notice the sliding belt and tie racks as well as the sliding valet rods. A must for any closet!

### *The Designer*

Meme Simmons, designer and space organizer for Closet Factory, has creatively designed the closet spaces at Providence Place. Both areas are a stylish and efficient utilization of space and aesthetically complement their surroundings. The gorgeous antique white in the south closet and the luxurious wood grain of hard rock maple in the north closet not only harmonize with the trim color but also lighten the patina of the aged paneling.
