

Minutes of the regular meeting of the Board of Trustees,  
University of Kentucky, Thursday, June 1, 1933.

The Board of Trustees of the University of Kentucky met in regular session in the President's office at the University of Kentucky on Thursday, June 1, 1933, at 10:30 a. m. The following members were present: Governor Ruby Laffoon, Judge Richard C. Stoll, Louis E. Hillenmeyer, J. B. Andrews, C. O. Graves, Miller Holland, G. C. Wells, James Park, Dr. George Wilson, and James H. Richmond, Superintendent of Public Instruction. Meeting with the Board were Frank L. McVey, President of the University, and D. H. Peak, Secretary of the Board.

1. Minutes Approved.

The minutes of the meeting of the Board of Trustees of April 19, 1933 were approved as published.

2. President's Report.

The President's report was read and ordered to be recorded in the minutes. Report is in words and figures as follows:

REPORT OF THE PRESIDENT, UNIVERSITY OF KENTUCKY  
TO THE BOARD OF TRUSTEES, JUNE 1, 1933

Report on Attendance at the University

There are a number of interesting points connected with the report on attendance of students at the University. In the first place, every county in the state is represented by one or more students. There are also students from thirty-five other states and three foreign countries. The attendance this year is below that of last year by approximately 17%. The Law College has a larger enrollment than last year. The other colleges have had decreases in their enrollment. The decreases in the Colleges of Agriculture, Engineering and Education began in 1931-32. The decreases in Arts and Sciences, Commerce, and the Graduate School did not begin until 1932-33, that is this present year. The present enrollment of the University as compared to previous years is shown in the table given in this report.

Comparative Enrollments by Years, Beginning with the Year  
Ending June, 1926, and Including the Year Ending June, 1933.

	1925-26	1926-27	1927-28	1928-29	1929-30	1930-31	1931-32	1932-33

The enrollment for the regular session ending June, 1933, showed a decrease over the previous year of 17 per cent.

The Law College was the only college that showed an increase over the preceding year, but the enrollment was smaller than in 1930-1931 by 7 per cent.

Arts and Sciences, Education, Commerce and the Graduate School had a decrease in enrollment over 1931-32, but an increase over the enrollment of 1925-26; Agriculture and Engineering had a smaller enrollment than in 1925-26.

The decrease in enrollment in the Colleges of Agriculture, Engineering, Education and Law began with the year 1931-32, but in Arts and Sciences, Commerce and the Graduate School the decrease did not begin until 1932-33.

The big increase in the Graduate School has been in the summer session. This year, counting the summer session, the graduate enrollment is 773.

### The Patterson House

In 1880 the house so long occupied by President Patterson was built. Doctor Patterson lived in this house until his death in 1922. His brother, Professor Walter K. Patterson, continued to live there until his death in the summer of 1932. The heirs, under Walter Patterson's will, removed all the old furniture, leaving the house bare.

For some time it has been suggested that the house be used for the women of the University. Dean Blanding, cooperating with the University Woman's Club, went to work to clean and redecorate the house. Furniture was brought from Smith Hall and the house was opened for the use of women students in April of this year. The house is attractive and well furnished and has already proved itself to be of great advantage to the women students of the University. Many thanks are due the Club for its assistance with money and direction.

In the meantime, the men have been thinking of a student union building, and the fraternity known as Omicron Delta Kappa has worked out a plan for the establishment of a fund to erect a Student Union Building. They have secured some subscriptions, and have encouraged the cooperation of fraternities in increasing the size of the fund. The committee has organized, and will set up a board of trustees who will have charge of the fund. It is hoped that the fund will grow rather rapidly so that such a building may be provided for student activities.

### The Reconstruction Finance Corporation and a Swimming Pool

Mr. Hugh Meriwether, a graduate of the University and an architect of Lexington, and Mr. R. C. Porter, an assistant in the College of Engineering, have combined their efforts and have suggested that the University of Kentucky should take advantage of federal provisions for the erection of public buildings. One of the conditions under which money can be obtained from the R. F. C. is that the project must be self-financing; that is, over a period of years, must return interest and a sinking fund. With that in mind the gentlemen mentioned have indicated that approximately \$13,000 a year can be earned, and with a carrying charge on \$75,000, the expenses of operation and a sinking fund can be met. At this meeting of the Board, they have asked me to present the plans and provisions for carrying out the idea they have in mind.

The University lags behind in its provisions for the physical training for students. There is now being erected at Morehead a large swimming pool. The college at Richmond also has a pool, and the college at Bowling Green has a very fine

out-door pool. I think plans are in preparation for a pool at the Murray State Teachers College. If it is possible to work this matter out in a satisfactory way I am suggesting that it be referred to the Executive Committee with instructions to carry out the plan. In doing this I recognize the fact that the whole financial plan must be thoroughly sound.

### Other Federal Projects

It will be recalled that Congress has made provisions for a forest conservation plan, and through this plan the employment of 250,000 men in different parts of the United States. This matter of conservation is moving along rapidly, and a number of places have already been designated in the state, among which is the Robinson Substation at Quicksand. There will be presented in this meeting a statement regarding the situation and action requested to make it possible to carry forward the different plans concerning the development of the forest area at Quicksand.

In a small way the University has been using some of the free labor provided for under the Relief Act. This labor has been used for the purpose of cleaning some of the buildings and now in grading the area around the College of Education Building.

In the budget, which has been presented to you, small sums have been set aside for the painting of three buildings. Our buildings are in great need of paint, and the continuance for another year without such protection to the woodwork would indeed bring about a heavy loss. I am of the opinion that it would be possible for the University to provide the paint and secure the labor under the provisions of the Relief Act. The University would also furnish the direction and supervision of such labor. I would be glad to know what the members of the Board of Trustees think about this matter.

### The Budget

At the last meeting of the Board of Trustees the budget was presented to the members in a tentative form. Since then I have gone over it carefully and made some reductions in expenditures as well as in income. I have reduced the amount of income to be received from federal sources and have kept the state receipts at the amount indicated in my last report. Since then I have received a communication from the State Tax Commission fixing the receipts for this year 1933-34 at a higher figure than I have them in the budget. The Tax Commission places the receipts from the inheritance tax at \$250,000 for

the University. The amount in the budget is put at \$220,000 from the same source. The Tax Commission places the receipts from sheriffs' revenue at \$382,270. I put the amount in the budget at \$390,000. The total income of the University for general fund operation is estimated at \$980,222 for 1933-34. The expenditures are approximately \$20,000 less than this, and I have also indicated a 5% reduction on salaries which leaves a cushion of \$50,000 for variation in expenditures and income.

### The Cooperative Finance Association

In May of last year it seemed necessary to set up an association that would provide money that could be lent to members of the staff whose financial condition had been reduced by the failure of the University to pay salaries May 1 and June 1. A number of citizens were called together and \$41,000 was subscribed for the capital of the association. Mr. J. E. McFarland was designated as trustee. The trustee loaned about \$32,000. Up to May 10 the trustee had returned to the original subscribers 85% of their subscriptions. It is more than likely that the remaining subscriptions will be returned in full together with the interest. This provision, therefore, seems to have justified itself both to borrowers and lenders. Their project made it possible to relieve in some degree a very difficult situation.

Thus far this year the salaries have been paid on the basis of the budget. This basis is 10% less than the previous year. The salaries due May 1 were paid, and salaries due June 1 will be paid. It is hoped that a sufficient amount of money will be gotten in between now and the first of July to pay salaries according to budget requirements. If this is done the University will finish the year with its bills paid and with a reduction of about \$33,000 in the amount due in salaries to the staff for the year 1931-32.

### The Office of Dean of Men

In 1914 Professor C. R. Melcher was appointed Dean of Men at the University of Kentucky. He has served in that capacity up to the present time, relinquishing his office at the end of this year. During the time Dean Melcher has held this office he has carried the full responsibility of a head of a department and met the teaching requirements of the regular teaching load. He has served effectively during that time and has dealt with many difficult and intricate problems in a satisfactory way. He retires from this office honored and respected by his colleagues and the student body.

The work of the Office of Dean of Men has moved from a disciplinary type of work to a cooperative and administrative one. The new type of Dean of Men works with students, advises with them, and helps them by suggestion and direction. The office itself ought to include advice on personnel matters. In fact, it might well take over a good deal of the work of advising the students on careers and opportunities. It is an office of very great value and can make or mar an institution's relationships to the student body.

In looking for a successor to Dean Melcher, I have gone over the list of the members of our own staff, and have investigated the records and personal qualities of a few officers in other institutions. There are two ways of dealing with this appointment. One way would be to appoint a young man who would grow up to the job. The other would be to find a more experienced person who knows something about the position and the problems with which it has to deal. In the first instance the University might be able to find a person who knows the institution and is acquainted with the student body. He thus would have an advantage from the start. An officer brought into the University from the outside would be handicapped by a lack of knowledge of the place and its traditions, but his greater wisdom and knowledge would be an offset for this situation. As yet I have no specific recommendations to make, but I hope to complete this matter in the near future.

### Residence Halls.

In 1920 the University purchased a residence on Lexington Avenue just south of the Maxwell Street Church. This building was bought to take care of the increased enrollment of young women before the erection of Boyd Hall. The attendance of young women at the University has fallen off from 1100 to 900. This necessitated the closing of Smith Hall this past year. The University now has an opportunity of renting it to one of the sororities, and in my opinion, this would be a wise thing to do. The residence halls for women are well conducted and have always had a balance at the end of each year's operation.

There are three residence halls for men. One of them was erected from an appropriation of \$150,000 granted by the legislature for 1922. This building is known as Bradley Hall. The other two, known as Breckinridge Hall and Kinkead Hall, were erected under an amortization provision at a cost of \$270,000. The University is called upon to pay a monthly installment of interest and sinking fund amounting to \$1,982.70.

In the last two years, however, these buildings have not been fully occupied. In this last year there were approximately 100 vacancies. In view of the amortization charges against these buildings, as well as the cost of maintenance, it is necessary that some provision be made to keep them full. I am therefore suggesting that a regulation be passed by the Board of Trustees requiring all freshmen who do not live in fraternity houses to reside in the dormitories of the University. The enforcement of a regulation of this kind may necessitate some modification of rates. The convenience and facilities in these buildings are so much more advantageous than in the ordinary house that there should be no objection to a reasonable rate.

Under the provisions of an act passed by the Legislature in 1920 the veterans of the World War are entitled to free room rent and tuition at the University. Provision would still have to be made for this group, which at the present time is comparatively small.

### Athletics

The athletic situation at the University of Kentucky is not altogether a happy one. The finances of the Council have been audited and presented in their regular report. The Council is spending more than it is taking in. This condition can not continue. One of the difficulties involved in the athletic situation is the granting of aid to students who participate in athletics. The new Southeastern Conference has set up a regulation requiring all such aids to be made a matter of record and open to the inspection of the Conference. I am, therefore, suggesting that a committee on grants-in-aid be set up, which shall have power to look into the qualifications of those students applying for grants and to make allotments as it thinks wise. The Board should authorize an appropriation from the general fund to meet the expenditures for such grants. I expect to present a plan in detail before the meeting for the establishment of the committee.

### 3. Financial Report

The Financial Report for April was received and ordered to be recorded in the minutes.

5. Budget for 1933-1934.

The Budget for the year 1933-1934 as revised since the meeting of April 19, 1933, was adopted on a tentative basis, subject to such further revision as may be necessary. It was further ordered that five per cent of all salaries be impounded and paid to the parties entitled thereto the last month of the fiscal year, if not necessary to use the amount impounded to meet current expense.

6. Audit of Accounts.

President McVey raised the question of audit of accounts of the University. The question, after discussion, was referred to the Executive Committee with power to act.

7. Widening Upper and Limestone Streets.

President McVey presented a request by the City of Lexington for grant of lands in order to widen Upper and Limestone Streets. The proposal to widen Upper Street was approved and it was referred to the Executive Committee with power to act.

The proposal to widen Limestone Street recalled previous action in regard to such a proposal. See Minutes of Executive Committee July 10, 1931, and Minutes of Board of Trustees September 22, 1931. Judge R. C. Stoll was authorized to take up the question with the city authorities on the basis proposed in Minutes referred to above, and to report to the Executive Committee.

8. Forest Reserve at Robinson Substation.

Dean Cooper submitted the following:

"When the Conservation Emergency Act was passed by the Federal government, I notified the State Forester that we desired information as to arrangements that could be made to have work performed at the Robinson Substation forest. Recently, I have received a letter from the State Forester stating that he recommended the Robinson Substation forest as a project on which work should be carried on and that he has been notified that the recommendation has been accepted.

"It is proposed that the necessary cuttings, forest road trails, fire breaks, fire protection and other measures which are required in the maintenance of a forest might be undertaken. It is desirable that we enter into an agreement covering this work, the essentials of which are that there shall be no expense or liability to the Experiment Station for any work performed and only that work shall be carried on which is approved by the Director of the Experiment Station and finally approved by the State Forester.

"It is proposed that a work unit shall be established on the forest for a period of six months.

"I wish to recommend that we make such agreements with the State Forester covering this work as would seem desirable."

President McVey was authorized to make an agreement with the government authorities to carry out the proposal subject to wishes of University officials.

9. Proposed Natatorium.

Messrs. Hugh Meriwether and R. C. Porter presented plans prepared by themselves with the assistance of architects Churchill and Gillig for a natatorium, together with facts concerning proposed loan by the Reconstruction Finance Corporation. The proposal was referred to the Executive Committee.

10. Wickliffe Explorations.

President McVey presented a communication from Professor W. S. Webb, together with correspondence of Professor Webb and Mr. Fain W. King, concerning prehistoric mounds on property of Mr. King at Wickliffe, Kentucky, which is a valuable archaeological site.

Professor W. S. Webb and Dean Thomas Cooper were appointed to negotiate with Mr. King relative to proper development of the property for archaeological interests.

11. State Council on Higher Education.

President McVey referred to the work of the State Council on Higher Education, and asked Superintendent of Public Instruction, James H. Richmond, to make a statement of the progress of the Commission. Mr. Richmond made a concise and thorough statement that was received with much interest by the members of the Board.

12. Report of the Student Loan Fund.

Following report was read and ordered incorporated in the minutes:

"Replying to your letter of recent date, requesting the annual report of the Student Loan Fund, I beg to submit the following as a summary of the activities of the Student Loan Fund for the period from May 1, 1932, to May 1, 1933.

Number of Loans	109
Of a total value of	\$3455.75
Number of collections on principal	110
Of a total value of	2597.40
Total amount of interest collected	757.39
Notes outstanding May 1, 1932	30702.46
Notes outstanding May 1, 1935	31840.79
Cash on hand May 1, 1932	601.81
Cash on hand May 1, 1933	173.33

## Gifts:

Su Ky Circle	50.00
Faculty Club Benefit Bridge	62.50
J. W. Carnahan	100.00
Mr. Sulzer's picture show performance	20.00

It is to be noted that while the number of loans has not been very greatly reduced the total value of the loans has almost been cut in half from the previous year. Also that while the number of collections has been only about 65% of the collections last year the total value of these collections is only about 50% of the collections last year. It has also been impossible this year to keep the collections of interest at as high a level as formerly.

The Committee has written off no notes as uncollectable during the past twelve months. The great body of notes falling due within this period have been extended either upon the request of the maker or from necessity. It is difficult to estimate the final effect upon the collection of these notes by continued extensions. It would seem reasonable to assume that if it is necessary to continue this process much longer a considerable loss may be sustained by the Loan Fund.

During the present year the Committee has seriously considered the question of whether or not loan fund principal should be invested and only the income loaned. They were moved to this consideration because of the effect on collections of the present economic situation. They have reached no conclusion warranting a recommendation and it is assumed they wish to continue to loan principal as well as accrued interest.

(Signed)

Wm. S. Webb  
Chairman Student Loan Fund

13. Dean of Men.

The appointment of a successor to Dean C. R. Melcher to the position of Dean of Men was left for consideration of the Executive Committee.

14. Student Grants and Aids Fund.

The Committee appointed to suggest a plan for grants and aids to students presented a report which was received and ordered filed. The acceptance and completion of the plan was referred to President McVey.

15. Reorganization of Athletic Council.

Reorganization of the Athletic Council of the University of Kentucky, so that the membership be as follows: four from faculty, three from outside citizens and one from student body, was recommended. This was referred to President McVey.

16. Student Union.

A Student Union Building was proposed by the following communication:

"Be it resolved: That Nu Circle of Omicron Delta Kappa will undertake and manage a plan for financing a student union building for the University of Kentucky:

"That the Circle will make every effort to secure the cooperation of other student organizations and alumni:

"That steps toward the furtherance of this plan will not be undertaken without the sanction of the authorities of the University.

(Signed) NU CIRCLE OF OMICRON  
DELTA KAPPA

Gorden E. Burns  
Chairman of the Committee "

Several proposed subscriptions were named. With this nucleus the suggestion was deemed worthy and the offer in the communication was accepted. President McVey was authorized to confer with the O.D.K. in regard to the establishment and care of the fund.

17. Sale of State Warrants.

The sale of state warrants reported below was approved.
