

Population 10,000. Prevailing Winds, East

KEY: Color-coded symbols for roofs, chimneys, and other architectural features. Includes a legend for colors and symbols used on the map.

WATER FACILITIES

Water supplied by the Cadetburg, Kenova & Corleto Water Co. with the pumping station of the Ashland Water Co. maintained as a reserve. Pumping station of the Cadetburg, Kenova & Corleto Water Co. is situated on the big sandy river at Catlettsburg 3 miles S. of Ashland. (See Sheet No. 25) and supplies water to two towns aggregating a population of 10,000. Water pumped from the sandy river directly to reservoir by one Ladlow (Lum Gordon steam pump 24x18 1/2x22) capacity 216 million galls per day. Water also pumped from river into a 284,000 gall. basin by one old rebuilt Smith-Valle pump (24x18x18) capacity 2 million galls per day from which it is again pumped to reservoir by one Worthington compound condensing pump (28-26-25x43) capacity 378 million galls. Water company is building one plunger pump (15x36) to be driven by 400 H.P. Corliss engine. Pump to be in operation Jan 1, 1907. Reservoir is located on hill 1/2 mile from pumping station and has capacity of 20 million galls, elevated 300 ft. above pumping station and approximately 280 ft. above the general level of Ashland.

The independent of supply line from pumping station to reservoir which may also be used as a discharge line in case of emergency. One 8" and one 10" discharge line from reservoir, said lines unite in one 12" line which extends from Catlettsburg to Ashland. Water pressure is lowered from 125 lbs. to 85 lbs. by means of a reducer before entering Ashland. The Ashland Water Co. pumping station (in reserve) is located on Ohio River (See Sheet No. 25). Two Deane differential pumps combined capacity 3 million galls. Water pumped into 1/2 million gall. reservoir elevated 200 ft. above general level of town. One 12" pipe supplies and discharges water to and from reservoir. Reservoir is kept full and pumping machinery kept in good repair. 18 Miles of Water Main 4" to 12" diam. 715 double hydrants (not fast flow) pressure from 65 lbs. to 85 lbs. average daily consumption 26 million galls. System built in 1882, many alterations and extensions, since that time.

FIRE DEPARTMENT

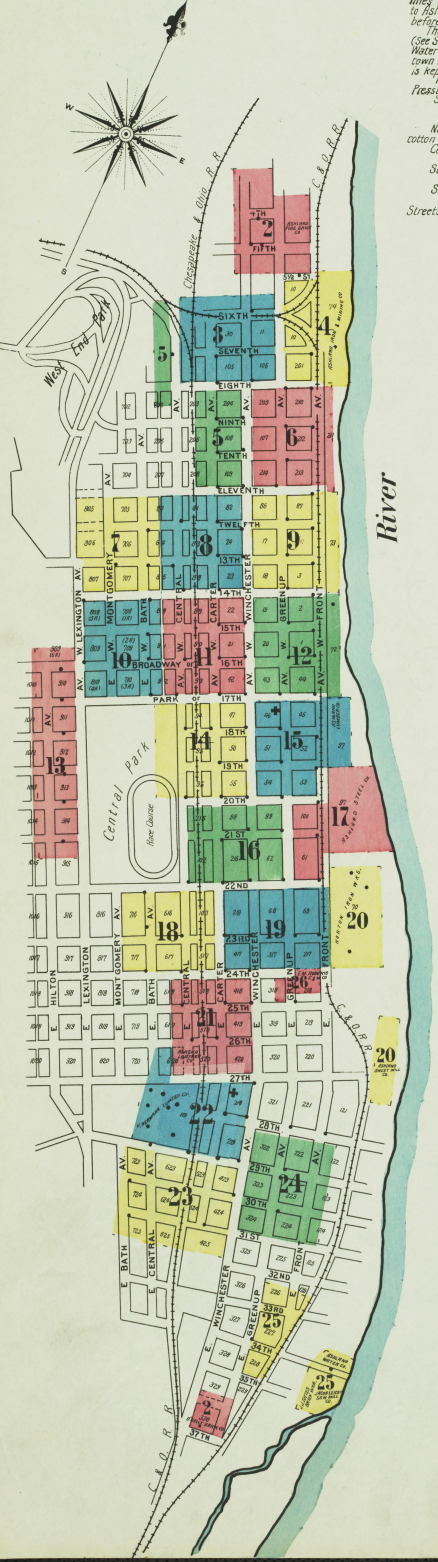

Nine men on call, paid while on duty. Given whistle alarm. 1000 ft. of good cotton-rubber lining, 2 1/2" hose. Three fire trucks equipped as follows: Central Station. 1 1/2 and Greenup Sts. One 2 horse wagon carrying 500 ft. 2 1/2" hose, one 3/4 gallon chemical, 50 ft. of 1 1/2" hose, 30 ft. of 1" hose. Station No. 1. 7th and Winchester Sts. One hand hose reel carrying 500 ft. 2 1/2" hose. Station No. 3. 27th and Carter Sts. One 2 horse wagon carrying 500 ft. 2 1/2" hose, one 3/4 gallon chemical, 20 ft. of 1 1/2" hose, live paid men. Streets practically level and half their extent brick and asphalt paved.
