A THOUGHT

FOR THANKSGIVING

WE GIVE THANKS

For daily food and common good,
For plenteous rain and ripened grain,
For laden board and winter's hoard --
For these we give Thee thanks.

For our own soil and the strength to
hold it,

For mortal heights and civic rights,
For holy zeal and nation's weal --
For these we give Thee thanks.

For thoughts of Thee, and spirits free,
For hearts to raise to Thee in praise,
For faith to see through darkest hours --
For these we give Thee thanks.

Fannie B. Williams

FATALISM

Following a recent mine accident some one was heard to say, "What's going to happen is going to happen regardless. There will always be accidents and lots of them." This is bad medicine. Don't let anyone tell you that a person can't keep away from accidents. It isn't fate that puts a man's hand under a mine car wheel, or places his hand on top of a loaded car as it goes under low top so that he will lose a finger. No, it's something else,

WHAT ARE YOU THANKFUL FOR?

I'm thankful that I am living in the greatest country on earth, and that I have the health to give it now all that is in my power.

I'm thankful for the warmth and food that is ours, and the help that I can give to others who are fighting against those who would take such blessings from me.

I am loyal.

I am peaceloving.

I am safety-conscious

I am fortunate.

I am an American.

TO THE SKEPTIC OF SAFETY

Our armed forces are provided with all of the known safety devices. Safety hats, gas masks, parachutes, steel armor are only a few of the Safety items found in their equipent. So, to the skeptic of Safety, we simply warn "get smart".
