MEDICAL SCHOOL  
THE DEPARTMENT OF PHARMACOLOGY

Dear General - I wanted you to know how  
very happy and satisfied I am that my  
friend the Brent Deane has become your patient. I  
only wish you could have been with him from  
the commencement of his operative interference. But  
this is water that has passed over the dam  
and now he comes to you with a more  
difficult physical situation for you to correct  
and if possible eradicate.

Both Brent and his wife are superb people. I  
have never known a man with greater honesty,  
a higher sense of fair play or more courage.

For years Brent has worked for the  
Government in some capacity and only last year  
retired to live here through his retiring allowance  
and by renting rooms in his home. His operative  
and hospital experience in Washington was more  
than a strain on him.

I wish so much we could get together.  
One of my bright recollections of the Washington  
war days was dinner with you and your wife
