

Minutes of the Meeting of the Executive Committee of the Board of Trustees, University of Kentucky, Friday, November 20, 1964, Board Room, Administration Building.

The Executive Committee of the Board of Trustees of the University of Kentucky met in the Board Room, Administration Building, at 10:30 a. m., Eastern Standard Time, Friday, November 20, 1964, with the following members present: Dr. Ralph J. Angelucci, Judge James A. Sutherland, Dr. H. B. Murray, and Mr. Robert Hillenmeyer. Mr. Smith Broadbent was absent. President John W. Oswald and Vice President A. D. Albright represented the administration of the University. Mrs. Katherine Kemper, Director of the University Placement Service, was a guest. Members of the press were also present.

A. Meeting Opened

The meeting was called to order at 10:35 a. m. by the chairman, Dr. Angelucci, who asked that everyone stand for a minute of silent prayer for President Emeritus Herman L. Donovan. The secretary was instructed to express to Mrs. Donovan the deep concern felt by the members of the Executive Committee at Dr. Donovan's illness.

✓ Judge Sutherland, the secretary, reported a quorum present.

B. Minutes Approved

Dr. Angelucci entertained a motion by Mr. Hillenmeyer, seconded by Dr. Murray, that the reading of the minutes of the meetings of the Board of Trustees of June 12, 1964, and September 15, 1964, and the meeting of the Executive Committee of October 19, 1964, be dispensed with and that the minutes be approved as published. By unanimous vote, the motion was approved and the minutes of the meetings of June 12, 1964, September 15, 1964, and October 19, 1964, were approved as published.

C. President's Report to the Trustees

Each month the President prepares a report to the Trustees on the varied activities and achievements of the colleges, departments and faculty of the University of Kentucky. As copies are distributed to members of the Board of Trustees, the press, and many alumni and friends of the University, the President commented only briefly on most of the topics. Special attention, however, was called to the following items:

President Oswald reported that the College of Medicine is now

fully approved. ✓ Final approval of a medical college cannot be granted until its fourth year of operation; therefore, approval of the University's College of Medicine came at the earliest possible date.

Dr. Albert D. Kirwan, dean of the Graduate School, has been presented the Sydnor Award by the Southern Historical Association for his book "John J. Crittenden: The Struggle for the Union." The book, published by the University Press, had already won for Dr. Kirwan the Hallam Bock Award and the UK Alumni Faculty Award for 1963-64.

Visitation teams, made up of University administrative personnel, are visiting high schools throughout the state providing information to the seniors on the cost of higher education, types of financial assistance available, academic requirements and expectations, housing, admission procedures, and student services. Several cities to be visited are the location of the community colleges.

A conference designed to create wider interest in the uses of educational television at the University was held on campus in November. One of the most important facets of ETV is the use of closed circuits between the University and the community colleges, the state colleges, and elementary and secondary schools.

D. Presentation of the "Blue Report"

The "Blue Report", mailed in advance to members of the Executive Committee, contains important but routine items for which approval or action is requested.

✓ RECOMMENDATIONS OF THE PRESIDENT

CONTRACTS AND/OR AGREEMENTS

1. Deed to Additional Acreage for Somerset Community College

Recommendation: that the deed from the Educational Development Association, Inc., Somerset, Kentucky, dated March 2, 1964, conveying approximately 10-1/2 acres of land to the Commonwealth of Kentucky, for the use and benefit of the University of Kentucky, be accepted and that a letter be sent by the University to the Educational Development Association, Inc., expressing appreciation and thanks to the Association for its generosity and interest in donating this property for use by the University.

Background: The deed conveying this property, together with a recent plat of the tract of land and an abstract and a title opinion on the property, was sent us by Mr. H. D. Strunk, President of the Educational Development Association, Inc. Our attorneys have examined the deed and abstract and other papers submitted and they find these documents well prepared and in order. The opinion states that the title to the property is sound, and the deed has been recorded in the office of the County Court Clerk of Pulaski County, Kentucky.

This property was acquired from funds donated to the Association for this purpose by people in Somerset and the surrounding area, and it was purchased by the Association at a cost of \$31,515.15. This is the second of two conveyances of land made to the Commonwealth of Kentucky for the use and benefit of the University of Kentucky by the Educational Development Association, Inc., the first being a tract of land containing approximately 52-1/2 acres, on which construction is now underway for the Somerset Community College, and which was acquired by the Association at a cost of \$45,000.00 and conveyed by deed dated August 31, 1962.

2. Basic Agreement with Department of the Army for the Instruction of Military Personnel

Recommendation: that approval be given to the Basic Agreement # DA-18-043-AII-427 between the Department of the Army and the University, for the instruction of military personnel, which agreement is dated as of September 1, 1964, and which is for the twelve months ending August 31, 1965, and that the appropriate officers of the University be authorized to execute the Agreement.

Background: This Agreement is similar to other such agreements that the University has had for the past several years for giving instruction to the military personnel of the Department of the Army. Among other things, the Agreement provides that the Government will compensate the University for the courses of instruction taken by its personnel in accordance with the orders covering their enrollment, but that the amount of compensation shall not be greater than that charged for other students pursuing the same or similar courses of study.

3. Agreement for Use of Automobile for Driver Training

Recommendation: that approval be given to an agreement between the University of Kentucky and Goodwin Brothers Plymouth, Lexington, Kentucky, for the supplying of an automobile by the latter to the University until August 15, 1965, for use by the University School in its Driver Training courses.

Background: For the past several years, the University School has offered Driver Training courses, for which one of the local automobile dealers has supplied an automobile without charge, except for the gasoline and oil used and the periodic servicing of the automobile. The agreement herein recommended is similar to the previous agreements covering the use of driver training automobiles. The

University is to pay for the operation of the automobile, including the periodic servicing, and the University is to provide insurance to cover property damage up to \$10,000, collision and upset with \$50.00 deductible and liability in the amounts of \$50,000 and \$100,000 for bodily injury. The automobile is to be returned to Goodwin Brothers Plymouth on August 15, 1965, in condition acceptable to the owner, normal wear excepted.

4. Air Force and Army ROTC Flight Training Contracts

Recommendation: that the Trustees of the University of Kentucky ratify the execution of renewal contracts for the 1964-65 academic year relating to the Flight Training Program for the Air Force and Army ROTC units at the University of Kentucky, by the Vice President-Business Affairs, as follows: Air Force Contract #AF 01(611)1544 and Army Contract #DA 33-159 AII-1484; and the related sub-contracts with the Bohmer Flying Service, Inc., Lexington, Kentucky.

Background: The Flight Training Program is part of the curriculum of the Department of Military Science of the College of Arts and Sciences. The terms and conditions of the renewal contracts are essentially the same as those set forth in prior year contracts for Flight Training Instruction.

5. Agreement for the Growing of Hybrid Seed Corn in Florida

Recommendation: that approval be given to an Agreement between the University and Ohio Foundation Seeds, Inc., Croton, Ohio, whereby Ohio Foundation Seeds, Inc. is to grow 625 rows of hybrid corn in the State of Florida for the University during the winter months of 1964-65 for a consideration of \$1.00 per row and that the appropriate officers of the University be authorized to execute the Agreement.

Background: The University has had hybrid corn grown in Florida by Ohio Foundation Seeds, Inc. each year since 1957 under agreements similar to this one, and this Agreement is identical in substance to the Agreement for growing corn last winter, except that the previous Agreement called for 1,386 rows of corn rather than 625.

ADMINISTRATIVE RELATIONSHIP BETWEEN THE COLLEGE OF DENTISTRY AND THE DEPARTMENT OF BIOCHEMISTRY

Recommendation: that a Department of Biochemistry in the College of Dentistry be created and the following members appointed to the faculty in that department:

Dr. George W. Schwert, Professor and Chairman
 Dr. A. X. Apostolopoulos, Assistant Professor
 Dr. Ernest Hausmann, Assistant Professor

Background: It is planned that the Basic Science departments of the College of Medicine will also be considered as Basic Science departments in the College of Dentistry with selected faculty members holding appointments in both colleges. A gradual implementation by departmental basis is planned as the programs within the College of Dentistry are defined and appropriate understandings reached. Additional individuals may be recommended for appointment in this department as the development of the faculty continues. Dr. Willard concurs in this recommendation.

CONSULTATIVE SERVICES

Recommendation: that the President's report on consultative services approved be accepted as presented.

Background: Approval has been given for the persons listed below to perform the consultative services indicated with the usual understanding that such services will in no way interfere with the performance of regularly scheduled University duties.

Dr. Peter P. Gillis, Assistant Professor in the Department of Engineering Mechanics, College of Engineering, as a consultant to Spindletop Research, Inc.

Dr. Melvin J. Lerner, Associate Professor of Behavioral Science, College of Medicine, as a consultant to the Office of Manpower, Automation and Training, of the United States Department of Labor

Dr. Lee W. Gildart, Associate Professor, Department of Physics, College of Arts and Sciences, as a consultant to the International Telephone and Telegraph Federal Laboratories.

Mr. Charles W. Dean, Instructor, Department of Sociology, College of Arts and Sciences, as a research consultant to the Department of Corrections, Frankfort

APPOINTMENTS AND OTHER STAFF CHANGES

Recommendation: that approval be given to the appointments and/or other changes which require Board action and that the President's report relative to appointments and/or changes already approved by the administration be accepted.

Background: Approval of the Board of Trustees is required for all appointments to positions with the rank of Associate Professor and above, to promotions, and to the granting of tenure, and to salary changes above \$12,000 for non-academic

personnel and \$15,000 for academic personnel. All other appointments and/or changes may be made by the President and reported to the Board.

Given below are the personnel changes since the last meeting of the Board of Trustees which either require action or which have already been acted upon by the President and are being reported:

BOARD ACTION REQUIRED

New Appointments

Theodore N. Guiglia, M.D., Physician, University Health Service, and Assistant Clinical Professor, Department of Medicine (salary over \$15,000)
 John Krog, Visiting Research Professor, Department of Physiology & Biophysics, College of Medicine
 Dean H. Morrow, M.D., Associate Professor, Department of Anesthesiology, College of Medicine, with tenure (salary over \$15,000)
 Paul A. Thornton, Adjunct Associate Professor of Medicine, Department of Medicine and Department of Physiology & Biophysics
 Mark T. Hoekenga, M.D., Clinical Professor of Community Medicine, College of Medicine

Retirement (prior to normal retirement age)

Ruth Marie Earnest, Administrative Assistant, Kentucky Geological Survey, effective January 1, 1965, after 43 years service

Additional Assignments

Dr. Arthur C. Glasser, Professor and Acting Dean, College of Pharmacy
 Dr. James B. Kincheloe, Division of Administration and Supervision, College of Education, Interim Department Chairman
 Dr. Carl Tatum, Division of Foundations, College of Education, Interim Department Chairman

Change in Title

K.C. Lutes, College of Nursing, from Associate Professor to Associate Professor of Clinical Nursing

Change in Rank

Robert M. Drake, Jr., from Visiting Professor part-time to Professor full-time, Department of Mechanical Engineering, College of Engineering

Sabbatical Leave

Hugh A. Storrow, M.D., Associate Professor, Department of Psychiatry, College of Medicine, beginning September 1, 1964, ending December 31, 1964

PRESIDENT'S REPORTNew Appointments

Arthur W. Aplin, D.M.D., M.S.D., Assistant Professor, Department of Fixed Prosthodontics, College of Dentistry
Leonidas Mostowycz, Clinical Instructor of Radiology, Department of Radiology, College of Medicine
Uldis Kukainis, Instructor of History, Prestonsburg Community College
P.B. Goff, Assistant Professor, Department of Modern Foreign Languages, College of Arts and Sciences
Edward B. Gernert, D.M.D., M.P.H., Visiting Instructor, Department of Community Dentistry, College of Dentistry
Kenneth Sydney Welsh, M.D., Clinical Instructor, Department of Community Medicine, College of Medicine
John L. Reilly, Instructor, Department of Radio-TV-Films, College of Arts and Sciences
James G. Pope, M.D., Clinical Instructor in Ophthalmology, Department of Surgery, College of Medicine

GIFTS AND/OR GRANTS

Recommendation: that the gifts and/or grants listed below be ordered accepted and proper letters of appreciation sent to the donors.

Background: The names of donors, the amounts given, and the purposes for which the money is to be used are given below:

<u>Donor</u>	<u>Amount</u>	<u>Purpose</u>
Western Electric Company	\$ 550.00	Scholarship and Grant-in-Aid to College of Engineering
International Business Machines Corporation	240.00	Matching Grants
American Air Filter Foundation	2,000.00	William Maxwell Reed Professor- ship Fund
Miss June Christophel	110.00	Scholarship at Northern Com- munity College
Western Kentucky Gas Company	500.00	Scholarship
National Plant Food Institute	200.00	Scholarship
American Hereford Association	1,000.00	Research
	<u>\$ 4,600.00</u>	

INJURIES REPORT

Recommendation: that authorization be given to pay the charges for treatment of on-the-job injuries to employees of the University as shown, with the usual understanding that the University does not admit negligence nor set a precedent by favorable action on these claims.

Background: The nature of the injury and the charges incurred are shown. The report covers injuries to 48 persons. For 45 of these, treatment was given at the University Hospital, and three other cases involved treatment by outside doctors plus University Hospital charges in one of the cases. The total charges to be paid by the University amount to \$2,192.58.

I. AGRICULTURAL EXPERIMENT STATION

1. Preston, Edgar - Experiment Station Farm, Carpenter

Date of accident May 26, 1964.

Tractor became unbalanced, throwing Mr. Preston to ground. \$1,096.65

Dr. Thomson R. Bryant, Lexington, Kentucky \$ 350.00

2. Taylor, R.J. - Seed Laboratory, Student Laborer
Date of accident August 12, 1964.
Caught finger in cyclone blower \$ 8.30
3. Stotts, Ethel Jane - Feed & Fertilizer, Key Punch Operator
Date of accident August 15, 1964.
Cut hand arranging glass ornaments in office. \$ 16.30
4. Coffey, Carlos - Coldstream Farm, Laborer
Date of accident September 8, 1964.
Became overheated while cutting tobacco. \$ 7.50
5. Whittaker, James - Experiment Station Farm, Laborer
Date of accident September 15, 1964.
Gas applicator used for tobacco beds leaked, causing minor burns
to hand. \$ 16.30
6. Hamilton, O.D. - Animal Science, Meat Sales Supervisor
Date of accident September 18, 1964
Caught finger in hand saw while slicing meat for customer. \$ 22.22

II. FOOD SERVICES

1. Clark, Ralph - Food Storage Center, Meat Cutter
Date of accident July 31, 1964.
Boning knife slipped, cutting finger. \$ 23.70
2. Sharpe, Mrs. Vivian - Blazer Hall Cafeteria, Supervisor
Date of accident September 5, 1964.
Mashed right thumb in refrigerator door. \$ 18.08
3. Stolts, Sallie - Blazer Hall Cafeteria, Checker
Date of accident September 6, 1964.
Caught right thumb in door of ice cream freezer. \$ 18.08
4. Fritts, Mossie Lee - Student Center Cafeteria, Counter Worker
Date of accident September 9, 1964.
Fell on wet floor, breaking left wrist. \$ 48.50
5. Ellis, Joe - Donovan Hall Cafeteria, Dishwasher
Date of accident September 15, 1964.
Burned finger on hot water running in sink. \$ 21.50
6. Carrier, Lillie Mae - Student Center Cafeteria, Counter Helper
Date of accident September 21, 1964.
Slipped on grease, fell, spraining right ankle and injuring
right arm. \$ 37.50

7. Goodpaster, Lillian - Blazer Hall Cafeteria, Asst. Head Cook
Date of accident September 29, 1964.
Cut left forefinger boning turkey. \$ 12.80
8. Janokowski, John - Food Storage Center, Meat Cutter
Date of accident October 4, 1964.
While boning chucks, stuck knife in index finger. \$ 8.30
9. Burns, Robert - Blazer Hall Cafeteria, Dishwasher
Date of accident October 16, 1964.
Slipped while doing mop work, cutting right eye on coat rack. \$ 8.30

III. MAINTENANCE AND OPERATIONS

1. Coffey, Roy - Service, Janitor
Date of accident August 29, 1964.
Cut right wrist on bed in Keeneland Hall. \$ 24.00
2. Kirkland, J.W. - Service, Truck Driver
Date of accident September 5, 1964.
Stepped out of garbage truck onto golf ball, fell, bruising hip. \$ 7.50
- Date of accident October 5, 1964.
Cylinder locked on plunger and pipe used to unload truck, mashing end of finger off. \$ 23.71
3. Stacy, Agnes - Service, Maid
Date of accident September 25, 1964.
Slipped and fell on wet floor, spraining shoulder and arm. \$ 19.50
4. Benton, Moulton - Service, Utility Crewman
Date of accident September 30, 1964.
Mashed finger while cleaning window. \$ 24.86
5. Ewashko, Paul - Building Engineer
Date of accident October 1, 1964.
While working on overhead lamp, foreign object fell in eye. \$ 7.50
6. Masters, E.E. - Carpenter Shop, Truck Driver
Date of accident October 26, 1964.
Cut finger on right hand while cleaning saw blade. \$ 11.80

IV. MEDICAL CENTER

1. Lee, Kenneth P. - Research Machine, Machinist
Date of accident February 6, 1964.
Cut right ring finger on 50 gallon drum. \$ 8.30

2. Brown, William - Hospital, Housekeeping - Houseman Date of accident April 17, 1964. Injured side while removing tape from legs of office desk.	\$	7.50
3. Landers, Hazel - Hospital, Nursing Services - LPN Date of accident April 29, 1964. Patient knocked acetic acid in nurse's eye.	\$	1.86
4. Fisher, Mattie - Hospital, Housekeeping - Housewoman Date of accident June 3, 1964. Cut finger on broken bottle in trash can.	\$	8.30
5. Harmon, Ernest, Jr. - Hospital, Housekeeping - Head Houseman Date of accident June 12, 1964. Cut right hand removing brush from cleaner.	\$	8.30
6. Haddix, Roy - Hospital, Pharmacy Central Supply - Medical Aide Date of accident June 14, 1964. Dropped stack of metal trays on left thumb.	\$	15.50
7. Taylor, Arthenia - Hospital, Dietetics & Nutrition - Cook Date of accident June 17, 1964. Cut finger on tin can.	\$	19.01
8. Grimes, Jacquelyn J. - Hospital, Dietetics & Nutrition - Kitchen Helper Date of accident July 1, 1964. Cut finger on meat slicer.	\$	16.30
9. Beckham, Norman - Hospital, Dietetics & Nutrition - Dishwasher Date of accident July 2, 1964. Got splinter imbedded under fingernail while mopping.	\$	7.50
10. Harris, Joseph R. - Hospital, Housekeeping - Sr. Houseman Date of accident July 8, 1964. Caught fingers in buffer.	\$	7.50
11. Dunne, Donna M. - Medicine, Research Assistant Date of accident July 9, 1964. Strained back muscles lifting patient.	\$	4.00
12. Dunn, Bernice - Hospital, Housekeeping - Maid Date of accident July 15, 1964. Cut hand on wall ashtray while cleaning.	\$	16.30

- | | |
|---|----------|
| 13. Gray, Elnora - Hospital, Dietetics & Nutrition - Counter Worker
Date of accident July 19, 1964.
Fell over carton in storeroom when someone turned out lights. | \$ 13.50 |
| 14. Reed, Virginia - Hospital, Nursing Services - O. R. T.
Date of accident July 20, 1964.
Tripped over oxygen cord, skinning knees and injuring left arm. | \$ 20.00 |
| Dr. O. B. Murphy, Lexington, Kentucky | \$ 5.00 |
| 15. Jordan, Marjorie - Hospital, Nursing Services - Unit Clerk
Date of accident August 5, 1964.
Filing cabinet fell on left wrist. | |
| Dr. Samuel O. Hodges, Lexington, Kentucky | \$ 20.00 |
| 16. Meyer, Arthur - Medicine, Lab Technician
Date of accident August 7, 1964.

Physical Therapist
Date of accident September 2, 1964.
Child patient bit employee on right index finger. | \$ 8.30 |

23. Lynn, Mildred - Hospital, Patient Accounts - Credit Clerk
Date of accident September 4, 1964.
Tripped over adding machine, injuring ankle. \$ 7.50
24. Stewart, Thomas L. - Hospital, Housekeeping - Houseman
Date of accident September 7, 1964.
Needle in trash bag punctured thumb. \$ 12.50
25. Hill, Carolyn - Hospital, Nursing Services - Nurses Aide
Date of accident October 1, 1964.
While preparing patient razor slipped, cutting employee's hand. \$ 7.50
26. Grigsby, Glenn Ellen - Dentistry, Pedodontics - Dental Assistant
Date of accident October 7, 1964.
Caught ring on door, cutting finger. \$ 8.30

V. PHYSICS DEPARTMENT

1. Ezell, Gene - Electronics Engineer
Date of accident September 8, 1964.
Bumped head on open door of top cabinet while working below. \$ 11.80

REPORT OF APPOINTMENT OF SPECIAL ASSISTANT ON PLANNING UNIVERSITY DEVELOPMENT PROGRAMS

Dr. Frank Santopolo, Associate Professor of Rural Sociology and Director of Co-operative Extension Training, has been appointed part-time special assistant in the Office of Executive Vice President for the purpose of initiating University planning for development programs, especially in Eastern Kentucky.

The recently enacted and pending Federal legislation on poverty, economic opportunity, and related problems highlights a responsibility of the University to perform more effectively its functions of instruction, research and service throughout the Commonwealth and especially in Eastern Kentucky.

Accordingly, the University recently held a conference, attended by members of its various departments and a representative of State government, to determine programs of development this institution should pursue with Federal, State and local governments. One course of action will be the establishment of one or two pilot projects in a geographic area surrounding a University community college in Eastern Kentucky.

The immediate step ahead for the University is the preparation of a proposal for

support that will mobilize and coordinate the institution's resources around some of the critical problems of development.

Dr. Angelucci expressed concern over the increasing number of injuries. After some discussion it was suggested that a study be made relative to the continuation of the present practices to see if it might not be cheaper to carry workmen's compensation or some other type of insurance. President Oswald told the Executive Committee he would ask that such a study be made.

On motion by Judge Sutherland, seconded by Dr. Murray, the report and recommendations of the President therein were approved.

E. Supplemental Recommendations of the President

Items contained in this report are routine, important recommendations which were received too late to be included in the "Blue Report". Copies were made available to members of the Executive Committee and the press.

SUPPLEMENTAL RECOMMENDATIONS OF THE PRESIDENT

I. PERMIT FOR THE PURCHASE OF TAX FREE ALCOHOL

Recommendation: that the following resolution be adopted by the Board of Trustees of the University:

That this Executive Committee of the Board of Trustees, for itself and its duly constituted and elected successors, hereby constitutes and appoints the Dean or Acting Dean of the College of Pharmacy of the University of Kentucky and the Chairman of the Pharmacy Department of the College of Pharmacy of the said University, jointly and severally, its true and lawful attorneys for and in its name to execute all applications, notices, letters, writings, and papers, and to do all acts for it in dealing with the Internal Revenue Service in connection with matters relating to the laws, and regulations issued pursuant thereto, administered by the Alcohol and Tobacco Tax Division of the Internal Revenue Service; and that this Executive Committee of the Board of Trustees hereby authorizes the said attorneys, or either of them, to receive on its behalf any and all notices, papers, and letters from said Service in connection with all such matters, hereby giving and granting to said attorneys, or either of them, full power and authority to do and perform all and every act and thing, whatsoever requisite and necessary to

be done in and about the premises, and hereby ratifying and confirming all that said attorneys, or either of them, shall lawfully do or cause to be done by virtue hereof.

Background: Under existing federal law this action is needed to assure proper procedures for acquisition and control of alcohol required for operation of the College of Pharmacy.

II. COMMITTEE APPOINTMENTS FOR MR. KERLEY

Recommendation: that the President be authorized to permit Robert F. Kerley, Vice President-Business Affairs and Treasurer, to accept appointment to the Commission on Federal Relations of the American Council on Education for a four year term ending December 31, 1968, and the Steering Committee of the Third Institute on Administration of the Association of American Medical Colleges.

Background: Vice President Kerley has been requested by Logan Wilson, President of the American Council on Education, to serve on its Commission on Federal Relations. This Commission functions as the major mechanism of Higher Education relative to matters of national interest. It deals with proposed legislation and contributes to the policy development of the executive branch of the federal government. Vice President Kerley would be the only senior business officer on the Commission.

Mr. Kerley has also been asked by the Association of American Medical Colleges to serve on its Steering Committee for a Third Institute on Administration. The primary purpose of this Institute and the earlier ones held is to deal with the administrative problems of Medical Colleges in four broad areas: (1) institutional administrative organization, (2) faculty organization, (3) business on financial management, and (4) the management of supporting services and the physical plant. Again Mr. Kerley would be the only senior business officer on this Steering Committee.

III. GIFTS AND/OR GRANTS

Recommendation: that the gifts and/or grants listed below be ordered accepted and proper letters of appreciation sent to the donors.

Background: The names of donors, the amounts given, and the purposes for which the money is to be used are given below:

Westucky Swine Producers Association	\$4,000.00	Area share in the employment of a swine specialist
---	------------	---

IV. APPOINTMENTS AND OTHER STAFF CHANGES

Recommendation: that approval be given to the appointments and/or other changes which require Board action and that the President's report relative to appointments and/or changes already approved by the administration be accepted.

Background: In accordance with the regulations of the Board of Trustees, the following changes and/or appointments are presented for either approval or acceptance.

BOARD ACTION REQUIRED

New Appointment

Frederick Eberson, M. D., Clinical Associate Professor, Department of Community Medicine, College of Medicine

REPORT OF PRESIDENTIAL APPROVALS

New Appointments

Robert C. Ward, Assistant to the Dean and Director, College of Agriculture
 Reverend Ralph S. Carpenter, Director of Chaplain Service in the University
 Hospital
 Richard I. Barnhisel, Assistant Professor of Agronomy, Experiment Station

Change in Rank

Potu N. Rao, from Postdoctoral Fellow to Instructor, College of Medicine

President Oswald commented on each recommendation as shown above and noted he would like the following item included as an addendum to the supplemental recommendations:

Memorandum of Agreement with State Tuberculosis Hospital No. 1, Madisonville, Kentucky

Recommendation: that Memorandum of Agreement, dated as of October 25, 1964, between the University of Kentucky and State Tuberculosis Hospital No. 1, located at Madisonville, Kentucky, whereby the hospital makes available its clinical and nurse-training facilities to students of nursing enrolled at the Henderson Community College in consideration of the services performed in the hospital by such students, be approved and that the appropriate officers of the University be authorized to execute the Memorandum of Agreement.

Background: This agreement, which imposes no financial obligation on either the University or the hospital, has the written approval of Dean Marcia A. Dake, of the University's College of Nursing, and of Dr. Ellis F. Hartford, Dean of the Community College System, and it is similar to such agreements the University has with several other hospitals. Provision is made in the agreement for annual review of its terms and for cancellation by either party upon giving four months' notice in writing to the other party.

President Oswald explained that approval of the Agreement with the State Tuberculosis Hospital would make it possible for the Henderson Community College to accommodate more students in their Associate Nursing Degree Program.

Mr. Hillenmeyer moved for the approval of the supplemental recommendations of the President and the additional item presented orally by the President. Judge Sutherland seconded the motion which carried unanimously.

F. Budgets for Auxiliary Units

This item of the agenda was postponed until a later meeting. President Oswald stated that of the four auxiliary units concerned--the Athletics Association, the Fund for Advancement of Education and Research in the University of Kentucky Medical Center, the Thomas Poe Cooper Foundation, and Kentucky Research Foundation--only two had submitted their budgets at this time and he preferred to present all four at the same time, probably at the December meeting.

G. New University Employee Basic Medical Insurance

A review of the University's basic medical insurance program requested by the President resulted in the following recommendation:

ACCEPTANCE OF BID ON NEW UNIVERSITY EMPLOYEE BASIC MEDICAL INSURANCE

Recommendation: that the President be authorized (1) to accept the low bid of Blue Cross Hospital Plan, Inc. and Kentucky Physicians Mutual, Inc. for a new University of Kentucky Basic Hospitalization and Surgical Plan and (2) that the appropriate officers of the University be authorized to execute the necessary agreements to effect this plan.

Background: The new plan:

1. Would supplant the present plans effective January 1, 1965. At present two

plans are in effect in the University Medical Center personnel are covered by one and other University personnel under a second.

2. Would offer each employee three options of coverage:
 - a. A basic hospitalization plan (only)
 - b. A basic hospitalization plan combined with a standard benefit surgical plan.
 - c. A basic hospitalization plan combined with a broader benefit surgical plan.
3. Would offer much broader and more extensive coverage than both existing plans at a nominal increase in cost to the employee. For example, employees now receive coverage for only \$8 per day for hospital room and board for a maximum of 31 days. Under the proposed coverage full cost of hospital room and board (semiprivate) would be covered for a maximum of 70 days. Present coverage on hospital services limits payment to unrealistic levels and provides for a \$25.00 deductible. The proposed coverage has no limit on hospital services and no deductible. The increased monthly premium for unmarried employees would be \$1.49; for married employees, \$2.84.

The development of this new program has resulted from efforts of the administration with the advice of the University Employee Insurance Committee.

Should this plan be adopted there is a strong possibility that the premium for the current Major medical plan will be reduced in part offsetting the increased cost of the proposed basic plan.

Following some discussion of the various bids received, Mr. Hillenmeyer made a motion (1) to accept the bid of Blue Cross Hospital Plan, Inc., and Kentucky Physicians Mutual, Inc., and (2) that the appropriate officers of the University be authorized to execute the necessary agreements to effect the plan. Dr. Murray seconded the motion which carried.

H. New Student Health Insurance Program for the Community College System

At the meeting of the Board of Trustees on May 12, 1964, approval was given to allot \$5.00 per full-time student per semester from the special activity fees collected from students in the community colleges to provide accident hospitalization coverage for the entire community college system. The following recommendation is the result of the earlier Board action:

ACCEPTANCE OF BID ON NEW STUDENT HEALTH INSURANCE PROGRAM FOR THE COMMUNITY COLLEGE SYSTEM

Recommendation: that the President be authorized (1) to accept the low bid of Continental Casualty Company for a new student accident and sickness insurance program for students in the Community College System and (2) that the appropriate officers of the University be authorized to execute the necessary agreements to effect this plan.

Background: The new plan:

1. Provides a basic accident and insurance program for all full-time students of the Community College System. A similar plan is now in effect for on-campus students.
2. Provides a basic coverage of \$1,000.00 for accident or illness for the 9-month school year at a basic rate of \$5.00 per semester per student.
3. Was developed by the efforts of the administration with the advice of the Dean of the Community College System and the University Insurance Committee.
4. Provides that coverage will become effective on the day following notification of acceptance.

In the discussion which followed the presentation of this recommendation, President Oswald pointed out that the on-campus students, as mentioned in point one of the background information, are served by the University Health Service, with a portion of the Special Activity Fee being allotted for this purpose. Mr. Nestor from the Business Affairs office said this insurance program would be submitted for rebid each year.

Dr. Murray made the motion, seconded by Mr. Hillenmeyer, that the President be authorized to accept the low bid of Continental Casualty Company for a new accident and sickness insurance program for students in the Community College System, and the motion carried.

I. Authorization to Proceed with Working Drawings for Dormitory Complex and to Allocate Necessary Funds for Such Drawings

President Oswald made the following recommendation, stating that it was a most important step in getting the housing complex underway.

Recommendation: that the President be authorized (a) to recommend to the Commissioner of Finance that the architects and engineers engaged to design the proposed Student Housing Complex be permitted to proceed with working drawings and

specifications and (b) to pledge or advance to the Commonwealth of Kentucky up to \$300,000 from funds available to the University and not otherwise obligated, as a short term source of funds to defray the cost of architects' and engineers' fees attributable to the preparation of working drawings and specifications for the Student Housing Complex, with the understanding that any funds actually advanced be returned to the University from capital construction funds later to be provided for this project.

Background: Final preliminary plans on the Student Housing Complex are expected to be complete on or before December 1, 1964. Thereafter working drawings and specifications must be authorized to move the project on the present schedule. The Complex would provide 2634 student living spaces and a central dining and recreation facility. Current estimate of project cost is \$16 to \$17 million. Construction is now contemplated to be performed in phases with the objective of providing 845 student living spaces in September, 1966, and an additional 1789 spaces in September, 1967.

Dr. Angelucci asked the press if they had any questions relative to the Complex and they asked several with reference to size and location.

Following the discussion, Judge Sutherland made the motion that the President be authorized (1) to recommend to the Finance Commissioner that drawings be made and (2) to pledge or advance to the Commonwealth of Kentucky up to \$300,000 from funds available to the University and not otherwise obligated, with the understanding that any funds actually advanced be returned to the University from capital construction funds later to be provided for this project. Dr. Murray seconded the motion and approval was given to the motion as made by Judge Sutherland.

J. Report of the Placement Service

President Oswald called attention to the following report on the Placement Service from its establishment in 1953, copies of which were available for the members of the Executive Committee and the press:

REPORT OF THE PLACEMENT SERVICE

1953-1964

The University of Kentucky has provided career placement assistance to seniors and graduate students for many years. In the late 1800's, long before placement offices were common on college campuses, the Dean of

the College of Engineering encouraged industrial employers to visit his offices to interview graduating engineers. Through his early efforts an Engineering Placement Office was developed. The College of Education established the Teacher Placement Bureau in 1922, and, beginning in the early 1930's, the College of Commerce sponsored the Commerce Employment Association. The College of Agriculture and Home Economics, the College of Law, and the Departments of Chemistry, Geology, Library Science, Mathematics and Physics actively assisted graduating seniors through various types of placement activities.

Decentralized placement served the University and its students well while enrollments were small and employer needs were rather limited. However, the "explosion of knowledge" during and after World War II and the increasing numbers of students seeking employment opportunities demanded a more formal approach to placement. Upon requests from business and industry, and after serious study by the Administration, the Board of Trustees established the Placement Service on January 1, 1953.

The Placement Service was charged with the responsibility of developing a centralized program to serve effectively the entire University. It was assigned three major duties: (1) To assist graduating students and alumni in locating career opportunities which would enable them to become contributing members of our modern society; (2) To assist business and industry, government, education, and other professions in locating qualified college-educated men and women to meet the many and varied personnel needs; and (3) To assist the University in locating non-academic staff members. The establishment of the Personnel Office in 1960 relieved the Service of all responsibility for securing University office personnel.

During most of the first decade of its history, the Placement Service served largely in a coordinating capacity, working with the established departmental bureaus. It was limited to this role because of insufficient staff, the absence of interview rooms and offices, and, to some extent, by on-campus reluctance to centralization. However, during these early years valuable contacts were made, and strengthened, with employers; registration forms were devised to meet the needs of employers; professional contacts were developed; and faculty cooperation was gained.

In 1957, when a small suite of offices was provided in the Administration Building, the real task of centralization began. By September 1962 centralization was an accomplished fact. Although sufficient interview rooms have never been available, the Service has been able to function by "borrowing" rooms from administrative officials and academic departments. The new quarters provided on the second floor of White Hall (in October of

this year) will do much to alleviate the space problem created by multiple recruiting teams and increasing student interest.

Table I shows the growth of the staff, physical facilities, and the budget support provided for the Placement Service from 1953 to the present time.

Table I. GROWTH OF PLACEMENT STAFF, PHYSICAL FACILITIES,
BUDGET, 1953-54 to 1964-65

Year	Placement Staff			Physical Facilities		Budget Appropriation
	Prof.	Clerical	Students	Offices	Interview Rooms	
1953-54	1.25			1		\$ 7,784
1954-55	1.25		1	1		8,106
1955-56	1.25		1	1	2	8,586
1956-57	1.25	1	1	1	2	11,136
1957-58	1	1	1	2	5	9,320
1958-59	1	1	1	2	5	10,220
1959-60	1	2		2	5	13,220
1960-61	1	2		2	5	14,520
1961-62	1	2		2	5	15,520
1962-63	1	3		2	5	20,296
1963-64	1.25	3	1	2	5	21,996
1964-65	1.33	4	2	2	7	28,498

Placement activities have increased steadily since 1953. Student registration, which has always been on a voluntary basis, grew slowly during the years the Placement office served in a coordinating capacity. However, as placement activities became centralized and as the recruiters emphasized the necessity for well-prepared credentials and advance scheduling, a majority of the graduating students available for employment began to take advantage of the Service. In 1953-54, only 466 students were registered, but in 1963-64, 1,690 students and alumni requested placement assistance. (The early fall registration this year is double the registration in October 1963.)

Two hundred eighty-six employing organizations contacted the Placement Service during the school year 1953-54; in 1963-64, 1,563 employers reported personnel needs. One hundred eight employers scheduled one-day on-campus visits in 1953-54, and last year 576 organizations sent one or more representatives to the campus for one, two, three, or four-day recruiting visits. Teaching vacancies reported to the Service in 1953-54

totaled 4,491. This figure rose to 27,892 in 1963-64.

Table II shows the growth of these Placement Service activities through 1963-64.

Table II. GROWTH OF PLACEMENT SERVICE ACTIVITIES
1953-54 through 1963-64

Year	Students Registered	Business, Industries Governmental Agencies Reporting Personnel Needs	Teaching Vacancies Reported	Recruiting Organ- izations Scheduled on Campus (1, 2, or more days)
1953-54	466	286	4,491	108
1954-55	375	351	9,654	150
1955-56	499	745	14,749	349
1956-57	661	1,106	16,540	471
1957-58	824	1,134	15,716	450
1958-59	1,162	1,250	14,734	451
1959-60	1,122	1,300	15,966	450
1960-61	1,126	1,027	19,424	450
1961-62	1,171	1,135	22,964	474
1962-63	1,204	1,285	26,077	534
1963-64	1,690	1,563	27,892	576

Table III shows the status of registrants at the close of each placement year, 1953-54 through 1963-64. Registrants who withdrew their names during the year did so because of family responsibilities or illness. Many returned to the placement files within one or two years. It may be presumed that persons who failed to provide the Service with information secured employment or were no longer interested in employment.

(See following page for Table III.)

Table III

STATUS OF REGISTRANTS AT CLOSE OF
PLACEMENT YEAR 1953-54 through 1963-64

REGISTRANTS						
Year	Employed	In School	In Military Service	Withdrawn	No Infor- mation	Total Number

The Placement Service holds membership in the Kentucky Institutional Placement Association, the Association for School, College and University Staffing, and the Southern College Placement Association. The Director was elected Secretary of the Southern College Placement Association in December, 1963, and is immediate past President of the Kentucky Association. In 1963, the Placement Service was invited to become a continuing participant in the National Salary Survey of the College Placement Council.

The Placement Service is the "show case" through which business, industry, government, education, and the professions view the University's products: its educated men and women - the most precious product in our economy. It is the first contact many organizations have with the University. To a great extent, the image of the institution itself is created in the minds of corporate officials and other employers through contacts with the Placement Service. It is hoped that the University may find it possible in the early years of its Second Centennial to provide adequate and comfortable facilities which will extend an institutional welcome to the visiting recruiters and which will afford the aids needed to assist the student in choosing a career in which he may make a maximum contribution to our complicated modern society.

Respectfully submitted,

S/Katherine Kemper

Katherine Kemper
Director

October 15, 1964

President Oswald then introduced Mrs. Katherine Kemper, Director of the Placement Service, and asked that she elaborate further on the written report. Mrs. Kemper said that in addition to the major placement function, and the attendant records function, the Service has an important public relations role. New channels of communication for the institution with business, industry, the professions, and with educational, social, and governmental agencies are opened, interpreting the University and its programs to employers. Departments and individuals, both faculty members and students, are able to establish and maintain valuable business and industrial contacts.

As each graduating student has his own personal and peculiar ambitions,

interests, needs and abilities, the Placement Service endeavors to provide individual counseling and to present the necessary placement aids which will enable him to match his requirements with career opportunities. Since 1956 the Service has corresponded annually with more than 1,000 companies in an effort to assist them in locating qualified college-trained men and women; it has received requests annually for 15,000 or more teachers, and more than 400 organizations have sent representatives to the campus to interview qualified graduates interested in specific openings.

Lack of sufficient office space, especially for conducting interviews, has been somewhat alleviated by moving the Placement Service to the present offices located on the second floor of White Hall, formerly the College of Commerce. As business, industry, government, and education expand with the growing population, the University will be expected to expand its services to meet increasingly complex personnel needs.

Dr. Angelucci and President Oswald commended Mrs. Kemper for the excellent work of the Placement Service and expressed appreciation on behalf of the Board of Trustees.

K. Mr. Hillenmeyer Reports on the Annual Meeting of the Association of Governing Boards of Universities and Colleges

The 42nd Annual Meeting and School for Regents of the Association of Governing Board of Universities and Colleges was held in October with the University of North Carolina as host. Mr. Robert Hillenmeyer, a member of the Executive Committee of the Board of Trustees, was this year's representative from the University of Kentucky. The meeting had an all time high record of attendance of regents and trustees. To Mr. Hillenmeyer it proved to be a most interesting and beneficial experience. The underlying theme of this year's meeting was "Interpretation" -- interpreting higher education, particularly the role of the press.

Some of the topics covered during the meeting included "The Role of the Regents", the subject of an address by the Honorable Victor S. Bryant, a trustee of the University of North Carolina, relative to the role of regents and trustees with the university administrations. At the School for Regents, a panel led by Dr. Harry Ransom, Chancellor of the University of Texas, used as their subject "The Board and the Press". Dr. Ransom said regents and trustees should be participants, not serving in name only. Mr. C.A. McKnight, a member of the press, suggested it might be better to have one person on a campus who was advised of all facets and news of importance send out feelers and let the press and reporters dig for the stories. President William Friday of the University of North Carolina spoke on "The Board and the Community." The Honorable Terry Sanford, Governor of North Carolina addressed the final session.

Mr. Hillenmeyer noted that Indiana State College at Terre Haute, Indiana would be host next year and expressed hope that additional representatives from the Board of Trustees of the University would be able to attend. In 1966 the meeting will be held at the University of Kentucky.

L. Meeting Adjourned

Dr. Angelucci asked if anyone had any questions or further business to be considered. On motion by Dr. Murray, seconded by Judge Sutherland, and carried, the meeting was adjourned at 11:55 a.m., Eastern Standard Time.

Respectfully submitted,

James A. Sutherland, Secretary

PR-1

PRESIDENT'S REPORT TO THE TRUSTEES

November 20, 1964

1. COLLEGE OF MEDICINE NOW FULLY APPROVED

Dr. William R. Willard, dean of the College of Medicine and vice president for the Medical Center, reports that the Council on Medical Education of the American Medical Association and the Executive Council of the Association of American Medical Colleges separately, and conjointly through the Liaison Committee on Medical Education, have accepted and approved the report of the Liaison Survey Team visit to the College of Medicine last February.

Acceptance of this report carries with it full approval of the College of Medicine. This approval was granted as of the date of completion of the survey team's visit, February 27, 1964.

Final approval of a medical college by these organizations can not be granted until its fourth year of operation. Therefore, approval of the University's College of Medicine came at the earliest possible date, several months before the graduation of its first class.

2. SYDNOR AWARD GOES TO DEAN KIRWAN

The Southern Historical Association has presented its Charles S. Sydnor Award to Dr. Albert D. Kirwan, dean of the Graduate School, as the author of the best book on Southern history published in 1962-63.

The award-winning book is "John J. Crittenden: The Struggle for the Union," which already had won for Dean Kirwan the Hallam Book Award and the UK Alumni Faculty Award for 1962-63. The book was published by the University Press.

Announcement of the latest award came last week at the Southern Association's meeting in Little Rock, Ark. Prof. Aubrey C. Land, chairman of the Department of History at the University of Maryland, who made the announcement, said the vote of the judges was unanimous.

Dean Kirwan wrote the book in 1960-61, while on leave from the University as a Guggenheim Fellow.

3. PRESENT ACADEMIC CALENDAR TO BE CONTINUED

The University faculty has voted to continue the present academic calendar, with only slight modification, for 1965-67. The approved calendar allows a somewhat longer Thanksgiving holiday and, as now, provides for final fall semester examinations before Christmas.

Registration for the 1965 fall semester will be held August 30-31, and classes will begin September 1. Holidays will be observed on Labor Day and Thanksgiving. Students will have one study day free of classes before final examinations, December 16-22.

The calendar provides for 86 classroom teaching days during the fall semester and 88 during the spring semester. The 1966 spring semester will start January 8 and end May 7.

4. RELIGIOUS ADVISORS CONDUCTING SEMINAR

A four-day seminar, "The University and Religious Life," currently is being conducted on campus by the University's 15-member religious advisors staff. Open to students, counselors, clergymen, social service workers, government officials and civic leaders, the seminar will explore these topics: Has the Supreme Court ruling outlawed religion in the state university? Does the university have an obligation to individual denominations? Can the university continue to provide physical facilities for religious programming? and Should the university expand its course offerings in religion to include subjects taught by qualified religious leaders?

The Rev. John King, minister to Presbyterian students, is chairman of the advisors staff. Visiting consultant to the seminar is Dr. Milton McLean of Columbus, Ohio, president of the National Association for the Coordination of University Religious Affairs.

5. KENTUCKY DEVELOPMENT DAY HELD ON CAMPUS

The University's Bureau of Community Service, in cooperation with the Kentucky Development Committee and the Kentucky Council for Community and Area Development, was host Tuesday to the annual Kentucky Development Day. Delegations from throughout the state attended the session to review progress made in the past year and to explore areas of potential future development at local, county, regional and state levels.

6. SIX ELECTED TO OMICRON DELTA KAPPA

Six University students have been elected to membership in the senior men's honorary, Omicron Delta Kappa. They are Robert Lee Lynch, Barbourville; Michael Prentice Cox, Lexington; Thomas Michael Jones, Owensboro; Stephen Thomas Miller, Benton; William Grant, Winchester, and Robert Edward Rawlins, Kensington, Md.

To be eligible for membership in ODK, a student must have a cumulative academic standing of 2.8 and a record of effective leadership in campus affairs.

7. SYMPATHY IS WAITING ROOM WATCHWORD

A hospital waiting room can be the loneliest place in the world and, until recently, it seemed almost as if they had been designed that way. Tenanted by worried relatives, who longed for news about a member of their family but who hesitated to disturb the busy nurses on duty, these waiting rooms were outstanding for their isolation and lack of comfort.

A nationwide trend aimed at making this waiting period more bearable is reflected in the surgery lounge of University Hospital--a project of the Hospital Auxiliary, one of the first to go into operation after the hospital was activated. The surgery lounge, on the second floor of the hospital, is staffed by nine volunteers headed by Mrs. William A. Duncan, chairman. Working in shifts, the Auxiliary workers act as hostesses in the lounge, providing a warm and sympathetic atmosphere for those who wait for news.

Although the hostesses can not completely relieve the tension of the waiting period, they can and do offer company, progress reports and a tasteful lounge--a large, restful room which is equipped with a small kitchen area where hostesses can prepare tea or coffee. Furnished with comfortable couches and chairs, the lounge also has a television set but it seldom is used except to entertain restless children.

Since a large number of University Hospital surgical patients are referred by out-of-town physicians, most of the relatives are unfamiliar with Lexington and often are somewhat apprehensive at being in a strange environment. At the time a patient checks into the hospital, his relatives are directed to the lounge, where they are greeted by the hostess on duty. An intercommunications system between the operating room and the lounge desk allows the hostess to give non-medical information to the family during the progress of an operation.

In addition to Mrs. Duncan, the other hostesses are Mrs. James Fara, Mrs. Fred Beyer, Mrs. James Walters, Mrs. David White, Mrs. Edward Robbert, Miss Edna Snapp, Mrs. Edward Burrows and Mrs. Arthur Anderson.

8. HIGH SCHOOLERS GETTING UK INFORMATION

Many hundreds of Kentucky high school seniors, who now are giving thought to their enrollment in college next year, are being given the opportunity this month to learn much about the University without having to make a trip to Lexington. The information is provided by UK visitation teams which, during a three-week period now in progress, will conduct meetings in 12 cities throughout Kentucky.

The meetings are open to prospective students and their parents, high school counselors, teachers and administrators. The visitation teams, made up of University administrative personnel, present information on the cost of higher education, types of financial assistance available, academic requirements and expectations, housing, admission procedures, and student services.

The visitation program, now in its fifth year, is headed by Dr. Elbert W. Ockerman, director of School Relations. Its purpose is not to recruit students but to provide information that will enable high school seniors to decide which college or university can best meet their educational needs.

Cities to be visited by the UK teams include Carrollton, Paducah, Covington, Hopkinsville, Ashland, Glasgow, Prestonsburg, Elizabethtown, Cumberland, Owensboro, Somerset and Henderson. In each case, students in surrounding counties are advised of the meeting and invited to attend.

9. TAIWAN WOMAN VISITS MEDICAL CENTER

Among the Medical Center's recent visitors was Miss Chuan Pan, director of social services at a hospital in Taiwan. In this country as a guest of the State Department, she spent 12 days studying the program and facilities of the Medical Center, which was placed on her itinerary by the State Department because its goals are similar in scope to those of the Taiwan hospital where Miss Pan is employed. At the conclusion of her stay in Kentucky, which included a visit to the state's mountainous eastern section, Miss Pan observed that the role of Eastern Kentucky social workers differs but little from her own in Taiwan.

10. STUDENTS ATTEND UNITED NATIONS SEMINAR

More than 30 University students returned Sunday from a five-day trip to New York City during which they attended a United Nations seminar sponsored by the campus YMCA and YWCA. In addition to tours of the UN facilities, the students attended briefing sessions conducted by UN delegates from Cyprus, Greece, Turkey, Ghana, Nationalist China, and the United States.

11. ENGINEERING STUDENT WINS \$400 SCHOLARSHIP

Larry W. Thompson of Corbin, a senior in electrical engineering, has been named recipient of a \$400 scholarship provided by the Western Electric Fund. The award was made on the basis of academic achievement and leadership in campus activities. The Department of Electrical Engineering also received a \$150 grant from Western Electric.

12. ENTOMOLOGISTS LAUNCH STUDY OF TOBACCO PESTS

The entomology department of the Agricultural Experiment Station has received a \$75,000 grant from the U.S. Department of Agriculture for a four-year study on the resistance of tobacco to a pair of insect pests. The department chairman, Dr. Lee Townsend, and a fellow researcher, Dr. Richard Thurston, say the insects to be studied include two species of the tobacco hornworm and two of the tobacco budworm.

Dr. Thurston, the project leader, said he will use foreign and domestic varieties and strains of tobacco in the testing, plus several wild species. He will attempt to find out (1) if any of the three types of tobacco has genetic resistance to the insects; (2) if it can be crossed into domestic tobaccos without undue difficulty; and (3) if the various quality factors of domestic, standard burley varieties can be maintained if the resistance quality is bred into it.

The research will be directed along three routes. One is to see if the hornworm and budworm moths will be selective in what type of tobacco they will lay their eggs on; (2) will the eggs develop normally on such tobacco, or will some factor in the particular variety or strain work against proper hatching of the eggs; and (3) will hatched eggs produce hornworms or budworms that will live and grow normally on any particular variety or strain.

The entire project is part of a long-range program being entered into by many agricultural experiment stations to find other ways of controlling insects than by chemical materials.

One part of the University's research will be conducted at the Coldstream Experiment Farm. It will utilize a "growing cage" about two-fifths of an acre in expanse and covered with a material that is widely used in shade-grown tobacco areas. This technique is being used in order to confine the moths and thus obtain a larger number of the eggs laid in this area.

13. FIVE AIR FORCE ROTC CADETS EARN COVETED RANK

Five students in the Air Force ROTC unit have won the classification of distinguished cadet. They are Ernest T. Wightman, Jr., Lexington; Benton G. Dishman, Jr., Frankfort; Aubin M. Higgins, Earlington; Joseph A. Jones, Ekron, and Gerald E. Raybeck, Confluence, Pa. They were chosen from a class of 41 senior cadets.

To be eligible for the honor, a cadet must rank in the upper third of his air science class, in the upper half of his summer training unit, and in the upper half of his college class. Those who maintain this status until they are commissioned are designated as distinguished military graduates and may apply immediately for a regular Air Force commission.

14. COLLEGE OF DENTISTRY IN SELECT GROUP

Because of its outstanding success in recruiting a research-oriented faculty, the College of Dentistry has become the object of a national committee's admiring attention. The committee, representing the National Institute of Dental Research, recently visited the campus with the specific mission of learning the key to the dental college's success.

A committee spokesman told Dean Alvin Morris and other Medical Center administrators that the dental research manpower situation today is critical. The committee, hopeful of making recommendations that may alleviate the situation, is visiting three institutions across the country in an effort to gain helpful information. Other schools on the itinerary are the University of Washington and another yet to be named.

The visiting committeemen included Dr. David Weisberger of Harvard, Dr. Ralph W. Phillips of Indiana University, Dr. Sholom Pearlman of the American Dental Association, and Dr. F. Earle Lyman of the National Institute of Dental Research.

15. CONFERENCE EXPLORES ROLE OF EDUCATIONAL TV

A conference designed to create wider interest in the uses of educational television at the University was held on campus November 16 under auspices of the Department of Radio, Television and Films. Serving as a visiting consultant was Dr. C. R. Carpenter, director of academic research and services at Pennsylvania State University.

16. ART EXHIBITIONS PLANNED AT ASHLAND

Plans for a series of one-man art shows at Ashland Community College have been completed by the college's convocation committee. The first of these exhibitions, a collection of paintings by John Dunbar, a septuagenarian who took up painting only four years ago, went on display early this month. The works of two Ashland students, paintings by Yvonne Ford and sculpture by David Preston, will be exhibited at the conclusion of the Dunbar show.

17. PROFESSOR DEFENDS FLU SHOTS' EFFECTIVENESS

The effectiveness of flu shots, sometimes questioned by laymen, is defended by Dr. Michael J. McNamara, assistant professor of community medicine, who terms the shots "highly effective" in prevention of influenza outbreaks.

Commenting on the belief held by some persons that flu shots have been responsible for triggering or causing upper respiratory problems, Dr. McNamara says there is no medical evidence to support this claim. He points out that controlled experiments performed by the Army show that groups taking the shots had fewer cases of flu than those groups which did not receive them.

Dr. McNamara also called attention to a Public Health Service report which indicates there probably will not be a widespread incidence of the virus this winter, but urges that persons over age 45, pregnant women and those in "high risk" groups be immunized. The high risk group includes persons who suffer from chronic debilitating disease such as chronic cardiovascular, pulmonary, renal or metabolic disorders.

Since the vaccine viruses are produced in eggs, those persons who are allergic to eggs or egg products should not be immunized.

18. GERMAN CHEMIST RETURNS TO CAMPUS

A German chemist who formerly was a member of the University faculty has returned to the campus--this time in the role of a visiting senior scientist sponsored by the National Science Foundation. Dr. Kurt W. Starke, director of the Department of Nuclear Chemistry at the University of Marburg, said he didn't have to consider it very long when he learned of the opportunity to spend two semesters teaching and conducting research in the UK chemistry department. Dr. Starke is back with old acquaintances in the department, in which he taught from 1956 to 1959.

Until the end of the academic year, he will teach classes normally taught by Dr. William D. Ehmann, who currently is doing research in Australia. Dr. Starke also will continue certain phases of his research in radiochemistry and inorganic chemistry.

19. COMPUTING CENTER AIDS METALLURGICAL RESEARCH

The University Computing Center has conquered a long-standing problem in metallurgical research. Dr. Richard S. Mateer, chairman of the Department of Mining and Metallurgical Engineering, reported at a recent American Society of Metals meeting in Philadelphia that one of the UK computers commits to memory the melting temperatures and solidification ranges for alloys and then predicts the values for alloys not actually tested. Until now, Dr. Mateer explained, this was done only by graphical methods which were adequate for simple alloys but not for complex alloys of technological interest.

20. SWINE RESEARCHER STUDIES VITAMIN A LEVELS

Vitamin A levels in gestating and lactating sows have a bearing on young pigs' susceptibility to disease outbreaks. That's a recent finding of Dr. Charles Chaney, swine researcher in the Agricultural Experiment Station.

If Vitamin A levels are significantly lower than 1,333 International units of that vitamin for each pound of feed, young pigs seem more susceptible to diseases, he reports. However, the number of pigs farrowed and the birth weights of these pigs do not appear affected by the lower vitamin levels.

Two successive litters of pigs were used in the test. Dr. Chaney checked Vitamin A effect on number of pigs farrowed, birth weights, level of Vitamin A in blood plasma, liver and milk, and the vitamin's effect on cerebral fluid pressure. He reports that the Vitamin A content in liver, sow's milk and plasma increased as Vitamin A levels in feed were raised, but spinal fluid pressures were not affected.

21. THREE LAW STUDENTS WIN CONTEST AWARDS

Three students in the College of Law recently were declared winners in competitive events sponsored by off-campus organizations.

Tommy W. Chandler of Webster County captured the \$250 first prize in the Nathan Burkan Memorial Competition sponsored annually by the American Society of Composers, Authors and Publishers. James L. Hummeldorf and Joe Burch, both from Kenton County, competed as a team in the 1964 Abstract-of-Title competition sponsored by the Louisville Title Insurance Company. Each won a plaque and a \$50 cash award.

22. NURSING COLLEGE RECEIVES \$16,280 GRANT

The continuing education program in the College of Nursing has received an additional grant of \$16,280 from the Division of Nursing of the U.S. Public Health Service. Miss Greta I. Fraser, director of the program, reports that total funds received to date total \$72,117. Conferences financed by these grants prepare nurses for teaching, supervision, administration and clinical nursing specialties.

The new grant will permit the training of 40 head nurses and supervisors in "Management for Nursing Care." The project consists of four five-day conferences to be held at intervals of approximately three months. The first was held October 26-30. After each conference, the nurses return to their jobs to test the new ideas. The problems they encounter are discussed at the next conference.

Two other conference series supported by Public Health Service funds currently are in progress at the College of Nursing. One, called "Nursing Administration," is offered for directors and assistant directors of nursing service. The other, "Improvement of Teaching for Maternal and Child Nursing," is designed to improve nursing care of mothers and children in Kentucky.

23. LIBRARY FILMING BARKLEY SCRAPBOOKS

Thirteen scrapbooks compiled by the late Mrs. Alben W. Barkley have been loaned by members of her family to the University Library for filming. The films will be added to the Jane Rucker Barkley papers in the library's extensive Barkley Collection.

Dr. Bennett H. Wall, associate professor of history, who represented the University at Mrs. Barkley's funeral in September, brought the scrapbooks from Washington to Lexington in late October. With the addition of the filmed scrapbooks, the Barkley Collection, already a rich source for American political scholars, will be even more valuable as a research aid.

Among the many letters in the scrapbooks are 26 written by former President Harry S. Truman and Mrs. Truman. Among the other correspondents were Generals George Marshall and James Van Fleet, Mrs. John F. Kennedy, former President Dwight Eisenhower and Mrs. Eisenhower, former House Speaker Sam Rayburn, Adlai Stevenson, actresses Mary Martin and Jeannette MacDonald, numerous senators, congressmen and other government figures. Nine of the scrapbooks contain photographs and clippings recording Mrs. Barkley's life after her 1949 marriage to the then Vice President.

The loan was made possible by Mrs. Barkley's two daughters, Mrs. M.M. Perry, Washington, D.C., and Mrs. Weldon Bahkend, Omaha, Neb., and Mrs. Barkley's sister, Mrs. Gaylord B. Lyon, Alexandria, Va.

24. PLANT PATHOLOGY PROJECT WINS NEW SUPPORT

The National Science Foundation has allocated \$13,500 to a Department of Plant Pathology research project that has brought notable results since its beginning in 1962. The work, directed by Dr. Raymond E. Hampton, involves clarifying changes in chemical constituents and enzymes systems brought about by disease in plants.

The N.S.F. grant, to become effective next March, will permit continuation of the project for two more years. Much of Dr. Hampton's research currently is being financed by the National Institutes of Health. The funds are administered by the Kentucky Research Foundation.

Dr. Hampton is finding that increases in certain kinds of compounds and enzymes activity occur regardless of the factor that causes disease. Writing in a recent issue of the journal, "Phytopathology," he reported on discoveries in tobacco infected with mosaic virus. He and his student assistants, Mrs. Roesmilah Suseno and David M. Brumagen, found two compounds that have not been detected in healthy tobacco tissue. Dr. Hampton describes them as different from any that previously have been reported.

25. NATIONAL AUDIENCES HEAR OF UK AGENCY

The story of the University's Poison Central was related last month to audiences in two of the world's largest cities.

Dr Mark M. Luckens, professor of toxicology in the College of Pharmacy, appeared before delegates to the annual meeting of the National Association of Poison Control Centers, in New York City, to discuss concepts of the poison control program as it is carried on at the University. He also addressed the National Safety Congress, which met a few days later in Chicago. Both groups were told that, because of the laboratory facilities available to it, the UK center is probably the only one of its kind in the nation.

The work of the center is carried on through the Institute of Environmental Toxicology and Occupational Hygiene.

26. LEXINGTON CENTENNIAL GROUP ELECTS BISHOP

W. T. Bishop, president of the Lexington Chamber of Commerce, has been elected chairman of the 66-member Greater Lexington Committee for the University Centennial observance. The group is comprised of representatives from local civic and governmental organizations. It will plan the city's participation in the University Centennial celebration. The group's executive committee includes Mayor Fred Fugazzi and County Judge Bart N. Peak as vice-chairmen, and Ray Gillespie, secretary.

27. ENGINEERING COLLEGE SPONSORS GERMAN SCIENTIST

The University for the past month has served as headquarters for a West German scientist who made a speaking tour of the United States under auspices of the national Engineers Joint Council.

The Department of Civil Engineering was official sponsor for Dr. Wolfgang Schwaderer, chief of the physical research division of the Otto Graf Institute at Stuttgart. Dr. Schwaderer's itinerary, which ranged from New York to California, was made by Prof. David K. Blythe, chairman of civil engineering. The German engineer-physicist returned to his homeland this week.

28. WESTERNERS SEE WORK OF UNIVERSITY ARTIST

Relief constructions by Raymond Barnhart, professor of art, now are on exhibition at the University of New Mexico. The one-man exhibition will be shown at the University of Colorado and at Stanford University after it closes in Albuquerque.

29. TERMINAL PROGRAMS GAIN AT COMMUNITY COLLEGES

Dr. Ellis F. Hartford, dean of community colleges, reports that each of the colleges now is offering two or more two-year career programs leading to the associate in arts degree.

The nursing program, whose graduates are qualified to take the state registered nurse examination, now is in its second year at Henderson, its first year at Covington, and will be offered for the first time at Elizabethtown next fall.

The forestry program is established at Cumberland. Students take one year of academic work there, then spend another year at the University's Eastern Kentucky Resources Development Project at Quicksand to learn the practical side of forestry. Dean Hartford says there is a possibility that the forestry course may be started at another community college.

All of the colleges have a two-year professional secretary program and a one-year stenographic course. About 50 new full-time students enrolled at Cumberland this year are students in the Harlan Hospital School of Nursing. They are required to complete one year of academic work. In addition, a laboratory technician course is scheduled to start soon at Cumberland. A two-year agricultural technician program will open next year at the Henderson and Hopkinsville colleges. Two types of engineering aide courses, chemical

and metallurgical, will be initiated at Ashland.

Services to local citizens also are an important function of the colleges. These include non-credit courses for adults, seminars, discussion sessions, concerts and art exhibits. For example, a folk art festival was held recently at Cumberland. The Ashland college last year presented an exhibition featuring the work of Appalachian painters, and the annual rose show at Covington last month attracted 3,000 persons in one afternoon.

30. GEOLOGICAL SURVEY PUBLISHES NEW MAPS

Six geologic maps prepared under the cooperative mapping program of the Kentucky Geological Survey, which is headquartered at the University, and the United States Geological Survey have just been published. The new maps are of the Cuba quadrangle, depicting part of Graves County; the Manchester quadrangle, part of Clay County; the Portersburg quadrangle, parts of Clay and Laurel counties; the Hazard North quadrangle, part of Perry County; the Hazard South quadrangle, parts of Perry and Leslie counties, and the Slaughters quadrangle, parts of Hopkins and Webster counties.

The maps include geologic diagrams, explanations, structural data, and surveys of potential mineral wealth. All are being distributed through the campus office of the Kentucky Geological Survey.

Members of the Kentucky Geological Survey staff also cooperated in the investigative work which led to another new publication, "Geochemistry of Natural Waters of the Blue Grass Region." This, too, now is being distributed by the K.G.S. office.

31. LAW JOURNAL FEATURES NEW SECTION

The Kentucky Law Journal, published quarterly by the College of Law, features a new department in its fall issue. The new section, called Court of Appeals Review, will be published once a year. The Journal's faculty editor, Prof. John R. Batt, says the review has two purposes: (1) To provide the practitioner with a superior research service, and (2) to place at the disposal of national legal scholars the end-statements and analysis of the Kentucky Court of Appeals.

In its current issue, the Journal presents a review of each of the 125 cases that were before the court during its 1962-63 term. They appear under such sub-headings as Constitutional Law, Criminal Law, Administrative Law, and Public Officials.

32. INSURANCE COURSE OFFERED AT COVINGTON

A 10-week, non-credit course, "Principles of Life Insurance," now is in progress at the Covington Community College. The course designed primarily for accountants, attorneys, trust officers and underwriters, is being taught by J. William Savely, operator of a South Fort Mitchell insurance agency. The course covers such topics as "Social Aspects of Insurance," "How Life Insurance Operates," "Programming an Estate," and "Taxation and Business Situations."

33. AGRICULTURAL ENGINEER WINS DESIGN AWARD

Grady E. Pearman, a U.S. Department of Agriculture engineer assigned to the University's Department of Agricultural Engineering, has won first place in the 1964 Lincoln Arc Welding Foundation contest for welding design.

Mr. Pearman received the \$1,750 award for his design of a welded steel farrowing stall for use in swine production enterprises. The device is collapsible for shipment and, after assembly, can be pivoted into position within the farrowing barn to provide for easy cleaning with power equipment. The stall makes for better labor efficiency as well as improved sanitation.

34. UNIVERSITY TO HOST OVER 200 GEOGRAPHERS

The University has been designated as the host school for the 20th annual meeting of the Southeastern Division of the Association of American Geographers, to be held next Monday and Tuesday at the Campbell House. Dr. Joseph R. Schwendeman, chairman of the Department of Geography and former president of the national organization, reports that over 200 geographers from throughout the United States will attend the two-day meeting. Several UK faculty members will appear on the program, the coordinator of which is Dr. William A. Withington, associate professor of geography.

35. UK SENIOR VOTED STATE'S TOP STUDENT NURSE

Miss Sue Thomas, a senior in the College of Nursing, has been selected as the outstanding student nurse of 1964 by the Student Nurse Association of Kentucky. Miss Thomas, daughter of Mr. and Mrs. Joe Thomas of Dry Ridge, competed against candidates from the state's 14 other schools of nursing. The honor was awarded on the basis of an essay on nursing, a personal interview, and an outstanding student record.

Miss Thomas, who served last summer as a missionary in the Republic of Ghana, West Africa, is active in the UK Baptist Student Union and served as steering committee chairman for the BSU state convention that was held in Lexington last month for about 1,500 college students.

36. PHYSICIANS RECEIVE GRANTS FOR TOBACCO RESEARCH

Two grants, totaling \$92,450 have been awarded to Medical Center physicians for tobacco and health reserach. The awards were received by Dr. Jerome E. Cohn - \$70,790 to study the effect smoking has on the lungs, and Dr. E. Douglas Rees, whose \$21,660 grant will be used to investigate the effect of cigarette particles on chromosomes. The grants were made by the American Medical Association's Education and Research Foundation in Chicago.

Dr. Cohn, in describing his project, said, "The main thing is that we will study the ways in which the lungs work. We expect to learn a lot about the lung and how it performs." He emphasized that the study will not start with any preconceived notion about the effects of smoking on the lung but will rely on whatever evidence is gathered during the project.

In his application for the grant, Dr. Cohn listed several ways in which cigarette smoking affects lung performance. Two particularly significant ways were that cigarette smokers have lower pulmonary diffusing capacities than non-smokers of the same age and size, and that inhalation of cigarette smoke, in experiments, causes alteration of pulmonary mechanical properties, leading to a rise of airway resistance and a fall in lung compliance.

The project, according to the application, will analyze the direct effect of tobacco smoking on distribution of blood and gas in the lungs of normal young human subjects and subjects with acute and chronic obstructive airway disease. In addition, attempts will be made to evaluate deposition and clearance of radioactive labelled particles from the lung in smokers and non-smokers. The project will utilize the University Computing Center and the Physics Department's 5.5-million volt Van de Graaff accelerator.

Dr. Rees says the main goals of his project, expected to get under way in February, are (1) to see what chromosome changes are associated with the administration of chemicals that cause cancer, and (2) to see if it is possible to use radioisotopes to demonstrate the presence of carcinogens on the chromosomes of the cells. He notes that Dr. James Fleisher, assistant professor of pharmacology, already has been using the radioisotope tritium in labeling these carcinogenic compounds. In his application, Dr. Rees pointed out that in spite of considerable success in inducing cancers in many organs by oral administration of polycyclic hydrocarbons, it has not been possible to induce lung cancers.

37. SIGNIFICANT ACTIVITIES OF FACULTY AND STAFF

D. V. Terrell, dean emeritus of the College of Engineering, has been awarded the Triangle Citation of meritorious service by the National Council of Triangle Fraternity.

Dr. Jesse G. Harris, Jr., chairman of the Department of Psychology, recently was elected a Fellow of the American Psychological Association.

Dr. Neil W. Bradley, associate professor of animal science, has been appointed to the research committee of the American National Cattlemen's Association.

Dr. W. B. Stewart, chairman of the Department of Pathology, has been named chairman of the Board of Registry of Medical Technologists of the American Society of Clinical Pathologists.

Dr. Lucile L. Lurry, professor of education, is the author of an article, "Educating Teachers for Change," which appeared in the October issue of The High School Journal.

Dr. Robert W. Rudd, acting dean of the College of Commerce, has been appointed to the advisory board of Indiana University's Aerospace Research Applications Center.

Miss Chloe Gifford, director of special activities, has been named by Governor Breathitt to the chairmanship of a committee which will study the legal status of women in Kentucky.

Dr. Richard Kay, assistant professor of history, has been elected secretary of the Midwest Medieval Conference.

Dr. Tom F. Wayne, assistant vice president for the Medical Center, recently was elected to a one-year term as vice president of the American College of Preventive Medicine.

Three members of the University's Cooperative Extension Service staff received Distinguished Service Awards this week at the annual meeting in Washington of the National Home Demonstration Agents Association. They are Mrs. Anna C. Thompson, Extension home demonstration agent in Fulton County; Mrs. Jacqueline S. Rogers, Hardin County home agent, and Mrs. Ida Jo Burg, associate home agent in Daviess County.

Dr. Lyman V. Ginger, dean of the College of Education, has been named chairman of the second annual Institute in Human Relations, to be held next spring under sponsorship of the Lexington chapter of the National Conference of Christians and Jews.

Dr. Charles B. Truax, associate professor of psychology, is co-author of a chapter in the book, "Progress in Clinical Psychology," published recently by Grune and Stratton. The other author is Dr. Robert R. Carkhuff, former University faculty member who is now at the University of Massachusetts.

Harry R. Allen, chemist in the Department of Feed and Fertilizer, has been elected an honorary Fellow of the Association of Official Agricultural Chemists. His election was in recognition of meritorious service to the Association. Bruce Poundstone, chairman of the Department of Feed and Fertilizer, has been elected to the Association's executive committee.

Miss Vivian Burke, instructor in the College of Education, recently was named winner of the Outstanding Service Award of the Kentucky Association on Children Under Six.

Dr. Daniel Leigh Weiss, professor of pathology, has been elected chairman of the Governmental Pathology Section of the College of American Pathologists.

Dr. S. Sidney Ulmer, chairman of the Department of Political Science, has been appointed to the program committee of the Midwest Conference of Political Scientists.

Dr. Richard I. Miller, associate professor in the College of Education has been named to a Joint Committee on Civic Education, a program sponsored by the American Heritage Foundation to upgrade civic education programs in American schools.

Dr. Lee H. Townsend, chairman of the Department of Entomology, recently was elected president of the North Central States Seed Control Officials organization.

Dr. Warren E. Wheeler, chairman of the Department of Pediatrics, has returned from Paris, France, where he represented the American Pediatrics Society at a meeting to establish an international Journal of Pediatric Research.

Dr. Charles C. Manker, Jr., associate professor of education, has been named to the executive board of the Ohio Valley Philosophy of Education Society.

Dr. Maurice A. Clay, associate professor of physical education, has been appointed to the screening committee for the Conference Board of Associated Research Councils for Senior Leaderships in Physical Education.

Dr. John C. Redman, professor of agricultural economics, has been re-elected to the board of trustees of the Kentucky Credit League.

Dr. James R. Ogletree, associate professor of education, is one of 11 persons from throughout the United States invited to serve as abstractors for a new magazine in educational administration.

Dr. Albert Balows, assistant professor of medicine, recently was elected president of the Kentucky-Tennessee Branch of the American Society for Microbiology. He reports that the 1965 meeting of the Society's Southeastern Branch will be held on campus next October as part of the University's Centennial celebration.

Miss Olive Barrett of the College of Education has been elected vice president of the Kentucky Association of College, Secondary and Elementary Schools.

Dr. Denver Sloan, director of correspondence study in University Extension, has been named chairman of the Rearing Youth of Good Will program of the Lexington chapter of the National Conference of Christians and Jews.
